- Supervise staff as assigned in the performance of job duties.
- Provide thought leadership in the design of technology systems & services to meet business requirements and operational objectives.
- Participate as a strategic and forward-thinking technology leader with expertise in technology strategy.
- Define reference architectures that turn business and technology strategic needs into actionable solutions.
- Design, deliver, document, and communicate architecture with a focus on standard design patterns, growth, performance, and scalability.
- Define, apply, and drive the use of design patterns, best practices, and standards in enterprise.
- Provide thought leadership that anticipates strategic, organizational, and technical changes and impacts.
- Partner across various IT and business teams to provide insight and technology recommendations, that result in enterprise solutions that solve critical business problems.
- Identify architectural risks and plans to mitigate the identified risks and perform periodic technology and architecture reviews.
- Participate in policy compliance activities and activities related to system authentication, encryption, technical and operational contingencies, and security.
- Ensure strategies, standards, and reference architectures are consistent and integrated across IT domains.
- Maintain systems technology roadmaps to ensure supportability and awareness for future technology decisions.
- Provide level 3 support, as needed, to resolve the most complex issues impacting business.
- Assist with needed black box testing (functionality testing) and white box testing (structure testing).
- Collaborate with architects, engineers, and project teams to assess requirements and recommend solutions.
- Maintain awareness of industry trends in different technology disciplines.
- Define best practices for supporting recommended solutions.
- Actively participate in creation of strategic technology roadmaps.
- Assist with business case development and presentation to management in support of new technology initiatives.
- Assist with security tasks such as prediction of security attacks and minimizing the impact.
- Implement needed security policies across the District's integrated systems; govern risk compliance; perform penetration testing and vulnerability assessment; perform security management framework assessment; perform policy GAP assessment; risk management; business continuity plan / disaster recovery management.
- Perform and promote all activities in compliance with the equal employment and non-discrimination policies of The School Board of Broward County, Florida.
- Participate in the training programs to enhance the individual's skills and proficiency related to the job responsibilities.
- Review current developments, literature and technical sources of information related to job responsibilities.
- Ensure adherence to safety rules and procedures.
- Follow federal and state laws, as well as School Board policies.
- Perform other duties as assigned by the immediate supervisor or designee.
