Personalized Pathways: Theory of Action

Theory

Action Plan

Lead Measures

If we execute this strategy:

Develop an education model that seeks to accelerate student learning by tailoring the instructional environment- what, when, how and where students learn – to address the individual needs, skills, and interests of each student

- 1) Develop Magnet Program progressions through feeder patterns from elementary to middle to high school so that students can continue a course of study that engages them and where they graduate with skills in a concentration area of interest.
- 2) Develop training options for teachers and administrators to develop instructional strategies promoting personalized learning that lead to individualized student pathways.
- 3) Develop CTE pathways for students as they progress from elementary to middle to high schools so that students can continue a course of study that engages them and where they graduate with certifications in areas of interest along with a diploma.

Lag Measures

Then we will realize this goal:

Enhance and expand personalized educational pathways, inclusive of college and career pathways, and ensure equitable access to innovative programs.

- 4) Develop personalized pathways for our Center and ESE students enabling them to develop the life skills needed to be productive citizens.
- 5) Develop matriculation options for students to graduate high school and complete CTE programs at our technical colleges.
- 6) Develop flexible elementary, middle, and high school bell schedules that promote career exploration, internships, industry certifications, and job placement.
