BCPS Digital Classrooms Plan 2015-2016

REQUESTED ACTION:

Approve the Broward County Public Schools Digital Classrooms Plan for submission to the Florida Department of Education to receive annual allocation to the School District.

SUMMARY EXPLANATION AND BACKGROUND:

The Digital Classroom Plan was originally presented to the Board on January 12, 2016. All of the feedback from the Board has been ncorporated into the updated Digital Classroom Plan that is being presented on March 1. To access the State FEFP Digital Classrooms Plan Allocation, school districts are required to submit to the FLDOE a school board approved Digital Classrooms Plan (DCP) as per s.1011.62(12), F.S. The funds are included in the 2016 Adopted Budget and are allocated in the Information and Technology Department budget. The DCP submitted for approval is aligned to the technology component of the General Obligation Bond, the District Strategic Plan, and the District Technology Strategic Plan. It provides the FLDOE a comprehensive overview of Broward's technology and learning goals and supports plans currently underway to meet these goals. It was developed with input from Academics, Information and Technology, Talent Development, Research representatives and OSPA Cadre Directors' input.

SCHOOL BOARD GOALS:

Goal 1: High Quality Instruction	Goal 2: Continuous Improvement	Goal 3: Effective Communication
----------------------------------	---------------------------------------	--

FINANCIAL IMPACT:

There is no additional financial impact to the district. The \$4,316,148 will be allocated to the Information and Technology Department budget, with \$3,732,903 going to Broward County Public Schools and \$583,245 going to Charter schools.

General

introduction/background/district technology

policies:

Vision: Broward's vision statement is, "Educating today's students to succeed in tomorrow's world". This statement vividly describes our ideal environment and outcomes – a picture of the future we want to create. It inspires, energizes, and provides a long-term view that concentrates on the future.

Mission Statement: Broward County Public Schools (BCPS) is committed to educating all students to reach their highest potential. Broward's mission statement defines our purpose – why we exit and what we do to achieve our vision. It provides direction and focus, and helps guide all goals and decisions. It reminds us why we do the work we do.

Over the last three years Broward County Public Schools took major steps to create a vision for Digital Education and to define key vital and critically important steps to improve student performance outcomes through the integration of digital tools, resources, and instructional strategies. The following is a summary of the steps taken and links to key documentation that further describes both the strategic direction and implementation priorities.

The District Strategic Plan (2012-2015): Goal One of the strategic plan, High Quality Instruction, specifically states that, "As we move toward new standards, today's student must demonstrate independence; build strong content knowledge; respond to varying demands of audience, task, purpose, and discipline; comprehend as well as critique; value evidence; use technology and digital media strategically and capably and understand other perspectives and cultures" (p. 10). A key tactic to achieving this goal is to integrate 21st century skill development into every student's learning path. In addition, Goal 2 (Continuous Improvement) and Goal 3 (Communication) rely on the effective use of technology for both the collection and analysis of student achievement data and the continuous and timely communication to all key stakeholders in the Broward education community. Web link to the plan: http://www.browardschools.com/About-Us/Strategic-Plan/home.

Broward County Public Schools Technology Strategic Plan (January 2014): Through extensive stakeholder involvement, the district developed and the Board approved a multi-year technology plan that provides a road map for the deployment of technology over the next three to five years. The plan describes the key technology objectives that support the District's strategic goals, assesses where the District is today, and prioritizes strategic initiatives and technology investments. This plan was developed over a three-month period and was based on extensive interviews with internal and external school district stakeholder, two district-wide surveys to teachers and students, and internal user survey and workshops with the Technology Advisory Council and the Information and Technology Strategic Planning Advisory staff. Because of the extensive stakeholder input obtained to develop the technology strategic plan, the Digital Classrooms Plan used this data and input to focus on the improvement of student performance outcomes including our ESE and ELL students.<u>http://www.broward.k12.fl.us/erp/itsupport/docs/Strategic Plan/l&T%20Strat egic%20Plan_Updated%2004302014.pdf</u>.

The above combined policies, plans, and funding sources; along with the funds made available through the FLDOE Digital Classrooms Plan will enable Broward to implement a comprehensive, long reaching plan of action aligned with student achievement and college and career readiness goals.

District Profile: Broward County Public School (BCPS) is the sixth largest public school system in the United States and the second largest in the state of Florida. BCPS is Florida's first fully accredited school system since 1962. BCPS has over 265,000 students and approximately 175,000 adult students in 238 schools, centers and technical colleges, and 105 charter schools. BCPS serves a diverse student population. Students are from 198 different countries and speak 204 different languages. To stay current about BCPS, follow us on Twitter (@Browardschools) like us on Facebook and download the free Broward County Public Schools mobile app.

I.2 <u>Planning Process</u> -

Broward County Public Schools underwent an extensive planning process centered on the effective integration of technology district-wide in support of the strategic goals of high quality instruction, continuous improvement, and communication in January 2014. The data and recommendations from that process are essential parts of the Digital Classrooms Plan.

On November 4, 2014, Broward County voters approved a General Obligation Bond (GOB Bond) referendum that provides critically needed funding for Broward's students. Broward County Public Schools has committed to investing the funding to enhance students' learning environments by focusing on improvements in Safety, Music, Art, Athletics, Renovations and Technology (SMART). The GOB Bond addresses the following critical areas:

- School improvements to support student health, safety and security;
- Technology and technology infrastructure to support student learning, digital environments, and 21st century classroom instruction;
- Facility repair, renovation and replacement to ensure quality schools in the community.

With the development of the technology component of the GOB Bond, Broward completed an extensive needs assessment, which included an analysis of facilities, infrastructure, and computing device needs of every school. This data, along with the Technology Readiness Inventory (TRI) data collected in conjunction with the FLDOE, enabled Broward to determine very specific school needs related to the integration of technology into daily classroom practice.

This initiative refreshes classroom technology, notably supporting the deployment of laptops for students and teachers in most need via a series of groups. Classroom technology is expected to be used by teachers to personalize the learning experience of BCPS students, therefore professional development options and resources will accompany the deployments. *The 21st Century Learner Qualification: Level 1* has been designed to provide a baseline of technology integration across Broward County Public Schools. Upon completion of Level 1, teachers will be awarded the *21st Century Learner Qualification*.

Broward County Public Schools' teachers and principals create the conditions for learning in schools by providing students with an environment that values growth, embraces failure as a growth experience, and provides the structure for a series of pathways for achieving success and demonstrating learning. Technology can be used to enhance learning by providing access to vast resources and collaboration opportunities, as well as a means of demonstrating student learning in a variety of ways. Technology is also the component that makes the widespread personalization of learning feasible and manageable.

One major aspect of this year's planning process was the creation of a Learning Management System Task Force divided into four sub-committees: Curriculum and Instruction; Data Analysis and Reporting; Data and System Integration; and Professional Learning, Documentation, and Support. The purpose of the Learning Management System Task Force was to begin the process of locating a learning management system for use district-wide by teachers, students, parents, and administrators. Input was provided from a cross-functional group including stakeholders from Academics, Information and Technology, Talent Development, Research Department, and schools. This group will select classroom based solutions that meet the district's personalized learning model in which a learning management system contains the digital curriculum. Teachers will customize teaching and learning through the use of vetted digital resources housed in the learning management system and the learning object repository; containing instructional applications, instructional frameworks, unit and lesson plans, activities, and assessments items aligned to the Florida Standards.

Towards this purpose, the Office of Academics commissioned a study of BCPS teachers in the spring of 2015. Broward County Public Schools partnered with a technology consulting firm, Gartner, to determine the needs of teachers when using technology for instruction. Gartner consultants conducted observations of classrooms and teachers to assist in this needs assessment and then followed up with brief interviews with teachers after school. Based on the study, a digital framework was developed to highlight distinct activities that teachers and students engage in throughout the day as part of the learning process. This framework was drafted, with the goal of attaining vendor feedback through an RFI process. The district wanted to understand the landscape of tools available to support the following teaching and learning activities:

Common Processes and Activities of BCPS Teaching and Learning

Broward continues its standing Digital Projects Team and a Digital Projects Steering Committee with representation from key stakeholders including the Office of Academics, the Office of School Performance and Accountability, the Information and Technology Department, Talent Development, and key vendor partners. These committees provide input into the digital curriculum, digital classroom tools, professional learning, and curriculum and technical support initiatives. While the Digital Projects Steering Committee meets quarterly, the Digital Projects Team meets weekly to plan and implement the extensive digital learning projects currently underway and projected in Broward that are essential to the success of the District Strategic Plan, the District Technology Strategic Plan, and the vision for digital learning in Broward County Public Schools. The Digital Projects Team is led by the Office of Academics and includes representatives from the mathematics, science, literacy, ESOL and ESE departments, which provide direction in the instructional use of digital resources to support student achievement targets. Technology partners are also part of the Digital Projects Team. In addition to the Digital Project Team providing input into the Digital Classrooms Plan, the Broward Technology Advisory Committee discusses the Digital Classrooms Plan at each of its monthly meetings thereby obtaining external stakeholder input into the plan.

I.3 <u>Technology Integration Matrix (TIM)</u> – Summarize the process used to train, implement and measure classrooms using the TIM.

Measure Classrooms Using the TIM:

The Technology Integration Matrix (TIM) is used by BCPS as a comprehensive framework for evaluating technology integration in our schools. Its resources are used as a model of best practices, present a context for planning, and assist with choosing educator professional development. The matrix gives the District a foundation for organizing technology-related professional development and a common vocabulary regarding technology integration.

On an annual basis, schools reported through the Florida Innovates Technology Resources Survey the status of their teacher's progress towards the integration of technology into classroom instruction based on the TIM and identify the percentages of teachers who are at the following levels of integration:

- Entry: The teacher begins to use technology tools to deliver curriculum content to students.
- Adoption: The teacher directs students in the conventional and procedural use of technology tools.
- Adaptation: The teacher facilitates students in exploring and independently using technology tools.
- Infusion: The teacher provides the learning context and the students choose the technology tools to achieve the outcome.
- Transformation: The teacher encourages the innovative use of technology tools. Technology tools are used to facilitate higher order learning activities that may not have been possible without the use of technology.

The Technology Integration Matrix (TIM) was utilized in determining how teachers in our BCPS classrooms use technology to enhance learning for K-12 students as part of our needs assessment process in relation to the procurement of a learning management system. Our technology partner, Gartner, conducted a *Teacher Experience Study* during the 2014-2015 school year. The study had some guiding research questions and hypotheses as listed below:

Ouestion(s)	Hypotheses
What is the current user experience of BCPS teachers with regard to district technology/solutions? Where are teachers encountering the most pain? Where are teachers experiencing productivity and effectiveness?	Overall BCPS user experience is frustrating due to multitude/variety of applications and logins; however, many individual applications serve their purpose adequately.
Where can efficiencies be gained by more or less technology solutions?	A unified platform could simplify access to the wide variety of existing tools, and its implementation would streamline the user experience (and data) of instructional staff.

How do we characterize those typical tasks (journeys or scenarios) where technology may facilitate instruction and student-centered learning? How can we best communicate how teachers will fulfill these individual capabilities and responsibilities in the future?	Teachers wear many hats, some of which could be/are facilitated by digital solutions addressing specific needs.
How do teachers prefer to be equipped and prepared for changes brought on by digitalization and 21 st century learning?	BCPS Teachers are at various stages of digital "readiness", though most understand its benefits – however, there is likely a device/asset shortage across the district to support digital learning environments. Teachers will also need ongoing professional learning, resources, and support.

Through the TIM's s five interdependent characteristics of meaningful learning environments: active, constructive, goal directed, authentic, and collaborative; along with the associated five levels of technology integration: entry, adoption, adaptation, infusion, and transformation; Gartner was able to create scenarios describing the varied technology integration levels of our teachers. See p. 51 for additional information.

Train Using the TIM:

Teachers and principals will receive new computer/laptop devices as a result of the GOB IT deployment. District professional development to train staff on effective instructional and operational use of the devices will be delivered in four levels: the **21st Century Learner Qualification:** Level 1 will provide a baseline of technology integration across Broward Schools. Upon completion of Level 1, teachers and administrators will be awarded the 21st Century Learner Qualification. Subsequent levels of training will be offered to move teachers and administrators into more substantial and varied usage of technology in their classrooms and schools: the **21st Century Educator Qualification:** Level 2, the **21st Century Collaborator:** Level 3, and the **21st Century Innovator:** Level 4. The District's Level 1 through Level 4 training aligns with the five levels of teacher technology usage of the TIM: Entry and Adoption (Level 1), Adaptation (Level 2), Infusion (Level 3), and Transformation (Level 4). Implement Using the TIM:

The TIM is currently used in our Digital Classrooms trainings to model for teachers how to best use technology tools in meaningful ways during daily instruction and for principals in how to best evaluate this type of instruction and recommend professional development. The District's Digital 5 and Digital Infusion Programs support the expansion of technology in classrooms. Students and their teachers receive digital devices, access to a learning management system, professional learning and curriculum resources to maximize student learning and engagement and create personalized learning environments in these Broward classrooms.

The first of these strategies, Digital 5, began with 27 elementary schools in 2013-2014. This program has now expanded to 84 elementary schools. Broward's middle schools are "infusing"

digital tools, resources and instructional strategies within the content areas of mathematics and English/Language Arts. Sixth grade English/Language Arts and mathematics classes have access to: a student laptop cart with 22 laptops for daily instructional use by students the following as part of daily instruction, teacher laptop to deliver curriculum, and a new digital curriculum aligned to Florida Standards in mathematics and English/Language Arts. In addition, every Intensive Reading class was given a laptop cart for daily instruction in 2013-2014. Broward's ninth grade students in English/Language Arts classes have access to a student laptop cart with 25 laptops for daily instructional use by students, a teacher laptop to deliver curriculum, and a new digital curriculum aligned to Florida Standards in English/Language Arts. Student laptops and teacher devices were distributed to D5 ESE special programs and 6th and 9th grade ESE programs. Devices were also distributed to D5 ESE ACCESS programs. Fourteen Broward middle and high schools participate in a new digitally-based curriculum program for students who are native speakers of languages other than English to develop and strengthen listening, speaking reading and writing skills and develop independent reading endurance while acquiring the English language (ELL students). Called Digital DLA, the goal of the project is to enable ELLs to control their pace, place and path of instruction by using digital devices and digital curriculum content for communication, collaboration, research, knowledge acquisition, and presentation of learning through assessments. The vision is to move ELLs towards a personalized learning environment in the Developmental Language Arts through a secondary ESOL - Reading course. Digital DLA incorporates digital tools, learning strategies and web-based applications in the creation of this personalized learning space.

During the 2015-2016 school year Broward County Public Schools will take advantage of the arrangement made between the Florida Center for Instructional Technology (FCIT) and the State of Florida Department of Education offering school districts an optional year-long subscription to the TIM Tools. The TIM Tools will assist our school district in its planning, implementing, and evaluating our school technology initiatives. Broward County Public Schools will also participate in the online TIM training courses providing instruction for administrators, teachers, and staff on how to effectively use the TIM.

I.4 <u>Multi-Tiered System of Supports (MTSS)</u> -

Describe the problem – solving process based on available district-specific data which were used for the goals and needs analysis established in the plan:

Broward has implemented an evidence-based model of instruction that uses data-based problem solving to integrate academic and behavioral instruction and intervention called the BEST Blueprint. BEST (Beyond Expected Student Targets) is a collaborative program that connects the work of the Office of Academics, the Office of School Performance and Accountability and the Office of Talent Development and led by the Superintendent and Senior Cabinet Leaders to create the following best practices:

- A focused and authentic professional learning community (PLC) process that focuses on student data to improve instructional practice
- An embedded high quality RtI process that establishes and ensures that early and appropriate interventions and progress monitoring are taking place

- Optimal internal/external relationships to engage municipalities, business partners and non-profit organizations in educating students
- Scaling up BEST practices in all schools

This comprehensive program is a unified effort to align student achievement expectations, provide real time data collection through common formative and summative assessments, examine on a monthly basis evidence of instruction and use of professional learning communities for teacher collaboration around student data, and provide differentiated support to principals and teachers aligned to individual school student needs. The BEST Blueprint provides essential data on a regular and ongoing basis needed to support the effective implementation and direction of the Digital Classrooms Plan and the continuous improvement of Broward's digital initiatives.

Explain the existing system used to monitor progress of the implementation plan:

The fidelity of Tier 1 is assessed through the use of walkthroughs by principals and peers and/or direct observation of the critical elements of the instructional process. Broward uses the Marzano Causal Teacher Model in its observation of teachers and support staff. The sufficiency of instruction for Tier 1 is monitored based on the degree in which teachers implement core instruction consistent with the time expectations for instruction in specific content areas each day. Fidelity in Tiers 2 and 3 is monitored through regular meetings to determine student response to the intervention, barriers to the delivery of the intervention, and technical assistance to deliver the interventions as intended. Professional development opportunities are varied and designed to directly support staff on how to assess fidelity at each tier and utilize identified strategies for ensuring fidelity of implementing evidence-based instruction through Professional Learning Communities at the school and district levels.

Behavioral & Academic Support Information System (BASIS) is the comprehensive District electronic tool providing ALL the data needed to drive decision-making and instruction in schools. BASIS enhances our continuing efforts to standardize student achievement and Response to Intervention (RtI) district-wide, and follows the Florida Continuous Improvement Model. Student assessment, academic, behavior, and demographic information are centrally located. Data is continually updated and current; enabling school administrators, teachers and staff the opportunity to gain a full grasp of their school and their students. By tracking and monitoring school-wide and individual student performance data, BASIS ensures fully informed decision-making and promotes high quality instruction to help all students succeed. Along with serving as an administrative tool for viewing school wide data needed for decision making, the system was designed to assist with:

- The early identification and assessment of at-risk students
- Streamlining of the Student Support referral process to ensure delivery of effective interventions across settings

Teachers and administrators upon entering into BASIS are able to:

- View interventions / activities provided to individual students by common teachers
- Enter interventions/ activities teachers/administrators provide to individual students
- Refer students for student support services (make a school social worker referral)

How the district intends to support the implementation and capacity described in the plan:

The District provides professional development and support (technical assistance and coaching), data support (data sources and technology), leadership support (policies, expectations, and evaluation) and program evaluation (ongoing data collection) to ensure integrity of implementation and support. For the 2015-2016 school year the Office of Academics Student Support Initiatives is implementing Zone Platform for Assistance & Collaboration (**Z-PAC**). School leaders, MTSS/RTI/CPS teams, instructional and support staff together will respond to the needs of all students through personalized learning and support to implement the BEST MTSS/RTI processes at all schools. Round 1 Z-PAC focus is specifically on the MTSS/RTI process described in this plan, Round 2 on Social-Emotional Learning, and Round 3 on Personalized Learning.

I.5 <u>District Policy</u> - The district should provide each of the policies listed below and include any additional digital technology relevant policy in the "other/open" category. If no district policy exists in a certain category, please use "N/A" to indicate that this policy is currently nonapplicable. (This does not preclude the district from developing and including a relevant policy in the future.)

Part II. DIGITAL CLASSROOMS PLAN –STRATEGY

STEP 1 – Needs Analysis:

Districts should evaluate current district needs based on student performance outcomes and other key measurable data elements for digital learning.

- A) Student Performance Outcomes
- B) Digital Learning and Technology Infrastructure
- C) Professional Development
- D) Digital Tools
- E) Online Assessments

Highest Student Achievement

Student Performance Outcomes:

Districts shall improve classroom teaching and learning to enable all students to be digital learners with access to digital tools and resources for the full integration of the Florida Standards.

After completing the suggested activities for determining the student performance outcomes described in the DCP guidance document, complete the table below with the targeted goals for each school grade component. Districts may add additional student performance outcomes as appropriate. Examples of additional measures are District Improvement and Assistance Plan (DIAP) goals, district Annual Measurable Objectives (AMOs) and/or other goals established in the district strategic plan.

Data are required for the metrics listed in the table. For the student performance outcomes, these data points should be pulled from the school and district school grades published at <u>http://schoolgrades.fldoe.org</u>. Districts may choose to add any additional metrics that may be appropriate below in the table for district provided outcomes.

A. Student Per	rformance Outcomes (Required)	Baseline	Target	Date for Target to be Achieved (year)
II.A.1.	FSA ELA Student Achievement	53% *	65%	2019
II.A.2.	FSA Math Student Achievement (Excludes EOCs)	55% *	65%	2019
II.A.3.	Science Student Achievement – 5 th	5 th - 50%*	5 th - 65%	2019
	and 8 th Grade	8 th - 46%*	8 th - 65%	
II.A.4.	Science Student Achievement – Biology	64%**	70%	2019
II.A.5.	ELA Learning Gains	N/A		
II.A.6.	Math Learning Gains	N/A		
II.A.7.	ELA Learning Gains of the Low 25%	N/A		
II.A.8.	Math Learning Gains of the Low 25%	N/A		
*Based on Total **Based on all f	District Data, not limited to school و irst time test takers	grades data		
<i>B.</i> Student Per	rformance Outcomes (Required)	Baseline	Target	Date for Target to be Achieved (year)

Quality Efficient Services

Technology Infrastructure:

Districts shall create a digital learning infrastructure with the appropriate levels of bandwidth, devices, hardware and software.

For the infrastructure needs analysis, the required data points can and should be pulled from the Technology Readiness Inventory (TRI). The baseline should be carried forward from the 2014 plan. Please describe below if the district target has changed. Districts may choose to add any additional metrics that may be appropriate.

B. Inf	B. Infrastructure Needs Analysis		Baseline	Actual from	Target	Date for	Gap to be	
(Re	equired)			from 2014	Spring 2015		Target to be Achieved (year)	addressed (Actual minus Target)
II.B.1.	Student to Co	mputer Devi	ce Ratio	5:1	2.45:1	2:1	2018	.45:1
II.B.2.	Count of desktop specifications	student i computers	nstructional meeting	17,200	26,202	33,402 (replacements in media centers)	2019	N/A
II.B.3.	Count of stud computers specifications	ent instruct (laptops)	ional mobile meeting	47,500	75,176	110,000	2019	27,676
II.B.4.	Count of st computers me	udent web eeting specif	-thin client ications	N/A	N/A	N/A	N/A	N/A
II.B.5.	Count of stud meeting speci	ent large sc fications	reen tablets	3,903	4,336	N/A	N/A	N/A
II.B.6.	Percent of recommended	schools l bandwidth	meeting standard	73.68%	81.71% *	100%	2019	18.29 %
II.B.7.	Percent of (802.11n or h	wireless igher)	classrooms	56 %	61 %	100 %	2019	39 %
*This number is different from what is being referenced in the 2015 District Infrastructure Survey. This percentage was obtained by using the PARCC Testing Guidelines from SEDTA.								

B. Inf (Re	rastructure Needs equired)	Analysis	Baseline from 2014	Actual from Spring 2015	Target	Date for Target to be Achieved (year)	Gap to be addressed (Actual minus Target)
II.B.8.	II.B.8. District completion and submission of security assessment *		N/A	N/A	N/A	N/A	N/A
II.B.9.	District support of brows two versions	sers in the last	N/A	Y	Y	N/A	N/A

* Districts will complete the security assessment provided by the FDOE. However under s. 119.07(1) this risk assessment is confidential and exempt from public records.

Skilled Workforce and Economic Development

Professional Development:

Instructional personnel and staff shall have access to opportunities and training to assist with the integration of technology into classroom teaching.

Professional Development should be evaluated based on the level of current technology integration by teachers into classrooms. This will measure the impact of the professional development for digital learning into the classrooms. The Technology Integration Matrix (TIM) can be found at: <u>http://fcit.usf.edu/matrix/matrix.php</u>. Average integration should be recorded as the percent of teachers at each of the five categories of the TIM for the levels of technology integration into the classroom curriculum:

- Entry
- Adoption
- Adaptation
- Infusion
- Transformation

C. Profe Anal	essional Development Needs ysis (Required)	Baseline (to be established in 2015)	Target	Date for Target to be Achieved (year)
II.C.1.	Average teacher technology integration via the TIM (based on peer and/or administrator observations and/or evaluations) *	To be determined	Entry: 5% Adoption: 10% Adaptation: 20% Infusion: 45% Transform: 20%	2019
II.C.2.	Percentage of total evaluated teacher lessons plans at each level of the TIM *	To be determined	Entry: 5% Adoption: 10% Adaptation: 20% Infusion: 45% Transform: 20%	2019

"The baseline (2015) will be determined using the electronic TIM tool. Observations will begin upon District approval of the DCP, conducted by trained district personnel. The DCP will be updated with results when observations are completed.

C.	Professional	Development	Needs	Baseline (to	Target	Date for

		Transform: 20%		
*The baseline (2015) will be determined using the electronic TIM tool. Observations will begin upon District approval of the DCP, conducted by trained personnel. The DCP will be updated with results when observations are completed.				

Seamless Articulation and Maximum Access

Digital Tools:

Districts shall continue to implement and support a digital tools system that assists district instructional personnel and staff in the management, assessment and monitoring of student learning and performance.

A key component to digital tools is the implementation and integration of a digital tool system that assists district instructional personnel and staff in the management, assessment and monitoring of student learning and performance. Districts may also add metrics for the measurement of CAPE (Career and Professional Education) digital tools. For the required metrics of the digital tool system need analysis, please use the following responses:

D. Digital (Requin	Tools Needs Analysis red)	Baseline (to be established in 2015)	Baseline (to be established in 2015)	Target	Date for Target to be Achieved
		0/ 6	0/ 6	0/ 6	(year)
	Student Access and Utilization (S)	% of student access	% of student utilization	student access	School Year
II.D.1. (S)	A system that enables access and information about standards/benchmarks and curriculum.	100% (CPALMS)	70 %	100 %	2019
II.D.2. (S)	A system that provides students the ability to access instructional materials and/or resources and lesson plans.	100% (CPALMS)	85 %	100%	2019
II.D.3. (S)	A system that supports student access to online assessments and personal results.	50 % (Online programs, BEEP)	70%	100 %	2019
II.D.4. (S)	A system that houses documents, videos, and information for students to access when they have questions about how to use the system.	25 % (Online programs, Atomic Learning)	25 %	100 %	2019
II.D.5. (S)	A system that provides secure, role-based access to its features and data.	85 % (Online programs, BEEP)	85 %	100 %	2019

Quality Efficient Services

Online Assessment Readiness:

Districts shall work to reduce the amount of time used for the administration of computer-based assessments.

Online assessment (or computer-based testing) will be measured by the computer-based testing certification tool and the number of devices available and used for each assessment window.

D. On (Re	line Assessments Needs Analysis equired)	Baseline (to be established in 2015)	Target	Date for Target to be Achieved (year)

	of scheduled time required to complete	(High		
	statewide FSA/EOC computer-based	Schools)		
	assessments			

STEP 2 – Goal Setting:

Provide goals established by the district that support the districts mission and vision. These goals may be the same as goals or guiding principles the district has already established or adopted.

These should be long-term goals that focus on the needs of the district identified in step one. The goals should be focused on improving education for all students including those with disabilities. These goals may be already established goals of the district and strategies in step three will be identified for how digital learning can help achieve these goals.

Districts should provide goals focused on improving education for all students, including those with disabilities. These goals may be previously established by the district.

Enter district goals below:

A. Broward County Public School's Three-Year Strategic Plan 2012-2015 Broward County Public Schools has identified three major and overarching goals for the district as established in the District's Three Year Strategic Plan (2012-2013). These goals guide and direct the academic and operational direction for the school district and support the district's vision and mission. The Broward goals are provided in this document along with a link to the web site: <u>http://bcps.browardschools.com/strategicplan/index.html</u>. While the overarching district goals of high quality instruction, continuous improvement and communications reflect Broward's strategic vision, the current strategic plan delineates student performance targets in math, reading and science based on FCAT student achievement results. Broward recognizes that with the state's adoption of the new FSA assessment, all school districts will need to establish new student performance baselines. Accordingly, BCPS will re-calibrate its strategic goals and objectives and update its strategic plan when FSA assessment data are available during the school year. In addition, the School District is currently developing its new Strategic Plan 2016 -2019.

Goal 1: High Quality Instruction: Improve student performance by focusing on raising academic rigor in teaching and learning among staff and students, and preparing students and staff for global competitiveness.

College and Career Readiness: Increase graduates who meet college/career readiness to 80% by 2015.

Graduation Success: Increase four-year graduation rate to 90% by 2015 *

Middle School Readiness: Increase grade 5 combined proficiency (Level 3+ in reading, math, and science) to 69% by 2015.

Early Childhood (grade 3): Increase grade 3 combined proficiency (Level 3+ in reading and math) to 84% by 2015.

High School Readiness: Increase grade 8 combined proficiency (Level 3+ in reading, math, and science) to 57% by 2015.

*The 90% graduation rate by 2015 target was established in 2012. The attached Focus on Graduation Success chart shows that the traditional high schools have nearly obtained that goal

as of 2013-14 school year with an 88.7% graduation rate. The district is continuing to strive towards a 90% overall graduation rate by 2019.

Goal 2: Continuous Improvement: Align resources and develop an organized structure that supports operational effectiveness and efficiency to implement the District's priorities focusing on improving student achievement and business processes.

Goal 3: Effective Communication: Increase the effectiveness of internal and external communication with stakeholders to improve the District's image and develop marketing initiatives that will lead to greater understanding and trust among the District, community, and School Board.

B. Broward Technology Strategic Plan – Goals aligned to the District goals of high quality instruction, continuous improvement and effective communication.

Technology will support Goal 1: High Quality Instruction by:

- 1. Providing the technology that enables the transformation of teaching and learning through personalized learning.
- 2. Providing technology to ensure effective and continuous provision of professional development through online, blended, and face-to-face options designed to deliver learning opportunities that integrate technology, curriculum, and pedagogy.
- 3. Maintaining a consistent and sustainable baseline standard of technology infrastructure and support in every school that is accessible by every student and is continually updated.
- 4. Meeting the specialized technical requirements of District education programs such as magnet schools, ESE programs, ESOL/ELL programs, Virtual Schools, Adult Education, Career Technical Education, and STEM.
- 5. Providing access to the breadth and depth of student information and instructional decision-making data maintained at the classroom level, school-level and District-level in a user friendly and secure manner.
- 6. Developing and maintaining close collaborative relationships between academic and I&T operational areas.

Technology will support Goal 2: Continuous Improvement by:

- 1. Increasing District-wide productivity through increased administrative efficiency enabled by reliable technology systems to all schools and within all departments.
- 2. Providing departments, parents, students, and the community user-friendly access to student and administrative data and information to positively impact administrative and academic decision-making at all levels within the District.
- 3. Supporting District-wide operational resiliency through effective security practices, disaster preparedness and business continuity planning.
- 4. Building and utilizing effective project management practices to ensure timely, costeffective and quality employment of academic, administrative and technological projects.
- 5. Assessing and aligning I &T staff resources, partnerships and third party contracts to facilitate timely delivery and support of technology initiatives.

Technology will support Goal 3: Effective Communication by:

- 1. Ensuring a reliable and secure core communications infrastructure for the District-telephony, data networks, video, and web services.
- 2. Providing a technology platform that supports community engagement and collaboration (this includes parent engagement and education, business partnerships and community relationships).
- 3. Supporting innovative use of technology for District-wide communication, e.g., use of social media and social collaboration platforms.
- 4. Deploying a platform for the communication of student and administrative data and information to those that need it.
- 5. Providing technology tools that enable robust but user friendly analytics.

STEP 3 – Strategy Setting:

Districts will outline high-level digital learning and technology strategies that will help achieve the goals of the district. Each strategy will outline the districts theory-of-action for how the goals in Step 2 will be addressed. Each strategy should have a measurement and timeline estimation.

STRATEGIES						
Goal Addressed	Strategy	Measurement	Timeline			
High Quality Instruction (Elementary)	Continue to implement the Digital 5 Personalized Learning Project until all 5 th grade students and teachers are included in this 1:1 initiative. Baseline: 69 schools in 2014-2015. Total schools - 140 Update: 84 schools in 2015-2016. Total schools - 137	 Capital Budget Plan and GOB are aligned to purchase digital devices for students and teachers in this project. Project is fully implemented by 2016-2017 school year. All program components are budgeted including professional learning, earning management system, and digital curriculum content. Measurement: Outside Evaluation by 3rd party evaluator. Goals focused on increasing student engagement, increasing achievement in math and reading 	 2015-2016: Additional 15 schools added to the Digital 5 initiative 2016-2017 school year: Additional 38 elementary schools will be implementing the Digital 5 program. 2016-2017: Goal met of all elementary schools having a Digital 5 program 			
High Quality Instruction (Middle and High)	Continue to roll out digital devices for the classroom in conjunction with the adoption of new Florida Standards aligned digital curriculum. Program name is: Digital Infusion. Status: 2014-2015 Grade 6 Math, ELA, and Intensive Reading Grade 7, 8 – ELA Grade 9, ELA, Intensive Reading Grade 10 – Intensive Reading Grade 6 and 9 ESE ACCESS	 Capital Budget Plan and GOB are aligned to purchase digital devices for this project Continue to purchase instructional materials in digital format Ensure digital curriculum is accessible through Broward learning management systems Professional learning is aligned to project goals Measurement: FSA student achievement results in ELA, Reading, and Math (baseline year - 2015) 	 2015-2016 Continue to add content areas including world languages, math, science, and social studies 2016-2018 Continue to add content areas including world languages, math, science and social studies 			
High Quality Instruction and Continuous Improvement	Continue to upgrade the infrastructure to support the expanding needs of digital learning and online assessment.	Bandwidth amount Wireless access for all classrooms Measurement: Utilization reports from Network Operations Center (NOC) Measurement: Number of schools with completed upgrades as part of the IT Bond Deployment	2015 - 2019			
High Quality Instruction	Meet the specialized technical requirements of District education programs such as magnet schools, ESE programs, ESOL/ELL programs, Virtual Schools, Adult Education,	Collaboration between Information and Technology and Academics is structured and regular.	2015-2019

Part III. DIGITAL CLASSROOMS PLAN - ALLOCATION PROPOSAL

The DCP and the DCP Allocation must include five key components as required by ss.1011.62(12)(b), F.S. In this section of the DCP, districts will outline specific deliverables that will be implemented in the current year that are funded from the DCP Allocation. The five components that are included are:

- A) Student Performance Outcomes
- B) Digital Learning and Technology Infrastructure
- C) Professional Development
- D) Digital Tools
- E) Online Assessments

This section of the DCP will document the activities and deliverables under each component. The sections for each component include, but are not limited to:

- <u>Implementation Plan</u> Provide details on the planned deliverables and/or milestones for the implementation of each activity for the component area. This should be specific to the deliverables that will be funded from the DCP Allocation.
- <u>Evaluation and Success Criteria</u> For each step of the implementation plan, describe the process for evaluating the status of the implementation and once complete, how successful implementation will be determined. This should include how the deliverable will tie to the measurement of the student performance outcome goals established in component A.

Districts are not required to include in the DCP the portion of charter school allocation or charter school plan deliverables. In ss. 1011.62(12)(c), F.S., charter schools are eligible for a proportionate share of the DCP Allocation as required for categorical programs in ss. 1002.33(17)(b).

Districts may also choose to provide funds to schools within the school district through a competitive process as outlined in ss. 1011.62(12)(c), F.S.

A) Student Performance Outcomes

Districts will determine specific student performance outcomes based on district needs and goals that will be directly impacted by the DCP allocation. These outcomes can be specific to a individual school site, grade level/band, subject or content area, or district wide. These outcomes are the specific goals that the district plans to improve through the implementation of the deliverables funded by the DCP allocation for the 2015-16 school year.

Enter the district student performance outcomes for 2015-16 that will be directly impacted by the DCP Allocation below:

	Student P	erformance	
Student P	Performance Outcomes	Baseline	Target
III.A.1	Increase percentage of fifth grade students in the Digital 5 Personalized Learning initiative performing at FSA proficiency levels in mathematics, reading and science	Baseline Year – 2015 * FSA Math (excluding EOCs)- 55%* FSA ELA – 48%* Science – 46%*	FSA Math – 60% FSA ELA-55% Science- 55%
III.A.2	Increase access to learning management system to targeted D5 and Digital Infusion program students and teachers for instruction, assessment, and progress monitoring	35%	80%
III.A.3	Increase percentage of targeted fifth grade elementary students with basic keyboarding skills	20%	80%
III.A.4	Increase percentage of targeted D5 and Digital Infusion program students meeting digital literacy standards as defined by ISTE national standards	35%	80%
III.A.5	Create personalized learning paths for students within a learning management system, in each grade level and program of study, aligned to the Florida Standards.	Baseline Year – 2015 with pilot ELA and Mathematics courses	80%
*Based on	n 69 D5 schools, Total School Data		

B) Digital Learning and Technology Infrastructure

State recommendations for technology infrastructure can be found at <u>http://www.fldoe.org/BII/Instruct_Tech/pdf/Device-BandwidthTechSpecs.pdf</u>. These specifications are recommendations that will accommodate the requirements of state supported applications and assessments.

Implementation Plan for B) Digital Learning and Technology Infrastructure:

B. Infra	structure Implementation				
	Deliverable	Estimated Completion Date	Estimated Cost	School/ District	Gap addressed from Sect. II
III.B.1.	N/A				
III.B.2.					
III.B.3.					
III.B.4.					

If no district DCP Allocation funding will be spent in this category, please briefly describe below how this category will be addressed by other fund sources.

Brief description of other activities		Other funding source		
Deliverables	Estimated	Estimated Cost	School/District	
	Completion Date			
Ensure higher bandwidth wireless access in all classrooms by moving an all 802.11N or 802.11AC standard by installing one access point in every classroom (doubling current density)	2017-2018	Funded with GOB/District Capital Budget/eRate resources	All classrooms in Broward County	
Upgrade LAN network equipment where needed to support new wireless access points and to ensure a 2 gbps campus backbone.	2017-2018	Funded with GOB/District Cpaital Budget/eRate resources	All campuses in Broward County	
Upgrade all WAN circuits to 1 gbps to the district's network core.	2016-2017	Funded by district operational	All campuses in Broward County	
Upgrade core network electronics to manage the district's WAN/Data Center/Internet convergence	2017-2018	Funded with GOB/District Capital Budget/eRate resources	District	
Upgrade bandwidth provisioning on the district's Internet circuits to an estimated 40 to 80 gbps based on utilization analysis.	2017-2018	Funded by district operational funds and eRate support	District	
IMS Global Learning Consortium member enabling a plug and play architecture enabling rapid deployment of innovative products working together.	June, 2016 and annually	Funded by district operational funds	District	

Evaluation and Success Criteria for B) Digital Learning and Technology Infrastructure:

Describe the process that will be used for evaluation of the implementation plan and the success criteria for each deliverable. This evaluation process should enable the district to monitor progress toward the specific goals and targets of each deliverable and make mid-course (i.e. mid-year) corrections in response to new developments and opportunities as they arise.

B. Infrastruc	B. Infrastructure Evaluation and Success Criteria					
Deliverable	Monitoring and Evaluation	Success Criteria				
(from	and Process(es)					
above)						
III.B.1.	Routine reporting and analysis of network traffic data obtained from the district's Network Operations Center (NOC)	 Network availability at levels greater than 99.9% Applications and online services perform at high quality levels Customer experience as shown by satisfaction surveys indicates highly satisfactory levels 				
III.B.2.	Routine reporting and analysis of network traffic data obtained from the District's Network Operations Center (NOC)	 Network availability at levels greater than 99.9% Applications and online services perform at high quality levels Customer experience as shown by satisfaction surveys indicates highly satisfactory levels 				
III.B.3.	Routine reporting and analysis of network traffic data obtained from the District's Network Operations Center (NOC)	 Network availability at levels greater than 99.9% Applications and online services perform at high quality levels Customer experience as shown by satisfaction surveys indicates highly satisfactory levels 				
III.B.4.	Routine reporting and analysis of network traffic data obtained from the District's Network Operations Center (NOC)	 Network availability at levels greater than 99.9% Applications and online services perform at high quality levels Customer experience as shown by satisfaction surveys indicates highly satisfactory levels 				
III.B.5	Routine reporting and analysis of network traffic data obtained from the District's Network Operations Center (NOC)	 Network availability at levels greater than 99.9% Applications and online services perform at high quality levels Customer experience as shown by satisfaction surveys indicates highly satisfactory levels 				

Additionally, if the district intends to use any portion of the DCP allocation for the technology and infrastructure needs area B, ss.1011.62(12)(b), F.S., requires districts to submit a third-party evaluation of the results of the district's technology inventory and infrastructure needs. Please describe the process used for the evaluation and submit the evaluation results with the DCP.

C) Professional Development

Broward's professional learning program that supports digital learning is implemented through a series of strategies that facilitate the teacher's commitment to continuous professional improvement. The BCPS professional learning system, as outlined in the Master In-service Plan, is aligned to the Standards established by Learning Forward, the national professional learning organization and the Third Cycle-Florida Professional Development System Evaluation Protocol from the FLDOE. The BCPS PL System also aligns to any relevant Florida Statutes and State Board of Education Rules. The collective vision is to "develop employees to improve performance." In relating to the infusion of digital learning, the Academics and Talent Development Departments support teacher professional learning for all teachers leading to the creation of personalized learning environments that support all student needs, including ESE and ESOL student. To achieve the digital learning vision, BCPS addresses the following:

- School leadership "look-fors" on quality digital learning processes in the classroom via the TIM
- Educator capacity to use available technology
- Instructional lesson planning using digital resources; and
- Student digital learning practices

The following links provides an overview of the BCPS Master In-Service Plan and the individual Innovation Configuration documents that specifically support digital learning:

http://www.broward.k12.fl.us/talentdevelopment/html/ic_masterplan.html http://www.broward.k12.fl.us/talentdevelopment/news/mp_ic/Digital_Learning_Curriculum_Integration.pdf http://www.broward.k12.fl.us/talentdevelopment/news/mp_ic/Technology_Systems_Operations.pdf http://www.broward.k12.fl.us/talentdevelopment/news/mp_ic/Digital_Person_Learn.pdf http://www.broward.k12.fl.us/talentdevelopment/news/mp_ic/21stCentTech_Learn.pdf

C. Profe	C. Professional Development Implementation

Evaluation and Success Criteria for C) Professional Development:

Describe the process that will be used for evaluation of the implementation plan and the success criteria for each deliverable. This evaluation process should enable the district to monitor progress toward the specific goals and targets of each deliverable and make mid-course (i.e. mid-year) corrections in response to new developments and opportunities as they arise.

C. Profession	nal Development Evaluation ar	nd Success Criteria
Deliverable	Monitoring and Evaluation	Success Criteria
(from	and Process(es)	
above)		
III.C.1.	School facilitators will monitor professional learning implementation at each school site.	Documentation of teacher movement on the Technology Integration Matrix (TIM) from baseline level to next level on scale through peer observations.
III.C.2.	Instructional staff position for digital learning professional development support will monitor implementation at assigned school sites.	Documentation of teacher movement on the Technology Integration Matrix (TIM) from baseline level to next level on scale through peer observations.
III.C.3.	Instructional Technology staff and school based administrators will participate in TIM training through iTeach online modules and will be responsible for observing teachers throughout the school district using the tool.	Fidelity of implementation based on inter-rater reliability of teacher observations using the TIM. The School District will be able to validate (or update) the baseline TIM data presented in this plan to get a clearer picture of technology integration in the school district.
III.C.4.	Administrators will use the TIM tool in their classroom walkthroughs to determine teacher technology integration level. Teachers will complete the Technology Use and Perception Survey	Comparison between the TIM classroom walkthrough results and the results from the Technology Use and Perception Survey.
III.C.5.	Online facilitators will monitor and support teachers as they progress through each level of the 21 st Century Teacher credentialing.	 Number of teachers completing each level of the training TIM walkthroughs of teachers completing each level of training to verify implementation strategies in the classroom are appropriate for level of credentialing Number of schools reaching Level 4: 21st Century Innovator Qualification
III.C.6.	Observations of teachers implementing technology into the classroom in a random sampling of schools across the district	Updating of the baseline TIM data for 2015 school year based on the data from observations conducted during 2015-2016 school year.

D) Digital Tools

Implementation Plan for D) Digital Tools:

Broward will use its DCP allocation to procure a standard Learning Management System (LMS) for K-12 students and teachers. The LMS is a key digital resource in a personalized learning environment as it provides individual student and teacher access to instructional content, communication and collaboration tools, and assessments that can be customized and directed to meet individual student needs, including ESE and ESOL students. The LMS will meet digital learning platform specifications as defined by key stakeholders, and guide the integration of instructional applications, instructional frameworks, unit and lesson plans, activities and assessment items aligned to Florida Standards.

Through a district LMS Task Force and in conjunction with purchasing procurement processes, Broward will select the appropriate LMS along with a content repository to meet the K-12 personalized learning vision of providing each student with access to their own learning system. The selected LMS will incorporate Universal Design principles to ensure that students with disabilities can access and use the system as part of their educational program.

The funds from the DCP will be used to procure the LMS, a content repository, implementation services, and professional learning for teachers needed for effective implementation. Currently, there is a gap in available funding for the purpose of procuring, designing, and incorporating an LMS. Therefore, this strategy would be an appropriate way to leverage these funds and align with the implementation plans for the GOB and capital budget.

D. Dig	ital Tools Implementation				
	Deliverable	Estimated Completion Date	Estimated Cost	School/ District	Gap addressed from Sect. II
III.D. 1.	Procure a standard LMS for K-12 and procure a Learning Object Repository (LOR) and services to be used in conjunction with the LMS to store digital materials, able to ingest and import content, with meta-tagging capabilities, and allow users to contribute to and rate/rank objects in the repository.	2015-2016	\$1,820,000 (yearly fee)	District	II.D.1 – II.D.5 (S) II.D.1 – II.D.9 (T) II.D.1 (P) II.D.1 – II.D.6 (IM)

Evaluation and Success Criteria for D) Digital Tools:

Describe the process that will be used for evaluation of the implementation plan and the success criteria for each deliverable. This evaluation process should enable the district to monitor progress toward the specific goals and targets of each deliverable and make mid-course (i.e. mid-year) corrections in response to new developments and opportunities as they arise.

D. Digital To	Digital Tools Evaluation and Success Criteria				
Deliverable	Monitoring and Evaluation	Success Criteria			
(from	and Process(es)				
above)					
III.D.1.	RFI and RFP process is used to select LMS for BCPS	Selection of LMS is completed by June 2016			
III.D.2.	Consultant contract scope of work, milestones, goals, and objectives	Contract, milestones, and goals are met by targeted dates			
III.D.3.	Content repository system works compatibly with the LMS and learning objects are properly tagged.	Online curriculum developers are able to successfully utilize the content repository system to locate and use learning objects in their course creation. Ability to separate content into learning objects for meta-tagging			
III.D.4.	Documentation and management of Phase 1 of the LMS including installation, professional learning, content integration, support and lessons learned	Successful Phase 1 of LMS implies that teachers, students, and parents are using the LMS and that reports can be generated to support teacher, student, and parent usage.			
III.D.5.	Seamless integration of LMS and content repository system.	 III.A.2 – Increase access to learning management system to targeted D5 and Digital Infusion program students and teachers for instruction, assessment, and progress monitoring III.A.5 – Create personalized learning paths for students within a learning management system, in each grade level and program of study, aligned to the Florida Standards. 			
	Digital content and student data is integrated in an efficient and timely manner	 III.A.1 - Increase percentage of fifth grade students in the Digital 5 Personalized Learning initiative performing at FSA proficiency levels in mathematics, reading and science III.A.2 - Increase access to learning management system to targeted D5 and Digital Infusion program students and teachers for instruction, assessment, and progress monitoring III.A.3 - Increase percentage of targeted fifth grade elementary students with basic keyboarding skills III.A.4 - Increase percentage of targeted D5 and Digital Infusion program students meeting digital literacy standards as defined by ISTE national standards III.A.5 - Increase percentage of targeted D5 and Digital Infusion program students meeting digital literacy standards as defined by ISTE national standards 			
III.D.6.	Team of online curriculum developers will evaluate digital content for procurement, create digital content, and curate free digital tools to be used in the content repository and to develop blended courses.	Annual completion of quality blended learning courses for district- wide use.			

E) Online Assessments

Technology infrastructure and devices required for successful implementation of local and statewide assessments are considered in this section. In our analysis of readiness for computer-based testing, we examined network, bandwidth, and wireless needs that coincide with an increased number of workstations and devices. We reviewed current technology specifications for statewide assessments (available at www.FLAssessments.com/TestNav8 and www.FSAssessments.com/) and schedule information distributed from the K-12 Student Assessment bureau when we determined potential deliverables.

Implementation Plan for E) Online Assessments:

E. Online Assessment Implementation								
	Deliverable			Estimated	Estimated	School/	Gap	
				Completion	Cost	District	addressed	
				Date			from Sect. II	
III.E.1.	Computer-based Certification	Testing	Readiness	February 2016	N/A	District	N/A	
III.E.2.								
III.E.3.								
III.E.4								

If no district DCP Allocation funding will be spent in this category, please briefly describe below how this category will be addressed by other fund sources.

Brief description of other activities	Other funding source	
Continue to procure digital devices to support online assessment	GOB, Capital Budget, Operating Budget	
Continue to update the network, bandwidth, and wireless	GOB, Capital Budget, Operating Budget	
infrastructures to meet FLDOE technology specifications		

Evaluation and Success Criteria for E) Online Assessments:

Describe the process that will be used for evaluation of the implementation plan and the success criteria for each deliverable. This evaluation process should enable the district to monitor progress toward the specific goals and targets of each deliverable and make mid-course (i.e. mid-year) corrections in response to new developments and opportunities as they arise.
