

II-1 Added

March 5, 2019

Continuation of Summary Explanation and Background

On February 1, 2019, the Superintendent, General Counsel and staff met with the new Sheriff and his leadership team to discuss the Agreement and potential revisions.

The First Amendment represents the result of this collaboration. The revisions are intended to address three primary issues:

- Clarify language to provide the ability to view recorded images during an emergency in connection with BSO's response;
- Provide opportunities to viewing video in connection with appropriate training activities; and
- Clarify that BSO School Resource Deputies will be provided direct access to the camera surveillance system at their applicable school during the course and scope of their role as an SRO.
