

Continuation of Summary Explanation and Background

FF-7 – Agreement between The School Board of Broward County, Florida and Embry-Riddle Aeronautical University (ERAU) (summary explanation and background con't.)

This program will be offered at four (4) high schools and give up to 900 students the ability to earn college credit. The high schools were selected because of their aeronautical programs. The participating High Schools are Plantation, South Plantation, Blanche Ely, and Miramar.

The cost will fund 30 sections of ERAU coursework taught on four BCPS High School campuses reaching approximately 900 students. This cost covers indirect cost of running the 30 sections, there is no additional cost for tuition, books, or other materials. As part of this contract ERAU will supply, at no additional cost to the District, instructor face to face training, required technology (including drones, flight simulators, and i-pads), and curriculum materials for the participating schools at a value of approximately \$100,000.

As a comparison, dual enrollment opportunities for the same number of courses through FIU would cost the District over \$46,000 or \$51 per student and this would not include any training, equipment, or textbooks. This ERAU Dual Enrollment opportunity to offer CTE students college credit courses will cost the District less than \$25 per student.
