Sunday Feb 7, 12pm-3pm (Clean-up and Winner Notification)
Monday Feb 8, 8am-12 noon (Table Removal)

Estimated Number in Attendance: 1000+

Event Description: The Broward County Regional Science and Engineering Fair (BCRSEF) is an annual, pre-collegiate science competition that provides a forum to showcase over 800 outstanding student projects from public, charter, and private schools across Broward County. The fair affords an opportunity for students to display their creativity and innovation in a STEM discipline, communicate with others about a scientific topic of personal interest, collaborate with others to understand the scientific and technological changes in society, and think critically/problem-solve for viable solutions to problems in their community, school, or national environment while competing for cash awards and prizes. Students present and defend their projects to experts in the field and are judged on the merit of their scientific research. The top 24 students at the middle and high school levels (48 total) are selected to compete in the State Science and Engineering Fair with the top 5 from the high school group receiving an invitation to compete at the International Science and Engineering Fair. The BCRSEF is free and open to the public.
