

Continuation of Summary Explanation and Background

In the current Plant Survey, the Dillard Community Center (Museum) parcel is authorized for a District ancillary joint use (administrative) facility. In 1987, the School Board of Broward County, Florida embarked on a project to create the Old Dillard Community Education Center. The guiding document states "The primary purpose of the Center is educational and during the regular school day educational activities will be ongoing 100% of the time." The guiding document also states "during the day, the Center will serve as an adjunct facility for...Walker Elementary..."

The purpose of this requested action is for Walker Elementary to utilize the Old Dillard facility as a multipurpose space that supports teaching and learning.
