

## **F-1. Continuation of Agreement with Hazel Health, Inc. and The School Board of Broward County, Florida.**

### **Continuation of Summary Explanation and Background**

Hazel Health, Inc. (Hazel) is an extension of the school health clinic that offers virtual medical clinics in the school setting. Nurses enable students to receive immediate care by connecting with a network of doctors via video call from the nurse's office with parental consent at no cost.

Many students return to class after a visit with Hazel, which means more time spent learning in the classroom. This is also a huge relief for parents, who might otherwise have to leave work and lose income. With this model, we can leverage technology to provide great care at a far lower cost than the alternative of an urgent care or emergency room visit.

During this COVID-19 pandemic, Hazel also provides "at home services". Students can access virtual doctor visits through Hazel without leaving home. Families can access this service any time they are remote learning, or when the school health office is closed. Doctor visits are available before school, as a check-in for parents who are not sure whether to bring their child to school. When students are remote learning, they can access a Hazel doctor on-demand using any device from home, alongside their parent or guardian.

Hazel Health will provide all necessary equipment, technology and support for each of the selected schools.
