

Summary Explanation and Background

This districtwide agreement supports the instructional programs provided by Broward County Public Schools that are necessary to meet Florida Department of Education mandated student performance standards. This agreement also addresses the requirements of regulatory agencies for students to qualify for certification/licensure.

This facility, formerly known as GEO Care, LLC, has come under new management. As a result a new agreement with Correct Care, LLC is being initiated.

In accordance with a School Board request, the Broward Technical Colleges will administer surveys to aid in measuring the effectiveness of the clinical experience. These surveys will be completed by students, Health Science Education teachers, and select staff of the facility. The results of the surveys will be used to make recommendations for modifying clinical agreements that will strengthen the student's job-site experience and the overall Health Science Education Program.
