March 5, 2019

Continuation of Summary Explanation and Background

Many parents expressed concern regarding the safety of the temporary portables placed on campus while the replacement building for Building 12 is being constructed. The Superintendent committed to review additional measures to address these concerns and allay parent and student fears. Staff reviewed, with the Chief Fire Official, opportunities to install additional fencing around the portables. However, the initial assessment suggests this is not feasible due to emergency egress concerns. Another option explored was the placement of an additional dedicated School Resource Deputy to be positioned at the portable area on campus while school is in session.

This Agreement is being recommended for the remainder of the 2018-2019 school year.
