SUMMARY EXPLANATION AND BACKGROUND:
The School Board of Broward County, Florida, received two (2) bids for ITB 16-151E - FileMaker Database Program. The FileMaker database program is used throughout the district by schools and departments to create and monitor student, teacher, and staff data, as well as automated workflow processes. It is estimated that the district currently has more than 1,000 databases running on Filemaker and will require approximately 20,000 licenses to support the appropriate district-wide use of the software. FileMaker is also used for the monitoring of inventory data throughout the district. Since there are many schools and district sites that are dependent upon the use of this software, the district must continue to be in compliance with licensing agreements.
