TITLE:

Second Amendment to Interlocal Agreement between
The School Board of Broward County, Florida, and Broward County
for Joint Comprehensive Recycling Program

REQUESTED ACTION:
Approve the Second Amendment to the Interlocal Agreement between The School Board of Broward County, Florida (SBBC), and Broward County for Joint Comprehensive Recycling Program, for recycling services from November 1, 2012, through September 30, 2013.

SUMMARY EXPLANATION AND BACKGROUND:
The SBBC's adoption of Environmental Stewardship as part of the Strategic Plan recognizes the importance and value of recycling. Our stewardship goal is to ensure the District remains a community and national leader in the recycling movement. The amendment with Broward County continues our recycling program for the next year at the fixed annual cost of \$563,304. The current agreement is 19 percent less than the \$699,000 per year that the SBBC paid during the County's 2006-2009 fiscal years. In late 2009, the County was able to lower agreement costs after securing lower collection contract pricing resulting from the County's 2009 rebid of recyclables collection services. This resulted in a \$135,696 savings, per year, to the School District. Customer service actions during the past three years, through 2011, have included, but were not limited to, delivery of more than 9,000 recycling bins for classrooms, offices, and common areas; 127 school and facility recycling program site assessments; and program training sessions for 1,900 employees and students (typically environmental clubs). This agreement has been reviewed and approved as to form and legal content by the Office of the General Counsel. Broward County will execute this agreement after the School Board's approval.

- SCHOOL BOARD GOALS:**
- Goal One: Raise achievement of all students to ensure graduation from high school and readiness for post-secondary education.

 - Goal Six: Build strong partnerships with family, business, community and government at the classroom, school, area, and district level.
 - Goal Seven: Ensure district's leadership as an environmental steward through innovative ecology and energy conservation programs.

FINANCIAL IMPACT:
The financial impact to the School Board is \$563,304 annually and is budgeted in the District's Waste Management/Utility Account.

EXECUTIVE SUMMARY

**Second Amendment to Interlocal Agreement between
The School Board of Broward County, Florida, and Broward County
for Joint Comprehensive Recycling Program**

PROJECT OVERVIEW:

Type of Contract:	Second Amendment to Interlocal Agreement between The School Board of Broward County, Florida, and Broward County for Joint Comprehensive Recycling Program
Architect:	NA
Contractor:	Broward County
Notice to Proceed Date:	NA
Bid Amount (Original Contract Amount):	\$ 563,304

GENERAL OVERVIEW:

The amendment with Broward County continues our recycling program for the next year at the fixed annual cost of \$563,304. The current agreement is 19 percent less than the \$699,000 per year that the SBBC paid during the County's 2006-2009 fiscal years. In late 2009, the County was able to lower agreement costs after securing lower collection contract pricing resulting from the County's 2009 rebid of recyclables collection services. This resulted in a \$135,696 savings, per year, to the School District.

The master agreement between The School Board of Broward County, Florida, and Broward County expired on September 30, 2009. Article 5.3 of the agreement automatically renewed the agreement for a period of one year. The first amendment extended the master agreement until October 31, 2012. This second and final amendment will extend the agreement, with no cost increase to the District, until September 30, 2013. However, the agreement may be unilaterally terminated by either party, provided that thirty (30) days written notice of such termination is given to the other party.

In 2009, Choice Environmental Services replaced Waste Management, Inc. as the recycling service provider for all District schools, offices and buildings. Choice Environmental Services will continue to provide weekly contracted recycling collection services from approximately 340 dumpsters at all schools and facilities. Choice has enhanced the recycling collection by accepting all recyclables from one dumpster. The following recyclable materials will be collected, processed, and marketed through the program:

Mixed Paper including:

- Flattened corrugated cardboard
- Boxes
- Office and copier paper
- Newspapers
- Envelopes and junk mail
- Magazines and catalogs
- Manila folders
- Computer paper and laser printer paper
- Books, telephone books, Print shop paper, note pads

Co-mingled Food and Beverage Containers including:

- Aluminum cans
- Steel cans of 2 gallons or less
- Aseptic juice boxes, milk and juice containers
- Glass bottles and jars
- Plastic bottles and jugs

Recycling is cost effective. The recyclables collected as part of this program are removed from the solid waste stream, which in turn proportionately decreases the volume of solid waste that needs to be collected and disposed of by the school system. Commercial and institutional solid waste collection contracts are structured based on a combined cubic yard collection and disposal rate. During the 2010-11 school year, the cubic yard rate for the school system's recycling program was approximately \$5.61 per cubic yard.

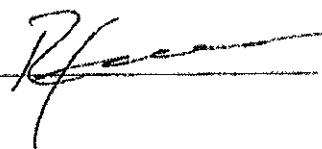

Conversely, the average cost for waste disposal was \$15.25 per cubic yard. The estimated avoided disposal savings for last school year are reflected in the below chart.

Table 2: Estimated Avoided Disposal Savings 2010-12 School Year

School Year	Recyclables Collected (in Cubic Yards)	Rates per Cubic Yard		Comparative Costs		Avoided Disposal Savings
		Recycling	Disposal	Recycling Program Costs	Disposal	
2010-11	100,170	\$5.61	\$15.25	\$563,304	\$1,532,168	\$968,864
2011-12*	57,626	\$4.88	\$14.93	\$281,650	\$860,356	\$578,706

**January 2012 - July 2012 time frame*

The \$1,547,570 in avoided disposal savings underscores the cost savings of recycling. The annual cost of recycling under the second amended agreement will remain \$563,304. The recycling program continues to pay for itself through avoided waste disposal.

COUNTY agrees to comply with all requirements of Sections 1012.32 and 1012.465, Florida Statutes, and that COUNTY and all of its personnel who (1) are to be permitted access to school grounds when students are present, (2) will have direct contact with students, or (3) have access or control of school funds will successfully complete the background screening required by the referenced statutes and meet the standards established by the statutes. This background screening will be conducted by SCHOOL BOARD in advance of COUNTY or its personnel providing any services under the conditions described in the previous sentence. COUNTY will bear the cost of acquiring the background screening required by Section 1012.32, Florida Statutes, and any fee imposed by the Florida Department of Law Enforcement to maintain the fingerprints provided with respect to COUNTY and its personnel. The Parties agree that the failure of COUNTY to perform any of the duties described in this section shall constitute a material breach of this Agreement entitling SCHOOL BOARD to terminate immediately with no further responsibilities or duties to perform under this Agreement. To the extent permitted by law, COUNTY agrees to indemnify and hold harmless SCHOOL BOARD, its officers and employees from any liability in the form of physical or mental injury, death or property damage resulting in COUNTY's failure to comply with the requirements of

this section or Sections 1012.32 and 1012.465, Florida Statutes. Nothing herein is intended to serve as a waiver of sovereign immunity by any party to which sovereign immunity may be applicable.

SUBJECT: **2010-2011 ANNUAL PAPER RECYCLING REPORT**

The School Board of Broward County's 2008-2012 Strategic Plan lists Environmental Stewardship as a system goal. This goal recognizes the importance and value of recycling at all district schools and administrative locations. Our objective is to be a community and national leader in the recycling movement. Through our paper, cardboard, can and plastic recycling program, we are able to meet Goal 7: Ensure district's leadership as an environmental steward through innovative ecology and energy conservation programs.

During the 2010-11 school year, approximately 2,152 tons of recyclable paper, cardboard and limited amounts of commingled metal and plastic food/beverage containers were collected from 245 Broward public schools and facilities. This represents an increase of 149 tons (7%) over the tonnage collected in 2009-10.

Through our interlocal agreement with Broward County Government, recycling dumpsters, classroom bins and intermediate wheeled containers are provided to assist in the collection of recyclable materials. School service staff and student environmental clubs are usually responsible for emptying recyclables from classrooms and transporting them to centralized collection areas. Recyclables are collected from recycling dumpsters typically located near schools and facilities loading dock and trash collection corrals. Recyclables are collected at each facility at least once weekly, with some schools requiring multiple collections each week.

Environmental Stewardship Benefits

Recycling has numerous environmental and energy benefits when compared to traditional disposal including conservation of natural resources, energy savings and pollution reduction with associated reductions in Greenhouse Gas (GHG emissions). Waste reducing practices such as recycling reduces the demand for raw materials, which conserves energy and reduces GHG emissions. Energy savings benefits of the SBBC recycling program can be calculated by inputting tonnage data into models developed by the U.S. Environmental Protection Agency. Table 1 reflects annual and historical environmental benefits of our program since inception in 1992.

Table 1: Estimated Environmental Benefits of SBBC Recycling Programs 2010-11 and Historical

	<u>2010-11 School Year</u>	<u>Historical (1992-11 School Years)</u>
Tons Collected Recyclables	2,152	34,330
Est. Metric Tons of Carbon Equivalent Emission Reductions	2,153	25,791
Est. Equivalent Gallons of Gasoline Savings	896,206	14,309,602
Est. Number of Trees Saved	35,927	572,986

Cash Revenues

Recycling program revenues earned by SBBC for the 2010-11 school year total \$121,286. The recyclables collected through the SBBC program are marketed along with recyclables collected by the Broward County Resource Recovery System's 26 partner cities and receive net revenue of \$56.36 per ton. All cash revenues are deposited into the school system's general fund account.

Avoided Disposal Benefits/Recycling's Return on Investment

The recyclables collected as part of this program are removed from the solid waste stream, which in turn proportionately decreases the volume of solid waste that needs to be disposed of by SBBC. Most commercial and institutional solid waste contracts are structured based on a combined cubic yard and disposal rate. During the 2010-11 school year, the cubic rate for the SBBC recycling program was approximately \$5.61 per cubic yard. Accordingly, SBBC was paying an average cost of \$15.25 per cubic yard for solid waste disposal system-wide. These price differences factored across the entire system reflect estimated avoided disposal savings of approximately \$968,864.

Table 2 below details the estimated avoided disposal savings for the SBBC during the 2010-11 school year.

Table 2: Estimated Avoided Disposal Savings 2010-11 School Year

<u>School Year</u>	<u>Recyclables Collected (in Cubic Yards)</u>	<u>Rates per Cubic Yard</u>		<u>Comparative Costs</u>		<u>Avoided Disposal Savings</u>
		<u>Recycling</u>	<u>Disposal</u>	<u>Recycling</u>	<u>Disposal</u>	
2010-11	100,470	\$5.61	\$15.25	\$563,304	\$1,532,168	\$968,864

Program Expenses

The School Board of Broward County and Broward County Board of Commissioners have partnered in recycling since 1992. On February 17, 2010, the parties extended an interlocal agreement for joint comprehensive recycling services. This agreement expires on October 31, 2012. Under the recycling interlocal agreement with Broward County Government, SBBC pays a fixed annual fee amount of \$563,304 for recycling services. The interlocal agreement provides no escalation of costs to SBBC. The cost for recycling services is contractually fixed at \$563,304 for the entire three years term of the agreement.

Program expenses include weekly contracted recycling collection services from all SBBC schools and facilities, program management, collection dumpsters, classroom containers, intermediate wheeled containers, customer service and complaint resolution.

Summary

During the 2010-11 school year, the program saw an increase in the amount of recyclables collected. Tonnage recycled increased seven percent when compared to the 2009-10 school year. This increase is credited to the implementation of the single stream or all-in-one recycling system that was introduced in 2010. Single stream recycling allows for all program recyclables including paper, cardboard, plastic bottles and cans to be collected in the same recycling bin.

Avoided disposal savings is \$968,864 for the 2010-11 school year. Program costs were \$563,304 resulting in a total savings of \$405,560. Recyclable revenues of \$121,286 also helped offset program costs. The data reaffirms that recycling is cost effective as well as beneficial to our environment.
