## Request to Add a New Course

<b>DATE:</b>		<b>SCHOOL DISTRICT: Broward</b>	
<b>CONTACT NAME/TITLE:</b> Mr. Guy Barmoha, Director Math, Science, & Gifted		<b>CONTACT PHONE:</b> 754-321-2119	
<b>CONTACT MAILING ADDRESS:</b> 600 SE Third Avenue Ft. Lauderdale, FL 33301		<b>CONTACT EMAIL ADDRESS:</b> Guy.barmoha@browardschools.com	
<b>COURSE TITLE:</b> BOTANY		<b>SUBJECT AREA:</b> SCIENCE	<b>SUBJECT AREA CATEGORY:</b> BIOLOGICAL SCIENCE
<b>GRADE LEVEL:9-12</b>	<b>COURSE LEVEL:</b>	<b>CREDIT:</b>	<b>WILL MEET HIGH SCHOOL SUBJECT AREA GRADUATION REQUIREMENT FOR:</b>
<input type="checkbox"/> Middle/Junior 6-8 <input checked="" type="checkbox"/> 9-12/Adult <input type="checkbox"/> Other _____	<input type="checkbox"/> Level 1 <input type="checkbox"/> Level 2 <input checked="" type="checkbox"/> Level 3	<input type="checkbox"/> 0.5 <input checked="" type="checkbox"/> 1.0 <input type="checkbox"/> Multiple	
<b>RECOMMENDED CERTIFICATION(S):</b> <a href="#">049 SCIENCE 4: Secondary (7-12)</a> , <a href="#">052 BIOLOGY 1: Grades 6-12</a>			

<b>COURSE DESCRIPTION:</b>	(Please attach a course description for the recommended course that identifies the Major Concepts/Content, Special Notes, and the Course Requirements aligned with the appropriate state standards.)  See example at: <a href="http://www.cpalms.org/Courses/PublicPreviewCourse1723.aspx">http://www.cpalms.org/Courses/PublicPreviewCourse1723.aspx</a>
<b>SCHOOL BOARD APPROVAL:</b>	(Please attach documentation of your School Board approval of this recommended course.)
<b>PLEASE DESCRIBE THE NEED FOR THE NEW COURSE, INCLUDING THE REASON WHY AN EXISTING COURSE WILL NOT SERVE THE NEED. Requests could be supported with data indicating the need for the course. Other considerations should include existing courses that might duplicate content or credits.</b>	
<p>Currently, the only Botany course available in the state CCD for our students is a level 2 course. However, many of the students taking this course is part of a specialized program and require a more rigorous course of study that will allow them to apply what they are learning in a real-world, interdisciplinary manner. In the proposed course students will learn plant science topics in an accelerated progression covering an array of advanced level scientific topics, concepts, and terminology that are used in course discussions, applications, and writing synthesis. The course includes a strong laboratory investigation component to allow students to learn via observation by testing concepts and principles introduced in the classroom, exploring problems in depth, and gaining awareness of factors that must be considered in the real world. This course can be duplicated district and state-wide because the curriculum and resources, including community partners are available to all schools. Any instructor can use school based or technology based resources to successfully duplicate and enrich this course.</p>	
<p><b>END-OF-COURSE (EOC) ASSESSMENT REQUIREMENT:</b> Section 1008.22(6), Florida Statutes, requires each school district to administer, for each course offered in the district, a student assessment that measures mastery of the content, as described in the state-adopted course description, at the necessary level of rigor for the course. Please indicate below which method has been used to develop the local assessment for the attached course request.</p> <p> <input type="checkbox"/> EOC was created using the Florida Interim Assessment Item Bank and Test Platform  <input type="checkbox"/> EOC was created with locally-developed items shared by another district(s)  <input type="checkbox"/> EOC was purchased from the Florida Catalog of State Adopted Instructional Materials  <input checked="" type="checkbox"/> EOC was created by this district and will be available only to this district </p>	

By signing, requestor is acknowledging that the information provided as a part of this *Request to Add a New Course* is true and accurate.

<b>Course Number:</b> 2000370	<b>Course Path: Section:</b> Grades PreK to 12 Education Courses > <b>Grade Group:</b> Grades 9 to 12 and Adult Education Courses > <b>Subject:</b> Science > <b>SubSubject:</b> Biological Sciences >
<b>Course Section:</b> Grades PreK to 12 Education Courses	<b>Abbreviated Title:</b> BOTANY
<b>Number of Credits:</b> One credit (1)	<b>Course Length:</b> Year (Y)
<b>Course Type:</b> Core	<b>Course Level:</b> 2
<b>Course Status :</b> Course Approved	
<b>Keywords:</b> PreK to 12 Education, Pre K to 12 Education, Grades 9 to 12 and Adult Education, 9 to 12, 9-12, High School, Science, Biological Sciences, Botany, BOTANY	
<b>Grade Level(s):</b> 9, 10, 11, 12	<b>Grade Level(s) Version:</b> 9,10,11,12

## GENERAL NOTES

While the content focus of this course is consistent with the Botany course, students will explore these concepts in greater depth. In general, the academic pace and rigor will be greatly increased for honors level course work. Laboratory investigations that include the use of scientific inquiry, research, measurement, problem solving, laboratory apparatus and technologies, experimental procedures, and safety procedures are an integral part of this course. The National Science Teachers Association (NSTA) recommends that at the high school level, all students should be in the science lab or field, collecting data every week. School laboratory investigations (labs) are defined by the National Research Council (NRC) as an experience in the laboratory, classroom, or the field that provides students with opportunities to interact directly with natural phenomena or with data collected by others using tools, materials, data collection techniques, and models (NRC, 2006, p. 3). Laboratory investigations in the high school classroom should help all students develop a growing understanding of the complexity and ambiguity of empirical work, as well as the skills to calibrate and troubleshoot equipment used to make observations. Learners should

understand measurement error; and have the skills to aggregate, interpret, and present the resulting data (National Research Council, 2006, p.77; NSTA, 2007).

**Special Notes:**

**Instructional Practices**

Teaching from a range of complex text is optimized when teachers in all subject areas implement the following strategies on a routine basis:

1. Ensuring wide reading from complex text that varies in length.
2. Making close reading and rereading of texts central to lessons.
3. Emphasizing text-specific complex questions, and cognitively complex tasks, reinforce focus on the text and cultivate independence.
4. Emphasizing students supporting answers based upon evidence from the text.
5. Providing extensive research and writing opportunities (claims and evidence).

**Honors**

Students will develop and demonstrate their skills through participation in a capstone and/or extended research-based project (e.g., science and engineering fair, participatory citizen science project, junior academy of sciences, or other teacher-directed research-based projects).

**English Language Development ELD Standards Special Notes Section:**

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Science. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

<http://www.cpalms.org/uploads/docs/standards/eld/SC.pdf>

For additional information on the development and implementation of the ELD standards, please contact the Bureau of Student Achievement through Language Acquisition at [sala@fldoe.org](mailto:sala@fldoe.org).

**Course Standards**

**Integrate Standards for Mathematical Practice (MP) as applicable.**

- MAFS.K12.MP.1.1 Make sense of problems and persevere in solving them.
- MAFS.K12.MP.2.1 Reason abstractly and quantitatively.
- MAFS.K12.MP.3.1 Construct viable arguments and critique the reasoning of others.
- MAFS.K12.MP.4.1 Model with mathematics.
- MAFS.K12.MP.5.1 Use appropriate tools strategically.
- MAFS.K12.MP.6.1 Attend to precision.
- MAFS.K12.MP.7.1 Look for and make use of structure.
- MAFS.K12.MP.8.1 Look for and express regularity in repeated reasoning.

Name	Description
------	-------------

<a href="#">ELD.K12.ELL.SC.1:</a>	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Science.
<a href="#">ELD.K12.ELL.SI.1:</a>	English language learners communicate for social and instructional purposes within the school setting.
<a href="#">LAFS.1112.RST.1.1:</a>	Cite specific textual evidence to support analysis of science and technical texts, attending to important distinctions the author makes and to any gaps or inconsistencies in the account.
<a href="#">LAFS.1112.RST.1.2:</a>	Determine the central ideas or conclusions of a text; summarize complex concepts, processes, or information presented in a text by paraphrasing them in simpler but still accurate terms.
<a href="#">LAFS.1112.RST.1.3:</a>	Follow precisely a complex multistep procedure when carrying out experiments, taking measurements, or performing technical tasks; analyze the specific results based on explanations in the text.
<a href="#">LAFS.1112.RST.2.4:</a>	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics.
<a href="#">LAFS.1112.RST.2.5:</a>	Analyze how the text structures information or ideas into categories or hierarchies, demonstrating understanding of the information or ideas.
<a href="#">LAFS.1112.RST.2.6:</a>	Analyze the author’s purpose in providing an explanation, describing a procedure, or discussing an experiment in a text, identifying important issues that remain unresolved.
<a href="#">LAFS.1112.RST.3.7:</a>	Integrate and evaluate multiple sources of information presented in diverse formats and media (e.g., quantitative data, video, multimedia) in order to address a question or solve a problem.
<a href="#">LAFS.1112.RST.3.8:</a>	Evaluate the hypotheses, data, analysis, and conclusions in a science or technical text, verifying the data when possible and corroborating or challenging conclusions with other sources of information.
<a href="#">LAFS.1112.RST.3.9:</a>	Synthesize information from a range of sources (e.g., texts, experiments, simulations) into a coherent understanding of a process, phenomenon, or concept, resolving conflicting information when possible.
<a href="#">LAFS.1112.RST.4.10:</a>	By the end of grade 12, read and comprehend science/technical texts in the grades 11–12 text complexity band independently and proficiently.
<a href="#">LAFS.1112.SL.1.1:</a>	<p>Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–12 topics, texts, and issues, building on others’ ideas and expressing their own clearly and persuasively.</p> <ul style="list-style-type: none"> <li>n. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.</li> <li>o. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as needed.</li> <li>p. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives.</li> <li>q. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or</li> </ul>

	complete the task.
<a href="#">LAFS.1112.SL.1.2:</a>	Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.
<a href="#">LAFS.1112.SL.1.3:</a>	Evaluate a speaker’s point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.
<a href="#">LAFS.1112.SL.2.4:</a>	Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.
<a href="#">LAFS.1112.SL.2.5:</a>	Make strategic use of digital media (e.g., textual, graphical, audio, visual, and interactive elements) in presentations to enhance understanding of findings, reasoning, and evidence and to add interest.
<a href="#">LAFS.1112.WHST.1.1:</a>	<p>Write arguments focused on <i>discipline-specific content</i>.</p> <ul style="list-style-type: none"> <li>r. Introduce precise, knowledgeable claim(s), establish the significance of the claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that logically sequences the claim(s), counterclaims, reasons, and evidence.</li> <li>s. Develop claim(s) and counterclaims fairly and thoroughly, supplying the most relevant data and evidence for each while pointing out the strengths and limitations of both claim(s) and counterclaims in a discipline-appropriate form that anticipates the audience’s knowledge level, concerns, values, and possible biases.</li> <li>t. Use words, phrases, and clauses as well as varied syntax to link the major sections of the text, create cohesion, and clarify the relationships between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaims.</li> <li>u. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing.</li> <li>v. Provide a concluding statement or section that follows from or supports the argument presented.</li> </ul>
<a href="#">LAFS.1112.WHST.1.2:</a>	<p>Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes.</p> <ul style="list-style-type: none"> <li>w. Introduce a topic and organize complex ideas, concepts, and information so that each new element builds on that which precedes it to create a unified whole; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension.</li> <li>x. Develop the topic thoroughly by selecting the most significant and relevant facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience’s knowledge of the topic.</li> <li>y. Use varied transitions and sentence structures to link the major sections of the text, create cohesion, and clarify the relationships among complex ideas and concepts.</li> </ul>

	<p>z. Use precise language, domain-specific vocabulary and techniques such as metaphor, simile, and analogy to manage the complexity of the topic; convey a knowledgeable stance in a style that responds to the discipline and context as well as to the expertise of likely readers.</p> <p>aa. Provide a concluding statement or section that follows from and supports the information or explanation provided (e.g., articulating implications or the significance of the topic).</p>
<a href="#">LAFS.1112.WHST.2.4:</a>	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
<a href="#">LAFS.1112.WHST.2.5:</a>	Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.
<a href="#">LAFS.1112.WHST.2.6:</a>	Use technology, including the Internet, to produce, publish, and update individual or shared writing products in response to ongoing feedback, including new arguments or information.
<a href="#">LAFS.1112.WHST.3.7:</a>	Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
<a href="#">LAFS.1112.WHST.3.8:</a>	Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the strengths and limitations of each source in terms of the specific task, purpose, and audience; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and overreliance on any one source and following a standard format for citation.
<a href="#">LAFS.1112.WHST.3.9:</a>	Draw evidence from informational texts to support analysis, reflection, and research.
<a href="#">LAFS.1112.WHST.4.10:</a>	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
<a href="#">LAFS.910.RST.1.1:</a>	Cite specific textual evidence to support analysis of science and technical texts, attending to the precise details of explanations or descriptions.
<a href="#">LAFS.910.RST.1.3:</a>	Follow precisely a complex multistep procedure when carrying out experiments, taking measurements, or performing technical tasks, attending to special cases or exceptions defined in the text.
<a href="#">LAFS.910.RST.2.4:</a>	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 9–10 texts and topics.
<a href="#">LAFS.910.RST.2.5:</a>	Analyze the structure of the relationships among concepts in a text, including relationships among key terms (e.g., force, friction, reaction force, energy).
<a href="#">LAFS.910.RST.3.7:</a>	Translate quantitative or technical information expressed in words in a text into visual form (e.g., a table or chart) and translate information expressed visually or mathematically (e.g., in an equation) into words.
<a href="#">LAFS.910.RST.3.9:</a>	Compare and contrast findings presented in a text to those from other sources (including their own experiments), noting when the findings support or contradict previous explanations or accounts.
<a href="#">LAFS.910.RST.4.10:</a>	By the end of grade 10, read and comprehend science/technical texts in the grades 9–10 text complexity band independently and proficiently.
<a href="#">LAFS.910.SL.1.2:</a>	Integrate multiple sources of information presented in diverse media or formats

	(e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.
<a href="#">LAFS.910.SL.1.3:</a>	Evaluate a speaker’s point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.
<a href="#">LAFS.910.SL.2.4:</a>	Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.
<a href="#">LAFS.910.SL.2.5:</a>	Make strategic use of digital media (e.g., textual, graphical, audio, visual, and interactive elements) in presentations to enhance understanding of findings, reasoning, and evidence and to add interest.
<a href="#">LAFS.910.WHST.1.2:</a>	<p>Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes.</p> <ul style="list-style-type: none"> <li>bb. Introduce a topic and organize ideas, concepts, and information to make important connections and distinctions; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension.</li> <li>cc. Develop the topic with well-chosen, relevant, and sufficient facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience’s knowledge of the topic.</li> <li>dd. Use varied transitions and sentence structures to link the major sections of the text, create cohesion, and clarify the relationships among ideas and concepts.</li> <li>ee. Use precise language and domain-specific vocabulary to manage the complexity of the topic and convey a style appropriate to the discipline and context as well as to the expertise of likely readers.</li> <li>ff. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing.</li> <li>gg. Provide a concluding statement or section that follows from and supports the information or explanation presented (e.g., articulating implications or the significance of the topic).</li> </ul>
<a href="#">LAFS.910.WHST.3.9:</a>	Draw evidence from informational texts to support analysis, reflection, and research.
<a href="#">MAFS.912.F-IF.3.7:</a>	<p>Graph functions expressed symbolically and show key features of the graph, by hand in simple cases and using technology for more complicated cases. ★</p> <ul style="list-style-type: none"> <li>hh. Graph linear and quadratic functions and show intercepts, maxima, and minima.</li> <li>ii. Graph square root, cube root, and piecewise-defined functions, including step functions and absolute value functions.</li> <li>jj. Graph polynomial functions, identifying zeros when suitable factorizations are available, and showing end behavior.</li> <li>kk. Graph rational functions, identifying zeros and asymptotes when suitable factorizations are available, and showing end behavior.</li> <li>ll. Graph exponential and logarithmic functions, showing intercepts and end behavior, and trigonometric functions, showing period, midline, and amplitude, and using phase shift.</li> </ul>

<a href="#">MAFS.912.N-Q.1.1:</a>	Use units as a way to understand problems and to guide the solution of multi-step problems; choose and interpret units consistently in formulas; choose and interpret the scale and the origin in graphs and data displays. ★
<a href="#">MAFS.912.F-IF.2.4:</a>	For a function that models a relationship between two quantities, interpret key features of graphs and tables in terms of the quantities, and sketch graphs showing key features given a verbal description of the relationship. <i>Key features include: intercepts; intervals where the function is increasing, decreasing, positive, or negative; relative maximums and minimums; symmetries; end behavior; and periodicity.</i> ★
<a href="#">MAFS.912.N-Q.1.3:</a>	Choose a level of accuracy appropriate to limitations on measurement when reporting quantities. ★
<a href="#">MAFS.912.S-IC.2.6:</a>	Evaluate reports based on data. ★
<a href="#">MAFS.912.S-ID.1.1:</a>	<p>Represent data with plots on the real number line (dot plots, histograms, and box plots). ★</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Remarks/Examples:</b>            In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</p> </div>
<a href="#">MAFS.912.S-ID.1.2:</a>	<p>Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Remarks/Examples:</b>            In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</p> </div>
<a href="#">MAFS.912.S-ID.1.3:</a>	<p>Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers). ★</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Remarks/Examples:</b>            In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</p> </div>
<a href="#">MAFS.912.S-ID.1.4:</a>	Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages. Recognize that there are data sets for which such a procedure is not appropriate. Use calculators, spreadsheets, and tables to estimate areas under the normal curve. ★
<a href="#">MAFS.912.S-ID.2.5:</a>	Summarize categorical data for two categories in two-way frequency tables. Interpret relative frequencies in the context of the data (including joint, marginal, and conditional relative frequencies). Recognize possible associations and trends in the data. ★
<a href="#">SC.912.L.14.10:</a>	Discuss the relationship between the evolution of land plants and their

	anatomy.
<a href="#">SC.912.L.14.2:</a>	Relate structure to function for the components of plant and animal cells. Explain the role of cell membranes as a highly selective barrier (passive and active transport).
<a href="#">SC.912.L.14.3:</a>	Compare and contrast the general structures of plant and animal cells. Compare and contrast the general structures of prokaryotic and eukaryotic cells. <b>Remarks/Examples:</b> Annually Assessed on Biology EOC. Also assesses <a href="#">SC.912.L.14.2</a> .
<a href="#">SC.912.L.14.5:</a>	Explain the evidence supporting the scientific theory of the origin of eukaryotic cells (endosymbiosis).
<a href="#">SC.912.L.14.5.3:</a>	Discuss basic classification and characteristics of plants. Identify bryophytes, pteridophytes, gymnosperms, and angiosperms.
<a href="#">SC.912.L.14.7:</a>	Relate the structure of each of the major plant organs and tissues to physiological processes. <b>Remarks/Examples:</b> Annually Assessed on Biology EOC.
<a href="#">SC.912.L.14.8:</a>	Explain alternation of generations in plants.
<a href="#">SC.912.L.14.9:</a>	Relate the major structure of fungi to their functions.
<a href="#">SC.912.L.15.1:</a>	Explain how the scientific theory of evolution is supported by the fossil record, comparative anatomy, comparative embryology, biogeography, molecular biology, and observed evolutionary change. <b>Remarks/Examples:</b> Annually Assessed on Biology EOC. Also assesses <a href="#">SC.912.L.15.10</a> <a href="#">SC.912.N.1.3</a> <a href="#">SC.912.N.1.4</a> <a href="#">SC.912.N.1.6</a> <a href="#">SC.912.N.2.1</a> <a href="#">SC.912.N.3.1</a> and <a href="#">SC.912.N.3.4</a> .
<a href="#">SC.912.L.15.3:</a>	Describe how biological diversity is increased by the origin of new species and how it is decreased by the natural process of extinction.
<a href="#">SC.912.L.15.4:</a>	Describe how and why organisms are hierarchically classified and based on evolutionary relationships.
<a href="#">SC.912.L.15.5:</a>	Explain the reasons for changes in how organisms are classified.
<a href="#">SC.912.L.15.6:</a>	Discuss distinguishing characteristics of the domains and kingdoms of living organisms. <b>Remarks/Examples:</b> Annually Assessed on Biology EOC. Also assesses <a href="#">SC.912.L.15.4</a> <a href="#">SC.912.L.15.5</a> <a href="#">SC.912.N.1.3</a> and <a href="#">SC.912.N.1.6</a> .
<a href="#">SC.912.L.16.1:</a>	Use Mendel's laws of segregation and independent assortment to analyze patterns of inheritance. <b>Remarks/Examples:</b> Annually assessed on Biology EOC. Also assesses <a href="#">SC.912.L.16.2</a> .
<a href="#">SC.912.L.16.2:</a>	Discuss observed inheritance patterns caused by various modes of inheritance, including dominant, recessive, codominant, sex-linked, polygenic, and multiple

	alleles.
<a href="#">SC.912.L.17.10:</a>	Diagram and explain the biogeochemical cycles of an ecosystem, including water, carbon, and nitrogen cycle.
<a href="#">SC.912.L.17.4:</a>	Describe changes in ecosystems resulting from seasonal variations, climate change and succession.
<a href="#">SC.912.L.17.6:</a>	Compare and contrast the relationships among organisms, including predation, parasitism, competition, commensalism, and mutualism.
<a href="#">SC.912.L.17.7:</a>	Characterize the biotic and abiotic components that define freshwater systems, marine systems and terrestrial systems.
<a href="#">SC.912.L.17.8:</a>	Recognize the consequences of the losses of biodiversity due to catastrophic events, climate changes, human activity, and the introduction of invasive, non-native species.
<a href="#">SC.912.L.17.9:</a>	Use a food web to identify and distinguish producers, consumers, and decomposers. Explain the pathway of energy transfer through trophic levels and the reduction of available energy at successive trophic levels.  <b>Remarks/Examples:</b> Annually assessed on Biology EOC. Also assesses <a href="#">SC.912.E.7.1</a> .
<a href="#">SC.912.L.18.1:</a>	Describe the basic molecular structures and primary functions of the four major categories of biological macromolecules.  <b>Remarks/Examples:</b> Annually assessed on Biology EOC. Also assesses <a href="#">SC.912.L.18.11</a> .
<a href="#">SC.912.L.18.10:</a>	Connect the role of adenosine triphosphate (ATP) to energy transfers within a cell.
<a href="#">SC.912.L.18.11:</a>	Explain the role of enzymes as catalysts that lower the activation energy of biochemical reactions. Identify factors, such as pH and temperature, and their effect on enzyme activity.
<a href="#">SC.912.L.18.12:</a>	Discuss the special properties of water that contribute to Earth's suitability as an environment for life: cohesive behavior, ability to moderate temperature, expansion upon freezing, and versatility as a solvent.  <b>Remarks/Examples:</b> Annually assessed on Biology EOC.
<a href="#">SC.912.L.18.5:</a>	Discuss the use of chemiosmotic gradients for ATP production in chloroplasts and mitochondria.
<a href="#">SC.912.L.18.7:</a>	Identify the reactants, products, and basic functions of photosynthesis.
<a href="#">SC.912.L.18.8:</a>	Identify the reactants, products, and basic functions of aerobic and anaerobic cellular respiration.
<a href="#">SC.912.L.18.9:</a>	Explain the interrelated nature of photosynthesis and cellular respiration.  <b>Remarks/Examples:</b> Annually assessed on Biology EOC. Also assesses <a href="#">SC.912.L.18.7</a> <a href="#">SC.912.L.18.8</a> <a href="#">SC.912.L.18.10</a> .
<a href="#">SC.912.N.1.1:</a>	Define a problem based on a specific body of knowledge, for example: biology, chemistry, physics, and earth/space science, and do the following:

39. **Pose questions about the natural world,** (Articulate the purpose of the investigation and identify the relevant scientific concepts).
40. **Conduct systematic observations,** (Write procedures that are clear and replicable. Identify observables and examine relationships between test (independent) variable and outcome (dependent) variable. Employ appropriate methods for accurate and consistent observations; conduct and record measurements at appropriate levels of precision. Follow safety guidelines).
41. **Examine books and other sources of information to see what is already known,**
42. **Review what is known in light of empirical evidence,** (Examine whether available empirical evidence can be interpreted in terms of existing knowledge and models, and if not, modify or develop new models).
43. **Plan investigations,** (Design and evaluate a scientific investigation).
44. **Use tools to gather, analyze, and interpret data (this includes the use of measurement in metric and other systems, and also the generation and interpretation of graphical representations of data, including data tables and graphs),** (Collect data or evidence in an organized way. Properly use instruments, equipment, and materials (e.g., scales, probeware, meter sticks, microscopes, computers) including set-up, calibration, technique, maintenance, and storage).
45. **Pose answers, explanations, or descriptions of events,**
46. **Generate explanations that explicate or describe natural phenomena (inferences),**
47. **Use appropriate evidence and reasoning to justify these explanations to others,**
48. **Communicate results of scientific investigations, and**
49. **Evaluate the merits of the explanations produced by others.**

**Remarks/Examples:**

Florida Standards Connections for 6-12 Literacy in Science

For Students in Grades 9-10

LAFS.910.RST.1.1 Cite specific textual evidence to support analysis of science and technical texts, attending to the precise details of explanations or descriptions.

LAFS.910.RST.1.3 Follow precisely a complex multistep procedure when carrying out experiments, taking measurements, or performing technical tasks attending to special cases or exceptions defined in the text.

LAFS.910.RST.3.7 Translate quantitative or technical information expressed in words in a text into visual form (e.g., a table or chart) and translate information expressed visually or mathematically (e.g., in an

equation) into words.

LAFS.910.WHST.1.2 Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes.

LAFS.910.WHST.3.9 Draw evidence from informational texts to support analysis, reflection, and research.

For Students in Grades 11-12

LAFS.1112.RST.1.1 Cite specific textual evidence to support analysis of science and technical texts, attending to important distinctions the author makes and to any gaps or inconsistencies in the account.

LAFS.1112.RST.1.3 Follow precisely a complex multistep procedure when carrying out experiments, taking measurements, or performing technical tasks analyze the specific results based on explanations in the text.

LAFS.1112.RST.3.7 Integrate and evaluate multiple sources of information presented in diverse formats and media (e.g., quantitative data, video, multimedia) in order to address a question or solve a problem.

LAFS.1112.WHST.1.2 Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes.

LAFS.1112.WHST.3.9 Draw evidence from informational texts to support analysis, reflection, and research.

Florida Standards Connections for Mathematical Practices

MAFS.K12.MP.1: Make sense of problems and persevere in solving them.

MAFS.K12.MP.2: Reason abstractly and quantitatively.

MAFS.K12.MP.3: Construct viable arguments and critique the reasoning of others. [Viable arguments include evidence.]

MAFS.K12.MP.4: Model with mathematics.

MAFS.K12.MP.5: Use appropriate tools strategically.

MAFS.K12.MP.6: Attend to precision.

MAFS.K12.MP.7: Look for and make use of structure.

MAFS.K12.MP.8: Look for and express regularity in repeated reasoning.

Describe and explain what characterizes science and its methods.

[SC.912.N.1.2:](#)

**Remarks/Examples:**

Science is characterized by empirical observations, testable questions, formation of hypotheses, and experimentation that results in stable and replicable results, logical reasoning, and coherent theoretical constructs.

	<p>Florida Standards Connections: MAFS.K12.MP.3: Construct viable arguments and critique the reasoning of others.</p>
<a href="#">SC.912.N.1.6:</a>	<p>Describe how scientific inferences are drawn from scientific observations and provide examples from the content being studied.</p> <p><b>Remarks/Examples:</b> Collect data/evidence and use tables/graphs to draw conclusions and make inferences based on patterns or trends in the data.</p> <p>Florida Standards Connections: MAFS.K12.MP.1: Make sense of problems and persevere in solving them.</p>
<a href="#">SC.912.N.2.1:</a>	<p>Identify what is science, what clearly is not science, and what superficially resembles science (but fails to meet the criteria for science).</p> <p><b>Remarks/Examples:</b> Science is the systematic and organized inquiry that is derived from observations and experimentation that can be verified or tested by further investigation to explain natural phenomena (e.g. Science is testable, pseudo-science is not science seeks falsifications, pseudo-science seeks confirmations.)</p>
<a href="#">SC.912.N.2.2:</a>	<p>Identify which questions can be answered through science and which questions are outside the boundaries of scientific investigation, such as questions addressed by other ways of knowing, such as art, philosophy, and religion.</p> <p><b>Remarks/Examples:</b> Identify scientific questions that can be disproved by experimentation/testing. Recognize that pseudoscience is a claim, belief, or practice which is presented as scientific, but does not adhere to strict standards of science (e.g. controlled variables, sample size, replicability, empirical and measurable evidence, and the concept of falsification).</p> <p>Florida Standards Connections: MAFS.K12.MP.3: Construct viable arguments and critique the reasoning of others.</p>
<a href="#">SC.912.N.1.3:</a>	<p>Recognize that the strength or usefulness of a scientific claim is evaluated through scientific argumentation, which depends on critical and logical thinking, and the active consideration of alternative scientific explanations to explain the data presented.</p> <p><b>Remarks/Examples:</b> Assess the reliability of data and identify reasons for inconsistent results, such as sources of error or uncontrolled conditions.</p> <p>Florida Standards Connections: MAFS.K12.MP.2: Reason abstractly and quantitatively MAFS.K12.MP.3: Construct viable arguments and critique the reasoning of others</p>
<a href="#">SC.912.N.1.4:</a>	<p>Identify sources of information and assess their reliability according to the strict standards of scientific investigation.</p>

	<p><b>Remarks/Examples:</b> Read, interpret, and examine the credibility and validity of scientific claims in different sources of information, such as scientific articles, advertisements, or media stories. Strict standards of science include controlled variables, sufficient sample size, replication of results, empirical and measurable evidence, and the concept of falsification.</p> <p>Florida Standards Connections: <a href="#">LAFS.910.RST.1.1</a> / <a href="#">LAFS.1112.RST.1.1</a>.</p>
<p><a href="#">SC.912.N.2.4:</a></p>	<p>Explain that scientific knowledge is both durable and robust and open to change. Scientific knowledge can change because it is often examined and re-examined by new investigations and scientific argumentation. Because of these frequent examinations, scientific knowledge becomes stronger, leading to its durability.</p> <p><b>Remarks/Examples:</b> Recognize that ideas with the most durable explanatory power become established theories, but scientific explanations are continually subjected to change in the face of new evidence.</p> <p>Florida Standards Connections: MAFS.K12.MP.1: Make sense of problems and persevere in solving them MAFS.K12.MP.3: Construct viable arguments and critique the reasoning of others.</p>
<p><a href="#">SC.912.N.3.1:</a></p>	<p>Explain that a scientific theory is the culmination of many scientific investigations drawing together all the current evidence concerning a substantial range of phenomena; thus, a scientific theory represents the most powerful explanation scientists have to offer.</p> <p><b>Remarks/Examples:</b> Explain that a scientific theory is a well-tested hypothesis supported by a preponderance of empirical evidence.</p> <p>Florida Standards Connections: MAFS.K12.MP.1: Make sense of problems and persevere in solving them and, MAFS.K12.MP.3: Construct viable arguments and critique the reasoning of others.</p>
<p><a href="#">SC.912.N.3.4:</a></p>	<p>Recognize that theories do not become laws, nor do laws become theories; theories are well supported explanations and laws are well supported descriptions.</p> <p><b>Remarks/Examples:</b> Recognize that theories do not become laws, theories explain laws. Recognize that not all scientific laws have accompanying explanatory theories.</p>
<p><a href="#">SC.912.P.10.1:</a></p>	<p>Differentiate among the various forms of energy and recognize that they can be transformed from one form to others.</p>

	<p><b>Remarks/Examples:</b></p> <p>Differentiate between kinetic and potential energy. Recognize that energy cannot be created or destroyed, only transformed. Identify examples of transformation of energy: Heat to light in incandescent electric light bulbs Light to heat in laser drills Electrical to sound in radios Sound to electrical in microphones Electrical to chemical in battery rechargers Chemical to electrical in dry cells Mechanical to electrical in generators [power plants] Nuclear to heat in nuclear reactors Gravitational potential energy of a falling object is converted to kinetic energy then to heat and sound energy when the object hits the ground.</p>
<a href="#">SC.912.P.10.18:</a>	<p>Explore the theory of electromagnetism by comparing and contrasting the different parts of the electromagnetic spectrum in terms of wavelength, frequency, and energy, and relate them to phenomena and applications.</p> <p><b>Remarks/Examples:</b></p> <p>Describe the electromagnetic spectrum (i.e., radio waves, microwaves, infrared, visible light, ultraviolet, X-rays and gamma rays) in terms of frequency, wavelength and energy. Solve problems involving wavelength, frequency, and energy.</p>
<a href="#">SC.912.P.12.12:</a>	<p>Explain how various factors, such as concentration, temperature, and presence of a catalyst affect the rate of a chemical reaction.</p> <p><b>Remarks/Examples:</b></p> <p>Various factors could include: temperature, pressure, solvent and/or solute concentration, sterics, surface area, and catalysts. The rate of reaction is determined by the activation energy, and the pathway of the reaction can be shorter in the presence of enzymes or catalysts. Examples may include: decomposition of hydrogen peroxide using manganese (IV) oxide nitration of benzene using concentrated sulfuric acid hydrogenation of a C=C double bond using nickel.</p>
<a href="#">SC.912.P.8.12:</a>	<p>Describe the properties of the carbon atom that make the diversity of carbon compounds possible.</p> <p><b>Remarks/Examples:</b></p> <p>Explain how the bonding characteristics of carbon lead to a large variety of structures ranging from simple hydrocarbons to complex polymers and biological molecules.</p>
<a href="#">LAFS.910.SL.1.1a:</a>	<p>Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.</p>
<a href="#">LAFS.910.SL.1.1b:</a>	<p>Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed.</p>
<a href="#">LAFS.910.SL.1.1c:</a>	<p>Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions.</p>
<a href="#">LAFS.910.SL.1.1d:</a>	<p>Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and</p>

understanding and make new connections in light of the evidence and reasoning presented.
