

EXECUTIVE SUMMARY

Recommendation to Approve Agreement 58-136E – Clever, Inc. Data Integration

This request is to approve the agreement between Clever, Inc. (Clever) and The School Board of Broward County, Florida (SBBC). Clever provides a data integration system that facilitates an expedited software implementation process for SBBC, while protecting student information and data through a single portal. There is no cost to SBBC for Clever services, as fees are paid directly to Clever by third party software vendors utilizing the Clever portal for new software implementation.

Clever ensures that third party vendors doing business with SBBC to provide software applications function properly in the classroom through their rigorous processes and exclusive features. With the use of dynamic rules, Clever cuts down on student data over-sharing, while capturing any changes that occur in the Student Information System (SIS) ensuring that only the necessary school data for a particular application is available. Utilizing Clever to sync software applications allows the Information and Technology Department the ability to focus on core business functions rather than dedicating time for distinct setups.

Clever also provides robust reporting capable of identifying application usage including schools utilizing the application along with the respective volume of use. Additionally, reports can be generated that identify specific student data information being shared with each application implemented and in use across the District through Clever.

Procurement Method

The direct negotiation was performed in accordance with Purchasing Policy 3320, VI (C)(5)(c), and Section 6A-1.012(14), F.A.C., permit the acquisitions of Information & Technology as defined in Section 282.0041(14), Florida Statutes.

Financial Impact

There is no spending authority requested with this item because Clever is paid by the third party vendors utilizing their services.
