Allows sign-in at Remote Computer for Visitors, Volunteers, or Faculty using ID

2D Bar Code Reader

Volunteer Background Checks

Raptor's Background Screening simplifies your volunteer approval process by incorporating background checks into the Raptor Volunteer Management System. Raptor Technologies has teamed with JD Palatine to deliver the most comprehensive background screening solution for schools to make reliable decisions to approve volunteers.

Your current background screening process may not be as detailed as you need to protect your students. A thorough background screen reports criminal information, sex offender registry data, known terrorists, and fugitive watch list data on a national, not only state, level, and includes courthouse searches for counties that do not report electronically.

Raptor offers several background screening options for districts to purchase. Please see the attached overview for descriptions of various levels of checks with associated pricing.
