Broward Science Charter School

Charter School Application

By

Discovery Education Services, Inc.

Submitted to the School Board of Broward County
August 1, 2013

NAME OF PROPOSED CHARTER SCHOOL: Broward Science Charter School

NAME OF FLORIDA NONPROFIT CORPORATION THAT WILL HOLD THE CHARTER:
Discovery Education Science, Inc.

The Corporation has applied for 501-C3 Non-profit Status: Yes ___X_____ No _____

Provide the name of the person who will serve as **the primary contact** for this Application. **The primary contact** should serve as the contact for follow-up, interviews, and notices regarding this Application.

NAME OF CONTACT PERSON: Yalcin Akin

TITLE/RELATIONSHIP TO NONPROFIT: Executive Director

MAILING ADDRESS: 2427 Lynx Ln, Orlando FL. 32804

PRIMARY TELEPHONE: (407) 967 7062 **ALTERNATE TELEPHONE:** (407) 253 7304

E-MAIL ADDRESS: akin@orlandoscience.org

NAME OF EDUCATION SERVICE PROVIDER (if any): N/A

NAME OF PARTNER ORGANIZATION (if any): N/A

Projected School Opening: Fall __X____ Spring ____ School Year __2014_____

Term of Charter Requested ___5 years____

School Year	Grade Levels	Total Projected Student Enrollment
First Year	K-6	Up to 400
Second Year	K-7	Up to 500
Third Year	K-8	Up to 600
Fourth Year	K-8	Up to 700
Fifth Year	K-8	Up to 800

I certify that I have the authority to submit this application and that all information contained herein is complete and accurate, realizing that any misrepresentation could result in disqualification from the application process or revocation after award. I understand that incomplete applications will not be considered. The person named as the contact person for the application is so authorized to serve as the primary contact for this application on behalf of the organization.

_____ _____   _Executive Director__
Signature   *Title*
__Yalcin Akin, Ph.D._____   ___August 1, 2013___
Printed Name   Date

STATEMENT OF ASSURANCES

This form must be signed by a duly authorized representative of the applicant group and submitted with the application for a charter school.

As the authorized representative of the applicant group, I hereby certify under the penalties of perjury That the information submitted in this application for a charter for Broward Science Charter School is accurate and true to best of my knowledge and belief; and further, I certify that, if awarded a charter, the school:

- Will be nonsectarian in its programs, admission policies, employment practices and operations

- Will enroll any eligible student who submits a timely application, unless the school receives a greater number of applications than there are spaces for students, in which case students will be admitted through a random selection process.

- Will adhere to the antidiscrimination provisions of section 1000.05, F.S.

- Will adhere to all applicable provision of state and federal law relating to the education of students with disabilities, including the Individuals with Disabilities Education Act, section 504 of the Rehabilitation Act of 1974; and Title II of the Americans with Disabilities Act of 1990.

- Will adhere to all applicable provisions of federal law relating the students who are limited English proficient, including Title VI of the Civil Rights Act of 1964 and the Equal Education Opportunities Act of 1974.

- Will participate in the statewide assessment program created under section 1008.22, F.S.

- Will comply with Florida statutes relating the public records and public meetings, including chapter 119, Florida Statutes, and section 286.011, F.S. which are applicable to applicants even prior to being granted a charter.

- Will obtain and keep current all necessary permits, licenses and certifications related to fire, health and safety within the building and on school property.

- Will provide for an annual financial audit in accordance with section 218.39, F.S.

The governing board, at its discretion, allows Dr. Yalcin Akin, Executive Director sign as the legal correspondent for the school.

TABLE OF CONTENTS

Preface

The mission of Broward Science Charter School (The School) is to provide students with a well-rounded elementary and middle school (K-8) education through teaching of mathematics and science in the light of proven and innovative instructional methods in a stimulating environment. The purpose is to prepare students to reach their maximum potential in all subjects with special emphasis on mathematics, science, and reading using research based exemplary curricula

Recognizing that educational success can be realized only when the student-teacher-parent triad is in harmony, The School intends a partnership among this triad that will enable our youth to reach their highest potential -intellectually, socially, emotionally, and physically. We believe that each child has an inherent curiosity and love of learning; and that each child has a unique intelligence, level of capability, and learning style. With this in mind, our students will strive toward their highest levels of capability with an education addressing their individual learning styles, thus fostering within them a life-long love of learning.

The School has the responsibility to construct a program, which engages and motivates students to invest their talents, energy, and enthusiasm in completing their schoolwork in an exemplary manner. In addition, continuous improvement, persistent innovation, positive response to change, and a commitment to incessant growth are characteristics of the School people and programs.

According to results of the Third International Mathematics and Science Study (TIMSS, 1995; TIMSS-R, 1999), children in the United States were among the leaders in the fourth-grade assessment, but by high school achievement they were almost last among the students of 38 nations. The latest TIMSS 2007 results also indicated that although there is a slight performance increase among U.S. students compared to other countries, no significant difference is evident among students in general and on average U.S. students are still outperformed by some other OECD countries. Likewise, the National Assessment of Educational Progress basically substantiates the students' poor performance. It is obvious from the evidence already at hand that we are not doing the job that we should do—or can do—in teaching our children to understand and use ideas from these fields. Our children are falling behind; they are simply not "world-class learners" when it comes to mathematics and science. As the School, we are aware of this insufficient mastery of basic knowledge and skills required for further academic achievement in math and science. The School will use a variety of teaching methods to (a) ensure mastery of appropriate skills, ideas, and knowledge for all students, regardless of race, gender, or the family's socioeconomic background, and (b) give students the ability to transfer these skills to new applications. Furthermore, we agree with the recommendations of the National Council of Teachers of Mathematics and the National Science Education Standards that innovative ideas, research findings, and research-based instructional approaches be utilized in teaching and learning of these fields.

The School will engage students in a rigorous, innovative, standards-based curriculum aligned with the Next Generation Sunshine-Common Core State Standards, with special emphasis on science and mathematics. In addition, reading and literacy will always be the priority and reading curricula will be aligned with the School Board of Broward County's Reading Plan.
Finally, we believe that an educated citizen in the 21st century must have the skills and understanding to participate and work productively in a multicultural, globally-oriented environment, including the skills required to use technology to its full potential in the new millennium.

PART A

Broward Science Charter School

Charter School Application

I. EDUCATIONAL PLAN

1. Mission, Guiding Principles and Purpose

1.A. Provide the mission statement for the proposed charter school

The mission of Broward Science Charter School (BSCS) is to provide students with a well-rounded elementary and middle school education with special emphasis on (STEM) Science, Technology, Engineering, Mathematics, and Reading in the light of research based, proven and innovative instructional methods in a stimulating environment.

The purpose is to instill math and science education to all students in a nurturing environment using inspiring learning opportunities and to prepare students to reach their maximum potential in all subjects using researched based exemplary curricula such as Everyday Math, Project M3: Mentoring Mathematical Minds, College Preparatory Mathematics (CPM), Science and Technology for Children (STC), Foundational Approaches in Science Teaching (FAST), Imagine It, Read XL or Jamestown Reading and Accelerated Reader. Research on these programs has shown that these programs are effective and accessible to "all levels of students," not only high performing students.

1.B. Describe how the school will utilize the Guiding Principles found in s. 1002.33(2)(a)

1.B.1. Meet high standards of student achievement while providing parents flexibility to choose among diverse educational opportunities within the state's public school system

Charter schools provide a choice to the parents within the state's public school system. In accordance with the law, The School will "meet high standards of student achievement while providing parents flexibility to choose among diverse educational opportunities within the State's public school system". Opening of the School will give parents and students a choice of rigorous mathematics and science focused programs with a special emphasis on reading in Broward County. The School's educational program will support a highly-rigorous academic curriculum and environment that sets high expectations for all students, teachers, parents, and staff members and fulfill its mission in the following ways:

- A clear focus on academic excellence: The School will provide state-of-the-art curricula that were designated as exemplary by the U.S. Department of Education in mathematics and science as well as rigorous reading programs consistent with effective teaching strategies, that incorporates the Next Generation Sunshine-Common Core State Standards, as adopted, with a scientifically–based reading initiatives. The delivery of the curricula will be enhanced by innovative and balanced instructional methods such as project-based instruction, computer-enhanced activities, contextual learning, cooperative learning, direct and differentiated instruction, and self-directed learning. Academic

excellence will be facilitated by a team of highly-qualified faculty, and it will be supported by collaboration with parents and partnerships with local higher-education and civic institutions.

- <u>A comprehensive assessment program:</u> A variety of student assessments, including state assessment programs, benchmark tests, unit tests developed locally, classroom-based assessments, faculty and staff evaluations, and school climate surveys will be used to evaluate teaching and learning processes and to improve the school environment on a consistent basis to continuously monitor, evaluate, and improve both curriculum and teaching strategies to achieve continuous student improvement year to year.
- <u>Promoting maturity and independence:</u> The school will strive to foster self-confidence, self-respect, and self-control in each student through group process skills and cooperative learning, the development of conflict resolution skills, and the expectation of accepting responsibility for one's actions. The academic environment will promote high expectations of each student in the pursuit of excellence (e.g., through participation in academic competitions such as Math Counts, Science Fairs, History Fair, and Science Olympiads) and skills needed for life-long learning (e.g., through effective computer skills to travel in the global information highway).
- <u>Providing balance:</u> Educational programs at The School will educate the entire student body by providing a rigorous education in math, science, and technology, with a strong emphasis on low-performing students and reading; encouraging serious exploration of the arts and humanities; developing student awareness of local and community needs as well as an understanding of national and global issues; and striving to reach academic excellence for all the students while at the same time recognizing individual differences.
- <u>Character education and parental involvement:</u> In collaboration with parents, teachers, and community members, the School will provide character education to meet the unique needs of the school and local community. The School will provide opportunities for active involvement of students, families, and the community partners in the educational process. In addition to scheduled school wide parent conferences, the school will communicate with parents on a mid-quarter and quarterly report cards that explains the exact skills and academic achievements students have accomplished.
- <u>Subject teachers in/after 4th Grade:</u> The elementary school will have two parts. In the lower grades (Grades Kindergarten thru 3), the instruction will be carried out by classroom teachers. Students in upper grades (grades 4 and 5) will receive specialized subject teachers in Math and Science.
- Online progress monitoring for parents that includes behavior and attendance as well as the academics
- Home visits to families to close the gap among parents-teachers-students-administrators

1.B.2. Promote enhanced academic success and financial efficiency by aligning responsibility and accountability

The student performance data will be the first accountability indicator for the School constituents. The indicators of the School success will depend upon: effective governance and financial stability; strength of the faculty; articulation of the school's mission by staff and

faculty; vitality of the curriculum and the nature of the learning environment; the quality of community life and the effective leadership; a positive climate of cooperation and trust among all constituents, loyalty and enthusiasm of staff and leadership; and ultimately student experience, the growth and development of the students while they are at the school. Results from state and district standardized exams as well as student records from previous schools (as applicable) will be used to gather baseline data on each student. The data may include standardized test scores, report card grades, attendance records, and behavioral records, Educational Plan (EP), Individual Education Plans (IEP), and/or ELL Plans. This data will be made available to teachers and parents who, as stakeholders, will share the responsibility of providing appropriate services to promote student academic success. Indicators of the school success will be as follows:

- School performance according to Florida's school grading system (A, B, C, D, F);
- Student proficiency on the FCAT 2.0, EOC and PARCC
- Annual performance gains in the students' FCAT 2.0, and PARCC scores
- Retention rate at Grade 3
- Learning gains in Reading and Math for those who are below grade level.
- Lower drop-out rate compared to the district and the state drop-out rate;
- A safe school environment as determined by student, teacher, and parent surveys;
- Student, parent and teacher satisfaction with the School; and
- Sound financial CPA audit reports furnished by the School.
- Strong financial controls

1.B.3. Provide parents with sufficient information on whether their child is reading at grade level and whether the child gains at least a year's worth of learning for every year spent in the charter school

Continuous communication regarding students' progress will occur between the School and parents through progress reports, quarterly report cards as well as parent-teacher conferences, and the School will utilize other appropriate forms of electronic, written and oral communications.

Parents will be provided with additional performance information like Educational Plans (EPs), Individual Education Plans (IEP), and individual Limited English Proficiency (LEP) plans (as applicable). Furthermore, consistent with the Just Read, Florida! initiative, the School will provide FCAT 2.0-PARCC assessment results to parents on an annual basis, for every year their child participates FCAT 2.0-PARCC, to communicate whether or not their child is reading at grade level and whether or not their child has gained a year's worth of learning for every year spent at the School. Baseline data will be established for each grade level. In order to do this students' cumulative records from school(s) previously attended will be examined by student services personnel to determine the successes, strengths, and weakness experienced during students' prior educational experiences. The baseline data will include, but will not be limited to, standardized test scores, benchmark tests, report card grades, possible informal procedures, alternative assessment instruments, attendance records, and behavioral records including

exemplary behavior and in-school and out-of-school suspensions. This data will be made available to teachers who will assess progress against it. Based on the information collected from this informal diagnosis process, the teacher, parent(s), and the student will set appropriate goals for the student. Student grades and progress will be available and provided to parents and students by an online Student Information System. Teacher-parent-student conferences will be held throughout the year to review goals that were set for students, to monitor student progress, and to set new goals for students. During these conferences, parents will be informed about the reading progress of their child (children) as well as about overall progress in general. Florida Assessments for Instruction in Reading (FAIR) scores, as well as other standardized test scores, will be explained to both parents and students. Teachers will monitor the programs to identify alternatives as needed in order to most effectively meet the needs of students.

Ongoing communication regarding the child's progress will occur between the School and the parents through mid-quarter progress reports; quarterly report cards as well as at parent Conferences. Teacher-parent-student conferences will be held throughout the year to review the goals that were set for the student, to monitor the student's progress, and to set new goals for the student. During the conferences the parents will be informed about the reading progress of his child as well as about overall progress in general. Standardized tests scores will be explained to both the parent and the student. Once the academic performance data is disaggregated, the School will identify students who are not making adequate progress towards Next Generation Sunshine-Common Core State Standards, and institute applicable measures for improvement. The data will also be shared with parents of those students. The School, including its instructional programs, will be open to recommendations regarding its instructional programs from the community, the Broward County School Board, and climate survey suggestions.

1.C. Describe how the school will meet the Prescribed Purposes of a charter school found in s. 1002.33(2)(b)

1.C.1. Improve student learning and academic achievement

The School will offer a well-rounded educational program that focuses improving student learning and academic achievement. To meet this goal, the school commits to:

• Set high expectations for all students to realize their highest academic potential especially in mathematics, science, technology and language arts education and provide the means to students to reach their potential,

• Improve student learning and achievement by pre-assessment and screening to ensure that all students are at their appropriate instructional level in reading and math; and if not, then by prescribing a specific learning plan to enable the student to reach grade level expectations,

• Match or surpass the average student academic performance in all required public accountability tests including EOC, FCAT 2.0 and PARCC,

• Provide exemplary academic curricula with innovative and proven instructional methods to give each student the chance to be prepared for attending a college of their choice,

• Provide continuous progress monitoring toward student success,

• Seek and establish sound and mutually beneficial partnerships with local higher education and civic institutions to provide a wide array of educational experiences for the students,

• Actively seek all opportunities to participate in national and international academic competitions,

• Promote respect and awareness of cultural diversity in all students by providing a culturally sensitive curriculum and educational programs,

• Utilize data driven instruction wherein student assessment results will be used for differentiated and targeted instruction, leading to consistent increased student achievement.

1.C.2. Increase learning opportunities for all students, with special emphasis on low-performing students and reading

The School's curricula are research based and nationally recognized that use inquiry based instructional models proven to work for all students with a special emphasis on low-performing students and reading. The School will carefully monitor student performance. Those students who are low performing and not making adequate progress and/or not demonstrating proficiency will be provided extra help through special programs such as mentoring, tutoring, weekend school. Those students whose reading scores fall below the acceptable proficiency levels will be recommended to enroll in an intensive reading program. The school will use exemplary reading intervention programs such as Read XL or Jamestown Reading Navigator and/or Imagine It to improve reading and increase reading achievement. According to Florida Center for Reading Research, these programs address the five areas of reading instruction identified by Reading First as being critical to the development and mastery of reading: phonemic awareness, phonics, vocabulary, fluency, and comprehension. These programs are highly structured and individualized and offer students step by step progression in addition to addressing the reading/language arts curriculum for nonreaders, second language learners, students with special education needs, and below average readers.

Furthermore, the School's curriculum will serve students of all ability levels in accordance with the NGSSS-CCSS. Remedial students and students with special learning needs will have access to supervised study time and after school tutoring or weekend studies to accelerate their progress.

1.C.3. Encourage the use of innovative learning methods

The innovation of the School will be use of exemplary curriculum delivered through a variety of proven instructional methods, while setting high academic expectations for all students and providing them with the means to reach their goals. The core curriculum will incorporate and be

aligned with the Next Generation Sunshine-Common Core Standards and will provide rigorous core courses customized to meet specific students needs. Innovative instructional design that includes proven programs that work for all students including at risk as well as academically gifted students. Mathematics, Science, and Reading programs that will be utilized at the School are as follows;

- ❖ Mathematics
  - ➢ Everyday Mathematics
  - ➢ Project M3: Mentoring Mathematical Minds (Gifted Program)
  - ➢ The College Preparatory Mathematics (CPM)
- ❖ Science
  - ➢ Science and Technology for Children (STC)
  - ➢ Developmental Approaches in Science, Health & Technology -DASH (Gifted Program)
  - ➢ Foundational Approaches in Science Teaching (FAST)
  - ➢ Glencoe integrated science
- ❖ Reading
  - ➢ Read XL or Jamestown Reading
  - ➢ Imagine It
  - ➢ Accelerated Reader

In addition to these proven successful programs, the School staff will utilize current best practices in their teaching to improve student learning in all areas. The following list is not exhaustive and serves as a sampling of the instructional methods and strategies that will be utilized by the School faculty. (Details are presented in the educational program section and Appendix A).

- Exemplary Computer-enhanced Support
- Project-Based Instruction
- Interdisciplinary Learning
- Alternative Assessments
- Contextual Learning
- Direct Instruction
- Differentiated Instruction
- Higher Order Thinking
- Scientific Reasoning Skills
- Inquiry-Based Curriculum
- Integrating Science with Non-Science Curricula
- Language-Based Approach
- Multi-sensory approach to learning
- Multiple Intelligence
- Data-Driven Decision Making
- Supporting and Stimulating Student Comprehension
- Improving Motivation

- Encouraging Family Involvement/Home visits
- After school extracurricular activities/tutoring

In addition, the School faculty evaluations will have components to assess innovativeness, in addition to other professional areas of concern. This will ensure the instructional staff to maximize their potential to research, invent, and learn different and innovative practices to use in their day to day teaching.

The following items will help school indirectly implementing innovative methods;
- School uniform as part of very successful discipline system which creates an environment conducive to learning.
- Subject teachers in/after 4th Grade: The elementary school will have two parts. In the lower grades (Grades Kindergarten thru 3), the instruction will be carried out by classroom teachers. Students in upper grades (grades 4 and 5) will receive specialized subject teachers in Math and Science.
- College bound program in middle school with high school accelerated courses such as Algebra I, Geometry, Biology, Foreign Language
- Small student-teacher ratio
- Home visits to close the gap between parent/students/teacher/admin
- Online student tracking system for parents to monitor students behavior and academic progress

The mathematics curriculum will be integrated throughout the entire school curriculum to the greatest extent possible. It will offer a range of courses to meet the students' different developmental and ability levels. By employing researched based math curriculum, the School will have the advantage of a complete mathematics curriculum that helps students develop understanding of important concepts, skills, procedures, and ways of thinking and reasoning through numbers, geometry, measurement, algebra, probability, and statistics.

In addition, manipulatives will be integrated into the math classes. One reason that students struggle in mathematics is that they consider it to be a highly abstract subject. Using manipulatives can be a very effective tool to help students move from abstract thinking to concrete thinking. Manipulatives, such as pattern blocks, fraction circles, and square tiles, can contribute to the students' understanding of mathematical ideas by giving them concrete ways to compare and operate on quantities.

In order to implement the school science curriculum, the School will adapt the proven instructional science curricula mentioned above. By employing these curriculums, hands-on science will be offered to the students. The students will be directly involved in forming ideas, asking questions, making observations, and conducting experiments. Students will be up and about in the lab and actively working with other students to discover new ideas. A guiding premise of these programs assumes that all students -regardless of age, sex, or ethnicity- can enjoy success in science. Students will question the workings of their world and find answers in active reading, listening, discussion, and hands-on learning. The students will grapple with scientific principles as they learn how to appreciate a less-than-intuitive universe, and they will come to value those things we take for granted in our daily lives.

The School's reading program will be aligned with the Broward County Schools' Reading Plan. However, The School will not be restricted to the content of the reading program offered by the district, in that, extra elements will supplement the reading program. The School will implement proven reading intervention program(s), such as Jamestown Reading or Read XL, Imagine It and/or Academy of Readings interventions, which are aligned with the Reading First according to FCRR. The School recognizes that reading is not only important for students to achieve success during their K-8 education, but also a requisite skill for secondary education and to achieve life-time success. The School will implement effective reading and reading intervention programs, which are aimed at developing proficient reading skills for all students at all grade levels and meet the requirements outlined in Section 1002.33, Florida Statutes. The School believes that high-quality instruction, reading text materials, and resources play prominent roles in the development and improvement of the students' reading and comprehension abilities at all levels.

1.C.4. Require the measurement of learning outcomes

Rather than serving solely as a means to judge an end product, assessment of student performance will be an integral component of measuring learning outcomes. Students will learn to understand that assessment is a part of the process of continuous improvement. Continuous assessment of student performance is an integral component of the individual's learning.

Each student's increased learning is the goal of the School's mission that each and every student at the school will be given ample opportunity to reach their highest potential on a daily basis. Completing an examination or a term paper will not be the focal point of the student's day. The School's educational environment will be constructed in a manner that instills in the students belief that learning is continuous and that errors or mistakes are not red marks on a paper signifying failure, but are check-in points to show the way toward continuous improvement. At the School, failure is viewed as a natural part of learning, an inherent characteristic of constant growth and development. Each student will be challenged to reach to and beyond what they believe they are capable.

The School's assessment methods are based on the following beliefs:

• In order to have a complete picture of a student's achievement, different types of assessments must be used. Assessments for individual students should focus on a student's progress towards a proficiency standard rather than comparing a student's performance against other students.

• There should be a close relationship between a desired student outcome and the means used to assess it.

• Assessing what students do with knowledge is as important as assessing what knowledge they have.

• Assessment should promote and support reflection and self-evaluation on the part of the students, staff and parents.

The School assessment procedure will provide valid, reliable, and timely information to teachers so they can modify their instruction, monitor student progress, select appropriate classroom activities, and use assessment results effectively. The purpose is to inform teachers about the effectiveness of their teaching and the progress made by the students in order to ensure their continuous progress.

Assessments will include teacher-constructed tests, completed assignments, observations and ratings of performance, portfolios of student work, text-based assessments, computer-assisted assessment, FCAT 2.0/PARCC/EOC, norm and criterion referenced tests, and other methods appropriate for the benchmarks. Based on FCAT 2.0/PARCC and other appropriate assessment data for appropriate grade levels, the School will identify students not making adequate progress towards proficiency and take appropriate measures for remediation in reading and other prescribed subjects.

The specific assessments to be utilized will include the following:
- Florida Kindergarten Readiness Screener (FLKRS) to gather information on a child's overall development and to specifically address the readiness of each student for Kindergarten
- Florida Comprehensive Test (FCAT 2.0) in grade 5 and 8 for Science and
- PARCC in applicable grade levels for ELA and Mathematics.
- EOC in applicable grade levels and subjects such as Algebra, Geometry, Biology, Civics, US History
- FAIR Test
- MAP testing (K-5)
- AR Star testing
- Study Island pre and post test
- Teacher made tests – Essays, Multiple Choice, Projects, Portfolios
- Internal School wide benchmark tests
- District benchmark tests as available

1.D. Describe how the charter school will fulfill, if applicable, the Optional Purposes of charter schools found in s. 1002.33(2)(c)

1.D.1. Create innovative measurement tools

In math, the school will provide a problem-centered curriculum and is organized into units that address ideas through a series of "investigations." Each investigation contains problems for teachers and students to explore. As students explore a series of connected problems, they develop a profound understanding of important mathematical concepts that are embedded within

the problems. The math curriculum uses a variety of teaching methodologies, including lecture, class discussions, manipulatives, and structured study teams. During class, students will be actively working on guided investigations, much like "math labs," to develop mathematical concepts and problem solving skills. The program strategies emphasize active learning and group work; students are introduced to problem solving, communication, and reasoning through laboratory experiments and real-world applications. Concepts are developed through guided instruction, individual and team work, tactile and kinesthetic activities, data collection, class work, and homework. Students are encouraged to develop a positive attitude toward mathematics, to become more aware of their own thinking about problems, and to describe their efforts, both orally and in writing.

In science, students will develop a scientific world view by doing science: generating questions, designing and carrying out experiments, collecting and analyzing data, researching, drawing conclusions based on evidence, writing reports, and communicating findings. Students will work in small collaborative groups that function as research teams, becoming producers rather than just receivers of information.

In reading, in addition to FAIR, the measurement tools such as quizzes, portfolios, formative and summative tests, practice tests specifically designed by Jamestown or Read XL, Imagine It and/or Accelerated Reader will be used for both student progress and student achievement.

By using multiple measures embedded within the curriculum, teachers have the ability to make determinations about individual student successes and modify instruction as needed to ensure that students are on the path to reach their achievement goals.

For example, in reading programs, each week's lesson begins with background building activities called create interest, build a mental model, and unlock text structure. These activities guide students to make predictions about the text, visualize the setting, and understand the organization of the lesson's genre. Frequent teacher-directed questions embedded throughout the text encourage students to monitor understanding. Specific strategies such as character analysis, sequence, fact/conclusion, main idea, summary, compare/contrast, and story grammar are introduced in a lesson and then applied as appropriate in subsequent lessons. A final wrap up of the reading activity provides literal and inferential questions for class discussion. Unique to these reading programs is an activity following each lesson called real-world reading which includes authentic text presentations of maps, movie reviews, medicine bottle labels, menus, pie charts, bar graphs and other relevant and meaningful examples. The instructional routines built into the reading programs are consistent and teacher friendly, and include direct instruction, modeling, guided practice, student practice, and application with feedback.

Besides the traditional teacher made measurements, and required standardized tests, the school will employ online web-based Acuity benchmark test system in Reading, Math, and Science. The measurements will provide valid, reliable, and timely information to teachers so they can modify their instruction, monitor student progress, select appropriate classroom activities, and use assessment results effectively. The purpose is to inform teachers about the effectiveness of their teaching and the progress made by the students in order to ensure their continuous progress.

The school climate surveys from parents, students and teachers will be used to evaluate teaching and learning processes and to improve the school environment on a consistent basis. Projects, portfolios, computer-assisted assessments, and exhibitions will be part of the measurement.

1.D.2. Provide rigorous competition within the public school district to stimulate continual improvement in all public schools

After implementing various educational programs, The School will share the best practices and innovations with other schools to stimulate the continual improvement in Broward County. The School seeks to provide rigorous competition within the local school district, and thereby stimulate continual improvement in all public schools through the creation of a new innovative program with a focus on math and science and innovative study methods. It is the goal of School to provide students with a quality choice education which produces successful, high performing students.

1.D.3. Expand the capacity of the public school system

Charter schools provide a choice to the parents within the State's public school system. Opening of the School will give parents and students a choice of rigorous mathematics and science focused program with a special emphasis on reading in Broward County.

1.D.4. Mitigate the education impact created by the development of new residential dwellings units

The School intends to open the school in a region that public elementary and middle schools are overcrowded. This will help the school to find targeted number of students and help the district to share the burden and comply Florida class size reduction act in classroom level.

1.D.5. Create new professional opportunities for teachers, including ownership of the learning program at the school site

In order to utilize the research-based math, science, and reading programs, all teaching staff will receive ongoing professional development on different components of the programs for effective implementation. The School experience will play a key role and model helping to create new professional opportunities for teachers, including ownership of the learning program at the school site. Teachers and the staff will take the ownership of the programs by reviewing all aspect of the programs, discussing and modifying the programs as needed towards students' success. All instructional staff will be encouraged and supported to participate in professional development programs, conferences, or workshops in order to grow academically, enhance their skills, and get current updates in their areas, and bring new horizons to the school. In addition, the school will seek opportunities from local universities and research centers, and the School District in order to accomplish these goals. In addition, at the end of the school year, administrators and faculty complete a survey to provide input on the current learning programs in place and the professional development provided throughout the year. These results are analyzed

and used along with student performance data to facilitate the school improvement process. The professional development schedule is created upon completion of data and needs assessment analysis. If analyzing different sources of student and teacher data throughout the year presents a need for additional professional development, the schedule is revised to include in-service to meet those training needs.

2. Target Population and Student Body

2.A. Describe the anticipated target population to be served

The School will be open to children in Kindergarten through 8th grade who would qualify to attend a traditional public school in Broward County. The School will seek a racially and ethnically diverse student body and offer all its students excellence and equity in education. Every applicant will be given equal opportunity in the admissions process, excluding those students who have been expelled from a public or private school because of serious discipline problems. The School emphasizes that any eligible applicant will be accepted regardless of race, color, national origin, religion, sex, ethnicity, sexual orientation, mental or physical disability, age, ancestry, or athletic performance. We welcome all eligible applicants, since our ultimate goal is to educate our young citizens, and we believe that all citizens are of equal value and deserving of the best education possible. The School will provide enrollment preference to the children of residents of Broward County in accordance with 1002.33(10)(e), 15(c), F.S. (2003).

2.B. Provide the following projection for each year of proposed operation, the grades that the school will serve, the number of students to be served in each grade, the number of students expected in each class and the total number of students enrolled

The School will be a small school with a structured academic environment to deliver its rigorous, innovative educational program. When fully operational, the school will encompass grades K through twelve. The School will comply with the constitutional class size requirements by the State. Currently the State requires school wide class size with a ratio of 18:1 in k-3; 22:1 in 4-8; and 25:1 in 9-12 grade level in core-curricula courses. The school will comply with the State charter school class size requirements. The enrollment projections are shown in Table below

Table - Enrollment projections

Year	Grade Served	Total Number of Enrolled	Number of Students per grade and each class, FL Statutes for charter schools
Year One	Grades K-6	Up to 400	
Year Two	Grades K-7	Up to 500	K-3rd Grade - up to 18 Students
Year Three	Grades K-8	Up to 600	4th-8th Grade - up to 22 students
Year Four	Grades K-8	Up to 700	
Year Five	Grades K-8	Up to 800	

The detailed tentative projections would be:

Grade	year 1	year 2	year 3	year 4	year 5
k	54	54	54	54	54
1	36	54	54	54	54
2	36	36	54	54	54
3	36	36	36	54	54
4	44	44	44	44	66
5	44	44	44	44	44
6	88	110	110	132	132
7		88	110	132	132
8			88	110	132
Total	**338**	**466**	**594**	**678**	**722**
Cap	**400**	**500**	**600**	**700**	**800**

These are tentative plans depending on student applications. BSCS reserves the right to modify the grades and enrollment projections in each grade level in order to best serve the community in accordance with general principles laid out in this charter proposal. The numbers provided herein are estimates, and may fluctuate within each grade level depending on student enrollment and/or attrition in the respective grade levels

2.C. Provide a description of how the student population projections were developed.

It is projected that the school would have 3 classes in K; 2 classes in 1-5; and 4 classes in 6th grade in the first year. In the second year, the school will add one additional grade classes that will carry on to the upper grades in the following years. Based on the initial surveys and interested siblings, this scenario is more likely to occur.

3. Educational Program Design

3.A. Describe the school's daily schedule and annual calendar, including the annual number of days and hours of instructional time

The School will follow the annual calendar set forth by the Broward County Public Schools, requiring at least a minimum of 180 days of instruction per calendar year (minimum of 900 net hours of instructional time in grades 4-8, and a minimum of 720 hours in grades K-3). The hours of instructional time are aligned with state and district requirements for elementary and middle school grades.

Annual Calendar:
The school will offer a minimum of 180 instructional days per year, and will mirror the calendar of the Broward public school district. There will be minimum of one week preplanning and two days post planning for faculty and staff before and after school year.

Daily Schedule:
The instructional day at the School is expected to commence at 8:00 am and end at 3:30 pm each day. Hours of instructional time with 30 min lunch break will be around 6 hours and 30 minutes. Reading FCAT Level 1 and 2 students will have longer uninterrupted reading classes.

A typical elementary schedule would be as follow;

	Monday	Tuesday	Wednesday	Thursday	Friday
8:00-8:30	Breakfast Homeroom	Breakfast Homeroom	Breakfast Homeroom	Breakfast Homeroom	Breakfast Homeroom
8:30-10:30	Class	Class	Class	Class	Class
10:30-11:20	Specials	Specials	Specials	Specials	Specials
11:20-11:40	Class	Class	Class	Class	Class
11:40-12:10	**L**	**U**	**N**	**C**	**H**
12:15-2:00	Class	Class	Class	Class	Class
2:00-2:30	Class/Recess	Class/Recess	Class/Recess	Class/Recess	Class/Recess
2:30-3:30	Class	Class	Class	Class	Class

Specials could be PE, Computer, Foreign Language, Art, Music

Middle School Daily Schedule: The hours of instruction will be aligned with State of Florida requirements regarding the number of minutes (min 180 days or 900 hours) and credits required for instruction. Hours of instructional time with 30 min lunch break will be around 6 hours and 30 minutes daily. The following state requirements will be implemented in the middle school's instructional master schedule:

Grade	Language Arts	Math	Science	Social Studies	Electives	Total
6	1	1	1	1	2	6
7	1	1	1	1	2	6
8	1	1	1	1	2	6

Electives may be PE, Computer, Foreign Language, Art, Music, Writing, Critical thinking, Character Education. Reading ant Math Level 1 and 2 students will have additional intensive classes.

3.B. Describe the proposed charter school's educational program.

The School's educational philosophy is to fully prepare students to carry the torch of knowledge through its proven curricula, as well as the freedom and prosperity that is passed from generation to generation in this great country.

The School will use a variety of instructional methods to (a) ensure mastery of appropriate skills, ideas, and knowledge for all students, regardless of race, gender, or the family's socioeconomic background, and (b) give students the ability to transfer these skills to new applications. Furthermore, we agree with the recommendations of the National Council of Teachers of Mathematics and the National Science Education Standards those innovative ideas, research findings, and research-based instructional approaches be utilized in teaching and learning of these fields.

The School will enhance the instruction in all disciplines by effectively executing the following instructional approaches:

- Exemplary Computer-enhanced Support
- Project-Based Instruction
- Interdisciplinary Learning
- Alternative Assessments
- Contextual Learning
- Direct Instruction
- Differentiated Instruction
- Higher Order Thinking
- Scientific Reasoning Skills
- Inquiry-Based Curriculum
- Integrating Science with Non-Science Curricula
- Language-Based Approach
- Multi-sensory approach to learning
- Multiple Intelligence
- Data-Driven Decision Making
- Improving Motivation

- Encouraging Family Involvement/Home visits
- After school extracurricular activities/tutoring

The innovation of the School will be the use of exemplary curriculum delivered through a variety of proven instructional methods, while setting high academic expectations for all students and providing them with the means to reach their goals. The core curriculum will incorporate and be aligned with the Next Generation Sunshine-Common Core Standards, and will provide rigorous core courses customized to meet specific student needs. The School accepts the School Board of Broward County's Curriculum as its basic curriculum. However, the School will not be restricted to the content of the curriculum, and whenever it is deemed necessary by the School administration, new elements will be introduced to any and all courses offered. Also, other innovative instructional approaches will be utilized, and the methods for supporting and stimulating student comprehension will be explained later sections to demonstrate how the School will meet the statutory purposes of charter schools as mentioned in Section 1002.33 (2), Florida Statutes.

The mathematics curriculum will be integrated throughout the entire school curriculum to the greatest extent possible. It will offer a range of courses to meet the students' different developmental and ability levels. In order to implement the school mathematics curriculum, the School will adopt the proven instructional mathematics curricula, Everyday Mathematics (core curriculum for all students in K-5), Project M3: Mentoring Mathematical Minds (For Gifted Students in K-8), and the College Preparatory Mathematics – CPM (For all students in grades 6-8). In addition, School will offer Algebra 1 and Geometry for eligible students in middle school. Furthermore, the School will utilize computer assisted intervention programs such as Success Maker, Study Island, Focus Florida. By employing these programs, the School will have the advantage of a complete mathematics curriculum that helps students develop understanding of important concepts, skills, procedures, and ways of thinking and reasoning through numbers, geometry, measurement, algebra, probability, and statistics.

In addition, manipulatives (including computer manipulatives) will be integrated into the math classes. One reason that students struggle in mathematics is that they consider it to be a highly abstract subject. Using manipulatives can be a very effective tool to help students move from abstract thinking to concrete thinking. Manipulatives, such as pattern blocks, fraction circles, and square tiles, can contribute to the students' understanding of mathematical ideas by giving them concrete ways to compare and operate on quantities.

In order to implement the school science curriculum, The School will adopt the proven instructional science curricula, Science and Technology for Children - STC (Core Curriculum for all students in grades K-5) and Developmental Approaches in Science, Health & Technology - DASH (For gifted students in grades K-5), Glencoe Integrated Science (Core Curriculum for all students in grades 6-8), Foundational Approach to Science Teaching – FAST (For gifted students in grades 6-8). By employing these programs, hands-on science will be offered to the students. They will be directly involved in forming ideas, asking questions, making observations, and conducting experiments. Students will be up and about in the lab and actively working with other students to discover new ideas. A guiding premise of these programs assume that all students -

regardless of age, sex, or ethnicity- can enjoy success in science. Students will question the workings of their world and find answers in active reading, listening, discussion, and hands-on learning. The students will grapple with scientific principles as they learn how to appreciate a less-than-intuitive universe, and they will come to value those things we take for granted in our daily lives.

The academic environment will promote high expectations of each student in the pursuit of excellence (e.g., through participation in academic competitions such as Math Counts, Science Fairs, History Fair, and Science Olympiads) and skills needed for life-long learning (e.g., through effective computer skills to travel in the global information highway).

The School's reading program will be consistent with the Broward County Schools' Reading Plan. However, the School will not be restricted to the content of the reading program offered by the district, in that, extra elements will supplement the reading program. The School will implement proven reading intervention program(s), Jamestown Reading Navigator or Read XL and/or Imagine It, Accelerated Reader interventions, which will be aligned with the Broward County Schools' Reading Plan. The School recognizes that reading is not only important for students to achieve success during their K-8 education, but also a requisite skill for secondary education and to achieve life-time success. The School believes that high-quality instruction, reading text materials, and resources play prominent roles in the development and improvement of the students' reading and comprehension abilities at the elementary, middle and high school levels.

See "Appendix A" for more detail explanation of above instructional methods and approaches.

3.C. Describe the research base for the educational program

The School will utilize research based curriculum in mathematics, science and reading. The School's educational philosophy and approach described above have been designed with the Schools mission in mind. These approaches create the appropriate environment to enable students to become confident, self-directed, and responsible life-long learners. Research based exemplary curricula have shown that these programs are effective and accessible to "all levels of students," not only high performing students.
See "Appendix A" for more detail explanation of above instructional methods and approaches.

3.D. Describe how the educational program aligns with the school's mission

As a school of choice, BSCS believes its focus on the special methods of teaching mathematics, science and reading will appeal to those students and parents interested in the School's mission. The BSCS educational program will ensure that the school delivers a comprehensive, cross-instructional program to students desiring to achieve in the core content areas. BSCS also believes that data-driven decision-making is a key component in teaching and that effective and efficient data management practices provides improved student achievement information for

classroom teachers in a timely manner. The School's educational philosophy is to fully prepare students to carry the torch of knowledge as well as the freedom and prosperity that is passed from generation to generation in this great country. The School's educational philosophy and approach is aligned with the schools mission by focusing mathematics and science education. This also can be seen clearly in the school's core curriculum section.

See "Appendix A" for more detail explanation of above instructional methods and approaches.

3.E Explain how the services the school will provide to the target population will help them attain the Next Generation Sunshine State-Common Core Standards, as required by section 1002.33, F.S.

The objectives and goals in the School's curriculum are built upon the Next Generation Sunshine-Common Core State Standards. Next Generation Sunshine State Standards can be found at:
http://www.floridastandards.org/Standards/FLStandardSearch.aspx

Common core at;

http://www.floridastandards.org/Standards/Common_Core_Standards.aspx

The faculty of the school will be provided and trained on Next Generation Sunshine-Common Core State Standards to make sure they align their lesson plans and yearly plans. All required supplements and materials will be provided to faculty to implement NGSSS-CCSS. The School's curriculum will focus on clear and measurable expectations for student learning and covers the main subject areas of Reading/Language Arts, Mathematics, Social Studies, and Science. The curriculum will continuously reflect high quality instruction and implement research – based strategies, innovations and activities that facilitate achievement for all students.

The proposed School's curriculum is already aligned with the NGSSS/CCSS and student progress will be assessed with the FCAT 2.0 and PARCC, school generated assessments. Some examples of Standards are presented in Appendix F.

The faculty and administrators analyze information obtained from classroom, and state/district assessments to evaluate the academic strengths and weaknesses of individual students. Data is derived from formal and informal assessments supporting data driven decision making when determining adjustments that may need to be made to the curriculum.

Teachers plan for instruction using lesson plans aligned with NGSSS-CCSS state approved resources and appropriate instructional strategies. Instruction is designed to address new skills acquisition as well as addressing the achievement gaps in student performance.

The State of Florida has developed NGSSS-CCSS and Course Outlines that stipulate a comprehensive plan for the instructional program. The Principal, Department Chairs, Lead teachers develop Scope and Sequence documents that guide the organization and pacing of

instruction. Classroom teachers implement "Best Practices" that include examples of techniques and strategies which effectively promote improved student achievement.

Classroom and school-wide interim assessments are a critical component of the teaching and learning process. Teachers assess student learning frequently to insure academic success. In addition, interim assessments that mimic the FCAT 2.0 and PARCC format provide tools for adjusting and refining curriculum and instruction so that all students have the opportunity for in-depth learning to be successful on the FCAT 2.0 and PARCC.

The school provides tutoring for students whose assessment results indicate a need for further instruction in any essential skill area. Extended learning opportunities are made available for all students at all academic levels of achievement. Classroom teachers and administrative staff monitor student progress on a continuous basis. Informal student/teacher conferences, principal visits to classrooms, and examinations of test results are ways a student's progress is monitored.

BSCS recognizes that a culturally diverse student population requires individualized methods of instruction delivery. Multicultural themes will teach students tolerance for the ethnically and/or culturally diverse population served by the school. With tolerance comes understanding, thus creating a community of students who are committed to working together to assist in creating a school environment that is conducive to learning.

If t he school intends to replicate an existing school design:
- **Provide evidence that the existing design has been effective and successful in raising student achievement. The effectiveness of an existing school design can be demonstrated by providing evidence of organizational viability and the success of the academic program, including compliance with legal requirements, as well as a direct relationship between program elements and student achievement.**

- **Describe the applicant's capacity to replicate an existing school design. The capacity to replicate can be demonstrated by providing credible and well-defined strategies for replication, including the financial and human resources necessary to replicate the design.**

The School will replicate the current Orlando Science School's (OSS) program and best practices. Currently Orlando Science Middle/High has high performing status. Orlando Science Elementary just opened last year and received an "A" grade.

Orlando Science Middle/High Public Charter School (OSS) was opened in 2008 as an Orange County Public Charter School, with the aim of providing students with a challenging curriculum, structured around the disciplines of science and math. Orlando Science is a 6-12, tuition free school, centrally located charter school in the Orlando Metropolitan Area, with a student body of

489 students. OSS is pleased and proud to announce that the first 12th grade class will be graduating in the summer of 2014.

In its first year, OSS served about 106 students and employed 11 staff members. The school housed grades 6 and 7. Since the first day of operation, students competed in the State Science Olympiad, Math Olympiad, Spelling Bee, National Geographic Bee, in addition to other local and statewide events. The school functioned, at that time, under the direction of Principal Dr. Yalcin Akin, who became the Executive Director of OSS the following year.

The 2009-2010 school year served grades 6-8, with 22 staff members. According to the State of Florida's FCAT data, OSS became an "A" school. The total number of students during the school was about 253. New programs implemented in the school included Music After School, Red Ribbon Week, Beautification Day, Drama, and a school newspaper.

OSS was proud to offer a high school program to start the 2010-2011 school year. Ninth grade students were immediately offered challenging AP courses led by highly qualified teachers from around the country and world. Highlights of the school year included Hispanic Heritage Night, and Grandparents Night. The incoming sixth grade class was the largest to date with over 425 students. The staff at OSS grew to over thirty employees with a variety of educational backgrounds and ethnicities. For the first time, OSS placed high enough in Florida's Science Olympiad to compete at the National Science Olympiad in Wisconsin.

One of the biggest accomplishments of the 2011-2012 school was the accreditation of the school by AdvancedED. In addition to this accomplishment, the school grew to 487 students and was ranked in the top 10 schools in the State of Florida by the Florida Department of Education. A certificate of appreciation was presented to the school by Orange County Public Schools because of excellence in academic performance. The school also placed first in Florida's Science Olympiad, and competed at the National Science Olympiad for the second year in a row.

Orlando Science School has maintained its student diversity, while increasing academic achievement, and has been formally recognized as a "High Performing Public Charter School" by the Florida Department of Education. Overall OSS promotes a high achieving environment for its students. Currently the school houses grades 6-11 with 488 students. The OSS Governing Board also operates Orlando Science Elementary Charter School which was opened in 2012 with 232 students. There are presently 719 students in the Orlando Science Elementary and Middle/High Schools. Since its beginning, with the guidance of the OCPS Charter Office, OSS has kept up with the current educational trends by becoming more data-driven, more standards-based, and more financially secure, while never losing sight of its innovative and creative vision of the learning process. Learning from our mistakes, we continue to mature and become stronger in all areas of academia and operations, moving us forward to meeting all of our goals. Orlando Science Middle/High School charter contract with the Orange County Public School Board has been renewed for 15 years in May 2013.

Please see below for the OSS accreditation, high performing charter school status letter, OCPS appreciation letter, FL DOE school ranking. With direct oversight from the current Governing Board, as well as key leaders from the existing school, the same OSS leadership team and founding board will implement and monitor the school design easily.

FLORIDA DEPARTMENT OF EDUCATION

Pam Stewart
Commissioner of Education

Just Read,
Florida!

October 5, 2012

Dr. Yalcin Akin, Principal
Orlando Science Middle/High Charter School (48-0089)
2427 Lynx Lane
Orlando, Florida 32804

Dear Dr. Akin:

This letter serves as notification that the Department of Education has verified that Orlando Science Middle/High Charter School (48-0089) currently meets the criteria for high-performing charter school status pursuant to s. 1002.331, F.S.

If you have any questions, please contact the Office of Independent Education and Parental Choice at (850) 245-0502, or via email at charterschools@fldoe.org.

Thank you for your continued participation in our mission to improve the quality of educational options for Florida's students.

Sincerely,

Pam Stewart

PS/jh

Cc: Dr. Barbara M. Jenkins, Superintendent
       Dr. Christopher Bernier, Charter School Liaison

4. Curriculum Plan

4.A. Describe the school's curriculum in the core academic areas, illustrating how it will prepare students to achieve the Next Generation Sunshine State-Common Core Standards.

The objectives and goals in the School's curriculum are built upon the Next Generation Sunshine-Common Core State Standards. The School will implement the Broward County Public School, Student Progression Plan, as a vehicle to guide the progression and implementation of the curriculum to be taught.

The School's curriculum will focus on clear and measurable expectations for student learning and covers the main subject areas of Reading/Language Arts, Mathematics, Social Studies, and Science. In addition, the School offers classes in Art, Music, Computer, Foreign Language (Spanish or another foreign language), and Physical Education. The curriculum will continuously reflect high quality instruction and implement research – based strategies, innovations and activities that facilitate achievement for all students.

The school will have the following processes in place to support the delivery of the curriculum: Scope and sequence of essential NGSSS-CCSS - based on nine-week intervals, in each content area; (Some examples of Standards are presented in Appendix F)
- Continuous review of curriculum to ensure teacher's delivery of NGSSS-CCSS material for mastery and to ensure a year's worth of learning of all state benchmarks;
- Research-based instructional practices (see Attachment A)
- Principal evaluation through weekly classroom walkthroughs
- School Improvement Plan (SIP) will be used as a continuous improvement tool and to ensure that the curriculum goals are being accomplished and the plan is a living document to ensure quality assurance;
- Use of assessment data to inform instruction and make curriculum decisions and plan interventions
- Weekly grade level and biweekly staff meetings
- Ongoing relevant professional development workshops
- Before and after school targeted tutoring for student remediation as well as weekend school for acceleration
- Targeted interventions for struggling readers and students performing below grade level;
- Focus on differentiated instruction for learning styles
- Reading and writing across the curriculum
- Integration of technology across all major disciplines

Elementary Language Arts

The goal of the CCSS aligned ELA curriculum is to increase rigor in core and intervention instruction and improve student proficiency on grade level outcomes & graduate all students ready for middle-high school and college and career in the long run. In return, students will be able to build knowledge through content-rich text, to use evidence in reading, writing & speaking, and to practice complex text and academic language. The School will use the state-approved Macmillan/McGraw-Hill Treasures series as the Elementary Comprehensive Core Reading and Language Arts program. The School's text selection may be modified as per the Sponsor's text adoption and modification to the Comprehensive Core Reading Program (CCRP) throughout the duration of the charter. The CCRP correlates to all Reading and Language Arts CCSS and addresses the five areas of reading: phonological awareness, phonics, fluency, vocabulary, and comprehension. The CCRP is the tool used to provide initial and differentiated instruction and is used to expose and instruct students on grade level.
All students will participate in a daily, 90-minute block of uninterrupted reading instruction following the high quality, explicit, and systematic initial instruction in the Macmillan/McGraw-Hill Treasures and Imagine It. The School will utilize computer assisted intervention programs such as Success Maker, Study Island, and Focus Florida.

The CCRP provides explicit lessons for whole group instruction that includes introduction of skills, modeling, teaching, independent and guided application, and review of skills and concepts. Techniques such as modeling, previewing and predicting, visualizing, summarizing, and direct instruction in strategic reading are embedded throughout the program. The Comprehensive Core Reading Program (CCRP) provides guidance to teachers in delivering differentiated instruction for diverse learners within the reading block. The program contains integral instructional sequences coordinated by strand of instruction and are carefully planned to move from cognitively simple skills to more complex skills. Daily lessons for small group differentiated instruction revolve around using leveled materials to provide numerous practice opportunities for mastery of skills and strategies.

Activities are organized to meet the needs of on-level learners, advanced learners, below-level learners, and English-language learners. The program integrates a scope and sequence within the daily lesson plans that affords teachers guidance in delivering strategy and skill instruction based on student needs. Aligned instructional materials, such as decodable books and leveled books, are used for individual and group practice opportunities. A variety of assessment opportunities, both informal and formal, are included in the comprehensive core reading program and are used regularly to monitor students' progress and match students with appropriately leveled text.

The Response to Intervention (RtI) model will guide the School with implementing a tiered approach to instructional delivery that includes fidelity of instruction using the core program and interventions of increasingly higher intensity, based on the differentiated needs of students. This multi-tiered approach to providing services and interventions to students at increasing levels of intensity is based on progress monitoring and data analysis. Problem solving at all tier levels is a

cyclical process that involves analyzing the data to identify the problem and determine why the problem is occurring, implementing an instructional plan to target specific differentiated student needs, and evaluating the plan to ensure effective response to the intervention.

As part of Tier I universal instruction, all students will be provided a daily, 90-minute block of uninterrupted reading instruction following the high quality, explicit, and systematic initial instruction of the Macmillan/McGraw-Hill Treasures-Imagine It Comprehensive Core Reading Program (CCRP).

Macmillian/McGraw-Hill Treasures and Imagine It programs are an explicit, systematic, and interactive instructional design focused on the six essential elements of reading instruction (phonemic awareness, phonics, fluency, vocabulary, oral language, and comprehension). The six elements of reading instruction includes:

Phonemic Awareness
Phonemic awareness, or manipulating phonemes in words, is a necessary prerequisite for successful phonics instruction and learning the decoding process. In an extensive meta-analysis of 52 studies, the National Reading Panel (2000) determined that teaching children phonemic awareness was highly effective under a variety of teaching conditions, grades, and age levels, significantly improving reading more than instruction that lacked explicit lessons in PA. Phonemic Awareness instruction in both the Macmillian/McGraw-Hill Treasures and Imagine It programs is based on this research and supports following attainment of beginning levels of understanding and skill that is driven primarily by instruction and practice in the use of phonemic decoding strategies in reading (Perfetti, Beck, Bell, & Hughes, 1987; Wagner, et al., 1997).

Phonics
Phonics instruction focuses on the acquisition of letter-sound correspondences and their use in reading and spelling. In both the Macmillian/McGraw-Hill Treasures and Imagine It programs, phonics is taught sequentially and cumulatively with multiple opportunities for applying the skills into decodable text. The programs include daily lessons to ensure that students are explicitly taught the process of blending individual sounds into words. Trophies and Treasures provide phonics instruction based on scientific research showing that systematic, explicit phonics instruction is a valuable and essential part of a successful reading program (Chall, 1996; Foorman, Francis, Fletcher, Schatschneider, & Mehta, 1998).

Fluency
Fluency in reading is the ability to read text accurately and with proper expression at an appropriate speed. According the National Reading Panel (2000), fluency is one of several critical factors necessary for reading comprehension. "If text is read in a laborious and inefficient manner, it will be difficult for the child to remember what has been read and to relate the ideas expressed in the text to his or her background knowledge." The ability to process text accurately and effortlessly includes blending words together quickly and instantaneous recognition of high-frequency words. Fluent reading develops over time, starting in kindergarten and first grade with lessons on phonemic awareness, phonics, and automaticity of word recognition. Lessons on these key components of fluency are included in both the MacMillian/McGraw-Hill Treasures and

Imagine It programs, along with daily opportunities for teachers to model fluent reading through read aloud, demonstrations, shared reading, and modeled strategies. The programs also include lessons on reader's theatre, choral reading, echo reading, books on tape, and repeated readings, all strategies shown to improve reading fluency.

Vocabulary

Lessons on word meaning, strategies for making vocabulary connections, and the link between vocabulary and comprehension are embedded into each daily reading lesson and all parts of the 90-minute reading block. According to Donald Bear (2005), research supports explicit and systematic vocabulary instruction involving active study of words before, during, and after reading text. Both the Macmillian/McGraw-Hill Treasures and Imagine It Programs provide daily opportunities for students to learn vocabulary through extensive reading in rich contexts, oral language development, multiple encounters with words, and direct teaching of key ideas, concepts, and connections to other words.

Oral Language

Oral language is an important link in the process of children's learning and thinking development, providing a foundation for the development of other language-based skills, including reading and writing. It is through speech that children learn to organize their thinking and focus their ideas (Lyle, 1993). A variety of oral language based activities are incorporated throughout both core programs, including partner pair, guided practice, summarizing and retelling, picture chats, and weekly "Talk About It" lessons. These activities build children's vocabulary, increase communication skills, and foster connections with language in print form.

Comprehension

Comprehension is the key element in reading. It includes making sense of words, connecting ideas between text and prior knowledge, and constructing and organizing meaning from print. Readers must be able to understand the meaning of the literal words read and create a broader understanding of the meaning implied from the text (Kintsch, 1998). The process of comprehension is strategic and interactive, involving the ability to apply, synthesize, and interact with what is being read (Adams, 1998; Harvey & Goudvis, 2000; Moats, 2000). The National Reading Panel (2000) identified strategies that have been shown to have a firm scientific basis for improving reading comprehension, including monitoring comprehension, using graphic organizers, answering questions, generating questions, recognizing text structures, and summarizing. Both comprehensive core programs feature systematic and explicit comprehension instruction using these strategies. The instruction builds prior background knowledge, and applies metacognitive skills and multi-level questioning to help students maintain comprehension that supports the promotion of higher-level thinking. Direct comprehension instruction is provided through explicit explanations of strategies, teacher modeling, and guided practice. Students are given multiple opportunities to apply these strategies through scaffolding teacher support with leveled text during small group instruction and independent reading.

Supplemental resources can be used to differentiate instruction for all students (Tiers I, II, and III). When data shows that students need additional explicit and intensive instruction in one specific component of reading (i.e., oral language, phonemic awareness, phonics, fluency, vocabulary, OR comprehension) supplemental resources can be used as an extension beyond the

universal Tier I initial instruction of a Comprehensive Core Reading Program (CCRP) for all students. As part of Tier II (strategic) or III (intensive) intervention instruction, Supplemental Intervention Reading Programs (SIRP) are implemented to provide targeted intervention support to meet the specific differentiated needs of struggling readers.

The School will also use Read XL or Jamestown Reading Navigator as its reading program to meet student learning needs in specific areas. The School will also use FAIR and PMRN resources, DAR and Accelerated Reader (AR) as supplement programs to meet student-learning needs in specific areas. Details of these programs will be provided in the School's Reading curriculum section below. Details of these programs will be provide in the Section 4, School's Reading curriculum section below.

Students will progress through a reading curriculum that emphasizes phonemic awareness and decoding skills in its early stages and builds towards the ability to read, comprehend, and interpret prose and poetry of different genres. The curriculum will guide students through basic phonics skills starting with identification of syllables and phonemes, blending, and decoding to the ability to sound out unfamiliar multisyllabic words to recognition of irregularly spelled words and fluent reading and strong comprehension skills. Acquisition of an extensive and advanced vocabulary will be emphasized at every level.

Students will have regular and frequent lessons and practice in the writing of Standard English. Lessons will develop mastery of the principles and applications of correct grammar - including knowledge of the parts of speech, punctuation, spelling, sentence structure, and paragraph structure, with ample opportunity to practice and reinforce writing skills in compositions and essays and to develop both writing style and creativity through the writing of poetry and prose. Students will learn basic keyboard skills and program operations for word processing in the preparation of assignments, including the preparation of charts and tables.

The elementary reading and writing curriculum will serve as a framework in which students encounter the works of great authors of the past and present. The curriculum will include, but not be limited to, Greek and Roman mythology, fables and stories from both Western and non-Western cultures, and stories illustrative of the history of the United States. The school will use reading materials not only to develop decoding and interpretive skills but also to begin students' encounters with great and enduring writings that will form a basis for advanced literary study and will address issues of character, virtue, and citizenship. Some examples of Standards are presented in Appendix F.

Elementary Mathematics

The incorporation of CCSS has necessitated an instructional shift that would require Focus, Coherence and Rigor. By focusing strongly where the standards focus, teachers will significantly narrow the scope of content, deepen how time and energy is spent in the math classroom and focus deeply only on what is emphasized in the standards, so that students gain strong foundations. The coherent math curriculum will require teachers to think across grades and link to major topics within grades. They will carefully connect the teaching within and across grades

so that students can build new understanding onto foundations built in previous years. They will also begin to count on solid conceptual understanding of core content and build on it since each standard is not a new event, but an extension of previous learning. Students will experience rigorous learning experience where intensity will be equal in solid conceptual understanding, procedural skill/fluency, and application of skills in problem solving situations.

Teachers will
- teach more than "how to get the answer" and instead support students' ability to access concepts from a number of perspectives
- educate students to see math as more than a set of mnemonics or discrete procedures
- support fluency and application by focusing on conceptual understanding
- structure class time and/or homework time for students to practice core functions such as single-digit sums or multiplication so that they are more able to understand and manipulate more complex concepts and have students gain speed and accuracy in calculation
- teach students how to use appropriate concepts and procedures for application even when not prompted to do so
- provide opportunities at all grade levels for students to apply math concepts in "real world" situations, recognizing this means different things in K-5, 6-8, and HS

The mathematics curriculum will be integrated throughout the entire school curriculum to the greatest extent possible. Teachers in content areas outside of math, particularly science, ensure that students are using grade-level-appropriate math to make meaning of and access science content. The incorporation of the CCSS will help develop Mathematical Expertise through the standards for Mathematical practices that are listed below:

1. Make sense of problems and persevere in solving them
2. Reason abstractly and quantitatively
3. Construct viable arguments and critique the reasoning of others
4. Model with mathematics
5. Use appropriate tools strategically
6. Attend to precision
7. Look for and make use of structure
8. Look for and express regularity in repeated reasoning

Accepted as a philosophy that "all children can learn," BSCS will not track students into large groups, but will instead provide individualized tutoring, small group work and extra practices for those students who need more time to master complex concepts.

Students will have extensive experience in making data, tables, graphs, and geometric sketches and will be able to use them to clearly describe a wide variety of patterns and relationships. Students will examine the limitations of mathematical models in describing and predicting events in the real world. They will be encouraged to state their own criteria for what is a satisfactory result and to discuss their judgments in terms of their purpose.

Students will be able to understand the mathematical significance of the arithmetic and algorithmic operations that they perform. By focusing on the 'why' behind the algorithmic procedures, BSCS will be preparing students for the further study of mathematics as well as the quantitative literacy of daily life.

According to the National Council of Mathematics Teachers, a shift is needed from traditional 'paper and pencil' approaches which emphasize computation and rote learning to an approach which emphasizes the child gaining mathematical insight, reasoning, and problem solving skills. BSCS will focus on creating a developmentally appropriate math curriculum where children are encouraged to understand the conceptual bases and quantitative analysis of mathematical relations. BSCS believes that the logical thought processes of mathematics are necessary to the development of critical thinking. Through exposure to the basic courses, students not only attain the computational skills needed for everyday life but also develop their ability to think clearly and to present their thoughts in a precise, well-organized fashion. The program will be flexible in that it satisfies the needs of students who are not particularly mathematically oriented, while providing the challenge and interest necessary for those who want a sound mathematical background on which to base further study.

The mathematics curriculum will be integrated throughout the entire BSCS curriculum to the greatest extent possible. It will offer a range of courses to meet the students' different developmental and ability levels. In order to implement the school mathematics curriculum, BSCS will adopt the proven instructional mathematics curricula, Everyday Mathematics and Project M3: Mentoring Mathematical Minds that will be discussed in detail later on.

In addition to Everyday Mathematics and Project M3: Mentoring Mathematical Minds, manipulatives will be integrated into the math classes. One reason that students struggle in mathematics is that they consider it to be a highly abstract subject. Using manipulatives can be a very effective tool to help students move from abstract thinking to concrete thinking (Stein, & Bovalino, 2001)[1]. Manipulatives, such as pattern blocks, fraction circles, and square tiles, can contribute to the students' understanding of mathematical ideas by giving them concrete ways to compare and operate on quantities.

However, the use of manupilatives is not enough for conceptual understanding [National Council of Teachers of Mathematics (NCTM), 2000][2.] It is important that teachers guide students in discovering mathematical ideas so lessons will be designed to teach rather than showing students how to work problems step-by-step. BSCS believes that students should actively construct their own knowledge within the academic environment. Additionally, students need to work with multiple representations, such as concrete materials, graphs, verbal statements, tables, and/or symbols, to have a richer understanding of mathematical concepts.

---

[1] Stein, M. K., & Bovalino, J. W. (2001). Manipulatives: One piece of the Puzzle. *Mathematics Teaching in the Middle School.* Vol.6, 6, 356.

[2] National Council of Teachers of Mathematics (2000). *Principles and Standards for School Mathematics.* Reston, Va.: NCTM.

By using manipulatives, BSCS will help students focus on mathematical ideas rather than mass calculation. In order to enhance the students' understanding of mathematics, the teachers will use the navigations series published by the National Council of Teachers of Mathematics.

BSCS recognizes that the mathematics teachers' subject-area content and pedagogical knowledge will affect the students' achievement level. In order to increase the teachers' knowledge in both areas, BSCS will have scheduled workshops every semester to discuss mathematical tasks and the best ways to teach them to the students. Moreover, RCSA-ES will encourage the teachers to plan their lessons collaboratively to encourage the sharing of ideas and to improve each teacher's instructional skills.

If a student struggles to comprehend any mathematical concept, a mentor or classroom teacher will spend time with the student to provide guidance and technical assistance in that area. Students who continue to have difficulties in math will be enrolled in an intensive math support course, as well as a grade level math course, to help them close the gap in their knowledge. Small group instruction may be provided two days per week on those strands that students need direct instruction for improvement. Math teachers may offer after-school help-sessions for students in the targeted groups. Additional measures may be taken, such as tutorial programs, extended-day services, retention, and modification of curriculum choices, if they are required to meet the students' needs. Teachers will keep a record of attendance in math help-sessions and correlate this to math grade improvement at the end of each nine weeks. After-school tutors and teachers will report to each student's classroom teacher on the student's progress as a result of receiving consistent assistance. The classroom teachers will identify those math strands that are weak for each student in the targeted groups. Assignments will be prepared to remediate weak skills. Teachers will customize the instruction and conduct small focus groups to address specific strands that each group needs.

Everyday Mathematics

Everyday Mathematics is a comprehensive Pre-K through 6th grade mathematics curriculum developed by the University of Chicago School Mathematics Project. It is currently being used in over 185,000 classrooms by almost 3,000,000 students.

Curriculum Features
There are a number of features that distinguish the Everyday Mathematics curriculum. These include:
- Real-life Problem Solving

Everyday Mathematics emphasizes the application of mathematics to real world situations. Numbers, skills and mathematical concepts are not presented in isolation, but are linked to situations and contexts that are relevant to everyday lives. The curriculum also provides numerous suggestions for incorporating mathematics into daily classroom routines and other subject areas.
- Balanced Instruction

Each Everyday Mathematics lesson includes time for whole-group instruction as well as small group, partner, or individual activities. These activities balance teacher-directed instruction with opportunities for open-ended, hands-on explorations, long-term projects and on-going practice.

- Multiple Methods for Basic Skills Practice

Everyday Mathematics provides numerous methods for basic skills practice and review. These include written and choral fact drills, mental math routines, practice with fact triangles (flash cards of fact families), daily sets of review problems called Math Boxes, homework, timed tests and a wide variety of math games.

- Emphasis on Communication

Throughout the Everyday Mathematics curriculum students are encouraged to explain and discuss their mathematical thinking, in their own words. Opportunities to verbalize their thoughts and strategies give children the chance to clarify their thinking and gain insights from others.

- Enhanced Home/School Partnerships

Daily Home Links (Grades K to 3) and Study Links (Grades 4-6) provide opportunities for family members to participate in the students' mathematical learning. Study Links are provided for most lessons in grades 4-6, and all grades include periodic letters to help keep parents informed about their children's experience with Everyday Mathematics

- Appropriate Use of Technology

Everyday Mathematics teaches students how to use technology appropriately. The curriculum includes many activities in which learning is extended and enhanced through the use of calculators. At the same time, all activities intended to reinforce basic computation skills are clearly marked with a "no calculator" sign:

Underlying the EM curriculum are six strands of knowledge: Algebra; Data and Chance; Geometry; Measurement; Numeration and Order; Patterns, Functions, and Sequences; Operations; and Reference Frames. At each grade level, learning targets are identified for each of the six strands.

Everyday Mathematics has been the subject of numerous studies, and the data is overwhelmingly positive, and it received the highest rating of any published curriculum reviewed by the Department of Education's What Works Clearinghouse.

Research

The What Works Clearinghouse (WWC) looked at elementary school math curricula designed to promote math knowledge and skills among elementary school students (average ages 5 to 10 years). Because there is some variation in how elementary school is organized across school districts, this review defined elementary school as a school with any of the grades, K through 5. Curricula included in this review are replicable, materials-based instructional programs that cover one or more of the following content areas: numbers, arithmetic, geometry, pre-algebra, measurement, graphing, and logical reasoning. This review considered only core, comprehensive math curricula. Core math curricula are defined as instructional programs that extend over the course of one semester or more, are central to students' regular school instruction, and are based on any combination of text materials, manipulatives, computer software, videotapes, and other materials. This review focuses on student achievement in mathematics as the key outcome.

The findings in this topic report summarize the first wave of WWC elementary school math intervention reports produced in 2006–07. We looked at 340 studies. Of these, 237 were assessments of interventions that qualified for our review; the other 103 could not be categorized by

intervention.3 Of the 237 studies, 9 studies of 5 curricula met our evidence standards, 2 without reservations and 7 with reservations. Altogether, the WWC looked at 73 interventions: 5 had studies that met WWC standards with or without reservations, 67 had studies that did not meet WWC evidence screens, and 1 had a single-case study, which is still under review. (The identification of eligible programs ended in September 2005, and that of eligible studies, in July 2006.) In looking at the one outcome domain for the five elementary school math curricula:

- Everyday Mathematics had potentially positive effects on math achievement.
- Four other curricula had no discernible effects on math achievement.

http://everydaymath.uchicago.edu/about/

Project M3: Mentoring Mathematical Minds

Project M3 is a research-based mathematics program for gifted and talented students in grades 3, 4, and 5. Development of this program was funded by the U.S. Department of Education's Jacob K. Javits Program[3.] Project M3, Mentoring Mathematical Minds, is a 5-year collaborative research effort of faculty at the University of Connecticut, Northern Kentucky University, and Boston University and teachers, administrators, and students in 10 schools of varying socioeconomic levels in Connecticut and Kentucky. Project M3 was researched under the direction of the Neag School of Education at the University of Connecticut.[4]

Rather than focusing on computation, as many mathematics curricula do, Project M3 units focus on increasing the depth and complexity of the mathematics in which talented students are engaged. In other words, these young mathematicians are engaged in conceptual understanding rather than the application of rote formulas. This is achieved through an emphasis on mathematical discourse, both written and verbal, within the classroom and on problem solving and the spirit of inquiry. The units combine this increase in depth and complexity, emphasis on mathematical discourse, and focus on problem solving and inquiry with the NCTM Content and Process Standards and with best practices in the field of gifted and talented curriculum development to create the type of mathematics that is both truly challenging and enjoyable for mathematically talented students.
The goals of the program include the following.

- Creating challenging and motivational curriculum units for students;
- Providing ongoing professional development for teachers;
- Increasing math achievement and attitudes toward math in talented and diverse students;
- Narrowing the gap in math achievement for students with talent potential from economically disadvantaged backgrounds, those with limited English proficiency, and minorities.

Award Winner:
Project M3 has won awards from the curriculum studies division of the National Association for Gifted Children (NAGC) for three consecutive years. The Level 4 unit At the Mall with Algebra: Working with Equations and Variables is the winner of the NAGC Curriculum Studies

---

[3] http://www.projectm3.org/
[4] http://www.gifted.uconn.edu

2006 Award, and was judged to be an exemplary model of curriculum for high-ability learners.[5] The two previous units winning this award are Unraveling the Mystery of the MoLi Stone, the winner of the NAGC Curriculum Studies 2005 Award, and What's the ME in Measurement All About?, the winner of the NAGC Curriculum Studies 2004 Award.

Curriculum Units:

Project M3 has created a total of 12 curriculum units of advanced mathematics accompanied by professional development as well as one differentiated unit for students of all ability levels. In each unit of the Project M3 series, students explore an interesting simulated or real-life problem connected to their world and use their Mathematician's Journals to think, write, and act like mathematicians to solve the problem.

	Level 3	Level 4	Level 5
Number and Operations	Unraveling the mystery of the MoLi stone: Place value and Numeration.	Factors, multiples, and leftovers: Linking multiplication and Division.	Treasures from Attic: Exploring Fractions
Algebra	Awesome Algebra: Looking for Patterns and Generalizations.	At the mall with Algebra. Working with variables and Equations.	Record makers and breakers: Using Algebra to Analyze Change.
Geometry and Measurement	What is the Me in Measurement All About?	Getting into Shapes. Exploring 2- and 3- dimensional shapes.	Funkytown Funhouse: Focusing on Proportional Reasoning and Similarity.
Data Analysis and Probability	Digging for Data: The Search within Research.	Analyze this!: Representing and Interpreting Data.	What are your chances? Exploration of Probability.

The curriculum design follows the tenets of The Multiple Menu Model:
A Practical Guide for Developing Differentiated Curriculum (Renzulli, Leppien, & Hays, 2000) and The Parallel Curriculum, A Design to Develop High Potential and Challenge High-Ability Learners (Tomlinson, Kaplan, Renzulli, Purcell, Leppien & Burns, 2002) recently published by the National Association of Gifted Children. This model adheres to the belief that "most, if not all, learners should work consistently with concept-focused curriculum, tasks that call for high level thought, and products that ask students to extend and use what they learned in meaningful ways" (Tomlinson et al., 2002, p.13).
This model is used as the basis for the design of the curriculum, focusing on the Core Curriculum with the Big Ideas of Mathematics in each unit and the Curriculum of Practice, an outgrowth of

[5]http://www.nagc.org/uploadedFiles/About_NAGC/Division_Pages/Curr%20SCOPE_FEB07.pdf

the Multiple Menu Model. Using the Multiple Menu Model, we will help students assume the role of mathematicians as they develop critical and creative thinking skills in solving real problems. Projects will be included in the units and used as a way for students to pursue some of their own interests. Renzulli's Enrichment Triad Model (Renzulli, 1977; Gubbins, 1995) is one of the instructional approaches; students will choose a topic to investigate, receive support and coaching from the teacher, and produce a product for a real audience.

Professional Development:

Teachers will receive training to increase their mathematical background in the content areas and to use teaching strategies developed to promote enrichment learning and mathematical discourse within the classroom. During the first three summers, the teachers implementing the curriculum units will receive the training. Teams of teachers will receive training on curriculum differentiation in grades 3, 4 and 5. A strong focus will be placed on developing mathematical discourse to encourage students to think deeply about the mathematics.

This training will take place during the summer for a 2-week period and during the school year (approximately 4 in-service days). Teachers will receive and keep resource materials and manipulatives that support the curriculum units. Ongoing technical assistance in the classroom will include videotaping of lessons with conferencing to help teachers reflect on their teaching by witnessing the discourse in the classroom.

Teachers can communicate with each other across schools and with the project staff on a regular basis through the internet portal that has been recently initiated. This technology will also allow teachers to be abreast of latest developments in the field of mathematics education and gifted education by providing links to resources and articles of interest.

Results:

The results of the Project M3 have been very promising. The students in the program have made statistically significant gains on the Measures of Academic Progress (MAP) and on open-ended response questions from the Trends in International Mathematics and Science Study (TIMSS) and the National Assessment of Educational Progress (NAEP). Furthermore, they have scored significantly higher than a comparison group of mathematically talented students on these standardized tests. Not only have the students made quantitative gains in their mathematics achievement, but the teachers also report a change in their students' attitudes toward mathematics. As one teacher said, "The children love math. They look forward to math class every day! In previous math classes, children literally cried when they came to 'problem solving.' These kids enjoy problem solving because of the program." This increase in enjoyment of mathematics is accompanied by a sense of accomplishment at being able to communicate mathematically. This is embodied by one student's comment, "I can do it. I can write about math." Furthermore, the project has been successful at identifying mathematically promising students from underrepresented groups. This success has carried over to the school level. One curriculum coordinator commented, "The M3 project has prompted us to look more closely at the academic ability of the students who have been identified to participate in the program…We have identified more minority and ESOL students than ever before."

Elementary Science

The science program is designed to use a constructive view of learning skills, sequences, and subject knowledge. BSCS believes that the curriculum and instructional strategies must first build the student's own reality before introducing new content. Understanding science comes from relating new experiences to what the students already know, not from simply adding new knowledge. Some examples of Standards are presented in Appendix F.

The sequence of instruction will begin with addressing the misconceptions or alternate understandings that the students have about the topic. Then the students will be engaged in activities that help construct or reconstruct meaning. The science curriculum will include strategies to:

- Encourage students to make their ideas explicit and present them with events that challenge their ideas;
- Encourage the process of hypothesizing and generating alternative inspirations of models, enabling the students to explore these alternatives in informal and non-threatening ways, particularly through group discussion, and providing opportunities for students to use their new ideas in a wide ranges of situations so that they can appreciate their utility.

BSCS's science-oriented curriculum will concentrate more on an experimental, hands-on approach to the students' current definition of science while increasing their abstract knowledge of science. BSCS will implement the proven instructional science curricula, the Science and Technology for Children (STC) and Developmental Approaches in Science, Health & Technology -DASH (Gifted Program) to reach this goal.

Science is a dynamic, ever-changing discipline, and the students will be encouraged to use computers and the Internet, plan and organize projects, hypothesize, analyze data, and draw conclusions from tests they will create. The major purpose of the science curriculum will be to teach the students to become self-reliant and independent problem-solvers; it is designed to create a high level of interest in learning that will become personalized and individualized.

The Science curriculum will prepare students to achieve the Next Generation Sunshine State Standards by incorporating a hands-on approach to learning of the central science themes: matter and energy, force and motion, earth and space, processes of life, and the scientific method. Teachers will utilize the Next Generation Sunshine State Standards, while incorporating FCAT test item specifications from the state of Florida in their daily lesson plans. Additionally, students will participate in hands-on science experiments. In grades 4-8, students will be encouraged to participate in competitions such as Science Fair, Science Olympiad, Science Bowl, where they will be able to explore and investigate the steps to the scientific method.

The Science and Technology for Children® (STC®)

General Description

Science and Technology for Children® (STC ®) is a complete science program for children in grades K–6 which was developed by the National Science Resources Center (NSRC), a nonprofit organization jointly operated by the Smithsonian Institution and the National Academy of Sciences, National Academy of Engineering and Institute of Medicine to address the critical problem presented by the A Nation at Risk report[6]. The NSRC began developing STC® in 1988; the curriculum was completed in 1997.

Filled with innovative hands-on activities designed to motivate young students, it is the result of a joint effort by some of the leaders in the fields of education and science. Its mission is to improve the learning and teaching of science for all children in the United States and throughout the world.

STC® curriculum offers innovative, comprehensive 24 units for students in grades 1 through 6. It covers four broad topic areas: life, earth, and physical sciences and technological design. The curriculum is flexible with respect to grade level and units also may be used at a level below or above the designated grade level to meet specific needs.

Each STC® unit was written by a teacher-developer working in collaboration with educators, scientists, and evaluators, as well as with science editors and illustrators. All units were field-tested in demographically diverse classrooms throughout the United States[7]. Input from teachers and students who participated in the field tests, as well as recommendations provided by an independent evaluator, were incorporated into the final version of the text.

Each STC® Unit provides a series of lessons that follow a carefully constructed conceptual sequence- one that builds both student understanding and skills using an inquiry approach design around current knowledge about how children learn. Because the science concepts and skills taught in later unit lessons build on those from earlier ones, all STC® lessons are prearranged accordingly and included during unit instruction.

STC® will engage adolescent in inquiry-based science learning and revive the natural curiosity typically found in young children but unfortunately discouraged in traditional elementary school science programs. As they progress through an STC® module, students will take greater responsibility for their own learning, eventually planning and conducting their own experimental procedures, devising their own data tables, and analyzing their own results. Keeping inquiry at the center of the learning process fosters student curiosity and enables students to learn new concepts in a real-world setting.

The primary goals of the STC® program are to:
- Make available a sequence of learning activities that fully address the National Science Education Standards.
- Engage students directly with natural phenomena, the tools of science, real-world problems, and technological design challenges.

---

[6] http://www.ed.gov/pubs/NatAtRisk/index.html
[7] http//www.carolina.com/Carolina_curriculum/stc/publications.as#Evidence

- Build on students' prior knowledge and experiences and allow them to apply problem-solving strategies in new contexts.
- Provide opportunities for students to test procedures collect and analyze data, use data to support conclusions, and communicate findings.
- Develop in all students the skills and knowledge necessary to open paths to careers in science and technology.
- Foster positive attitudes toward science.

The NSRC followed a rigorous research and development process to ensure that the STC® modules are scientifically accurate. NSRC curriculum developers worked with master teachers and scientists across the nation to ensure that the learning activities in each module are effective in the classroom and reflect current scientific thinking.

NSRC developer designed special apparatus for many of the activities, testing each piece of equipment to perfect its design while making sure that all STC® activities are safe for elementary school use. After field testing, materials and apparatus were revised even further, based on feedback from students and teachers. NSRC developers have worked closely with Carolina Supply Company to establish exact specifications for each item in every module and to monitor quality control during production.

Lessons within each STC® module also follow a carefully constructed conceptual sequence – one that builds both students understanding and skills using an inquiry approach designed around current knowledge about how children learn. STC® modules follow a planned sequence of conceptual development as shown in the Table below.

	Grade	Life and Earth Sciences		Physical Science and Technology	
STC	K-1	Organisms	Weather	Solids and Liquids	Comparing and Measuring
	2-3	The Life Cycle of Butterflies Plant Growth and Development	Soils Rocks and Minerals	Changes Chemical Tests	Balancing and Weighing Sound
	4-5	Animal studies Micro worlds Experiments with Plants	Land and Water Ecosystems Measuring Time	Electric Circuits Food Chemistry Magnets and Motors	Motion and Design Floating and Sinking The Technology of Paper

Table: The summary of STC® Modules.

Professional Development:
High-quality professional development is an essential component of the STC program.
Professional development courses offered through the National Science Resources Center
(NSRC) Professional Development Center (PDC). The PDC offers courses that move teachers
through all levels of the proficiency continuum – from novice to expert. The PDC Courses
provide teachers with the opportunity to learn and practice the skills needed to create supportive
classrooms environments for student inquiry. PDC Courses are available to existing and new
users of STC, district science specialists, teacher leaders, and educators planning to adopt a new
science curriculum. PDC Courses model the inquiry approach and are designed by the
curriculum developers for STC, presented by NSRC PDC-certified trainers, designed to promote
integration of educational technology and technological design in the classroom, and tailored
to the National Science Education Standards.[8]

Results:
A science education program that is judged to be effective typically includes a number of
elements (such as exemplary curriculum, professional development, and community support)
that work together. The most recognizable indicator of a science education program's
effectiveness, however, is the outcome of the student assessment-student test scores. Educational
studies show that student learning increases after the use of STC Program®. Below are some
examples of the impact that STC® has made in students' learning in school districts across the
U. S. that have adopted STC® as a science curriculum.

- A study conducted in Michigan showed that students in school districts that used the
  NSRC's Science and Technology for Children (STC elementary curriculum) performed
  better on the Michigan Educational Assessment Program (MEAP) for Science than those
  who did not. The study compared the results from 15 STC school districts in affluent,
  moderate, and poor districts (socioeconomic categories aggregated according to the
  percentage of students who qualify for free or reduced-price lunch) with the results from
  districts using a textbook approach to science education. Ten of the 15 STC districts,
  including two of the low-income districts, improved their scores of the MEAP at a greater
  rate than the state average.[9]
- During its eight-year partnership with the NSRC, Washington State Department of
  Education has increased the number of school districts implementing research-based
  science education programs from a few pilot districts to districts that serve 75% of the
  state's student population. Statewide data show significant improvement in student
  learning in schools that have fully implemented the NSRC reform model such as STC®,
  with a strong emphasis on teacher professional development.[10]
- The science reform effort in this economically deprived rural community shows that an
  investment in science education provides an excellent return in other areas of the
  curriculum as well. The Valle Imperial Project in Science (VIPS) is a NSF funded Local
  Systemic Initiative serving approximately 22,500 K-6 students and 1100 teachers in 14
  school districts in Imperial County, California. Imperial County ranks highest in poverty

---

[8] http://www.nsrconline.org/professional_development/index.html
[9] http://www.carolina.com/stc/publications/evidence/michigan.pdf
[10] http://www.carolina.com/carolina_curriculum/stc/acrobat/westvalley_brief.pdf

of all 58 California counties with 66% of students receiving free/reduced lunches, and 47% of the students are English language learners. The El Centro Elementary School District implemented a reform effort following the NSRC model, including research-based instructional materials such as STC®. Students in Imperial Valley public schools who have been taught using inquiry methods significantly outperform their classmates who have had traditional (textbook-based) science instruction. Stanford Achievement Test results indicate that the longer students are enrolled in research-based science programs, the better they perform on nationally normed science, writing, and mathematics tests.[11]

Developmental Approaches in Science, Health & Technology

Developmental Approaches in Science, Health & Technology (DASH) is an engaging K–6 inquiry-based program in science, health, and technology, which has been developed by The Curriculum Research and Development Group at the University of Hawaii (CRDG), validated by the U.S. Department of Education's Program Effectiveness Panel, and awarded a dissemination grant through the National Diffusion Network. Primary developmental funding was from the National Science Foundation, the Hawaii State Department of Business, Economic Development, and Tourism, and the University of Hawai'i.
It reaches the spectrum of learners in typical classrooms through 650-plus interconnected, developmentally appropriate, hands-on activities that align with national standards.

The goal of DASH is to capture the imagination of elementary students by engaging them in questioning and making sense of things unknown, inventing and building to solve problems, and caring for themselves through their experiences in learning science, health, and technology. To accomplish this goal, DASH activities at each grade level are organized into ten content clusters: Learning Time; Weather and Sky; Animals; Plants; Food and Nutrition; Health and Safety; Wayfinding and Transportation; Energy and Communication; Conservation, Recycling and Decomposition; and Matter, Space, and Construction.

Content is sequential and spiraled to promote reinforcing, multi-year development of concepts and skills. Students work inside and outside the classroom as a research community, modeling real-world roles of scientists and technologists. The teacher acts as research team leader. Assessment is integrated into instruction; each activity has a portfolio-building product; each grade level has a concept-and-skill inventory for student self-assessment. DASH articulates well with language arts, mathematics, social studies, physical education, and the arts. Students with various backgrounds and learning styles master concepts and skills in contexts of authentic technological and scientific exploration, invention, explanation providing models for thinking and problem solving.

DASH is used by over 12,000 teachers in 26 states. DASH teachers are supported by a network of 14 universities and a cadre of 175 teacher instructors. DASH has earned the following recognitions:

---

[11] http://www.carolina.com/stc/publications/evidence/vips.pdf

- One of seven programs designated as promising by the U.S. Department of Education's Expert Panel on Mathematics and Science Education (2001)[12]
- Cited as an innovative curricula by the Eisenhower National Clearinghouse in ENC Focus: A Magazine for Classroom Innovators (1999) and (2000).
- Cited as an example of high-quality intensive technical assistance in the U.S. Department of Education's report to Congress titled Federal Education Legislation Enacted in 1994: An Evaluation of Implementation and Impact (1999).
- Identified as an effective program in School Health: Findings from Evaluated Programs, a collaborative publication of the American School Health Association and the U.S. Department Health and Human Services (1998).
- Identified as one of three research-based, effective science "skill and content" reform models in a nationwide search by the Northwest Regional Educational Laboratory for the U.S. Department of Education's Catalog of School Reform Models (1998).[13]

Standard-Based Program:
DASH meets The National Science Education Standards (NSES)[14] and the American Association for the Advancement of Science (AAAS)[15] Benchmarks for Science Literacy through ten learning clusters of activities specifically integrating science, health and technology.

Professional Development:

There are separate teacher institutes for DASH levels K–1, 2–3, 4, 5, and 6. These institutes prepare teachers to teach the program successfully by developing knowledge of the program's philosophy and objectives, ability to use the variety of instructional strategies inherent in DASH, understanding of the science, health, and technology content necessary to teach the course, and engage in the excitement and enthusiasm for teaching science in the elementary school. Participants accomplish these goals by experiencing the program in the role of a student and working through the developmental sequence of activities. Besides focusing on the content of the activities, the course immerses teachers in the challenge and excitement of the student experience. DASH teachers are fully trained with both institutes and continued support programs. Teachers attend a 10-day teachers' institute where they (a) participate in the same activities and inquiries and create the same products their students will in their classes; (b) learn to use the variety of teaching behaviors used in the DASH program; and (c) analyze the DASH learning, teaching, and assessment model through reflective and in-depth discussions. A two-

year professional development program is also provided, with monthly meetings and continued newsletter, e-mail, Website, and 800 number supports.

Results:
In many formative evaluations conducted in different states that have implemented DASH, the impact of DASH on student learning is found in the following way:

1.) DASH students demonstrate understanding of fundamental concepts and use of essential skills in science, health, and technology as documented in case studies, including observations, artifacts, documents, and interviews.
   a. Students demonstrate knowledge of concepts.
   b. Students use basic inquiry skills and data gathering techniques.
   c. Students demonstrate integration and application of concepts.
2.) DASH students are self-directed learners taking responsibility for their own learning as reflected in engaged learning time, planning and completion of tasks, and use of multiple resources as documented in case studies including observations, artifacts, documents, and interviews.
   a. Students consistently demonstrated 85%–95% engaged learning time.
   b. Students demonstrated self-directed responsibility for assigned tasks.
   c. Students demonstrated responsibility for fellow students and the classroom.
3.) Experienced DASH teachers changed their attitudes and approaches toward elementary science in ways that result in increased instructional time spent on science and focus on students' learning, as documented in case studies including observations, documents, and interviews.
   a. Teachers became more positive in their attitudes toward teaching science.
   b. Teachers changed approaches to teaching science.
   c. Teachers spent more time teaching science than the national average.
4.) The schools that have adopted DASH have increased their achievements in state tests and standardized tests.

Elementary Social Studies

This curriculum will promote the students' understanding of historical, geographical, and civic knowledge and their application of this knowledge to today's diverse world culture. The School will use the state-approved Harcourt Series or other state-adopted text in the instruction of Social Studies. The Social Studies curriculum includes the study of related knowledge and modes of inquiry selected from history, the humanities, and the social sciences, including anthropology, archaeology, economics, geography, history, law, philosophy, political science, psychology, religion, and sociology. In K-2, history is delivered to students with stories and discussions through folk tales, legends, and prior knowledge brought to the classroom by the student. Stories of different cultures and countries to compare to their personal stories and experiences are presented. Students also create an understanding of community through the classroom rules, values, and decisions that affect individuals and the classroom community as a whole. In grades, 3-5, the curriculum focuses on the history of the United States, Florida History, and World History. This gives an opportunity for students to explore community and civic responsibility as they study historical events and research their effect on present day society through projects, research, technology and community service. The program will prepare students to have an

understanding of multiple cultures, tolerance, and respect for the world beyond our borders and therefore becoming more global citizens. The social studies program will provide each student with a broad background in the social sciences. Within each class, the faculty-student exchange will be strongly encouraged. Students will be encouraged to think critically and to form opinions consistent with the facts of history. From the earliest events of recorded history, through the development of family life, culture and the arts, to the development of governments and countries driven by geographical exploration, the wars of history and the stories they tell, from yesterday to today, these students will have the unique opportunity to pursue their curiosity and respond to the Next Generation Sunshine State Standards by participating in the discovery of man and his contributions to the whole of humanity. Some examples of Standards are presented in Appendix F.

MIDDLE SCHOOL CURRICULUM

Middle School Language Arts

The goal of the CCSS aligned ELA middle school curriculum is to increase rigor in core and intervention instruction and improve student proficiency on grade level outcomes & graduate all students ready for high school and college & career in the long run. In return, students will be able to build knowledge through content-rich text, to use evidence in reading, writing & speaking, and to practice complex text and academic language. The primary focus of the language art program will help students use the reading process effectively, select and use pre-reading strategies that are appropriate to the text, such as discussion, making predictions, brainstorming, generating questions, and previewing (to anticipate content, purpose, and organization of a reading selection). In addition, the students will use writing processes effectively, select and use appropriate prewriting strategies, such as brainstorming, graphic organizers, and outlines. Briefly, the students will be prepared to use viewing and speaking, strategies effectively and understand the nature and power of language. The core of the curriculum will incorporate and be aligned with Common Core State Standards. Some examples of Standards are presented in Appendix F.

The School will use the state-approved Common Core aligned Holt McDougal Series or other state-adopted text as Language Arts program. The program helps students develop the essential skills of reading carefully, thinking critically, listening intently, and speaking and writing persuasively. Students are an integral part of the reading process. Instruction is aligned to mastery of the Common Core State Standards and employs before, during, and after reading strategies. Students use Socratic questioning techniques to increase critical thinking and develop skills in formulating their own questions to guide their inquiry.

The purpose is to provide educational experiences which develop English language arts concepts and skills. The content will include, but not be limited to the study of literature, the use of the writing process, and the application of reading, listening, speaking, critical thinking and study skills. Information on how language arts skills apply to daily life and work will also be provided. The purpose of this course is to develop the ability to use, interpret, and appreciate spoken and written English.

All students at all levels need rich experiences with good literature. An ideal program moves beyond strict adherence to a set of materials, and is centered on themes appropriate to given groups of students. Literature will include multicultural selections of traditional classical and modern works. A quality literature program includes biographies, essays, and other nonfiction, as well as poetry, drama, stories, and novels.

Reading/Literature and Writing will be taught across the curriculum. Students will perform plays, sing songs and play music, read novels as related to the theme for the quarter and demonstrate comprehension and understanding through book reports, oral presentation, etc. Multicultural activities such as cultural demonstrations, speakers with international experiences, dressing in costumes correlating to the culture, etc. will be implemented.

Students will read and analyze increasingly challenging and complex works of poetry and prose, representing a wide range of styles and genre. Students will acquire the ability to read critically, to identify stylistic and rhetorical devices of poetry and prose, and will develop understanding of the relationship between literary form and content.

They will receive intensive training in English composition, including conventions of syntax and punctuation, and they will demonstrate competence in written assignments. Students will practice expository writing, with strong emphasis on proper sentence and paragraph and essay organization; they will also learn to prepare memos, business letters, and newspaper reports. The writing of research papers-that is, essays that discuss and rely extensively on sources-will be required throughout the curriculum; students will learn how to identify appropriate sources, form a bibliography, organize the paper and acknowledge sources properly.

They will also have the opportunity to develop the techniques of creative writing and the composition of poetry in forms commonly found in English-language verse (such as ballad, blank verse, sonnet, free verse, heroic couplets).

The School will follow the State course descriptions for the following courses to be offered in grades 6-8;

GRADE	COURSE
6	M/J Language Arts I
6	M/J Language Arts I Advanced
6	M/J Language Arts I Through ESOL
6	M/J Reading Advanced
7	M/J Language Arts II
7	M/J Language Arts II Advanced
7	M/J Language Arts II Through ESOL
8	M/J Language Arts III
8	M/J Language Arts III Advanced
8	M/J Language Arts III Through ESOL
6-8	M/J Intensive Reading*

ESOL
6-8   M/J ESOL Developmental Language (L1)
6-8   M/J ESOL Developmental Language (L2)
6-8   M/J ESOL Developmental Language (L3)
6-8   M/J ESOL Developmental Language (L4)

* Developmental instruction in reading may be required during grade 6 when student performance in grade 5 indicates a need for strengthening. These courses will be in addition to the regular language arts courses and may be offered as electives. Students scoring at Levels 1 and 2 on the most recent administration of FCAT 2.0 or PARCC reading are to be enrolled in M/J Intensive Reading in addition to their required M/J Language Arts course in grades 6, 7, and 8.

<u>Middle School Mathematics</u>

Math Curriculum incorporates CCSS. The incorporation of CCSS has necessitated an instructional shift that would require Focus, Coherence and Rigor. By focusing strongly where the standards focus, teachers will significantly narrow the scope of content, deepen how time and energy is spent in the math classroom and focus deeply only on what is emphasized in the standards, so that students gain strong foundations. The coherent math curriculum will require teachers to think across grades and link to major topics within grades. They will carefully connect the teaching within and across grades so that students can build new understanding onto foundations built in previous years. They will also begin to count on solid conceptual understanding of core content and build on it since each standard is not a new event, but an extension of previous learning. Students will experience rigorous learning experience where intensity will be equal in solid conceptual understanding, procedural skill/fluency, and application of skills in problem solving situations.

Teachers will
- teach more than "how to get the answer" and instead support students' ability to access concepts from a number of perspectives
- educate students to see math as more than a set of mnemonics or discrete procedures
- support fluency and application by focusing on conceptual understanding
- structure class time and/or homework time for students to practice core functions such as single-digit multiplication so that they are more able to understand and manipulate more complex concepts and have students gain speed and accuracy in calculation
- teach students how to use appropriate concepts and procedures for application even when not prompted to do so
- provide opportunities at all grade levels for students to apply math concepts in "real world" situations, recognizing this means different things in 6-8 and HS

The mathematics curriculum will be integrated throughout the entire school curriculum to the greatest extent possible. Teachers in content areas outside of math, particularly science, ensure that students are using grade-level-appropriate math to make meaning of and access science

content. The incorporation of the CCSS will help develop Mathematical Expertise through the standards for Mathematical practices that are listed below:

1. Make sense of problems and persevere in solving them
2. Reason abstractly and quantitatively
3. Construct viable arguments and critique the reasoning of others
4. Model with mathematics
5. Use appropriate tools strategically
6. Attend to precision
7. Look for and make use of structure
8. Look for and express regularity in repeated reasoning

Students will have considerable experience in making data, tables, graphs, and geometric sketches and using them, along with symbols and clear English, to describe a wide variety of patterns and relationships. Students will examine the limitations of mathematical models in describing and predicting events in real world. They will be encouraged to state their own criteria for what is a satisfactory result to discuss their judgments in terms of their purpose.

Students will be able to understand the mathematical significance of the operations while they will be able to perform arithmetic operations. By focusing on the 'why' behind the algorithmic procedures, we are preparing students for further study of mathematics as well as the quantitative literacy of daily life. The mathematics curriculum is integrated throughout the curriculum as much as possible. The Math Curriculum will align with Common Core State Standards. Some examples of Standards are presented in Appendix F.

Accepted as a philosophy that "all children can learn," The School will not jump students into large groups, but will instead provide individualized tutoring, small group work and extra practices for those students who need more time to master complex concepts.
According to the National Council of Mathematics Teachers, a shift is needed from traditional 'paper and pencil' approaches which emphasize computation and rote learning to an approach which emphasizes the child gaining mathematical insight, reasoning, and problem solving skills. The School will focus on creating a developmentally appropriate math curriculum where children are encouraged to understand the conceptual bases and quantitative analysis of mathematical relations. The School believes that the logical thought processes of mathematics are necessary to the development of critical thinking. Through exposure to the basic courses, students not only attain the computational skills needed for everyday life but also develop their ability to think clearly and to present their thoughts in a precise, well-organized fashion. The program will be flexible in that it satisfies the needs of students who are not particularly mathematically oriented, while providing the challenge and interest necessary for those who want a sound mathematical background on which to base further study.

The Mathematics curriculum will be aligned with NCTM Principles and CCSS. In order to implement mathematics curriculum, The School is committed to adopt the proven instructional mathematics curricula, the College Preparatory Mathematics (CPM).

The School will follow the state course descriptions for the following courses to be offered in grades 6-8. The purposes of these courses are to provide instruction and promote academic excellence in basic mathematic skills, geometry, algebra, problem solving, and mathematical reasoning. The content will include, but not be limited to operations, numeration, whole numbers, fractions, decimals, percent, ratio and proportion, equations, inequalities, functions, expressions, properties, constructions, area, volume, proofs, limits derivatives, integrals and the development of logical reasoning skills. These skills and in preparation for the Florida Comprehensive Assessment Test, are essential for a student to succeed within the real world work environment. These courses cover concepts and materials that are aligned to NGSSS-CCSS.

GRADE	COURSE
6	M/J Mathematics I*
6	M/J Mathematics I Advanced
6-8	M/J Intensive Mathematics
7	M/J Mathematics II*
7	M/J Mathematics II Advanced
8	M/J Mathematics III (Pre-Algebra)
8	Algebra I
8	Algebra I (Honors)**
8	Geometry (Honors)**

*Students requiring further strengthening in mathematics will be enrolled in M/J Intensive Mathematics.
** High School Credit(s) for Students in Grades 6, 7, and 8 - Students may enroll in selected high school courses for the purposes of pursuing a more challenging program of study.

College Preparatory Mathematics (CPM)

College Preparatory Mathematics (CPM) is offering series of textbooks to meet the grade 6-8 and high school CCSS content and practice standards: Core Connections, Courses 1 - 3 and Core Connections Algebra 1 & 2 and Geometry. CPM is a complete, balanced mathematics program for middle school and high school students who want to learn the basics and more. The U. S. Department of Education designed CPM "an exemplary program" in October, 1999.
CPM includes middle school curriculum and a high school program of Algebra 1, Geometry, Algebra 2, Math Analysis (Pre-Calculus), and Calculus accepted by every college and university in the country. CPM students are prepared to know fundamental skills and procedures, understand concepts, and acquire an array of problem solving strategies so that they will be prepared to be successful in college mathematics courses and the workplace of the 21st century. In line with the requests of leaders of high-tech industries, CPM students learn to work together in study teams on challenging problems. Under the careful guidance of their teachers, CPM students explore the major concepts of middle school and high school mathematics in a variety of ways designed to provide them with several means to solve math problems. CPM students are assisted in making the transition to higher mathematics by doing problems which illuminate concepts in four major ways: numerically, symbolically, graphically, and verbally. Deep ideas are spread over weeks or months as students engage and re-engage the same concepts

in a wide variety of contexts and degrees of difficulty with frequent opportunities to cement their understanding of basic ideas and their intellectual connections.

As a result of the carefully designed problem sequence of the books, CPM students score at least as well but usually somewhat better (and often substantially better) on standard multiple choice exams than students in traditional classes. On written response questions, CPM students score 30-40% higher. Transcript studies indicate that very high ability CPM students who take Algebra 1 in the 8th grade are 60% more likely to enroll in calculus classes in high school than students in traditional classes at the same school. At the same time, average students are significantly more likely to persist in mathematics than students in traditional classes. A report that compares the CST results for about 100 CPM high schools in California to the state average on the Algebra 1, Geometry, and Algebra 2 CST exams shows CPM schools scored equal to or higher than the state average for "proficient and above" or better students in 63 of the 71 comparisons (2010). Another report that compares the CST results for about 50 identified CPM middle schools in California to the state average on the 6th and 7th grade tests shows that for all five years and in both grades, the CPM schools have a greater percentage of students performing at the proficient or better level. The 6th grade results average 13.2% higher for the five years, while the 7th grade results average 24.6% higher (2008)

The goal of CPM Educational Program is simple: improve the effectiveness of secondary mathematics instruction by incorporating contemporary knowledge about how people learn into student texts and teacher methodology. CPM is built on the fundamentals of the existing mathematics curriculum and incorporates the mathematics necessary for success in the 21st century. CPM has helped more than 4,000,000 students make sense of mathematics and see both the power and the beauty of the subject.

What Is The CPM Curriculum?

The CPM middle school and high school core courses—Making Connections: Foundations for Algebra, Courses 1 & 2, Algebra Connections, Geometry Connections, and Algebra 2 Connections—were designed and written based on several fundamental learning principles. An outline of those principles (in bold) and their implications in the course design are described below.

Mathematics is a coherent intellectual system, not a collection of disjoint facts, and needs to be taught in a way that makes this coherence clear. The Connections courses emphasize the connected nature of mathematics. Each course consistently weaves strands of topics together so that the connections emerge naturally and can facilitate deeper understanding.

Curriculum works best when it is successful with all students, including "traditionally struggling students" and "accelerated" students. Therefore, the Connections series makes each course challenging and engaging for all students from the very beginning. This approach not only builds stronger study teams (because in order to promote mathematical discourse among the students, study teams need something to talk about), but also helps to reduce status issues from the start (e.g.," Jimmy can do these problems quickly on his own so he must be smart and I am not."). Through the use of challenging problems, accelerated students are pushed to learn more and are

not lost to boredom, while "traditionally struggling students" are actively engaged in the work of developing solution plans and executing them. They become an integral part of the study team.

  At the same time, to support students with weaker skills and learning gaps, these courses build the conceptual foundation slowly with an emphasis on manipulatives and looking at problems in multiple ways. The "mastery over time" approach helps "traditionally struggling students" build understanding over time and accommodates different learning styles.

Teachers teach better when curriculum materials are flexible. The Connections authors have specifically designed many of the guided investigations so that teachers can choose an open-ended approach or select the "further guidance" problems for their students. Chapter closure is designed to offer choices for teachers depending on their students' needs and the time available to them for closure.

Structured investigations and lessons are more successful when students clearly understand what they are looking for. Each lesson in the Connections courses begins with an introduction that lays out the learning goals. In addition, lessons are written so that students understand the purpose and goals of the task to enable them to sharpen their focus. Attention is also paid to helping students recognize the framework of what they are learning, such as using a representation web. Students learn more when they solve problems and discuss their thinking with others. This research-based principle is incorporated into the design of the CPM Connections curriculum by having students collaborate in study teams. The teacher manages and supports learning while guiding students toward the mathematical objectives of the lessons.

Teams work better when the work actually requires a team and there is something to talk about. The Connections courses are specifically designed to have class work that is challenging for all students so that students must problem-solve together. Each student has a specific, defined role in the solution process. These specific responsibilities eliminate the potentially damaging team behavior of having one student solve the class work problems and then "teach" or "tell" the other students in the team how to solve them.

Closure is a vital portion of a lesson. Closure is incorporated into each lesson. Sometimes the closure activity consists of reflective writing while other times the Teacher Editions offer suggested questions the teacher can use to facilitate a whole-class discussion.

A student's learning is more meaningful and is better retained when he or she reaches the level of understanding necessary to explain and justify his or her thinking. The Connections courses emphasize asking students to justify their mathematical thinking and problem-solving approaches to help foster long-term retention of what they learn.

A mathematical text should have usable reference elements. The text design allows teachers, parents, and students to access information through indices, glossaries, and by referring to problems in a manner that helps everyone find the problem or lesson. All major concepts are eventually consolidated in Math Notes boxes, which include definitions of key mathematical terms, as well as examples for how to solve certain types of problems. Every lesson is structured similarly (introduction, problems/investigations, closure, Math Notes box (when appropriate), and homework) so that students know where to look for what they need.

Literacy can be strengthened through meaningful/rigorous mathematical study. The Connections series supports students' growth in reading and writing literacy. The student text is written in an even voice with consistent language usage to help students who are challenged with reading. Students are also given regular opportunities to develop and practice their writing skills through reflections and explaining their understanding. The bulk of the reading is done during class time when students have the support of their team members and the teacher. Homework assignments require much less reading. The Lexile scores for the books support the readability of the texts for their intended grade levels.

The structure of the lessons and layout of the textbook help students focus on mathematics and eliminate distractions. The consistent structure of each lesson, homework set ("Review and Preview"), and chapter closure section help to make students comfortable and confident with the lessons. The use of one color printing with illustrations specific to the problems (or that are a course icon) avoid the distractions of random pictures, multiple color splashes, and layers of highlighting. These techniques divert the students' focus from the mathematics in the lesson and create more confusion than clarity. The "color" in the book is the excitement and engagement of the students with mathematics.

Program Quality:

Reviewers noted that College Preparatory Mathematics' learning goals are aligned with NCTM standards and CCSS content and practice standards. The program is rigorous, focused, and coherent and provides familiarity and practice with numerous mathematical concepts (e.g., algebraic notation, algorithms, and geometric representations in Mathematics 1). The reviewers found that the overall program goals are well aligned, challenging, clear, and appropriate for the intended student population (lower level ability to advanced students). Each of the four courses is built on a few core ideas that are developed and deepened over a four-year period, thereby allowing students more time to master a concept.

The program strategies emphasize active learning and group work; students are introduced to problem solving, communication, and reasoning through laboratory experiments and real-world applications. Support materials are provided in the student texts to help them review and evaluate their progress. The reviewers noted ample evidence for the application of skills through problems that engage the students in both individual and collaborative work and address a variety of learning styles. Concepts are developed through guided instruction, individual and team-work, tactile and kinesthetic activities, data collection, class-work, and homework. Students are encouraged to develop a positive attitude and become more aware of their own thinking about problems and to describe their efforts both orally and in writing.

An assessment handbook is provided in the teacher editions and outlines a variety of options for integrating assessment into instruction, e.g., investigations, portfolios, projects, presentations, problem solving, and daily performance assessment. The wide variety of approaches presented in the teacher's program materials includes methods for assessing depth, flexibility, and application of learning. The student self-assessment component was viewed by the reviewers as a strong component of the assessment handbook.

Program Effectiveness and Success:

College Preparatory Mathematics has been designated as an **_Exemplary_** mathematics program. CPM has shown consistent evidence of improved student performance in a variety of studies that employ comparison groups and large sample sizes. Nine separate studies examined the achievement of approximately 30,000 California students in diverse settings. A variety of instruments was used to assess growth in mathematics achievement, including multiple choice assessments from the Math Diagnostic Testing Program (a well-established program that produces multiple-choice examinations for use by California high schools to provide diagnostic data and by colleges as placement tests), open-ended written response items which were processed by the University of California at Davis, the SAT mathematics exams, and California's Golden State Examination (a test to assess students in many disciplines for high achievement). In three studies that asked students to provide written responses to open-ended questions assessing their inquiry, reasoning, and problem-solving skills, evidence consistently favored CPM students of both genders and all ethnicities over non-CPM students. Several studies examined possible differences in achievement produced by CPM for both genders, students of various ethnic groups, and students at different places on the performance spectrum. Results demonstrated that CPM works equally well for students of all characteristics.

Usefulness to Others:
Reviewers noted that the program is well developed with a solid curriculum and supportive teacher training component. The program has been used in both accelerated and regular classes from Grade 7 to early college, in block scheduling structures, and in a variety of geographic and multi-ethnic locations that include non-native English speakers, and students with learning disabilities.

Educational Significance:
The CPM program is consistent with the NCTM standards that suggest that real-life problems be used to show students that the mathematical concepts they are learning will be used after they leave the classroom. Each unit in CPM is based on real-life themes and built around appropriate mathematical concepts.

The CPM curriculum, designated one of five "Exemplary Mathematics Programs" by the U.S. Department of Education in October, 1999, is taught by more than 3,000 teachers in more than 900 schools across the country. It was originally a grant-funded curriculum and assessment development project located in Sacramento County, California. When the first edition of Algebra 1 was released in 1992, there were about 200 teachers using CPM materials, mostly in seven urban sites in California. By the 1995-96 school year there were more than 2,000 teachers using CPM materials, mostly in California, with about 100 teachers located in Washington State, Wisconsin, Illinois, Pennsylvania, and Washington, D.C. *Today CPM is used in more than 35 states.*

The CPM program presents mathematical ideas in contexts that help students make sense of otherwise abstract principles. Students are taught how to gather and organize information about problems, break problems into smaller parts, and look for patterns that lead to solutions. Each course is built around several core ideas that are used to develop related topics, skills and procedures. Students master skills and come to understand ideas over several days and weeks. Much of their classroom time is spent doing guided investigations–much like a math lab–that develop ideas in concrete, visual ways. They also apply their learning to realistic problems that require more than merely mimicking examples of rules.

What Makes the CPM Curriculum Effective?

• The CPM curriculum is effective because of its unique emphasis of both basic skills and problem solving strategies. Where other mathematics programs emphasize only the mechanics of mathematics, the CPM materials develop the basics while encouraging students to understand ideas, see relationships between them, and apply mathematical principles to complex problems.

• CPM courses prepare students for the global marketplace they will face after graduation, either in institutions of higher learning or in the job market.

For more detail see http://ww.cpm.org

Pearson Pacemaker Basic Math

Pacemaker Basic Math is a comprehensive program that provides a solid, well-balanced approach to teaching math content and building math skills in whole numbers, basic arithmetic operations, and mastery of simple geometry and algebra as it prepares students for the rigors of difficult standards and proficiency tests.

This program provides educators with tools to meet the needs of diverse classrooms, keep learning up-to-date and relevant, and create supportive learning environments for a range of learning styles. Correlated to the NCTM standards, the materials and techniques used in the program are accessible, predictable, age-appropriate, and relevant as it bridges the gap between varied abilities of students and the ladder to success in algebra.

Visual learners and struggling readers are supported with photographs, charts, graphs, and illustrations, and high-interest projects gear up students for lessons.

Pacemaker Basic Mathematics Encourages students to progress at a pace that works for them through a manageable and consistent format, Reinforces student comprehension with frequent opportunities to assess student understanding, Equips students with the essential skills they need to master word problems through unique problem solving lessons and Fosters student success through single-concept lessons and stepped-out examples.

This comprehensive program provides a solid, well-balanced approach to teaching math content and building and mastering math skills in number sense, measurement, as well as introductory

operations and data analysis, as it prepares students for the rigors of difficult standards and proficiency tests.

Pacemaker Basic Mathematics bridges the gap between success in algebra and the varied abilities of students. It incorporates valuable materials and techniques for educators and students, ensuring accessibility of content, relevance, and age-appropriateness.

<u>Middle School Science</u>

The science program is designed to use a constructive view of learning skills, sequences, and science knowledge. It is believed that we must build the student's own reality when introducing content. Meaning in science effective teaching comes from relating the new experiences to what they already know, not from simply adding new knowledge to what students know. The Science Curriculum will incorporate Florida's Next Generation Sunshine State Science Standards. Some examples of Standards are presented in Appendix F.

The sequence of instruction necessarily begins with misconceptions or alternate understandings that the students have about the topic. Thus, it engages students in activities that help construct or reconstruct meaning. Science class strategies include:

- Encouraging students to make their ideas explicit, presenting them with events that challenge their ideas;
- Encouraging the process of hypothesizing, and the generation of alternative inspirations of models, enabling the students to explore these alternatives in informal and friendly ways, particularly through group discussion, and providing opportunities for students to use their new ideas in wide range of situations so that   they can appreciate their utility.

The School's science-oriented curriculum will concentrate more on an experimental, hands-on approach to their current definition of science while increasing the abstract knowledge of science. Science is a dynamic ever-changing discipline; thus student will be encouraged to use computers and the Internet, plan and organize projects, hypothesize, analyze data, and draw conclusions from tests they will create. The major purpose of the science curriculum is to teach children to become self-reliant, independent problem-solvers, concentrated in science subjects, which are merged with life in a consistent manner with what is known about how adolescents think of them. It is designed to create a high level of interest in learning that will become personalized and individualized. The School believes as a philosophy that science empowers students to understand our world and how it works. Science, therefore, is the key that opens the doors that help students discover their own unique and important gifts.

The School will implement Glencoe Florida Science series and the Foundational Approaches in Science Teaching (FAST). The Science curriculum will prepare students to achieve the Next Generation Sunshine State Standards by incorporating a hands-on approach to learning of the central science themes: matter and energy, force and motion, earth and space, processes of life, and the scientific method.

The purpose of the science courses offered is to provide students with a broad knowledge of

scientific concepts. All of the science courses are designed to promote a sense of inquiry through laboratory experiences and to develop critical thinking skills. The School will follow the state course descriptions for the following courses to be offered in grades 6-8.

GRADE	COURSE

* High School Credit(s) for Students in Grades 6, 7, and 8 - Students may enroll in selected senior high school courses for the purposes of pursuing a more challenging program of study.

The Foundational Approaches in Science Teaching (FAST)

General Description:
The Foundational Approaches in Science Teaching (FAST) program is a sequence of three inquiry science courses especially designed for middle-school students. The courses emphasize the foundational concepts and methods of the physical, biological, and earth sciences. Student investigations are organized into three strands called physical science, ecology, and "relational study," which integrate the study of science, technology, and society. The goal of FAST is to develop scientifically literate students who have both the background necessary for understanding environmental concerns in our technological society and basic tools for further study in science. The main objectives are to develop relevant thinking skills, laboratory skills, and knowledge of core science concepts.

FAST students develop a scientific world view by doing science -generating questions, designing and carrying out experiments, collecting and analyzing data, and researching, drawing conclusions based on evidence, writing reports, and communicating findings. Students work in small collaborative groups that function as research teams, becoming producers rather than only receivers of information. The teacher is the research director and coordinator, a colleague who stimulates and facilitates ever deeper probing into problems. Through the process of inquiry and research, student teams generate the theoretical content of the program.

As scientists, students design many of their own experiments. In a physics unit, for example, students formulate theoretical models of heat and light and test their models. They also invent and build tools and instruments for some investigations. As technologists, students apply recently mastered scientific principles, such as the concepts of buoyancy and density in designing and constructing a working model of a submarine. By experiencing multiple roles (scientist, engineer, technologist, politician, and citizen), students practice and reinforce skills from many

areas, including math, written and oral communications, and social studies. FAST meets the standards and goals for science education set by the National Research Council, the American Association for the Advancement of Science, and the National Center for Improving Science Education.

Results:
In several impact evaluation studies, FAST students have outperformed non-FAST students in a number of areas. FAST students have demonstrated significantly higher science achievement on CTBS and the California Achievement Test, significantly higher performance on basic thinking and problem-solving skills (CTBS), significantly higher gains in manipulative laboratory skills (Laboratory Skills Test), and significantly higher creative thinking skills (Torrance Tests of Creative Thinking). Results were consistent for all FAST students, regardless of gender, learning style differences and ability. Also, FAST was designated by the Educational Testing Service as one of two programs nationwide with the best comprehensive middle-school science curricula.

Student Populations:
FAST is designed as a science program for students in heterogeneous, untracked classes. The Educational Testing Service identified FAST as an exemplary program serving minority and female populations during the middle-school years. Separate studies have shown the effectiveness of FAST in teaching gifted and mildly disabled students as well.
Special Considerations:
FAST incorporates a wide variety of instructional strategies designed to address the different learning styles and developmental needs of students ages 12-15. Some of the instructional strategies appropriate for student investigations are cooperative/ collaborative learning, whole group instruction, independent and self-directed learning, peer coaching, graphing, concept mapping, self-assessment, research, and simulations.

Middle School Social Studies

The School will use the state-approved McDougal Littell, Holt, Rinehart & Winston, Prentice-Hall Series or other state-adopted text in the instruction of Social Studies. The Social Studies curriculum includes the study of related knowledge and modes of inquiry selected from history, the humanities, and the social sciences, including anthropology, archaeology, economics, geography, history, law, philosophy, political science, psychology, religion, and sociology. Thematic units have been designed that integrate the various subjects and address key areas of social studies in alignment with NGSSS. Character Education components (respect, honesty, responsibility, self-control, tolerance, kindness, citizenship and cooperation) will be emphasized individually through thematic lessons and group projects.
Social Studies education will promote loyalty and love of country and community, and it will prepare students to participate intelligently in public affairs. Its component disciplines foster in students the knowledge and skills needed to understand current political and social issues. Social studies education will provide students with an understanding of the democratic principles and ideals upon which good citizenship is founded and an understanding of the world beyond their borders.

The School will follow the state course descriptions for the following courses to be offered in grades 6-8. These courses cover concepts and materials that are aligned to the Next Generation Sunshine State Standards. Students will be required to successfully complete three credits of Social Studies at the Middle School level in Global Geography, Civics, and U.S. History which will be offered through the school at the Regular, Advanced and Gifted Levels within the Middle School.

GRADE	COURSE
6	M/J World Geography
6	M/J World Geography Advanced
7	M/J Civics
7	M/J Civics Advanced
8	M/J US History and Career Planning
8	M/J US History Advanced and Career

Lessons will be designed to teach students to effectively analyze historical evidence, use sources effectively, detect potential bias in resources due to cultural influences, and argue empathetically.

Thematic units will be designed that integrate the various subjects: Time, Continuity, and Change (History); People, Places, and Environments (Geography); Government and the Citizen (Civics and Government); Additionally, the School will include the following Social Studies topics in the Social Studies curriculum:

- African-American History Requirement
- Holocaust Requirement
- Hispanic Contributions to the United States Requirement
- Women's Contributions to the United States Requirement
- Veterans Contributions Recognition
- "Celebrate Freedom Week" Instruction - shall be in accordance with Florida Statutes and district guidelines.
- Character Education - Instruction in the nine core character education values (The nine core values are citizenship, cooperation, fairness, honesty, integrity, kindness, pursuit of excellence, respect, and responsibility).

Students are required to enroll in a semester-long course in career and education planning to be completed in the seventh or eighth grade. As part of the course students will develop a career and education plan using Florida CHOICES Planner (or other career information system such as CHOICES Explorer, etc.) and ePEP at FACTS.org. The School will use approved year long Social Studies courses to meet this requirement, such as M/J United States History & Career Planning. The classroom teacher will determine which semester to implement the career and education content. Some examples of Standards are presented in Appendix F.

4.B. Describe the research base and foundation materials that were used or will be used to develop the curriculum

The School will use the Next Generation Sunshine-Common Core State Standards as a guide when developing the curriculum. The School's curriculum and materials is research based as described in the above section. The School's curriculum described above have been designed with the Schools mission in mind. These research based curriculum and approaches create the appropriate environment to enable students to become confident, self-directed, and responsible life-long learners. Research based exemplary curricula have shown that these programs are effective and accessible to "all levels of students," not only high performing students. See "Appendix A" for more detail explanation of instructional methods and approaches.

4.C. Describe the school's reading curriculum. Provide evidence that reading is a primary focus of the school and that there is a curriculum and set of strategies for students who are reading at grade level or higher and a separate curriculum and strategy set for students who are reading below grade level

The school ensures that reading is a primary focus of the curriculum and that resources are provided to identify and provide specialized instruction for students reading at grade level or higher and a separate curriculum and strategies for students who are reading below grade level. The School reading program will be consistent with the Broward County Schools K-8 Comprehensive Reading Plan. However, The School will not be restricted to the content of the reading program offered by the district, in that, extra elements will be introduced to the reading program. The School is aware that reading is not only important to achieve success but also a requisite skill to achieve life-time success. To this end, the School will implement an effective reading program, which aims at developing proficient reading skills for all students at all grade levels and meets the requirements outlined in Florida Statue 1002.33. The School believes that high-quality instruction, reading text materials and resources are major factors playing prominent roles in development of students reading and comprehension for elementary, middle and high school level. These factors serve as a framework for making wise decisions in designing a reading program that is comprehensive and cohesive.

An effective reading program includes regular use of a wide variety of reading materials that match students' independent reading levels. Content-area learning incorporates alternative texts that students can read and comprehend independently. Therefore, the School will provide adequate reading material for varying reading levels to accommodate different independent reading levels and interests of individual students in the school library media center. Reading materials will include children's literature, novels, magazines, informational text, student published writing, Internet, handbooks as well as textbooks and other supplementary materials.

Throughout the school year the following procedures will shape the reading program. First, students will be screened at the beginning of the school year to determine basic reading development and to detect the presence of any difficulty. Second, comprehensive diagnostic

measures will be used to investigate the nature of reading problems for students with detected reading difficulties. Third, progress monitoring of skill acquisition will be periodically administered throughout the school year to detect and steer reading progress. A reading coach and highly qualified reading teacher(s) will be hired in order to implement and monitor scientifically based reading program.

The school will support the Just Read, Florida! initiative in assisting all students in becoming successful, independent, and comprehensive readers by adopting the Broward County Public Comprehensive Research-Based Reading Plan to provide teachers with a systematic framework for literacy instruction.

As discussed in Language Art curriculum sections above the School's text selection will be modified as per the Sponsor's selection of state-adopted texts and modifications throughout the duration of the charter:

In Elementary, the School will use Macmillian/McGraw-Hill Treasures and Imagine It series; This series is a research-based, developmental reading program for kindergarten through fifth grades.

In Middle, state-approved Holt McDougal Series or other state-adopted text will be used. These are research-based Reading/Language Arts programs designed to assist with differentiating teaching using intensive reading and writing instruction and interventions that help all students succeed. The series are state adopted and aligned with *Just Read Florida.* This series provide a full continuum of reading instruction complete with vocabulary development, fluency techniques and practice, comprehensive strategy checks and a variety of readings and literature

In addition Read XL or Jamestown Reading Navigator, Accelerated Reader (AR), Imagine It are the programs to be implemented as Supplemental Intervention Reading Programs (SIRP) and Comprehensive Intervention Reading Programs (CIRP) for those who are reading below level.

The Response to Intervention (RtI) model will guide the school with implementing a tiered approach to instructional delivery that includes fidelity of instruction using the core program and interventions of increasingly higher intensity, based on the differentiated needs of students. This multi-tiered approach to providing services and interventions to students at increasing levels of intensity is based on progress monitoring and data analysis. Problem solving at all tier levels is a cyclical process that involves analyzing the data to identify the problem and determine why the problem is occurring, implementing an instructional plan to target specific differentiated student needs, and evaluating the plan to ensure effective response to the intervention.

As part of Tier I universal core instruction, all elementary students must participate in a dedicated, daily, minimal 90-minute uninterrupted initial instruction reading block, which includes an explicit whole group lesson from the Comprehensive Core Reading Program (CCRP), small group differentiated initial instruction, and independent and peer collaborative application of skills/strategies in literacy centers. This initial instruction must explicit, systematic, scaffold, differentiated, guided by data analysis, and focused on the six essential components of reading (oral language, phonemic awareness, phonics, fluency, vocabulary,

comprehension). Elementary students identified as struggling readers (Tier II and Tier III) must participate in additional daily immediate intensive intervention (iii) instruction that focuses on the specific differentiated needs of students and provides more intense reading instructional time that extends beyond the initial 90-minute reading block for which a double or triple dose of targeted instruction is delivered. This intervention must continue until the reading deficiency is remedied.

Daily reading intervention (Tier II and Tier III) for secondary students must include on a daily basis: whole group explicit instruction from the Comprehensive Intensive Reading Program (CIRP), small group differentiated instruction, independent reading practice monitored by the teacher, an infusion of Common Core State Standards and benchmarks specific to the subject area, and a focus on informational text at a ratio matching PARCC. Students that are reading below level have a variety of intervention needs and teachers must recognize that no single program or strategy can be successful for the remediation of all students and draw from a variety of effective reading strategies that are grounded in scientifically based reading research and proven to have been successful in the remediation of struggling adolescent literacy learners.

Florida Formula for Effective and Powerful Instruction:
3Fs + 1S + Data + PD = Effective and Powerful Instruction

• Frequency and duration of meeting in small groups – once daily, twice daily, etc.
• Focus of instruction (the WHAT) work in vocabulary, phonics, comprehension, etc.
• Format of lesson (the HOW) determining the lesson structure and the level of scaffolding, modeling, explicitness, etc.
• Size of instructional group – 1, 3, 4, 6, or 8 students, etc.
• Analysis of Data to determine the 3 Fs and 1 S (the WHY)
• Provide Professional Development that focuses on the collection and analysis of data, the 3 Fs, and 1 S

The reading program will cover the Florida's Formula for Reading Success: 6 + 4 + ii = iii
6 Areas of Reading - Oral Language, Phonemic Awareness, Phonics, Fluency, Vocabulary, Comprehension
4 Assessments – Screening, Progress Monitoring, Diagnosis, Outcome measures

ii: Initial Instruction –
- Minimum 90-minute reading block
- Incorporates 6 instructional components of effective reading instruction into a comprehensive and cohesive instructional design.
- Use assessment data to plan for and provide instruction including
  - Explicit instructional strategies
  - Coordinated instructional sequences
  - Print-rich instruction
  - Whole group/small group/whole group
  - All students, using differentiated instruction

iii: Immediate Intensive Intervention of the 90-minute reading block
- Small group or one-on-one

- Students with reading deficiencies
- Minimum of 20 minutes/day until deficiency is remedied

Print Rich Environment - Each class will maintain a classroom library to include a collection of quality literature that includes material written at varying reading levels and in a variety of genre forms, inclusive of both fiction and nonfiction. This collection will offer students reading material that will support their individual interests and abilities. Frequent successful reading experiences using appropriate texts will provide the opportunity to improve their reading proficiency with regard to fluency, vocabulary, and comprehension. The books in the classroom library will be attractively displayed to exhibit an inviting accessibility to all students. Teachers will organize classrooms to afford students ample opportunities for, and easy access to reading materials during literacy center time within the daily reading block.

Word Walls - Teachers will create word walls that consist of high frequency words, word patterns or phonic elements, and interesting, exciting words. Students will use word wall activities to practice recognizing words quickly and accurately. In addition, these word walls will display interesting and relevant content area words, and more challenging words. Word walls will be used in all classrooms, and in the content area classrooms will assist with content area vocabulary comprehension and acquisition.

Silent Sustained Reading - Increments of independent, sustained silent reading will be included in the reading classroom to help students build stamina for increasingly longer and more challenging text. Teachers must monitor for engagement. Reading logs, reaction journals, text talk, book passes or story summaries help students make connections to text.

To encourage students and increase motivation, the School will have book fairs and reading days where special guests, parents, and volunteers visit the school and read. The School will conduct book talks, reader's theater, read aloud, poetry readings, storytelling contests, book clubs, author visits, and Distance Learning opportunities. The Schools may also participate in book battles with the Sunshine State Young Readers Books and incentive programs that offer awards for certain numbers of books read. Classroom teachers may also implement additional reading motivation programs, such as Pizza Hut's Book IT! daily reading log challenges, and various incentive programs.

Writing activities are incorporated into the 90-minute reading block to provide students with the opportunity to apply skills, strategies, and techniques relating to the six components of reading (phonemic awareness, phonics, fluency, vocabulary, oral language, and comprehension). The School's reading programs include lessons where writing is used to specifically aid comprehension before, during, and after reading. Before reading, teachers can build background by having students write what they already know about a topic, draw pictures and label to support visualization, collect words with concept maps in word journals to enhance vocabulary, and/or write a prediction about what might happen in the reading. During reading, writing is used to help students stay actively engaged with the text. Students can confirm predictions, summarize what has happened so far, create questions about parts they may find confusing, write opinions about characters or actions, or take notes to support question/ answer relationships. Students can create responses after reading by writing to create visual displays of their understanding with graphic organizers, writing to support or revise their predictions, writing to explain their

thinking, writing to use new vocabulary words in a different context, and writing to make connections with the text. Literacy workstations and center ideas in both programs include writing activities such as innovations on the core student text, extensions that cross genres, research writing to build background and vocabulary, and additional support for the reading/writing connection.

Read XL

Read XL is a reading intervention program designed for struggling readers in grades 6-10. The program can be adapted for 45-minute, 60-minute, or 90-minute sessions, including whole group instruction (for 2/3 of the time) and supported, independent reading (1/3 of the time). An anthology of 24 lessons for each grade provides high-interest fiction and non-fiction (60% of materials) beginning with reading levels three years below grade level and gradually progressing up to grade level. Each anthology lesson provides explicit instruction in vocabulary and word study, comprehension strategies, self-monitoring strategies, writing, fluency practice, and real-world reading using authentic text. Additional reading practice is provided through three shared novels for each level, an independent library, an audiobook library, and an electronic text collection on CD-ROM. Read XL suggests that shared reading requires the teacher to read aloud as students follow along in their own copies of the book, modeling strategies used by good readers such as applying comprehension strategies, thinking aloud, using context clues, making inferences, predicting, questioning the author's purpose, and reading fluently with expression. An independent library of 12 books includes fiction and biography in a range of reading levels from 1.5 to 8.0. The audio-book library provides modeled reading through a cassette with two voices: a narrator who reads the text and a reading coach who models strategies that good readers use. Students follow along with the narrator in a print version of the book. The electronic CD-ROM presents high-interest, non-fiction reading selections with 'clickable' vocabulary words and graphics.

Student materials include the Read XL student anthology, shared novels, an independent library, an audio book library, a practice book, and an electronic text collection on CD-Rom. A Teacher's Guide provides detailed instructional plans for each lesson including explicit pre-, during-, and after-reading strategies, vocabulary and word study guidelines, suggestions for ESL support, self-monitoring hints, writing prompts, and comprehension questions. Blackline Masters of graphic organizers are included within the resources section along with extra-support lessons on a variety of comprehension, fluency, vocabulary, and test-taking topics. Separate Teacher Guides accompany the independent library, audio books, and shared novels, and provide summaries, discussion questions, reproducible practice pages, and teaching suggestions. Read XL can be used in combination with Scholastic Reading Inventory (purchased separately) since all student materials are leveled using Lexile measures. Student progress is measured informally through selection wrap-up questions, practice book answers, and written work. An assessment book provides 12 multiple choice questions for each lesson.

How is Read XL aligned with Current Reading Research?

Read XL incorporates four of the five elements essential to reading in various levels of concentration. Typical of a program designed for older readers, phonological awareness is not

addressed. Phonics instruction is not based on the traditional progression from easier word analysis activities to more difficult, but instead a phonics-based instructional activity (referred to as word analysis) in each lesson is specific to words contained within that lesson. Vocabulary development in each lesson (referred to as vocabulary in context) begins with an instructional routine which introduces 3 concept words and 5 high utility words. Definitions, context clues, and teacher-led discussion with these words are provided throughout the lesson and the student practice book provides a follow-up worksheet. Teacher read-aloud and listening to books on tape provide repeated exposure to vocabulary and additional opportunities to read independently allow students to apply word learning strategies to text. Each lesson also includes a word study section, focusing on the study of word structures including affixes, roots, synonyms, antonyms, multiple meanings, and multi-syllabic words. A specific instructional routine targeting vocabulary instruction for ESL students includes topics such as cognates, colloquial language, idioms, time words, etc.

Fluency is supported in each lesson through structured routines which emphasize phrasing, natural and consistent pace, expression, and self-correction. Teacher read-aloud and narrated books on tape present models of fluent reading and each week's lesson contains a fluency practice such as peer assisted oral reading, reader's theater, choral reading, or repeated reading. Practice materials and opportunities to practice reading at appropriate reading levels are provided through shared novels and the independent library. However, fluency building routines that include goal setting to measure and increase reading rate are not included, fluency building is not a part of each day's lesson, and fluency is not regularly assessed.

Comprehension instruction in Read XL is explicit and provides many opportunities for students to engage in teacher-led discussions relating to text meaning. Most Read XL lessons consist of two connected readings that expand on an idea, providing students with the opportunity to make connections between texts. Each week's lesson begins with background building activities called create interest, build a mental model, and unlock text structure. These activities guide students to make predictions about the text, visualize the setting, and understand the organization of the lesson's genre. Frequent teacher-directed questions embedded throughout the text encourage students to monitor understanding. Specific strategies such as character analysis, sequence, fact/conclusion, main idea, summary, compare/contrast, and story grammar are introduced in a lesson and then applied as appropriate in subsequent lessons. A final wrap up of the reading activity provides literal and inferential questions for class discussion. Unique to Read XL is an activity following each lesson called real-world reading which includes authentic text presentations of maps, movie reviews, medicine bottle labels, menus, pie charts, bar graphs and other relevant and meaningful examples. The instructional routines built in to Read XL are consistent and teacher friendly, and include direct instruction, modeling, guided practice, student practice, and application with feedback.

Professional development is available in a 3 hour or 1/2 day session with an emphasis on program implementation. An additional all-day training is available for a fee to schools who wish more in-depth training in the reading strategies specific to the program.

Research Support for Read XL

Read XL is a relatively new program, published in 2001, and does not have any research that is specific to the intervention. The content, strategies, and instructional design of Read XL's comprehension and vocabulary instruction are consistent with current reading research. Future studies that employ control groups and have sound experimental designs will help determine the effectiveness of Read XL.

Jamestown Reading Navigator

Jamestown Reading Navigator is a reading intervention program designed specifically for students in grades 6–12 who are reading two or more reading levels below their grade in school. The program provides direct, explicit instruction and modeling of good reading practices, together with opportunities for students to practice and apply these reading strategies—with a specific focus on comprehension skills and strategies, designed for application to content-area reading, vocabulary, writing, fluency, and decoding/phonics (for students with a particular need in this area).

Jamestown Reading Navigator combines online multimedia activities and text selections; printed resources for students to read; and teacher support materials, including professional development, lesson plans, instructional recommendations, and re-teaching skills support.

Jamestown Reading Navigator provides decoding instruction targeted specifically to readers who are likely to need help in this area. This instruction aligns with research and expert opinion related to focus of decoding instruction, recommended instructional features and approaches, and opportunities for practice.

Decoding instruction in Jamestown Reading Navigator is directed toward students at the lowest reading levels—those who are most likely to have skill deficits in this specific area—with a content focus that is supported by research and expert opinion.
• Phonemic awareness instruction in Trek 1 (level 1) of Jamestown Reading Navigator teaches students to relate sounds to specific letters and letter combinations.
• Trek 1 in Jamestown Reading Navigator provides students with systematic and explicit instruction in phonics.
• Instruction focuses on high-frequency sound-spelling relationships and word elements.

Instructional Features and Approaches

Jamestown Reading Navigator incorporates specific research-based instructional features and approaches to help students improve their decoding skills.
• Jamestown Reading Navigator uses computer technology to provide needed support for struggling readers in the area of decoding instruction.
• Decoding instruction combines approaches that stress both mastery of specific phonetic patterns and implicit understanding of phonic generalizations.
• Decoding instruction is reflective, guiding students to recognize patterns and make generalizations instead of memorizing rules.

• Lessons are fast paced, multisensory, lively, and brief; incorporate explanation, modeling, demonstration, and application; and include explanations of why skills are important.
• Instruction incorporates strategies that use word identification by analogy.
• The program provides teacher resources and guidance in tutoring students who can benefit from intense, individualized decoding instruction.

Jamestown Reading Navigator incorporates a variety of research-based practices to help students improve their reading fluency. These practices align with research and expert opinion regarding focus of fluency instruction, recommended instructional features and approaches, opportunities for less structured reading practice, and assessment resources.

Jamestown Reading Navigator includes an appropriate research-based focus on improving student fluency.
• Each online journey (lesson) includes an oral reading fluency activity in which students read and record text passages.
• Trek 1 teaches 100 common "instant words" that students must learn to recognize by sight.
• Fluency instruction and practice in Jamestown Reading Navigator represent one facet of a broad-based literacy program.

Jamestown Reading Navigator incorporates instructional features and approaches for improving fluency that are supported by research and expert opinion.
• Jamestown Reading Navigator uses computer technology to help students develop fluency through modeling and guided practice. Fluent oral reading is modeled by the expert online recordings of the fluency passages.
• Additionally, teachers are encouraged to model fluent reading in the Jamestown Reading Navigator teacher materials and professional development.
• The program supports a combination of modeling fluent reading and monitoring student growth in fluency.
• Throughout Jamestown Reading Navigator, fluency skills are always practiced in context.
• Teacher materials and professional development encourage teachers to use a variety of formats for guided oral reading fluency activities, including choral reading, echo reading, and reading for performance.
• Recommendations are provided in the on-site Jamestown Reading Navigator implementation training for tutoring students who can benefit from intense, individualized fluency instruction.

Jamestown Reading Navigator includes research-based features that help students gain vocabulary knowledge through wide reading and broad language exposure.
• The program incorporates opportunities for students to read extensively to develop vocabulary knowledge.
• Within Jamestown Reading Navigator, students are exposed to a variety of potential vocabulary words, including but not limited to words that are directly taught. Professional development encourages teachers to develop a word-rich environment in which students are immersed in words, including engaging word play and games.
• Teachers have the option to allow English language learners (ELLs) and other students to listen to spoken text while following along with printed text.

Direct vocabulary teaching in Jamestown Reading Navigator focuses on words that are most likely to be valuable to students, based on recommendations drawn from research and expert opinion.

• Jamestown Reading Navigator's approach to vocabulary instruction is planned, systematic, and sustained, based on specific learning goals for students to learn specific targeted vocabulary words.

• Vocabulary words that are selected for direct instruction are high frequency for mature language users, are found across a variety of domains, and are generally one to two years above the readability level of the text selection where they are used. This helps ensure that the words will be useful to students and are words that students are not likely already to know.

• Direct instruction in vocabulary includes words that will help students process content-area texts.

• Critical vocabulary is pre-taught to help students understand instructional text passages. Jamestown Reading Navigator incorporates a variety of research-based instructional approaches, focused on teaching specific comprehension skills and providing practice in their use.

Jamestown Reading Navigator focuses on helping students develop comprehension skills and strategies that are supported by research and expert opinion.

• Each journey in Treks 2–4 has a specific comprehension skill/strategy focus. Jamestown Reading Navigator provides explicit instruction in 32 comprehension skills/strategies.

• Students are provided with ample practice in answering questions both during and after reading, based on the online and print selections.

• Instruction in several reading skills incorporates teaching students how to generate questions related to texts for specific purposes.

• Students are taught summarizing.

• Students are taught a variety of skills related to story structure.

• Students are guided in using different types of graphic organizers in a variety of contexts.

• Students are taught to visualize what they are reading.

• Pre-reading activities for each online selection prompt students to activate their prior knowledge about the selection's topic. Additionally, teacher materials and optional professional development encourage teachers to help students use strategies for activating prior knowledge.

• Students are taught to read and interpret texts critically.

• As described under Vocabulary, Jamestown Reading Navigator includes an extensive framework for developing students' vocabulary knowledge to improve their text comprehension, focusing in particular on vocabulary that is used in the text selections.

Literacy instruction provided by Jamestown Reading Navigator incorporates a variety of features that are supported by research and/or expert opinion for improving students' content-associated literacy skills.

• Texts used for teaching comprehension skills and strategies include content-area selections from a variety of subject areas, including science, social studies, literature, math, geography, music, art, health, and history.

• Activities provide extensive guidance to reinforce students' understanding before reading content-area texts, while reading content-area texts, and after reading content-area texts.

• Instruction in literacy strategies includes modeling of the strategies using content-area texts.

• The program incorporates a broad array of methods for assessing students' use of reading strategies with content-area texts and providing feedback to students on their performance.
• Teaching of reading skills and strategies is scaffold, using the gradual release of responsibility model, consisting of focus lessons, guided instruction, collaborative learning, and independent learning.
• Students have multiple opportunities to work collaboratively in a variety of processes related to the content- area texts.

Assessment Characteristics
Jamestown Reading Navigator aligns with research-based instructional recommendations relating to variety of assessments, frequency of assessments, and student self-assessment.
• Jamestown Reading Navigator provides a wide range of assessments, including both informal measures as students are carrying out learning activities and more formal assessments.
• Assessment is ongoing and frequent. A student who works daily in the program will likely encounter multiple assessments on a daily basis.
• At several points in the program, students are provided with opportunities to assess their own learning.

The School leadership team will monitor results and analysis of progress monitoring in reading.
• Review the school's implementation of the reading plan;
• Assess the professional development needs of staff related to reading instruction based on student performance data; and
• Develop an action plan that addresses curricular and professional development needs as they relate to the implementation of the reading plan.

Reading Coach or Curriculum Coordinator or APC will analyze progress monitoring data on a quarterly basis. As student data are collected and analyzed, these data will be used to identify specific areas in which teachers can benefit from additional professional development opportunities.
Assessment data will indicate areas where improvement is needed in instructional methods, practices and necessary interventions, thereby allowing for laser-focused professional development (including site-based modeling and coaching).

Screening and Progress Monitoring- Assessments will be used to (1) monitor students progress in reading as well as mathematics, and science Next Generation Sunshine- Common Core State Standards; (2) Provide teachers with classroom assessment tools that will provide student-level benchmarks; and (3) Provide students with information on their progress on specific benchmarks. The assessments include but are not limited to:

Screening: Students will be screened using the Florida Assessments for Instruction in Reading (FAIR), DAR and MAP Testing.
Progress Monitoring: Students will be progress monitored three times per year using the Florida Assessments for Instruction in Reading (FAIR) and DAR, AR, and MAP testing.

For ELL's - CELLA (administered each spring to all current ELL students to measure proficiency and gains in reading, writing, listening, and speaking). Teachers will keep data

portfolios, or folders, of student assessment results and progress in their classrooms to provide additional data of student progress for district and school-based monitoring.

Diagnostic Assessment: Florida Assessments for Instruction in Reading (FAIR), DAR, and MAP.

Outcome Measures: PARCC, FAIR, DAR, MAP

Data Collection and Analysis: The school will compile progress monitoring data on a quarterly basis (or when available) and will disaggregate the results. Classroom instruction will be designed to address the deficiencies shown by data analysis and progress monitoring.

The Home Connection – The School believes learning continues beyond the classroom. For that reason, in addition to the efficient use of classroom time, the following objective from Florida's

Reading Program Specifications will be a practice implemented at the school:

- Collaborative and coordinated efforts within the school and between the school and home
- Homework assigned will reinforce reading skills taught in the classroom. In addition, the School will promote parental and family involvement in teaching and encouraging reading, encourage family literacy practices, and communicate information regarding students' reading progress to parents.
- The idea encouraged will be that reading should take place in the home as well as in the classroom, and parents will be encouraged to read with their children whenever possible.

Professional Development - The Reading Coach or Curriculum Coordinator, in conjunction with the Literacy Leadership Team, will design workshops to address the needs of classroom instruction. There will be meeting with grade levels/departments to review these results and share best practices. For further intensification, demonstration lessons, in-class coaching, peer observation and additional professional development opportunities will be made available to the faculty.

Teachers will be provided classroom support and on-site teacher professional development in utilizing reading intervention programs. In addition to providing classroom support seminars, the school will participate in a series of instructional workshops to actively engage students: Differentiated Instruction, Content-Area Classroom Libraries, Vocabulary Strategies/ Word Walls.

Strategies for Students Reading Above and Below Grade Level
Because students come to school with different levels of readiness, the reading program will be structured in a manner that will serve all students well. The reading program will accommodate those students who are on-grade-level and above and readers-at-risk. The latter requires more instruction, intervention, and curriculum differentiation than the other.

Strategies for above grade level students will include but not be limited to: the study of high level, high interest novels; projects requiring reading and research; i.e., book reports, skits, group projects; a "Literary Circle" to discuss novels; and competitive reading games. The objective is that all students, including advanced readers, receive instruction and materials commensurate with their abilities. Advanced readers must progress at their appropriate rate, which is typically more than one grade level per year. By eliminating work on skills already mastered and

progressing through the reading curriculum at an accelerated pace, student will generally continue to expand their reading proficiency, Advanced readers must be challenged through instruction at their highest readiness level and appropriate pace. Pre-instruction assessments must be used to accurately determine the students' instructional and independent levels of reading. Assessments must be varied beyond the standardized test to document progress and guide instruction. Other recommendations for advanced learners include incorporating rich inviting tasks that require spatial as well as analytical and abstract thinking; encouraging students to develop more complex, enrolling students advance level classes, high level comprehension and reach advanced interpretations; promote student research using technology to generate original investigations and advanced products; and provide examples of superior work to challenge students to ever-increasing levels of excellence.

Students will be identified by screening, diagnostic and/or progress monitoring assessments (e.g., FAIR and MAP) and placed in an appropriate intervention program described above. The intervention program will be designed to meet the specific diagnosed needs of each individual student. Students will be scheduled to attend a small group for immediate intensive intervention for 90 minute reading block during the regular school day. Continual progress monitoring data, using FAIR and Acuity, will be utilized to adjust the intervention schedules, rosters and strategies as well as monitor fidelity of implementation.

Strategies for low level students will include but not be limited to: high interest novels; reading practice utilizing phonics for reading comprehension and speed; reading centers to focus on individual skills; use of FCAT practice materials; after-school reading tutorials; extended day program for reading; and nightly reading homework. Students reading below grade level lack the skills that enable them to organize text, to understand what they are reading, and to stay on task. To acquire these skills, students need careful, systematic instruction that will help them overcome these problems. Teachers will implement instructional strategies such as;
Graphic Organizers - By visually representing the meaning they construct from reading, students improve their ability to comprehend.
Reciprocal Teaching - uses four strategies for constructing meaning: predict, summarize, question, and clarify. Each of these strategies aids students in constructing meaning from text, and provides a means of monitoring their reading to ensure that they, in fact, understand what they read.
Scaffolding- The process of providing strong teacher support and gradually removing it until students are working independently, scaffolding is effective in helping students accelerate their learning.
Daily, fast-paced, structured lessons- Fast-paced, structured lessons help to move students along and keep them focused on the task at hand.
Modeling good work habits - Students reading below grade level usually lack structure in their schoolwork. An effective intervention program should model the structures that successful students use every day: arriving on time, getting right to work, staying on schedule or task, and keeping to the topic.

Other Supporting strategies in general for attaining the benchmarks on the State Assessment Test at each grade level will be implemented based on the needs of the students. Below is a listing of strategies which will be utilized at the School:

- Reading Aloud
- Teacher-Directed Interactive Reading
- Structured Independent Reading
- Reciprocal Teaching
- Questions and Discussions
- Read and Retell
- Cooperative Groups
- Graphic Organizers
- Marginal Note-taking
- Learning to Write – Writing to Learn
- Vocabulary Development
- Accelerated Reader Program
- CRISS (Creating Independence through Student-owned Strategies)
- Book Sharing

If the child has been identified as having a deficiency in reading, the K-8 comprehensive reading plan shall include instructional and support services to be provided to meet the desired levels of performance. If the core instruction is both effective and equitable, then Tier 2 (Supplemental) interventions are provided to those students identified as "at-risk." The primary characteristics of Tier 2 interventions are:

1. Interventions delivered to smaller groups of students either in the general education classroom or outside of the general education classroom.
2. Interventions must be provided in addition to core instruction
3. Interventions focus on particular skill areas that need strengthening.

Florida students who have been retained two times in third grade (Tier 3) are in need of instruction that is more intensive, more explicit, more systematic, and more motivating than instruction they have previously received. Tier 3 interventions are developed based on individual student needs following a problem-solving process that will use diagnostic assessment to inform intervention development. Progress monitoring of intervention effectiveness is the same for Tier 3 as in Tier 2. Characteristics of Tier 3 interventions are:

1. Interventions are delivered to very small groups of students or to students individually.
2. Interventions must be provided in addition to Tier 1 instruction. Tier 3 children should be receiving the most instructional minutes. It is critical that Tier 3 instruction does not supplant the core instruction.
3. Interventions focus more narrowly on defined skill areas.
The goal for these students is:
- Instruction with a structured delivery based on a 90-minute class session. This model assures daily direct instruction in whole group (20 min.), direct instruction and intervention in a small group setting (20 min), experience with modeled and independent reading (20 min), use of research-proven software (20 min), whole group direct instruction, and closure (10 min);
- Use of reading materials of various levels of difficulty and interest;

- Maintenance of a print-rich classroom learning environment which includes trade books, high interest fiction and non-fiction titles, and books that connect to other subject areas;
- Strong vocabulary emphasis across the curriculum through practice with definitions in context, dictionary definitions, understanding of word parts, analogies, and etymologies;
- Use of predictable language materials for students who are lagging behind three grade levels in reading. These materials are based on rhyme, rhythm, and repetition of patterns. Materials will be high interest to motivate the reluctant reader. Reading will be further enriched via visual formats in building conceptual models. This results in dynamic, visual, and spatial images that promote the formation of vivid mental models that are especially beneficial for students with little knowledge;
- Use of computer-assisted instruction for students to practice reading skills;
- Organization of a parent intervention program to serve as volunteers for Reading Buddies, an after-school program;
- One-on-One tutoring both in class and after school;
- Before and after-school mentoring opportunity;
- Weekend school.

On-Grade-Level and Above Grade Level Structure

The goal of instruction for this group of students is to keep them motivated and excited about reading and to improve their reading level. Strategies for this group include:
- Sustained silent reading requiring a written assignment;
- Independent reading assignments requiring book reports, literary analysis, oral reports, debates, etc.;
- Timed readings to increase speed, accuracy, & comprehension across the content areas;
- Emphasis on reading strategies such as skimming, scanning, predicting and generalizing to assist students in comprehending materials of increasing difficulty and to vary reading strategies inherent in diverse content areas;
- Use of computer assisted instruction to augment classroom programs and provide skilled practice for acceleration. (Examples of computer programs with excellent assessment in each of the five skills identified by research as critical to successful readers are Jamestown Navigator or Accelerated Reader.);
- Teacher directed lessons focusing on skills to be learned and applied by students;
- Promotion of reading in the home and with parents reading to and with their child.

The School will conduct a gifted education program in the same manner as other special education programs insofar as special programs exist to address special needs of students not typically met by mainstream instruction. The program will use teachers who are trained in meeting the needs of the special population with an endorsement in gifted education. The School will begin in grades 2 & 3 and subsequently expand grade-by-grade until it becomes a school-wide effort. Depending upon the number of students meeting gifted standards, a Gifted Students Resource Room may be created for all students.

In a review of research on gifted students in the regular classroom, Johnson and Ryser (1996) describe five overall areas for differentiation: modifying content, allowing for student preferences, altering the pace of instruction, creating a flexible classroom environment, and

using specific instructional strategies. The following have been established as effective strategies (Johnson & Ryser, 1996):

- Posing open-ended questions that require higher-level thinking
- Modeling thinking strategies, such as decision-making and evaluation
- Accepting ideas and suggestions from students and expanding on them
- Facilitating original and independent problems and solutions
- Helping students identify rules, principles, and relationships
- Taking time to explain the nature of errors

Gifted second language learners deserve an optimal learning environment in which to develop talent. Multiple criteria in screening ELL students may include, among other items, (a) ethnographic assessment procedures (the student is observed in multiple contexts over time), (b) dynamic assessment (the student is given the opportunity to transfer newly acquired skills to novel situations), (c) portfolio assessment, (d) the use of test scores (performance based and/or nonverbal) in the native or English language (depending on the child's level of fluency), (e) teacher observation, (f) behavioral checklists, (g) past school performance, (h) parent interview, (i) writing samples and other samples of creativity and/or achievement, and (j) input from the cultural group with which the student identifies in the local school community.

4.D. Explain how students who enter the school below grade level will be engaged in and benefit from the curriculum

As mentioned above research on these programs (the school's curriculum) has shown that these programs are effective and accessible to "all levels of students," not only high performing students but also below level students. Results consistently show that students who are engaged in these programs perform as well as or better than other students.

BSCS recognizes importance of implementation of the school curriculum for students who enter the school below grade level. All students entering the school will benefit from the implementation of school curriculum, including meeting the needs of exceptional students, and students who enter the School below grade level.

The school will provide a free and appropriate public education (FAPE) to all students with disabilities, in accordance with all state and federal guidelines, Individuals with Disabilities Education Act, Section 504 of the Rehabilitation Act of 1973, and the Americans with Disabilities Act, to ensure that the educational goals for each student are addressed.

The school curriculum is aligned to specific state standards and grade-level expectations and has the framework of what is taught at each grade level and allows for modifications to the instruction in the classroom to meet the students' needs. Students will be engaged by our innovative K-8 curriculum, which is designed to introduce core concepts that are further developed and expanded as student's progress through each grade level. In addition, students who enter the school below grade level will have own course schedule and extracurricular activities like after school tutoring to become at level end of the school year.

Students needing remediation based on respective subject area assessments in specific subject areas will be assigned to and placed on a specific Progress Monitoring Plan (PMP) targeting these deficiencies. This plan requires active participation from the student, the parents and specific teachers in order to ensure continuous student improvement. This initiative allows each student to have ownership and understating of his/her learning style and allows each student to track and monitor his/her achievement. The PMP will be comprised of specific measurable individualized goals for that student as well the strategies and services (tutoring/required additional classes) to be implemented in order for the student to achieve the specified goals. Students identified below grade level in any given area will have targeted tutoring. Individualized Supplemental Instruction and/or Computer-Based Programs may also be used for remediation, instruction, and progress monitoring, as appropriate. Student performance will also be continuously assessed using the classroom observations and school-wide and district-based assessment instruments.

4.E. Describe proposed curriculum areas to be included other than the core academic areas

The School will offer variety of electives and extracurricular programs in addition to core academic areas. The followings summarize some of them.

TECHNOLOGY
The School will equip its classrooms with multi-media, high-speed computers and other hardware with high-speed Internet access. In addition to technology utilized in elective courses listed below, the School will utilize SMART boards, along with the purchase of document cameras, various integrated learning systems and professional development related to such systems, plus other hardware and peripherals to increase staff, teacher, parent and student access to a wide range of advanced equipment that facilitates operations, improves instruction, and encourages the use of 21st Century technology.
Florida's Department of Education has adopted the National Educational Technology Standards for Students for Primary (K-2), Intermediate (3-5) and Middle Grades (6-8). The School will follow these standards and the use of technology will play a major roll in the education of every student. The power of information technology has had more impact on today's world than any other recent technology. It is transforming economies and creating a demand for new skills in which imagination, knowledge, intellect, and higher-order thinking are essential ingredients. The internet and the union of information and communication technologies are changing the way we all live, work, play and, most relevantly, the way we learn.

In addition to becoming a way of life, technology has particular effectiveness with all levels of learners. Enrichment and remediation are equally enhanced through the use of appropriate technological experiences and presentations. Our approach is to integrate technology throughout the curriculum and to establish at each grade a stronger foundation for future growth.

To facilitate the effective use of technology at the School:
- Regular, specific training for teachers will be conducted regarding technology integration into all aspects of the whole curriculum;

- There will be networked computers with Internet access and other multimedia equipment;
- Technology as a specific curricular element will be implemented at the earliest point in K and spiral throughout each succeeding year with increasingly complex tasks and activities. The goal of the technology curriculum is to provide our students with the technology tools and competencies they need to become independent and effective users of technology.

Primary (K - 2) level students will:
- Learn basic computer terms;
- Become familiar with computer hardware;
- Learn proper use and care of computer equipment;
- Learn beginning keyboarding skills and simple file management;
- Use appropriate school-wide networked programs in a computer lab or the classroom;
- Use multimedia programs to produce a simple product;
- Be exposed to websites on the Internet with teacher use to support curricular content;
- Be familiar with email through classroom collaborations with other classes or schools;
- Discuss ethical/legal use of online resources;
- Participate in at least one class multimedia project during the year.

Intermediate (3 - 5) level students will:
- Learn intermediate computer terms;
- Demonstrate familiarity with computer hardware;
- Lear proper use and care of equipment;
- Learn to use computer peripherals and other multi-media hardware;
- Learn keyboarding skills and file management;
- Use appropriate school-wide networked programs in a computer lab or the classroom;
- Use word processing programs in a real world context to write stories, poems and type reports;
- Create news reports;
- Use multimedia-authoring programs to produce a product;
- Access multimedia and online resources for research;
- Use email to collaborate with other students or classes;
- Demonstrate an understanding of ethical/legal conduct in using online resources;
- Complete at least one multimedia project per year (done in a small group, with a partner, or individually, as appropriate).

Middle School students, grades 6-8, will have the opportunity to enroll in courses such as M/J Keyboarding, Introduction to Technology, M/J Computer Applications, etc. in accordance with the FLDOE Course Code Directory.

FOREIGN LANGUAGES

The School recognizes that there is a growing international interdependence among nations which demands that the United States develop citizens with a sound understanding of international and cross-cultural issues and the ability to communicate in more than one language.

The School intends to develop students' understanding of international and cross-cultural issues as well as their ability to communicate in more than one language. Thus, the school will implement Spanish and/or another language as a foreign language program for both non-speaking and Spanish-speaking students.

Foreign Language K - 5 – The School will focus on developing students' understanding of international and cross-cultural issues as well as their ability to communicate in more than one language. Thus, the school will implement Spanish as a foreign language program for both nonspeaking and Spanish-speaking students in grades K-5.

Grades 6-8 – Middle School Spanish for Spanish Speakers - The school will implement the Spanish for Spanish Speakers course if it has a 10% or more Hispanic Population. Hispanic students will be tested for Spanish Language Level using a placement test as determined by the Sponsor. The essential content of this Spanish for Spanish Speakers course will be to reinforce and build grammar, vocabulary, comprehension and critical thinking skills that will be transferred to the English language and better test scores. This course at the middle school level will significantly increase students' opportunities to enroll in Spanish Advanced Placement Language and Literature courses in high school.

Section 1007.261(1)(a), Florida Statutes, requires two credits of sequential foreign language instruction at the secondary level as a prerequisite for admission to all Florida state colleges and universities. A student whose native language is not English is exempt of this requirement, provided that the student demonstrates proficiency in his/her native language. High school credit will be offered to Middle School Students who complete the appropriate course work.

PHYSICAL EDUCATION
The Physical Education program will consist of the required 150 minutes of PE per week for grades K-5, will incorporate these components and will communicate knowledge, offer group experiences, teach the joy of effort and achievement, and build lasting recreational interests. The program will strive to be in step with the current practices and procedures in education and to contribute to the all-around development and education of students.

The physical education program will follow the Next Generation Sunshine State Standards including prescribed times for engagement in physical education, the course code guidelines and the National Standards for Physical Education instruction. Governor Charlie Crist signed the Don Davis Physical Education Act requiring Florida elementary schools to provide 30 minutes of continuous exercise daily for their students. Some examples of Standards are presented in Appendix F.

Middle school students will take Physical Education class as required for one semester. The program will include many components including team sports, health education, instruction regarding appropriate dietary habits. Fitness assessments will be a regular component of these classes. All students will participate in physical education classes, and all students will be encouraged to participate in after school athletic programs.

This requirement may be waived for a student who meets one of the following criteria:

- The student is enrolled or required to enroll in a remedial course.
- The student's parent indicates in writing to the school that: 1) The parent requests that the student enrolled in another course from among those courses offered as options by the school district; i.e. art, music, language, etc OR 2) The student is participating in physical activities outside the school day, which are equal to or in excess of the mandated requirement; i.e. afterschool sports, dance classes, physical activity as part of an after school program, etc.

Grades 6-8 Courses for Physical Education;
- M/J Comp PE I (0.5) Sem 1 and 2
- M/J Comp PE II (0.5) Sem. 1 and 2
- M/J Comp PE III (0.5) Sem. 1 and 2

THE ARTS and MUSIC
Visual and performing arts will be integrated into all areas of the curriculum. Art activities will reinforce the exploration of various cultures and provide students an opportunity to explore their own cultural heritage. The School will present shows and displays for parents and community members to celebrate the rich cultural diversity of the community as expressed by the creativity and talent of the students.

Often the Arts will be integrated and used to demonstrate mastery of core subject Benchmarks. Students' use of these art forms will be encouraged as means to discover, enhance and demonstrate mastery of other core subject Benchmarks. The teaching and study of the Arts will be developmentally appropriate for each student. The emphasis will be on increasing awareness and appreciation of art, their individual talents, and interest in the talents others. The Arts' curriculum will also emphasize discovery of the intrinsic value of art and music through *active learning*.

Middle school students will have the opportunity to choose a fine arts component as an elective during the regular school day. The courses that may be offered include music, art, band, chorus etc.

EXTRACURRICULAR ACTIVITIES

In addition to afterschool and/or weekend tutoring, the School will offer variety of extracurricular activities to support its core curriculum. The programs will be open to all students. There will be academic, athletic, social, cultural, leadership community service, recreation, etc. activities based on student and teachers interests. Some of the offerings may be:

Academic	Athletics	Campus-Related
Math Olympiad	Baseball	Dance Club
Science Olympiad	Basketball	School Newspaper/Journalism
Science Fair Club	Cheer/Spirit Squad	Student Government/Council
History Fair Club	Softball	Yearbook
Technology Club	Soccer	
Academic Bowl Club	Volleyball	

Odyssey of the Mind Debate Club/Team National Honor Society	Table Tennis	
Community Service/ Awareness/Activism Animal Club Canned Food Fundraising Environmental Boy/Girl Scouts Service Learning Club Model Union Student Government/Council	Cultural/Artistic Arts and Crafts Photography Club Spanish Club Music Choir/Band Folk Dance	

4.F. Describe how the effectiveness of the curriculum will be evaluated

The effectiveness of the curriculum will be measured by the student achievement of the specific measurable objectives for the first year of operation (described in Section 5 below). Expectations are that students will progress as well or better than they did before attending the charter school, and that the specific measurable objectives for the school are achieved from year to year. The level of effectiveness of the curriculum is monitored through review of the role of the school leadership team, goals of the School Improvement Plan, and progress of all students as part of the Response to Intervention (RtI) model. Data will be collected through classroom walkthroughs and analysis of FCAT-PARCC scores, Benchmark Tests, Florida Assessments for Instruction in Reading (FAIR) data, Progress Monitoring Data, and Progress Monitoring data.

In years 2 and beyond, effectiveness of the curriculum will be evaluated based on achievement of the objectives in the School Improvement Plan, wherein students will be expected to make annual learning gains toward achieving the NGSSS-CCSS.

Ongoing monitoring and analysis of school-wide assessment data (as described in Section 5 below) will assist the School in determining staff development needs, curriculum realignments, and the objectives submitted in the School Improvement Plan. Student outcomes on standardized and school-wide assessments, benchmark tests and quizzes, projects, presentations, exhibitions, and portfolios will help assess the effectiveness of the curriculum throughout the school year. Ongoing student progress monitoring, such as progress reports, report cards, beginning year, mid-year, and end-year assessments will be utilized as tools to evaluate whether the curriculum is effective and meeting the needs of all students.

Additionally, through the school's commitment to pursue and obtain accreditation from the Southern Association of Colleges and Schools Council on Accreditation and School Improvement (SACS/CASI), within specific timelines will also serve as a means to evaluate not only of the effectiveness of the curriculum but also the entire school program. Through the Accreditation process, the School will: validate compliance with numerous SACS/CASI learning standards; demonstrate engagement in Continuous Improvement, including the development and implementation of foundations for continuous improvement; provide for quality assurance; and

participate in a peer review process. It is anticipated that within three years of opening, the school will complete a SACS self study, host a peer-review visiting team, and comply with all SACS standards.

Ultimately, the effectiveness of the Curriculum will be evaluated by the attained curriculum, primarily measured by students' performance on the FCAT 2.0 and PARCC. The School will focus on meeting and exceeding the rigorous goals outlined in this application, particularly those that articulate those students make annual learning gains—a year's worth of learning for each year enrolled.

5. Student Performance, Assessment and Evaluation

5.A. State the school's educational goals and objectives for improving student achievement. Indicate how much academic improvement students are expected to show each year, how student progress and performance will be evaluated, and the specific results to be attained.

The primary learning objective of the School will be to demonstrate continuous improvement among its students. The following objectives are presented with the caveat that the school has not opened and therefore has no baseline data for its students. More importantly, the school will use the School Improvement Planning process to develop subsequent learning objectives based upon the experience(s) and learning results obtained in the first year.

The following will be the School's goals and objectives:

The FLDOE will implement PARCC in ELA and Math starting from 2014-15 school year. Since the proposed school will be opening in 2014-15 school year, the goals and objectives refer to PARCC assessment.

- Given instruction using the Common Core State Standards, the percentage of students in grade 3-8 achieving proficiency on PARCC ELA Test will be at a rate of equal or exceeding the county average percentage.

- Given instruction using the Common Core State Standards, the percentage of students in grade 3-8 achieving proficiency on the PARCC Mathematics Test will be at a rate of equal or exceeding the county average percentage.

- Given instruction using the Next Generation Sunshine State Standards, the percentage of students in grade 5th and 8th achieving mastery on the FCAT 2.0 Science Test will be at a rate of equal or exceeding the county and state average percentage.

- Percentage of lowest 25% students making learning gains in math as measured by PARCC Math will be at least 50%.

- Percentage of lowest 25% students making learning gains in math as measured by PARCC Reading will be at least 50%.

- Given a school-wide emphasis on instruction for proficiency of the CCSS, at least 60 percent of students in grades 3-8 will make annual learning gain on the PARCC ELA Test.

- Given a school-wide emphasis on instruction for proficiency of the CCSS, at least 60 percent of students in grades 3-8 will make annual learning gains on PARCC Mathematics Test.

- In grades K-2 the mean growth from fall to spring in reading and mathematics will be at least 1 yr as evidenced by the outcomes from the fall and spring administrations of FAIR, MAP and student portfolios.

- Percent of students' mastery on the End of Course (EOC) assessments in applicable courses, such as Biology, Civics, Algebra I, Geometry, will be at a rate of equal or exceeding the county and state average percentage.

Students are expected to make annual learning gains toward achieving the Common Core State Standards appropriate for the student's grade level. The annual gains will be measured by the student's score on the PARCC and on internal pre and post tests to be administered at the beginning and end of each school year.

In addition to the FCAT 2.0-PARCC standardized tests, the School will also conduct other methods of assessing students' mastery of performance outcomes, such as facilitator observation, peer- and self-evaluations, teacher tests and quizzes, projects, presentations, exhibitions, portfolios. The student portfolios will show not only the student's "best" work, but also drafts of student work that will demonstrate progress. Ongoing Progress Reports and Report Cards of student performance will be utilized as reflective and guidance tools.

5.B. Describe the school's student placement and promotion standards.

Promotion from grade to grade will be in accordance with the requirements set forth in the Broward County Public Schools Student Progression Plan.

Each student must meet specific levels of performance in reading, writing, mathematics, and science in order to be promoted. For each student who does not meet state performance levels in reading, writing, mathematics, and/or science, the School will implement a school-wide Progress Monitoring Plan (PMP) to assist the student in meeting expectations for proficiency. In consultation with the parent/guardian, student performance will be evaluated and reported based on mastery of standards to determine a student's eligibility for promotion.

The academic grades in all subjects are to be based on the student's degree of mastery of the instructional objectives and competencies for the subject. The determination of the specific grade a student receives will be based on careful consideration of all aspects of each student's performance during a grading period: Class work, observations, tests, portfolios, district and state assessments, and written progress reports and report cards (at the end of every nine weeks of school) should serve as the primary means of communicating student progress and achievement of the standards for promotion. The student's mastery of the content of the course, in which the student is enrolled, as determined by the teacher, is a further condition for passing the course.

State Test Performance – Currently, in compliance with Section 1008.25, F.S., and the specific levels of performance on the FCAT 2.0 required for grade 3 reading must be attained by the end of grade 3 for promotion to grade 4. Grade 3 students who do not score at Level 2 or higher on the Grade 3 FCAT 2.0 SSS Reading portion must be retained unless exempt from mandatory retention for good cause as specified in paragraph 6(b) of 1008.25, F.S. No student may be

assigned to a grade level based solely on age or other factors that constitute social promotion as per state legislation. When the PARCC assessment in place, this requirement will be revisited according to the corresponding Statute.

Reading and Mathematics - For each year in which a student scores at Level l on FCAT 2.0 Reading (for the first year), PARCC ELA (for the second year and on), the student must be enrolled in and complete an intensive reading course the following year.

Placement of Level 2 readers in either an intensive reading course or a content area course in which reading strategies are delivered shall be determined by diagnosis of reading needs. Reading courses shall be designed and offered pursuant to the comprehensive reading plan. For each year in which a student scores at Level 1 or Level 2 on FCAT 2.0 (for the first year), PARCC Mathematics (for the second year and on), the student must receive remediation the following year, which may be integrated into the student's required mathematics course.

English Language Learners - ELL students cannot be retained solely due to lack of proficiency in English. A formal retention recommendation regarding an ELL student shall be made through action of an ELL committee. The courses M/J Language Arts (1, 2, and 3) Through ESOL mirror the course descriptions for regular middle school Language Arts. In addition, all secondary ELL students, i.e., ESOL Levels I-IV are required to take a second period of Developmental Language Arts through ESOL.

Middle School Promotion – Promotion to senior high school requires that the student successfully complete the following academic courses:

- Three middle school annual courses in English.
- Three middle school annual courses in mathematics.
- Three middle school annual courses in science.
- Three middle school annual courses in social studies.
- One semester course, Career Exploration and Decision Making, to be completed in 7th or 8th grade, which can be a stand-alone course or instruction integrated into an existing course or courses.

To be promoted, students in grades six and seven must pass a minimum of four subjects, two of which must be in English, Mathematics, Science or Social Studies. Students who are failing and/or fail up to two of the 4 core courses (i.e., English, Mathematics, Science, Social Studies) will be given the opportunity to meet the requirements of the course(s) through school day or extended learning opportunities. Students who pass less than 4 courses are retained in the same grade, interventions are continued, and progress must be monitored as specified in the school-wide PMP.

5.C. If the school will serve high school students, describe the methods used to determine if a student has satisfied the requirements specified in section 1003.428, F.S., and any proposed additional requirements

NA

5.D. Describe how baseline achievement data will be established, collected, and used. Describe the methods used to identify the educational strengths

and needs of students and how these baseline rates will be compared to the academic progress of the same students attending the charter school.

Student records from previous schools will be collected and reviewed for baseline data on each student. More specifically, the School will be established using multiple measures of student's academic performance on the School and the Florida Assessment Programs.

The specific assessments to be utilized will include the following:
- Florida Comprehensive Assessment Test (FCAT 2.0) for the first year and PARCC for the following years in ELA/Literacy
- FCAT 2.0 for the first year and PARCC for the following years in Mathematics FCAT 2.0 in Science
- FCAT Writing
- Portfolio Assessments (whenever applicable)
- FAIR Test in Reading
- MAP
- DAR
- AR
- EOC

Students who have not previously taken the FCAT will be assessed in the core subject areas using such instruments as the placement assessments provided by the text, baseline benchmark assessments scored by Acuity, previous standardized test scores and report card grades.

In order to establish baseline data for ELL students, Comprehensive English Language Learning Assessment (CELLA) will be used. Florida uses the Comprehensive English Language Learning Assessment (CELLA) to measure the growth of students classified as English Language Learners (ELLs) in mastering the skills in English they will need to succeed in school.
CELLA is a four-skill language proficiency assessment developed under contract by Educational Testing Service (ETS) that is designed to provide:
- Evidence of program accountability in accordance with Title III of No Child Left Behind (NCLB), which calls for schools and districts to meet state accountability objectives for increasing the English-language proficiency of English Language Learners.
- Data useful for charting student progress over time and, for the newly arrived students; charting progress over the first year.
- Information about the language proficiency levels of individual students that can be used in making decisions regarding placement into, or exit from ELL programs.
- Diagnostically useful information about students' strengths and weaknesses in English (with as much specificity as possible within the limitations of a large-scale standardized test.)

The baseline levels of academic achievement established during the first academic year will be compared to academic achievement levels of the same student in the following years, when data is available in order to assess rates of academic progress.

5.E. Identify the types and frequency of assessments that the school will use to measure and monitor student performance.

Rather than serving solely as a means to judge an end product, assessment of student performance will be an integral component of the learning process at the School. Students will come to an understanding of assessment as a part of the process of continuous improvement. Continuous assessment of student performance is an integral component of the individual learning. Individual learning is the mechanism for implementing the core mission of the School that each and every student at the school be given ample opportunity to reach their highest potential on a daily basis. Completing an examination or a term paper is not the focal point of the student's day. Teaching, learning, and assessing will be implemented in a manner that instills in students the belief that learning is continuous, that errors or mistakes are not red marks on a paper signifying failure, but are check-in points to show the way toward continuous improvement. Each student will be challenged to reach to and then beyond what they believe themselves capable.

The School will comply with all mandated assessment requirements as specified in F.S. 1003.43. (7)(a)(4). (i.e. FCAT 2.0. PARCC, EOC) and will implement various teacher-made classroom assessments to determine mastery of Next Generation Sunshine-Common Core State Standard's content for earning specific class credit requirements, as discussed above.
The School also commits to implement all State mandated and/or Sponsor-required assessments as appropriate to the grade level students and as presented in the BCPS Assessment Calendar http://www.broward.k12.fl.us/studentassessment/AssessmentCal.htm. Some of the specific instruments that will be used to assess student performance, as well as those utilized for diagnostic and/or other placement purposes, are presented below. The presented dates may also be revised in each year according to the States and the Sponsor's assessment calendar:

DATE	EVENT
AUGUST 23 - OCTOBER 5	FLORIDA KINDERGARTEN READINESS SCREENER (FLKRS)
SEPTEMBER TBA	FLORIDA ASSESSMENT FOR INSTRUCTION IN READING (FAIR)
SEPTEMBER 13 - 16	DISTRICT BENCHMARK ASSESSMENT (SEPTEMBER BAT)
OCTOBER 11 - 15	FALL FCAT READING AND MATHEMATICS SSS RETAKE ADMINISTRATION (GRADES 11 - ADULT)
OCTOBER 13	PSAT/NMSQT [FOR MORE INFORMATION, PLEASE VISIT WWW.COLLEGEBOARD.COM]
OCTOBER 27 - 28	SEMESTER FINAL EXAMS (BLOCK SCHOOLS ONLY, IF APPLICABLE)
NOVEMBER 29 - DECEMBER 2	DISTRICT BENCHMARK ASSESSMENT (NOVEMBER BAT)
JANUARY 18 - 21	SEMESTER FINAL EXAMS
JANUARY TBA	FLORIDA ASSESSMENT FOR INSTRUCTION IN READING (FAIR)
TBA	FLORIDA ALTERNATE ASSESSMENT ADMINISTRATION

	(ESE, IF APPLICABLE)
JANUARY- MAY	PORTFOLIO ASSESSMENT READING COMPREHENSION, GRADE 3 (ALTERNATIVE ASSESSMENT FOR PROMOTION)
MARCH 1 - 3	FCAT WRITING+ ASSESSMENT GRADES 4, 8, & 10
MARCH 31 - APRIL 1	SEMESTER FINAL EXAMS (BLOCK SCHOOLS ONLY, IF APPLICABLE)

APRIL TBA	FLORIDA ASSESSMENT FOR INSTRUCTION IN READING (FAIR)
MARCH 7 - APRIL 8	COMPREHENSIVE ENGLISH LANGUAGE LEARNING ASSESSMENT (CELLA)
MAY TBA	STANFORD ACHIEVEMENT TEST – TENTH EDITION (SAT-10) READING COMPREHENSION, GRADE 3 ALTERNATE FOR PROMOTION
MAY 2 - 13	ADVANCED PLACEMENT EXAMS [SCHEDULING INFORMATION AVAILABLE AT WWW.COLLEGEBOARD.COM]
TBA	PRIMARY READING AND MATHEMATICS END-OF-YEAR ASSESSMENT (GRADES 1 AND 2)
MAY 1 - 20	STATE EOC EXAMS
MAY 24 - 27	GRADE 12 SEMESTER FINAL EXAMS
JUNE 6 - 9	GRADES 9-11 SEMESTER FINAL EXAMS

In addition, the School will utilize following school measures to assess student performance in the Table 4.

Table 1 – Additional Specific instruments to assess the student performance in core subject areas

Subject Matter	ASSESSMENT
Language Art/ Reading	Portfolios, various writing assignments, exhibitions, standardized tests, teacher-made tests, Text/Publisher's supported assessments, observations, quarterly progress summaries
Social Sciences	Essays, multiple-choice exams, portfolios, exhibitions, teacher-made tests, Text/Publisher's supported assessments, observations, quarterly progress summaries
Science	Projects, portfolios, exhibitions, teacher-made tests, Text/Publisher's supported assessments, observations, quarterly progress summaries
Mathematics	Projects, portfolios, exhibitions, standardized tests, teacher-made tests, Text/Publisher's supported assessments, observations, quarterly progress summaries
Electives	Portfolios, exhibitions, exams, teacher-made tests, performances, projects, observations, quarterly progress summaries
Foreign Languages	Oral and written examinations, cultural performances, standardized tests, teacher-made tests, observations, quarterly progress summaries

5.F. Describe how student assessment and performance data will be used to evaluate and inform instruction.

In order to achieve the School's yearly goals and objectives the School will institute the periodic assessment program throughout the year. The School' assessment procedure will provide valid, reliable, and timely information to teachers in order to modify their instruction, monitor student progress, select appropriate classroom activities, and use assessment results effectively. The purpose is to inform teachers about the effectiveness of their teaching and progress made by students in order to assure continuous progress. Grade level chairs will communicate with teachers to determine the areas of students' strengths and weaknesses as demonstrated by class work assignments and assessment results. Each teacher will use data to determine the instructional focus of whole group lessons. An Item-Analysis of FCAT 2.0-PARCC benchmarks and chapter tests will be used to re-teach questions that students missed most frequently. Response to Intervention (RtI) model will guide the School in implementing a tiered approach to instructional delivery that includes interventions of increasingly higher intensity, based on students' needs. Teachers play an active role in the RtI problem solving approach to use the data to define the problem, analyze the data to determine why it is occurring, implement a plan and then evaluate to see if the plan is working. As part of the RtI model, making informed instructional decisions based on data is a dynamic on-going process and may occur as frequently as weekly or biweekly, or after each Progress Monitoring period, depending on need. Minimally, it must occur after the results of each progress monitoring period and when any Benchmark Assessment Test data is available. Classroom teachers need to understand and be trained in the process of daily progress monitoring analysis, using informal data, such as student work maintained in folders or portfolios in their classrooms, and classroom based assessments that demonstrate whether students are progressing towards mastery of benchmarks aligned to their Instructional Focus Calendars.

The educational strengths and needs of students will be monitored on an individual and school-wide basis. As mentioned above, the school assessment procedures will serve as a feedback system to guide teachers in lesson planning and individualizing instruction, and inform students, teachers and parents about where a student is succeeding and what needs strengthening. It will keep not only school but also parents informed about student progress. The results of prior-year standardized tests and student records will be used to determine the best educational setting for the students (e.g. appropriate course selection, tutoring, services, etc.).

5.G. Describe how students' assessment and performance information will be shared with students and parents.

All the results of administered tests like state and district wide exams, standardized tests, diagnostics tests, and classroom assessment will be stored and maintained through on-line reporting system. The data will be accessible online with a secure Internet connection. Parents and students who have Internet connection will be able to see them through on-line. The results will also be shared with students in their classroom. Parents who do not have an Internet connection will see the results with quarterly report cards. Quarterly report cards with detailed information about the students' progress provided to parents and students. The report cards will

include classroom assessment results, attendance, student conduct, and teachers' narrative comments that will help parents and students to improve towards students' yearly goals. The school administrators will also monitor students' progress through on-line reporting system. In addition, parents will be informed through progress reports, parent conferences, and other forms of written and oral communication that the parents may be comfortable utilizing. The School's web-based tool, BSCS Connect, will assist in the daily communication and information maintenance. The BSCS Connect is currently designed to be a tool for administrators, faculty members, parents and students. Each different type of school community member can be given access to the tool and what they are able to view will change depending upon their authorization level. Parents can view their child's assignments, behavior and cumulative grades, and can communicate via electronic mail with the classroom teacher.

At any time of the year teachers and/or administrators will contact parents to inform them of low progress of students' learning and ask for a parent conference. A student interim progress report will be utilized to communicate the students' current performance. Teachers, an administrator, parent and the student will be present in the conference. The goal of the conference will be to use problem solving strategies to isolate the problem and lay out a working plan that will eventually ensure the students' success to achieve the expected outcomes.

6. Exceptional Students

6.A. Please indicate the level of service that the school will provide to students with disabilities by selecting from the list below.

- o The school will serve students with disabilities whose needs can be met in a regular classroom environment (at least 80% of instruction occurring in a class with non-disabled peers) with the provision of reasonable supplementary supports and services and/or modifications and accommodations.
- o The school will serve students with disabilities whose needs can be met in a regular classroom and resource room combination (between 40%-80% of instruction occurring in a class with non-disabled peers) with the provision of reasonable supplementary supports and services and/or modifications and accommodations.
- o The school will serve students with disabilities whose needs can be met in a separate classroom (less than 40% of instruction occurring in a class with non-disabled peers).

The School will serve student with disabilities whose needs can be met in a regular classroom environment (at least 80% of instruction occurring in a class with non-disabled peers) with the provision of reasonable supplementary supports and services and/or modifications and accommodations.

6.B. Describe how the school will ensure that students with disabilities will have an equal opportunity of being selected for enrollment in the charter school.

The School will have an open enrollment and application period for all students who live in Broward County. Any student who submits a timely application will be eligible for enrollment.

The School recognizes that services to students with disabilities are governed by Federal, state and local policies and procedures (specifically, the Individuals with Disabilities Education Act (IDEA); Section 504 of the Rehabilitation Act of 1993; Sections 1000.05 and 1003.57, Florida Statutes; Chapter 96-186, Laws of Florida; and Chapter 6A-6 of the Florida Administrative Code). The School will use procedure, guidelines and resources of Broward County Schools' guidelines for meeting the needs of exceptional student education. The educational program for exceptional students will include the following:
A Non-discriminatory policy regarding the eligibility, identification, location, placement and evaluation process
Free appropriate public education (FAPE) will be provided to every exceptional student enrolled in the School
Child Find Services – Child Find is the entry point for ESE services for birth-to-five-year old children and their families in Broward County. The School will use ChildFind Services to assure that all children who need special education and related services receive a free appropriate education by locating, identifying, and obtaining services for children who have disabilities or

special needs. Child Find also provides free screenings for children ages 3-5 who may have special needs to determine if they need to be formally evaluated.

Individual Education Plans (IEP) and Educational Plans (EP) for gifted and meetings

Extended Year Services (EYS)– for students needing specialized services as required by student's IEP

Least Restrictive Environment: students with disabilities will be educated in the least restrictive environment and will be segregated only if the nature and severity of the disability is such that education in regular classes with the use of supplementary aids and services cannot be achieved satisfactorily.

Federal and State Reports: Unless otherwise exempted by Chapter 1002, Florida Statutes, the School will complete federal, state and any other reports deemed necessary in accordance with the time-lines and specifications of the Sponsor and the State Department of Education.

6.C. Describe how the school will work with the sponsor to ensure the charter school is the appropriate placement for each student with a disability, based on the student's needs.

Each student with a disability has an IEP. Each IEP consists of written statements that include the following:

A. A statement of the student's present levels of educational performance including, how the student's disability affects the student's involvement and progress in the general curriculum. For students with disabilities who participate in the general statewide assessment program, consistent with the provisions of Rule 6A-1.0943, FAC, a statement of the remediation needed for the student to achieve a passing score on the statewide assessment;

B. A statement of measurable annual goals, including benchmarks or short-term objectives related to meeting the student's needs that result from the student's disability, in order to enable the student to be involved and progress in the general curriculum and meeting each of the student's other educational needs that result from the student's disability;

C. A statement of the specially designed instruction and related services, and supplementary aids and services to be provided to the student, or on behalf of the student;

D. A statement of the classroom accommodations, modifications, or supports for school personnel that will be provided for the student in order to: (1) advance appropriately toward attaining annual goals; (2) be involved and progress in the general curriculum and to participate in extracurricular and other nonacademic activities; and, (3) be educated and participate with other students with disabilities and nondisabled students in activities;

E. An explanation of the extent, if any, to which the student will not participate with nondisabled students in the regular class or activities;

F. A statement of any individual accommodations in the administration of state or district wide assessments of student achievement that are needed in order for the student to participate in these assessments. In accordance with s. 1008.22(3)(c)6., F.S., parents must provide signed consent for a student to receive instructional modifications that would not be permitted on statewide assessments; this consent may be included on the IEP or on a separate document;

G. If the IEP team determines, in accordance with Rule 6A-1.0943, FAC, that the student will not participate in a particular state or district-wide assessment (or part of such an assessment), a statement of why that assessment is not appropriate, and how the student will be

assessed; parents are notified of such nonparticipation and provided with information regarding the implications of the nonparticipation;

H. The projected date for the beginning of the specially designed instruction and related services, accommodations, and modifications described and the anticipated frequency, location, and duration of those services and modifications;

I. Beginning at age 14 (or younger if determined appropriate by the IEP team), and updated annually, a statement of the student's desired post-school outcome to be developed through a student-centered process, a statement of the transition service needs of the student related to applicable components of the IEP that focuses on the student's courses of study (such as participation in a vocational education program or advanced placement courses), and consideration of training or the provision of information in the area of self-determination so that the student may actively and effectively participate in IEP meetings and self-advocate;

J. During the student's eighth grade year or during the school year of the student's fourteenth birthday, whichever comes first, a statement of whether the student is pursuing a course of study leading to a standard diploma or a special diploma;

K. Beginning at age 16 (or younger if determined by the IEP team), a statement of needed transition services including, when appropriate, a statement of the interagency responsibilities or any needed linkages;

L. Beginning at least one year before the student reaches the age of majority, a statement that the student has been informed of his or her rights that will transfer to the student on reaching the age of majority; and, m. a statement of how the student's progress toward the annual goals will be measured and how the student's parents will be regularly informed at least as often as parents are informed of their nondisabled student's progress. Parents are informed of their student's progress toward the annual goals and the extent to which that progress is sufficient to enable the student to achieve the goals by the end of the year.

Based on the set goals and objectives on the IEP, the School will check its resources, support level, reasonable supplementary supports and services and/or modifications and accommodations that would be provided for the student. In this process ESE teacher and IEP team and school administrators will be reviewing IEP to determine if the School can provide the best service to the student. After the school has attempted to service the needs of the student, but if determined that placement is not appropriate, and whereby the student cannot be served by the School, then the School will meet with District personnel to review the child's IEP (if one is in place) to discuss placement options with the parent. The School understands and committed to collaborating with the sponsor to ensure that placement decisions for students with disabilities will be made based on each student's unique needs.

6.D. Describe how the school will utilize the regular school facilities and adapt them to the needs of exceptional students to the maximum extent appropriate, including the use of supplementary aids and services.

The School will utilize the regular school facilities and adapt them to the needs of exceptional student by adhering to Section 504, IDEA, and ADA to ensure that schools provide free and appropriate education within the least restricted environment. The School will implement the Universal design model, accommodating to the maximum extent possible for individuals with special needs.

The School is aware that special education spaces should not be clustered or isolated in a single area of the building. While some special education functions clearly need to be adjacent or in proximity to one another, the balance will be dispersed throughout the school. The design of the School will respect the distance student's travel throughout the building. Elevators will be centrally located and never placed at the far ends of the building. The School's Universal design sanctions that school furniture should maximize comfort and minimize the potential for injury, eye fatigue, and distractions by being free of protrusions and having rounded edges and no glare surfaces. Likewise, pedestrian walks, bus circulation, car circulation, service deliveries, and parking should be physically separated. The clear delineation of these traffic patterns enhances everyone's safety. Pedestrian routes, including those to and from parking areas and bus loading and drop-off areas, will be supervised during school hours as well as well-lit during dark hours. Points of transition such as steps, ramps, intersections, and entry doors will meet all ADA requirements.

6.E. Describe how the school's effectiveness in serving exceptional education students will be evaluated.

The goals for determining the School's effectiveness in serving special education students are consistent with the goals set for all students of the School or as specified in the child's IEP and EP. The School will support the education of the students with special learning needs within the regular classroom setting as the first choice of placement and with a commitment to provide services necessary for full implementation of the child's IEP. The School's effectiveness in serving special education students can also be evaluated in its' ability for the student to demonstrate learning gains consistent with the annual goals specified in the child's IEP and EP. Additionally, at conclusion of every marking period (and/or during mid-term progress report sessions), the School will evaluate the students' progress towards goals identified in the students' IEP/EP as well as overall success with current courses. The success of students in the gifted program will also be evaluated by a review of their grades and progress evaluations from the gifted teacher.

It is expected that students with disabilities will be totally integrated into the school program through an inclusive instructional model. The school will support the education of students with special learning needs within the regular classroom setting as the first choice of placement and with a commitment to provide services necessary for full implementation of the child's IEP. If extraordinary support for teachers or students is necessary, it will be provided through personnel or contracted services. The school will ensure that it complies with federal/state and local regulations/policies regarding students with disabilities.

IEP team participants;
The IEP team will include the following:
- ◊ The parent or legal guardian of the student,
- ◊ Special education teacher,
- ◊ At least one of the general education teachers of the student,
- ◊ Administrator or designee
- ◊ An individual who can interpret the instructional implications of the evaluations such as a certified psychologist if needed,

◊ District representative if needed
◊ Others by recommendations of the parents and/or the school such as private counselor of the student or a business representative, and
◊ Student (when appropriate as decided by mutual agreement of the parent and the school)

Funding for ESE services is generated by the student's level of services as documented on the Matrix of Services form and the school shall utilize this supplemental funding to provide for each exceptional student's education needs. However, in cases of extreme impairment or disability, after the school has attempted to service the needs of the student, but if determined that placement is not appropriate, and whereby the student cannot be served by the School, then the School will meet with District personnel to review the child's IEP (if one is in place) to discuss placement options with the parent.

The following is a list of services that could be provided to serve the needs of the exceptional student population:
- Academic pullout – All students will be included in regular education classes. However, those students who require extra services or instructional assistance will be pulled-out of the regular classroom for the services mandated on their IEP by a certified ESE teacher. The amount of time and the specific content area to be remediated will be determined in the IEP;
- Speech Therapy, Physical Therapy & Occupational Therapy – These services will be contracted out and services provided according to each student's IEP;
- Age/Grade Appropriate Classroom – Students are served with same age/grade peers
- Consultation – General Education teachers, ESE teachers and/or related services personnel meet regularly to plan, implement and monitor instructional alternatives designated to ensure that the student with disabilities is successful in the general education classroom. Students who do not require "pull-out" services but require some assistance per the IEP will receive extensive monitoring;
- Co-teaching – General Education teachers, ESE teacher share responsibility for planning, delivering, and evaluating instruction. The ESE teacher must be in the general education classroom each day for a designated period of instructional time. The number of students with disabilities in each class may be up to one third. This service may be provide based on school's available resources and funding.
- External Supports – Commonly known as consultation. General Education teachers, ESE teachers, and/or related services personnel meet regularly to plan, implement and monitor instructional alternatives designated to ensure that the student with disabilities is successful in the general education classroom. The ESE teacher does not provide hands on support directly the ESE student(s) in the general education classroom.
- Inclusion – Students with disabilities are equal members of the school community and should have the opportunity to participate fully in all school-based activities with non-disabled peers. Students are educated in their general education classroom to the greatest extent appropriate.
- Support Facilitation – The school may offer this service in a way that a ESE teacher and/or related services personnel provide support for students with disabilities in the general classroom. The frequency and intensity of support varies based upon students'

99

and/or general educators' need for assistance. ESE teachers and/or related service personnel may utilize a variety of instructional grouping models (small group, pull-out, one-on-one) to meet the needs of the student.

6.F. Explain how exceptional students who enter the school below grade level will be engaged in and benefit from the curriculum.

As mentioned in the core curriculum descriptions above, research on these programs (the school's curriculum) has shown that these programs are effective and accessible to "all levels of students," not only high performing students. Results consistently show that students who are engaged in these programs perform as well as or better than other students. The level of implementation of the K-8 Reading Plan at the school and classroom level is monitored through goals of the School Improvement Plan, and progress of all students as part of the Response to Intervention (RtI) model. Data will be collected through classroom walkthroughs and analysis of FCAT 2.0 and PARCC scores, Internal Benchmark Tests, Florida Assessments for Instruction in Reading data, Progress Monitoring Data, and Ongoing Progress Monitoring data, as needed. All students will be engaged in and benefit from the curriculum including exceptional students or students who enter the school below grade level. Apart from providing the specific services listed in a student's IEP, the School's faculty will differentiate instruction as necessary and is committed to offer the students tutoring services or other such assistance to ensure they remain successful. Since it is anticipated that a majority of students will matriculate from the elementary to the, the School has a vantage point for monitoring and ensuring continuous improvement of all students, including those who may have fallen below grade level, those who meet, and/or those who exceed grade level requirements and expectations. The School will hire a certified ESE teacher to make sure it uses procedures, guidelines and resources of Broward County Schools for meeting the needs of exceptional student education. The ESE teacher will work collaboratively with the teachers to ensure appropriate accommodations and modifications are provided towards meeting the goals on students' IEPs.
Students needing remediation based on respective subject area assessments in specific subject areas will be assigned to and placed on a specific Progress Monitoring Plan (PMP) targeting these deficiencies. This plan requires active participation from the student, the parents and specific teachers in order to ensure continuous student improvement. This initiative allows each student to have ownership and understating of his/her learning style and allows each student to track and monitor his/her achievement. The PMP will be comprised of specific measurable individualized goals for that student as well the strategies and services (tutoring/required additional classes) to be implemented in order for the student to achieve the specified goals. Students identified below grade level in any given area will have targeted tutoring. Individualized Supplemental Instruction and/or Computer-Based Programs may also be used for remediation, instruction, and progress monitoring, as appropriate.

6.G. Provide the school's projected population of students with disabilities and describe how the projection was made.

The School is projecting population of students with disabilities at 10% of its total population based on the county and state rates.

6.H. Identify the staffing plan for the school's special education program, including the number and qualifications of staff

The School will hire a certified ESE teacher/coordinator who meets all licensure and/or certification requirements that apply to the area in which the individuals are providing services to the special education students. The ESE teacher/coordinator will attend the district's ESE professional development program. The number of special education staff will be based on the number of ESE students identified upon student enrollment. While the school is growing, if the school needs more than one ESE teacher, additional certified ESE teachers will be hired.

All personnel who provide related services (e.g. psycho-social counseling will be provided by a psychologist, social worker or mental professional, etc.) to students will be contracted and those will meet all required licensure and/or certification requirements pertaining to their area of related service. Speech-language, occupational, and physical therapy services will be contracted for students who qualify for those services according to their IEPs.

6.I. Describe how the school will serve gifted and talented students

The School recognizes that gifted students possess superior abilities and/or potential and are, therefore, a unique segment of the school's student population. If gifted students are to develop their abilities and/or potential, they need ongoing and varied educational opportunities to extend their learning. In accordance with State Board Rule 6A6.03019, the school will implement the following procedures for meeting the needs of gifted students:

Identification: Gifted students will be identified for special instructional programs for the gifted if the student demonstrates the following:

1. a need for a special program
   - In order to provide a comprehensive profile of the student's abilities and needs, screening activities will include nomination forms from teachers, school staff, students themselves, parents and/or community. The following criteria will be used in identifying students:
     - high percent levels of performance on test scores (FCAT 2.0-PARCC)
     - referrals from teachers for gifted eligibility based on classroom performance, student's portfolio
     - recommendation from counselor/teachers regarding student motivational behavior, involvement in activities, etc.
     - recommendation from parents about student's academic areas of strength and individual interests

2. a majority of characteristics of gifted students according to a standard scale or checklist and
3. superior intellectual development as measured by an intelligence quotient of two (2) standard deviations or more above the mean on an individually administered standardized test of intelligence
.

Educational Plans (EP) for students who are identified solely as gifted will be developed. The procedures for the development of EPs for students identified as gifted are as follows:

a. The EP includes:
- a statement of the student's present levels of educational performance which may include, but is not limited to, the student's strengths and interests, the student's needs beyond the general curriculum, results of the student's performance on state and district assessments, and evaluation results;
- a statement of goals, including benchmarks or short term objectives;
- a statement of the specially designed instruction to be provided to the student;
- a statement of how the student's progress toward the goals will be measured and reported to the parents; and,
- the projected dates for the beginning of services and the anticipated frequency, location, and duration of these services.

b. The EP team considers the following during development, review, and revision of the EP:
- the strengths of the student and the needs resulting from the student's giftedness;
- the results of recent evaluations, including class work and state or district assessments;
- in the case of a student with limited English proficiency, the language needs of the student as they relate to the EP.

c. Timelines for development of the EP include the following:
- an EP is in effect at the beginning of each school year for each student identified as gifted who is continuing in a special program;
- an EP is developed within thirty (30) calendar days following the determination of eligibility for specially designed instruction in the gifted program and is in effect prior to the provision of these services;
- meetings are held to develop and revise the EP at least once every three (3) years for students in grades K-8 and at least every four (4) years for students in grades 9-12;
- EPs may be reviewed more frequently, as needed, such as when a student transitions from elementary to middle school or from middle to high school.

d. EP participants include:
- the parents, whose role includes providing strengths of the student, expressing concerns for enhancing the education of their child, participating in discussions about the child's need for specially designed instruction, participating in deciding how the child will be involved and participate in the general curriculum, and participating in the determination of what services the School will provide to the child and in what setting;
- at least one teacher of the gifted program;
- one regular education teacher of the student who, to the extent appropriate, is involved in the development of the student's EP. Involvement may include the provision of written documentation of a student's strengths and needs for review and revision of subsequent EPs;
- a representative of the school district as needed;
- School administrator or designee;

- an individual who can interpret the instructional implications of the evaluation results.
- at the discretion of the parent or the school, other individuals who have knowledge or special expertise regarding the student, including related services personnel;
- whenever appropriate, the student.

An EP is in effect before specially designed instruction is provided to an eligible student and is implemented as soon as possible following the EP meeting. The EP is accessible to each of the student's teachers who are responsible for the implementation, and each teacher of the student is informed of specific responsibilities related to the implementation of the EP.

To provide appropriate and challenging educational experiences for Gifted and Talented students, differentiation may include but not limited to:

- acceleration of instruction;
- in-depth study;
- a high degree of complexity
- advanced content; and/or
- variety in content, processes and products
- ability grouping
- differentiation
- specialized gifted courses

The goals for determining the School's effectiveness in serving special education students are consistent with the goals set for all students of the School or as specified in the child's IEP and EP. The School will support the education of the students with special learning needs within the regular classroom setting as the first choice of placement and with a commitment to provide services necessary for full implementation of the child's IEP. The School's effectiveness in serving special education students can also be evaluated in its' ability for the student to demonstrate learning gains consistent with the annual goals specified in the child's IEP and EP. Similarly, the school's ability to meet annual gains for the students with disabilities subgroup, would also serve to demonstrate effectiveness in serving the School's special education population. Additionally, at conclusion of every marking period (and/or during mid-term progress report sessions), the School will evaluate the students progress towards goals identified in the students IEP/EP as well as overall success with current courses. The success of students in the gifted program will also be evaluated by a review of their grades and progress evaluations from the gifted teacher.

7. English Language Learners

7.A. Describe how the school will comply with state and federal requirements for serving English language learners, including the procedures that will be utilized for identifying such students providing support services

The School will meet the requirements of the Consent Decree entered in Lulac, et al. vs. State Board of Education. English Language Learners (ELLs) enrolled at the school will be served by ESOL certified personnel who will follow the Sponsor's District Plan for English Language Learners. Students in the ESOL program are required to meet the same curriculum standards as non-ELLs in English/Language Arts and content area instruction. The content of the curriculum is established by the Common Core State Standards. ESOL strategies, supplementary materials, and native language assistance are used to ensure that comprehensible instruction is being provided to every ELL.

All students who are classified as ELLs are required to participate in a program of English for Speakers of Other Languages (ESOL). To comply with the requirements of the League of United Latin American Citizens (LULAC) et al. v. State Board of Education Consent Decree, and corresponding Florida State Board of Education rules on ELL services, all schools with students classified as ELLs must provide an appropriate ESOL program to meet the specific needs of such students in language learning, academic achievement, and cultural integration.

Identifying English Language Learner (ELL) Students:
The school will survey ALL parents upon initial entry (registration) using the Home Language Survey (HLS). The HLS will be a required form of the registration packet for every child who seeks enrollment at the School. The Home Language Survey includes three questions and is given at the time of registration.

The questions are as follows:
1. Is a language other than English used in the home?
2. Does the student have a first language other than English?
3. Does the student most frequently speak a language other than English?

If a parent answers "yes" to one or more of the three HLS questions, and/or meets the definition of ELL, they will be advised that the student will need an aural/oral language assessment of English proficiency to determine eligibility and placement in the school's ESOL Program. The parents are informed orally of the need of a language assessment by the school registrar, ESOL contact/designee, or by the guidance counselor. The student is then referred to a trained language assessor or assistance is requested from the District. In that case, the students will be tested using Idea Oral Language Proficiency Test (code: IPT) in the areas of speaking and listening and Kaufman Test of Educational Achievement II (KTEA) (code: KEA) in English reading and writing as implemented by the District.

K-2 students who score at Non- English Speaking (NES) and Limited English-Speaking (LES) levels based on the IPT-I are assigned Broward County Language Classifications ranging from

A1-C1 using the charts correlating the IPT test score levels with the Broward County Language Level Classifications. These NES and LES (A1-C1) students qualify for ESOL Program Placement.

K-2 students who score at Fluent English- Speaking (FES) levels based on the IPT-I are generally assigned a Broward County Language Classification of C2 using the aforementioned charts. These FES (C2) students do not qualify for ESOL Program Placement [Exception: FES K-2 students can be given a Broward County Language Classification of C1, qualifying them for ESOL Program placement, if recommended by an ELL Committee because of a lack of English proficiency in readiness (K) or academic skills (Grades 1-2).]

Grade 3-12 students who score at NES or LES levels based on the IPT are assigned language classifications ranging from A1-B2 using the charts correlating the IPT test score levels with the Broward County Language Level Classifications. These NES and LES (A1-B2) students qualify for ESOL Program Placement. For FES (C1-C2) students in grades 3-12, test scores in reading and writing are considered for ESOL Program entry and the following criteria are used to determine student eligibility for the ESOL Program:

- If both reading and writing test scores are at or above the 33rd percentile, the student is placed in the Basic Program and does not qualify for the ESOL Program.
- If both reading and writing test scores are at or below the 32nd percentile, the student is placed in the ESOL Program.
- If either the reading or writing test score is at or below the 32nd percentile, the student is referred to the ELL Committee for placement recommendation in either the ESOL or Basic program.

The school ESOL contact/designee keeps a record of all students whose parents answer "yes" to one or more of the three HLS questions to ensure aural/oral testing is completed within 20 days of registration. District trained school-based language assessors will be available to test at school site. In addition, The School may request language assessors from the district Multicultural, ESOL and Program Services Department.

To ensure that the Reading/Writing test is administered within one year of the aural/oral test, the following procedures are implemented:

- Reading and Writing subtests of the Kaufman Test of Educational Achievement-II Brief Form (K-TEA-II) are administered by the School ESOL Program staff to Grades 3-12 students identified as FES.
- This testing is completed within 20 days of the identification of the student as FES.
- The District ESOL Program staff informs the school ESOL Contact or designee of the results so appropriate student placement is made and TERMS database can be done by school staff.

For students in grades K-8 with inconsistent test data to meet the entry criteria, an ELL Committee is convened to determine if the student should enter the ESOL Program. Parents are invited to attend this meeting. For students in grades K-8, the ELL Committee may determine a student to be ELL or not to be ELL according to consideration of at least two of the following criteria in addition to the results of the assessment of English language listening/speaking proficiency (IDEA Oral Language Proficiency Test) and/or reading and writing:

- extent and nature of prior educational and social experiences; and/or student interview;
- written recommendations and observations by current and previous instructional and supportive services staff;
- level of mastery of basic competencies or skills in English and/or home language according to appropriate local, state, and national criterion referenced standards;
- grades from the current or previous years;
- test results other than those from the district assessment of listening/speaking/reading/writing.

ELL Committee decisions are documented in the ELLSEP folder under ELL Committee recommendations. ELL Committee members sign the folder for documentation purposes.

The ELL Committee:
The main function of the ELL Committee is to resolve any issue that affects the instructional program of an ELL student (program placement recommendations can also be made through the ELL committee). It is composed of at least 4 members: an administrator or designee, the ESOL teacher, the home language teacher (if any), the classroom/subject area teacher(s), plus guidance counselors, school social workers, school psychologists or other educators as appropriate for the situation. Parent(s) are invited to attend any meeting of the ELL Committee. All decisions regarding ELL programmatic assessment and academic placement are documented in the appropriate section of the student's English Language Learner Student Educational Plan (ELLSEP) folder.

The Individual ELL Student Education Plan (ELLSEP):
All students classified as ELL will have an Individual ELL Student Education Plan. Such plan is part of the permanent student cumulative record folder upon entry into the ESOL program. The ESOL contact/designee will be responsible for overseeing the development and updating of the English Language Learner Student Education Plan (ELLSEP) by the ELL committee. The ELLSEP is updated as follows:
- whenever an ELL Committee is held
- annually at the end of each school year
- on the anniversary date of student's entry into the ESOL Program,
- any other time when there is a change in the student's educational plan.

All ELLSEPs are reviewed annually, at the end of each school year, to determine the appropriate educational placement and instructional options of the student. Assessment data (ie. achievement test results, class performance, grades, language proficiency) are considered when conducting the review. The documentation of the recommendations are part of the student ELLSEP folder. The plan is also updated on the student's anniversary date of entry into the ESOL program for a recommendation for continued placement in the ESOL program. The 2nd and 3rd year recommendations are documented by the ESOL contact/designee in the appropriate section of the ELLSEP folder. In addition, the Principal/designee or the ESOL contact person informs the teachers of students who have completed a 3-year base period in the ESOL program. If the student does not meet the exit criteria after 3 years in the ESOL program, the ELL Committee is convened to make a recommendation for a 4th, 5th or 6th year of continued ESOL program

placement. Recommendations for an extension of the ESOL program are documented on the ELLSEP Folder by the school ESOL contact person or designee.

Exit procedures:
The School ESOL contact person, in coordination with its teachers, will follow the following procedures to exit students from the ESOL program:
- Identify students who are eligible to exit the ESOL program based on the exit criteria.
- Update the exit information on the ELLSEP folder for exiting students.
- Complete the appropriate section of the ELLSEP folder with the assessment data used to determine English proficiency, date and signature. If the ELL Committee needs to be convened, parents will be invited and all members of the committee will sign as appropriate.
- Provide the school data processor with required exit data. The required information in entered in the State Database (TERMS).
- Notify the parent(s) that the student is exiting the ESOL program.
- Monitor the student for two years from the exit date in order to ensure success in the mainstreamed classroom.

Students in K-2 are eligible for exit from the ESOL program upon scoring at FES level (E) on the IPT-I. Students in grades 3-12 eligible for exit from the ESOL program must score an achievement level of three (3) or greater or equivalent developmental scale score on the Reading portion of the Florida Comprehensive Assessment Test. In addition students must score a level of proficient on the Comprehensive English Language Learning Assessment (CELLA) in listening and speaking, and writing. Students in grades 3-12 eligible for exit from the ESOL program must score an achievement level of three (3) or greater or equivalent developmental scale score on the Reading portion of the Florida Comprehensive Assessment Test. In addition, those students must score a level of proficient on the Comprehensive English Language Learning Assessment (CELLA) in listening and speaking, and writing. The Comprehensive English Language Learning Assessment (CELLA) will be administered each spring to all current ELL students to measure proficiency and gains in reading, writing, listening, and speaking.

The school ESOL contact/designee at the school site is responsible for updating the ELLs exit data in the ELLSEP Folder. The school principal/designee is responsible for ensuring this process is completed.

The Student ELL plans will be updated annually by the principal's designee/ESOL coordinator. Documentation of the progress review for each ESOL-exited student will be conducted at the end of the student's first grading period, first semester, first year, and second year after exiting. The school will monitor the student's progress:
- report cards
- test scores
- classroom performance
- Standardized tests (as applicable)

7.B. Identify the staffing plan for the school's English language learner program, including the number and qualifications of staff

Dependent upon the number of students who qualify for ESOL instruction the school will hire an ESOL teacher(s) who will have the responsibility of overseeing, training, and assisting staff in meeting the needs of the school's ELL population throughout the school year. Highly qualified teachers who are implementing and documenting the required ESOL strategies and using appropriate instructional materials will be hired. Teachers will complete their ESOL endorsement to serve the ELL students. All instructional members will be expected to appropriately identify any ESOL students and levels in their grade books and use ESOL strategies when instructing ELL students.

If there are fifteen or more students of a particular language enrolled in the school, a bilingual teacher or assistant will be available to assist students in understanding content instruction (LULAC et al vs. School Board of Education Consent Decree).

Teachers and paraprofessionals assigned to this program are expected to assist ELL students using their home language in the core subject areas of mathematics, science, and social sciences. Tutoring logs indicating services provided will be kept at the school by the administrator supervising the program. Bilingual paraprofessionals will assist students through the use of the following:
☐ working in small groups
☐ translating information
☐ interpreting test questions and homework assignments as appropriate
☐ helping students comprehend textbooks and other written materials.

Additionally, the School will ensure that all core curriculum personnel instructing ELL students will have the appropriate training (ESOL endorsement/required coursework) documentation. Staff members will be provided with training and opportunities for ESOL endorsement. All instructional members will be expected to appropriately identify any ESOL students and levels in their grade books and use ESOL strategies when instructing ELL students.

7.C. Explain how English Language Learners who enter the school below grade level will be engaged in and benefit from the curriculum.

As mentioned above, the school curriculum has components for ELL population. In order to promote both literacy and proficiency, the curriculum will provide ELLs with English language development instruction that is age and grade appropriate and is tailored to the student's English proficiency level. ELLs will be in a climate that promotes not only listening, speaking, reading, and writing skills, but also a cross cultural understanding during classroom instruction. ELLs will receive comprehensible instruction for the core curriculum so that they can make academic progress comparable to that of native English speakers. The School offers the English Language Learner (ELL) instructional services through mainstream/inclusion instructional delivery models. Mainstream/inclusion instruction provided to ELL students is equal in amount, sequence and scope to the instruction provided to the non-ELL students at the same grade levels, while also

including specific accommodations and modifications to the curriculum. Instruction is supported through the use of ESOL instructional strategies, such as but not limited to:

- o Provide a climate of warmth and caring which nurtures a sense of comfort
- o Seat the student close to the front of the room
- o Establish a daily routine in the classroom and prepare the students for any changes
- o Use as many of the senses (seeing, hearing, touching, smelling and tasting) as possible to present information to students
- o Provide ESOL students guidelines for written work and homework assignments
- o Provide alternative instruction whenever the class lessons are extremely difficult for the ELL student
- o Arrange small discussion and talking activities that permit students to practice verbal skills
- o Utilize oral techniques, such as cueing, modeling elicitation and chunking
- o Utilize graphic organizers such as webbing and semantic maps
- o Modify your lesson objectives according to the language level of the ELL student
- o Use manipulatives to help students visualize the math concepts
- o Allow students to use computational aids such as number lines, abacus, counters and computation charts
- o Teach math concepts and computation procedures through games and kinesthetic activities
- o Give practice in reading word problems by identifying the key words to determine the operation needed to solve the problem
- o Utilize the cooperative learning approach in which the student is given the opportunity for peer instructions

In addition, the curriculum, textbooks and other instructional materials such as supplemental materials used by ELL students are comparable to those used by native English speakers. The School will also utilize State adopted language proficiency texts to enable teachers to instruct students on their current level of language proficiency. This allows teachers to assign grades in English/language arts, communication skills and reading/writing levels according to the language acquisition stage at which the student is operating. This grading on the appropriate language development levels, provides optimal opportunity for promotion using a variety of instructional sources, ELL students will work with their teachers on creating and maintaining a progress plan to track the students' progress. The plan will be used to show the areas of success and growth that the student maintains. It further identifies the type of help needed to equip the student with the ability achieve high standards of proficiency and to comprehensively communicate in English. In addition, all ELL students will be referred to Tier 2 of RtI, where the Problem Solving/Response to Intervention Team will meet to discuss interventions and strategies to support the ELL student continued academic success. The ESOL strategies will be documented in the teachers' lesson plan and in the student's plan and ELL folder. The effectiveness of these ESOL strategies will be determined by the teachers' observations, administrative classroom walk through, data summits, site visits, and district fidelity checks.

8. School Climate and Discipline

8.A. Describe the school's planned approach to classroom management and student discipline

The School recognize importance of establishing and maintaining a safe and disciplined learning environment at all time for healthy and successful education. In order to provide criteria for addressing discipline issues that will ensure health, safety, and welfare of all the students, the school will take the School Board of Broward County student code of conduct as a base, discipline code and matrix ("Appendix C - The School Tentative Student and Parent Handbook" reserving the right to amend as needed). The School's philosophy regarding student behavior ensures its commitment to the School's mission on a daily basis. Its founders are of the opinion that both teachers and students need to be provided with a consistent behavior management system so that maximum time can be spent teaching and learning. Student safety and an orderly environment is vital component of the instructional program. Inappropriate behaviors that interfere with the learning process and the expectations set for character development can be reduced and ultimately extinguished through consistent, best practice behavior management techniques. All staff will be trained on school wide classroom management plan which will be based on *CHAMPs*, a Proactive and Positive Approach to *Classroom Management* and Harry Wong's approaches.

All the students at the School are entitled to the rights guaranteed by the United States Constitution and Bill of Rights, and their rights will not knowingly be denied by the required code of conduct or by any disciplinary actions taken by the school. Any student, who exhibits any of the unacceptable student behaviors or Conduct Violations listed in the Student and Parent Handbook. In all instances, the School's policies and procedures governing due process for suspensions and dismissal will follow Broward County School District Policies. All students at the School have the right to feel physically, emotionally, and intellectually safe. Therefore, if at any time students feel they are the subject of harassment, hazing, threats, or other intimidating behavior, students should immediately speak to an administrator about the problem. The situation will be investigated as soon as possible. All reports like this will be kept completely confidential. The ultimate goal is provide safe and secure learning environment for students. Safety and security of students will be one of the top priorities at the school.

8.B. Describe the school's Code of Conduct, including the school's policies for discipline, suspension, and dismissal

The School will employ Broward County Schools' Student Code of Conduct[16], the Discipline Code, and Discipline Matrix as its primary policy guides in these areas. In addition, The School will use a Student and Parent Handbook, which lays out specific details that take into account the School's idiosyncrasies, such as standards for the uniform and parent and student agreement. The tentative Student and Parent Handbook can be found in "Appendix C - The School Tentative Student and Parent Handbook". Policies and Administrative Procedures of Broward County

---

[16] The current Code of Conduct can be found at http:// http://www.browardschools.com/schools/code.htm.

Schools as well as State Board Rules and Florida School Laws override the Tentative Student and Parent Handbook of the School.

This information will be made available to parents and students upon registration. Parents are expected to read and discuss the policies with their child/children and return the appropriate form(s) with signatures for the students' portfolio records.

Minor infractions would include items such as dress code violations, horseplay, tardiness, misuse of equipment, or failure to do homework. In order to resolve minor infraction discipline problems, the following options are available:
. Conference with teacher
. Parent Contact
. Conference with teacher and parent(s)
. Conference with Principal or designee
. Conference with counselor
. Behavioral Contract
. Detention (lunch)

Some of the disciplinary actions that may be utilized (in accordance with the district's Code of Student Conduct) include:
☐ Removal from Class
☐ Student Work Assignment
☐ Peer Mediation
☐ Other Alternatives (e.g. after-school detention)

The Principal or designee of the School may suspend a student from school for up to ten days for persistent disobedience and/or gross misconduct. Principals take this action when they have exhausted informal disciplinary strategies, or when they have at least considered those alternatives and rejected them as inappropriate in a given situation.
Outdoor Suspension may be utilized by the School under the following conditions:
☐ The student's presence in school presents a physical danger to the student or others;
☐ A "cooling off" period is needed in order to relieve tensions and relieve pressure; and/or
☐ The student and/or parent refuses an alternative to suspension.

In accordance with the SB Policy 5006, the School's Principal may request that the Superintendent recommend to the School Board that a student be expelled. The Principal of the School may take this action when he/she has exhausted less severe administrative disciplinary action, or when he/she has considered those alternatives and rejected them as inappropriate in the given situation. The details of the school's policies for discipline, suspension, dismissal and recommendation for expulsion are presented in the "Appendix C - The School Tentative Student and Parent Handbook".

II. ORGANIZATIONAL PLAN

9. Governance

9.A. Describe how the school will organize as or be operated by a non-profit organization.

The legal entity that will organize and/or operate the school is Discovery Education Services, Inc., a Florida nonprofit corporation doing business as Broward Science Charter School which already received 501(c) 3 status. Discovery Education Services Inc., has five board of directors and those directors are governing board members of Broward Science Charter School. The officer positions will be president, vice president and secretary. The certificate of the Incorporation is attached. By Laws of the entity is included as "Appendix E - By Laws of The Discovery Education Services, Inc.

The corporation is managed by its board of directors ("Governing Board"). The Governing Board has the responsibility for all of the affairs and management of the School and will provide continuing oversight of school operations. Members are committed to the mission of the School and are cognizant of their responsibility to effectively and properly manage public funds.

The School will comply with S. 119.011(2), Florida Statutes, relating to Public Records, and 286.011, Florida Statutes, relating to Public Meetings, unless exempted by law. All the financial, business, and membership records shall be public records and subject to the provisions of S.119.07, Florida Statutes. Furthermore, board meetings shall be open to the public as per S. 286.011, Florida Statutes. The parents/guardians of the students are expected to participate in the decision-making and planning procedures of the school through the channels such as surveys, voicing opinions at the regular board meetings, and subcommittees. A notice of compliance will be posted at the school, in an area that is visible to all parents. In addition, a list of the dates for the Board meetings will be posted in a visible area. Notification of the meetings will be sent home via school newsletters with all students prior to the date of the meeting. The dates might also be posted on the school's web page.

Within two business days after the adjournment of a meeting, the principal shall make available to the public a summary of the subjects acted upon at the meeting and the names of the Board members present at the meeting.

Board meetings are held to conduct the affairs and business of the board in the presence of the public. The Board welcomes and encourages citizens to attend its meetings so that the public may become better acquainted with the operation and programs of the school and the board.

All official records of the board shall be kept and safeguarded by the principal as ex-officio Board Secretary. The principal shall also be responsible for the safekeeping of all official papers, including, the official minutes of the Board, its written policies, financial records, titles, contracts, obligations and other documents that belong to the Board or pertain to its business.

Records deemed "public records" and made subject to public inspection by law shall be open for the inspection of any citizen desiring to examine them during hours when the office of the Principal is open.

9.B. Provide an organizational chart for school and a narrative description of the chart. Clearly describe the proposed reporting structure to the governing board and the relationship of the Board to the school's leader and administration.

Figure 1. shows the organizational structure of the school. Note that this chart can vary according to budget report. It is designed to show administrative functions rather than individual positions. In other words, multi-tasks can be performed by the same person, if need arises. The organizational chart is submitted for the first five-year proposal term.

The Board of Directors of Discovery Education Services, Inc. will serve as the Founding Governing Board for the School. After the approval of the charter proposal, Founding Governing Board may become Governing Board. The Board of Directors is responsible to the Sponsor for the fulfillment of the terms of the Charter Agreement. The Founding Board is responsible primarily for the planning, development and implementation stages of the charter school project. This would include the time period beginning with the submission of the application through approximately the first year of the school's operation. As stated in this section the founding board members may remain on the permanent governing board to ensure continuity of vision. The Governing Board is the ultimate policy-making body that will have the responsibility for the affairs and management of the School and will provide continuing oversight of School operations. They are committed to the mission of the School and are cognizant of their responsibility to effectively and properly manage public funds. The Board Members direct the policies of the school and hire a Principal to implement those policies. The Board Members work directly with the Principal to advise and consult on matters including the school development process and the establishment of necessary procedures to ensure a smooth and successful start to the school.

The principal will be the core of the administration. The day to day management of the school will be the responsibility of the school principal. The principal must be an integral member of the learning community comprised of students, staff, and families. The school principal, hired by the Board, will be responsible for all aspects of school operations within the scope of operating policy and budgetary approval by the Governing Board The principal must support shared decision-making, promote collaborative leadership, and require accountability from all parties. The School's faculty and staff will report directly to the principal, who reports to the Governing Board. The School's on site administration will consist of the principal, an assistant principal or lead teacher, and secretarial staff. The principal, with the support of the administrative staff, will ensure that the operations of the School (resources, courses, policies) are in accordance with the mission and vision of the School. The administrative staff, as instructional leaders, will make all school-based decisions, establishing and implementing procedures for the day-to-day operations of the School.

In addition to serving as the educational leader of the school, the principal is responsible for planning, budgeting, facilities management, scheduling staff development, and supervision and evaluation of staff. The principal will establish and maintain regular communication with local board of education, superintendent, and county administrators. Ultimately, the principal is responsible for maintaining positive relationships with students, parents and board members.

                              Business services
                                Food services
                             Maintenance services
                               Transportation
                               School nurse
                                 Secretary
```
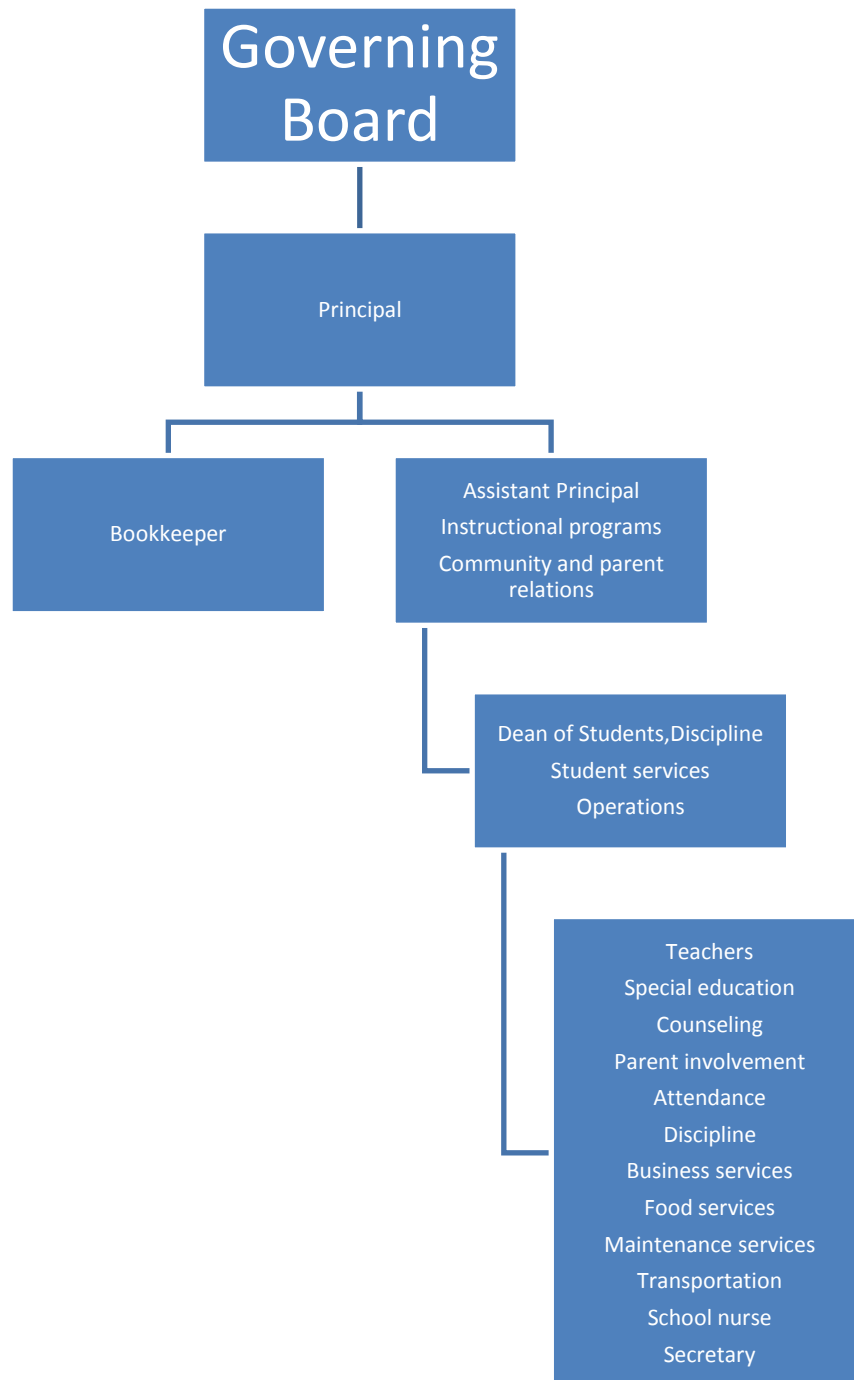

Figure 1 – Tentative Organizational Structure of the School

The following chart compares the roles of the board and the School Leader for developing and sustaining academic excellence in the charter school.

Board	The School Leader
- Establishes the mission and program direction for the charter school - Approves goals and objectives designed to achieve those ends.	- Participates in establishing mission and program direction for the charter school. - Contributes to the charter school's vision and assists the board in maintaining focus and momentum for the school.
- Reviews and approves Accountability and Implementation Plans.	- Implements program goals and objectives based on the board's specific targets. - Provides board performance data on specific targets.
- Reviews performance data and identifies academic areas that need corrective action.	- Develops and implements corrective action plan.
- Assess compliance/progress in achieving educational and other outcomes agreed to in the charter.	- Develops reports to demonstrate program progress.
- Evaluates the performance of the School Leader.	- Evaluates the performance of the instructional staff.

9.C. Provide a description of how the governing board will fulfill its responsibilities and obligations, including but not limited to:
  - ○ **Adoption of annual budget**
  - ○ **Continuing oversight over charter school operations**

The Board has full responsibility to adopt an annual budget, monitor the budget in each board meeting and amend the budget as needed basis. The board shall oversight the financial activities of the school and review monthly financials in its governing board meeting.

Continuing oversight over charter school operation as given an example for financial oversight above will be provided. The Board will be the sole policy making body for the school.

Each board member will take on proactive roles in specific areas that reflect his/her areas of expertise. Officers of the Board shall include a President, Vice President, and Secretary. The Board will have a minimum of three members at all times and any one officer may fulfill the duties of a second office, such as Vice President will act as treasurer with the exception of the

Chairman. The Chairman may only serve as the Chair and may not simultaneously hold another office on the Board.

The Board shall be responsible for hiring, evaluating and terminating the School Principal. The Board shall be responsible for final approval of employment of persons recommended by the Principal. The Board shall establish salaries and benefits to facilitate the Mission and Vision of the School and the Board shall annually adopt a budget that provides sufficient resources and control of costs to foster the mission and objectives of the school. The Board shall also be responsible for naming an auditor selection committee and procuring an auditor via the guidelines set forth by the Florida Auditor General's office.

Key Responsibilities of the Board
- Governing board will ensure that the school's operations continue to focus on serving its students and achieving the academic performance goals of its charter.
- While many decisions can be delegated to the school's management, the board has final say in all policy, financial and operational decisions and for setting the overall direction of the school. Therefore, the charter school board is one of the most critical element in the school's success.

The primary responsibilities of the board include:
Provide oversight functions. The board's ability to remain objective, and not be directly involved in the school's operational activities, is critical to its effectiveness in guiding the charter school.
Promote the charter school's mission. The board should be comprised of individuals who support and promote the charter school's mission and educational philosophy.
Lead planning and policymaking. The board must initiate the strategic planning process and develop policies and procedures consistent with the education laws of Florida State.
Raise funds. Board members should be proactive in building a group of private and business financial supporters who regularly donate money to the school and provide other resources to help implement the school's educational program.
Achieve charter requirements. The board is responsible for ensuring that school's programs and operation comply with the terms of its charter, and that the school:
- Is financially solvent
- Complies with statutory and regulatory requirements'
- Has competent professional staff
- Has a successful academic program, as measured by internal and external assessments

Additionally, the Board's specific policy and direction goals are:
- To interpret the education needs and aspirations of the community through the formulation of policies which stimulate the learner and the learning process;
- To manage the school in accordance with federal and state laws;
- To provide leadership in school in order that the goals and objectives of the school can be effectively carried out;
- To maintain two-way communication with the various persons served by the school in order to understand public attitudes and encourage community involvement with an understanding of the schools;

- To develop and provide the data appropriate for the management functions of planning, evaluating, organizing, controlling and executing.

The Board is responsible to the people and therefore should attempt to reflect the opinion of the community. However, Board members must look to the future more clearly than is required of the average citizen. The results of many of the decisions and actions of the Board will not be realized at once, but will set the course of education for future years. The Board should fearlessly support those educational philosophies and procedures needed to promote proper education for this community based upon the needs of the students.

The chair of the Board shall preside at Board meetings and shall perform all duties as may be prescribed by law or by action of the Board. The duties of the chair include the following:

The board chair ensures that the board fulfills its governance responsibilities and works with the school leader to achieve the mission of the charter school. It is a challenging role that requires collaboration, people skills and a lot of patience.

The following steps will help the board chair prevent the board from "micromanaging" the school's leader and staff, and minimize conflicts within the board itself:
- Have clearly written and approved procedures for evaluating the school leader.
- Have regular board training sessions that include an overview of the roles of the school leader and the board.
- Meet with the school leader to discuss how to work together as a team.
- Have the school board and leader mutually develop agendas for board meetings.
- Consult with the school leader for appointments or recommendations for various board committee chairs.
- Have clear written guidelines about the roles of staff as it relates to board support.
- Develop the frequency and nature of meetings to be held between the school leader and the board chair, and share the highlights of these meetings with the entire board.
- Ensure all board members understand the roles of the board, the chair and committees.
- Maintain an open communication policy to ensure that important information is never concealed by and from the board chair, the school's leader or the entire board.
- Celebrate accomplishments and acknowledge the key people involved

The Vice President shall have the powers and duties of the President when the President is absent or disabled, and shall have such other powers and duties as the Board may from time to time determine.

In the absence of both the President and Vice President, the attending members shall elect one of their members to preside.

The Secretary shall be responsible for preparing the minutes of each Board meeting. The minutes shall, at a minimum, include the names of the Board members present at the meeting, a description of each motion or other proposal made, and a record of all votes. For roll-call votes or votes to close a meeting to the public, the name of each person voting for or against the

proposal shall be recorded. For all other votes, it shall be presumed that the action taken was approved by each member in attendance unless the minutes reflect the names of any members voting against the proposal or abstaining.

The minutes shall be submitted to the Board for approval at its next regular meeting. Once approved and signed by the Principal and Board President, Board minutes shall be available for public inspection upon request.

The duties and obligations of an individual Board member may be enumerated as follows:

- To become familiar with the state school laws, regulations of the Florida Department of Education, School policies, rules and regulations;
- To have a general knowledge of educational aims and objectives of the school;
- To work harmoniously with other Board members without trying either to dominate the Board or neglect a share of the work;
- To vote and act in the Board meetings impartially for the good of the school;
- To accept the will of the majority vote in all cases and give wholehearted support to the resulting policy;
- To represent the Board and the school in the public in such a way as to promote both interest and support; and
- To refer complaints to the proper school authorities and to abstain from individual counsel and action.

Sample Charter School Board Member Job Description
1. Attend regular meetings of the charter school board, which are approximately two hours in duration. Be accessible for personal contact in between board meetings.
2. Provide leadership to board committees. Each board member is expected to serve as an active, ongoing member of at least one committee. This requires a number of meetings per year plus individual committee task completion time. Present committees include educational policy, resource development, strategic planning, board development, personnel, finance, and executive.
3. Commit time to developing financial resources for the charter school. This includes making a personally meaningful financial gift as well as supporting other fund development activities of the charter school in a manner appropriate for board members.
4. Responsibly review and act upon committee recommendations brought to the board for action.
5. Prepare in advance for decision-making and policy formation at board meetings and take responsibility for self-education on the major issues before the board.
6. Participate in the annual board member self-review process.
7. Participate in the annual board training each year.
8. In general, utilize personal and professional skills, relationships and knowledge for the advancement of the charter school.

The Board believes that the legislation of policies is the most important function of a school board and that the execution of the policies should be the function of the Principal.

Delegation by the Board of its executive powers to the Principal provides freedom for the Principal to manage the school within the Board's policies, and frees the Board to devote its time to policy making and appraisal functions.

The Board holds the Principal responsible for carrying out its policies within established guidelines and for keeping the Board informed about school operations. In the budget development process, the Board conducts pre-budgeting discussions with the Principal to establish informal understandings about perceived budget opportunities, challenges and/or restrictions, and provides guidance for budget development. The Principal prepares a draft budget for review by the Board. The Board gives careful study to the budget and holds public hearings to allow for public review and reaction prior to formal approval of the budget.

In an effort to keep the Board informed, the Principal will notify Board members as promptly as possible of any happenings of an emergency nature which occur in schools.

Any Board vote on the employment or promotion of a member of a Board member's immediate family will be conducted in public and separate from any other personnel matter. The vote on such action will be recorded, and the Board member whose family member is the subject of the vote will not participate in the vote. As used in this policy, "immediate family" means a Board member's spouse, child, stepchild, sibling, parent, grandparent, grandchild, aunt, uncle, niece, nephew or first cousin, or the spouse of the Board member's parent, child, or sibling, or any relative living in the household of a Board member.

In addition;

- Board president should not make the decisions without consulting others
- Board members should not conduct illegal board meetings without posting, in secret, and on the telephone
- School funds should not be mismanaged
- The Board should not hold meetings that are too long and not focused on overall policies
- The Board should not fail to keep minutes that are open to the public
- The Board should not micromanage the school's operations
- The Board should not agree to financial obligations without studying the overall cost picture (enrollment predictions, facility insurance costs, class size reduction, reserves)
- The Board should not carry out the school mission and vision and terms of the bylaws
- The Board should not allow the principal to continue in his/her position without a formal evaluation by a committee of board members including the chair person
- The Board should not allow the executive director and/or principal to be a voting member

Best Practices of Charter School Governing Boards

1. The board has clearly defined bylaws that it reviews on a regular basis
2. Yearly board training is provided to all members
3. Board meetings and a standard calendar of meeting dates are posted well in advance
4. No email or telephone discussions on board agenda items are conducted among board members prior to the next open meeting

5. Board minutes, financial updates and agenda are received by members at least a week in advance of the upcoming meeting
6. The board evaluates itself yearly
7. Financial checks and balances are in place and followed
8. The Principal reports at each meeting to give updates and asks for policy making when necessary
9. The Board conducts an annual evaluation of the principal
10. The Board follows a clearly written conflict of interest policy

Compliance with new provisions described in SB 278
The Governing Board stays abreast of school operations including its oversight of the School and the school's financial performance. The Governing Board is also aware of the recent legislative changes described in SB 278.

1. The Governing Board has adopted a Conflict of Interest Policy that ensures compliance with the provisions of SB 278 and the IRS Code governing exempt (501c3) entities (see attached Conflict of Interest Statement). A copy of the exempt status certificate is also attached.
2. The Governing Board shall direct its contractor to prepare monthly financial reports in the format required by the Florida Department of Education and distribute same monthly to members of the Governing Board and the Sponsor.
3. The Governing Board will ensure compliance with the provision of the employment of relatives.

9.D. Describe the policies and procedures by which the governing board will operate, including board powers and duties, board member selection and removal procedures and term limits, code of ethics, conflicts of interests, and frequency of meetings. If the Board has not yet developed policies, the applicant shall describe the timeline for development and approval of Board policies.

Charter school governing boards must be guided by a set of by-laws that define how the board will operate. Applicants may include their proposed by-laws.

The governing board will operate according to its by-laws including board powers and duties, board member selection and removal procedures and term limits, code of ethics, conflicts of interests The Board will comply with the recently adopted State Board of Education Rule 6A-6.0784, FAC regarding Charter School Governance Training. Each governing board member must complete a minimum of four (4) hours of instruction focusing on government in the sunshine, conflicts of interest, ethics, and financial responsibility as specified in Section 1002.33(9)(k), F.S. After the initial four (4) hour training, each member is required, within the subsequent three (3) years and for each three (3) year period thereafter, to complete a two (2) hour refresher training on the four (4) topics above in order to retain his or her position on the charter school board. Any member who fails to obtain the two (2) hour refresher training within any three (3) year period must take the four (4) hours of instruction again in order to remain eligible as a charter school board member.

The governing board shall also meet the requirements of Senate Bill 1712, Ethics in Education Act, by developing and adopting policies that establish standards of ethical conduct for instructional personnel and school administrators, including the requirement of training on the standards, responsibilities and procedures for reporting misconduct affecting the health, safety, and welfare of students by instructional personnel and school administrators, and liability protections.

Senate Bill 278 incorporates the provisions of several public official ethics laws. It now prohibits governing board members from accepting anything of value based upon any understanding that any vote or official board action would be influenced.

More importantly, governing board members and any business entity in which they or their immediate family have a material interest, are now prohibited from contracting with the charter school they govern for the purchase, rent or leasing of any realty, goods or services. This prohibition is subject to several exceptions set forth in s. 112.313(12), F.S., including if the contract was subject to competitive bidding. Finally, governing board members are prohibited from voting on any matter that would benefit any relative, business associate, or entity for whom that individual has been retained. In addition to recusing him/herself from any such vote, the board member must publicly disclose the interest prior to the vote being taken and must provide a written memorandum within 15 days after the vote explaining the nature of the interest which must be included in the minutes of the governing board meeting. (Section 112.3143(3), F.S.)

The permanent Governing Board will be responsible for the School's operations, policies, and performance. The Board will act to assure compliance with Florida's Charter School Law, the Sponsor's written policies, and the terms of the Charter entered into between the Governing Board and the Sponsor. The permanent governing Board of Discovery Education Services, Inc. shall consist of no less than three (3) and no more than five (5) members.

The following chart compares the roles of the board and the School Leader for developing and sustaining academic excellence in the charter school.

Please see "Appendix E - By Laws of The Discovery Education Services, Inc." for details for duties, board member selection and removal procedures and term limits, code of ethics, conflicts of interests, and meeting schedule.

9.E. Explain how the founding group for the school intends to transition to a governing board.

Members of the Founding Board may continue on their position on the Governing Board to ensure continuity between the Founding Member's vision and the permanent Governing Board. The Board is committed to ensuring that newly elected members will agree to support the founding vision, in order to maintain continuity between these founders and any subsequent board members who may be elected to serve in the future. Newly elected members will agree to

support the founding organization's vision in order to maintain continuity between the founders and subsequent board members.

To ensure continuity between the founding board members and the governing board members, the founding members will nominate and select the members of the governing board members by majority vote
.
The Founding Board of the School includes:

- Dr. Yalcin Akin
- Dr. Sirin Coskun
- Mr. Michael Singleton
- Mr. David Canora
- Mr. Ersan Songur
- Mr. Nuri Onat

9.F. Describe the plans for the board member recruitment and development, including the orientation process for new members and ongoing professional development.

The founding board of directors of the Discovery Education Services, Inc. will become the Governing Board Members of the school initially. Vacancies in the board will be filled by individuals (parents, community members, and private entrepreneurs) who are nominated and elected by a majority vote of the Board according to Bylaws of the Discovery Education Services, Inc. Bylaws are attached in "Appendix E - By Laws of The Discovery Education Services, Inc."

New board members will go through an orientation process that includes the distribution and discussion regarding all of the planning and development documents including, but not limited to, the charter application, the Articles of Incorporation, Bylaws, charter laws, the Sponsor's charter policies and any contracts or Agreements entered into by the Board. Ongoing professional development will be pursued through activities presented by the Florida Department of Education, the Sponsor, and The Florida Consortium of Public Charter Schools and through activities at the annual Florida Charter School Conference.

The Board will comply with the recently adopted State Board of Education Rule 6A-6.0784, FAC regarding Charter School Governance Training. Each governing board member must complete a minimum of four (4) hours of instruction focusing on government in the sunshine, conflicts of interest, ethics, and financial responsibility as specified in Section 1002.33(9)(k), F.S. After the initial four (4) hour training, each member is required, within the subsequent three (3) years and for each three (3) year period thereafter, to complete a two (2) hour refresher training on the four (4) topics above in order to retain his or her position on the charter school board. Any member who fails to obtain the two (2) hour refresher training within any three (3) year period must take the four (4) hours of instruction again in order to remain eligible as a

charter school board member. Any new member will go through the same training within 90 days of election.

9.G. List each of the proposed members of the school's governing board, indicating any ex-officio members and vacant seats to be filled. For each proposed member, provide a brief description of person's background that highlights the contribution he/she intends to make through service as a governing board member and any office of board that individual holds.

This application is submitted by Discovery Education Services, Inc. a non-profit corporation under the laws of the State of Florida. Discovery Education Services, Inc. is established to open a charter school in the State of Florida that implements STEM focused education. There are no Ex-Officio members. All members of the board subsequent to these founding board members shall be voted by majority vote of the Board Members.

The Board comprises the following professionals:

Dr. Sirin Coskun: Dr. Coskun is the President of the founding board and responsible for the project overall. In addition to leading the project, she is in charge of public and business relations on behalf of board. Serving as the President at the Governing Board, Dr. Coskun keeps the records associated with the Board and its meetings and ensures that the Board and the School are in compliance with the Florida Sunshine Law and Florida Public Records Law. Dr. Coskun is also responsible for developing and oversight of implementing Math and Science curriculum as well as overseeing the preparation for competitions and Olympiads of OSES students. She always highlights the importance of Math and Science education in K-5school levels as an important building block for students' future careers. Further, Dr. Coskun assists the principal in applying and receiving of SACS accreditation for OSES. Ms. Coskun received her Ph.D. in Mathematic Education Department at UCF.

Dr. Yalcin Akin: Dr. Akin is the founder and executive director of Orlando Science Middle/High and Orlando Science Elementary School. He will be helping Dr. Coskun for the project overall and sharing responsibilities of public and business relations with Dr. Coskun on behalf of Broward Science Charter School. He always highlights the importance of Math and Science education in K-12 school levels as an important building block for students' future careers.

Dr. Akin earned his M.S. and Ph.D. degrees at University of Florida (UF) in the Department of Materials Science and Engineering. Dr. Akin worked as a Research Associate at the Florida State University (FSU), Physics Department, Tallahassee, FL. He worked in National Science Foundation (NFS) and Department of Energy (DOE) supported projects at the National High Magnetic Field Laboratory (NHMFL), Tallahassee, FL for 4 years. Dr. Akin also mentored K-12 teachers, high school and under graduate students under NSF supported Research Experience Programs at the NHMFL. He has been involved in teaching graduate and undergraduate courses at the UF. Dr. Akin has numerous scientific publications and actively involved in Charter Schools in Florida and other states.

He currently serves as the Executive Director of Orlando Science Schools (OSS), in Orlando, Florida since the school has started in operation four years ago. Since the opening, the School has doubled its enrollment and serving around 750 students (K thru 12th) for upcoming school year. The School is one of the best performing school in Orange County and the State of Florida. The School received an "A" grade four years in a row after that and made AYP in all subgroups. Under his leadership the School received SACS-CASI accreditation in 2011 and received high performing charter status in 2012. The School's Science Olympiad team became the State Winner from FL State Science Olympiad. OSS Elementary School has opened in 2012 and also received an "A" school grade from 2013 FCAT. Dr. Akin has completed required governing training requirements. He regularly participates in annual Florida Charter School Conferences. He is a member of Florida Charter School Consortium. He is very actively involved in and volunteered dissemination of best practices and replication of high quality charter schools.

Mr. Michael Singleton: Michael Singleton was born and raised in Pensacola, FL by a family of educators. He graduated from the University of Colorado with high honors and earned a B.A. in Geography and Sociology. From 2000-2004, he worked with Denver Parks and Recreation as a supervisor. From 2004-2007, he taught Social Studies in Escambia County, in addition to coordinating history and wellness programs. In 2008, he received his M.A. in Interdisciplinary Humanities from the University of West Florida, with emphasis in both History and Philosophy. For the 2008-2009 school, he was hired as a Social Studies instructor at Orlando Science Schools and was promoted to Assistant Principal in 2010. He served as the Assistant Principal of Discipline until 2013. In June of 2013, he was hired as the principal position of Orlando Science Elementary School. Currently he holds a Florida Teaching Certificate for both Pre-K Primary and Social Science, in addition to being ESOL certified. His responsibilities are establishment and development of school policies, procedures, oversight of professional development of school administrators and teachers and compliance with generally accepted ethical norms and standards, finance.

Mr. Ersan Songur: Mr. Songur is the Treasurer of the Governing Board. He ensures financial responsibility of the Board and oversees financial health of the school. Mr. Songur assists the principal to compile and present financial reports at Board meetings and makes recommendations to the Board on a monthly basis. Mr. Songur is the President & CEO of Songur International Inc. He earned his degree in Business and Hotel Administration from the University of Nevada, Las Vegas. After graduation, internationally renowned hotel companies recruited him for work in several international locations. He moved to Orlando, Florida in 2001 and began a career in real estate. Mr. Songur researched the booming real estate market in Central Florida, and earned the designations of Accredited Buyer Representative (ABR), Graduate REALTOR® Institute (GRI), and Certified International Property Specialist (CIPS). He is regarded as a knowledgeable and respected REALTOR® by many builders in Central Florida, especially in downtown Orlando. Mr. Songur has become a top producer in residential and commercial real estate and handles transactions for many international investors. He is also licensed as a Florida Mortgage Broker.

Mr. David Canora: Mr. Canora has been with Walt Disney Parks & Resorts for over 10 years, where he develops innovative new technologies that power experiences such as Disney's

PhotoPass. He currently leads media and experience development projects that continue to advance the state of the art in capturing and preserving Disney Guests' cherished memories. In addition to proudly serving on the Orlando Science's Governing Board as a parent member, Mr. Canora serves on the Advisory Board of Hacking Autism, an Autism Speaks initiative. He also chairs the board of Quest, Inc., Central Florida's largest provider of services to persons with disabilities. Mr. Canora holds a Bachelor of Arts degree in Psychology from Binghamton University and Master of Science degree in Computer Science from Marist College.

Nuri Onat: Mr. Onat, board member, of Discovery Education Services, Inc., currently works as a researcher at University of Central Florida, Civil Engineering program. He is currently working towards his doctoral program at the same department. He received his master degree in Civil Engineering from University of Florida, Civil Engineering Department. As a civil engineer, he has involved in research studies such as improvement of guardrails, car crash tests, certification process of guardrails, designing and checking stability of regulators, static calculation of hydroelectric power plants. He is also a recipient of Fulbright Opportunity Grant.

The resumes/CVs of the founding governing board members are available in "Appendix H - Resumes/CVs of the Governing Board Members".

9.H. Outline the methods that will be used for resolving disputes between parents and the school

Parents' grievance with the school will be addressed through a direct dialogue, which, if necessary, may involve a series of meetings and discussions. As a first step, the parent will make an appointment with the student's teacher to redress the issue. If results of the meeting with the teacher are not satisfactory, the parent will then make an arrangement to see the school administration. The parent will meet either assistant principal or principal. If the meeting with the principal does not assuage the parent's concerns, the issue will be communicated to the School Governing Board Chairperson in writing. The Chair will attempt to resolve the issue in person. However, if this resolution is unsatisfactory to the parent, this concern will further be taken to a scheduled Governing Board meeting. The parent can attend and articulate his/her concern to the Board.

10. Management

10.A. Describe the management structure of the school. Include job descriptions for each administrative position and teachers that identify key roles, responsibilities and accountability.

Principal of the school will be the core of the administration. The day-to-day management of the school will be the responsibility of the school principal. The principal must be an integral member of the learning community comprised of students, staff, and families. The principal must support shared decision-making, promote collaborative leadership, and require accountability from all parties. The Principal will hire instructional and non-instructional staff. The employees of the School hired by the Principal report to and are evaluated by the Principal or his/her designee.

The School's on-site administration consists of the Principal and Assistant Principal(s), and they receive assistance from the administrative support staff. The administration are responsible for instructional delivery, curriculum development, faculty and staff oversight, student-related issues, concerns and activities, parental involvement and assistance, community relations, to name a few. The administration will ensure that the operations of the School (resources, courses, policies) are in accordance with the mission and vision of the School, and as instructional leaders, will make all school-based decisions, establishing and implementing procedures for the day-to-day operations of the School. The administrative support staff (e.g. principal's secretary, etc.) will be responsible to assist the administration to carry out these procedures and serve as ambassadors, in their daily activities, maintaining positive interactions with students, teachers, and parents of the School.

Job descriptions of administrative positions and teachers can be found in Appendix B which is tentative Employee Handbook of The School, Section 2.8, and page 131. Job descriptions may be modified by the Board.

10.B. Outline the criteria and process that will be used to select the school's leader.

The School governing board will actively search highly qualified leaders by placing advertisements on online job search platforms, charter schools network and newspaper(s). The job opening will also be posted on the school's website. A minimum of bachelor degree will be required. Administrative experience and leadership experience/certificate are desired especially in public/charter schools. The School Principal, will be interview and hired by the Board, and will be responsible for all aspects of school operations within the scope of operating policy and budgetary approval by the Governing Board. The Principal will maintain the day-to-day operations of the School and serve as the instructional leader of the School. As such, the Board will recruit talented individuals who have knowledge of and experience with instructional, educational, and school site matters.

The Board will adopt a research based evaluation tool to evaluate the Principal annually.

10.C. Provide a staffing plan for each year of the charter term.

There will be an 18:1 student/teacher ratio in Grades K-3 and 22:1 in Grades 4-8. All teachers will be certified in their area of instruction and will abide by all rules set forth by the School and BCPS. Teacher salaries will be comparable to those outlined in the teacher salary schedule implemented by the local public and charter schools.

The staffing plan and the School's projected operating budget, (Appendix D) will be adjusted in accordance with actual student enrollment numbers. Please see Appendix B for job description of each position. Below table outlines the staffing plan for each year of the term.

Staffing Plan					
Positions	Year 1	Year 2	Year 3	Year 4	Year 5
# of Students	338	466	594	678	722
Teachers	22, FT	30, FT	38, FT	43, FT	46, FT
Counselor	1, FT	1, FT	1, FT	1, FT	1, FT
Nurse	-	1, PT	1, PT	1, PT	1, PT
Media Specialist	-	1, PT	1, FT	1, FT	1, FT
Principal	1, FT	1, FT	1, FT	1, FT	1, FT
Assistant Principal	-	1, FT	1, FT	1, FT	1, FT
Dean of Student	-	1, FT	1, FT	1, FT	1, FT
Secretary	1, FT	1, FT	1, FT	1, FT	1, FT
Data Clerk	-	-	1, FT	1, FT	1, FT
Bookkeeper	1, FT	1, FT	1, FT	1, FT	1, FT
Food Service Workers	1, PT	2, PT	2, PT	2, PT	2, PT

FT= Fulltime
PT= Part-time

The School proposes that the above staffing plan will be appropriate for each year but recognizes that adjustments to this staffing model may be necessary to respond to changes in law, rule or other factors.

10.D. Explain school's plan for recruitment, selection, development.

Recruitment process will begin by advertising the positions for highly qualified administrators, teachers and school staff using the following ways after securing the school facility.

1. Placing classified ads in Broward, Miami-Dade, and West Palm Beach metro area major newspapers in paper and online
2. Posting the openings on Florida online teacher recruitment platform
3. Participating teacher job fairs in the Broward County and local colleges
4. Placing ads on online recruitment portals like www.career.com,
5. Word of mouth

The principal will hire certified teachers with a clear commitment and dedication to propelling high student achievement. If necessary, teacher recruiting strategies will include hiring bonuses, payment of fees associated with the DOE subject area exam (if required by the individual to gain certification), or payment of bonuses or incentives to teachers who complete highly qualified requirements. All school-based personnel, including teachers, administrators and staff, will comply with the Sponsor's requirement for fingerprinting, background checks and drug screening prior to employment at the school. Teachers' experience may affect the salary range, which would reward experienced teachers. After reviewing the qualifications of candidates, the appropriate number of qualified candidates will be narrowed down to be invited to interviews. The decision of employment is generally determined by these interviews. Furthermore, reference checks can be done such as making phone calls to former employers and other references. The job descriptions can be seen in Attachment B (Employee Handbook) section 2.8.

If the candidate is being accepted, s/he will be asked to complete paperwork, criminal check and fingerprinting. Employment will be offered by the school administrator who may revoke employment if the candidate fails to get criminal, drug, and other clearances in the application form. Once the clearance has been obtained, by the school administrator asks the candidate to complete employment agreement. The contract will include employment details such as duties, salary, start and end date of employment.

The following standards and potential strategies will be used to recruit, hire, train, and retain qualified staff:

• The teachers of the School will be certified as required by Chapter 1012, F.S. The school may employ skilled selected non-certified personnel to provide instructional services and to assist instructional staff members as educational professionals as permitted by Chapter 1012, F.S.

• All administrative staff will be hired to ensure relevant educational and experiential background and that they will share the school vision.

• The School will practice non-sectarian employment practices. The school will not employ an individual to provide instructional services if his/her certificate or license is suspended or revoked by this or any other state.

• The school will require fingerprints, and background checks of its employees as required by the applicable law in section 1012.32 F.S. in the spirit of ensuring the safety of all students.

- The school holds the rights to require drug test from its employees if needed.

- The school will not violate the anti-discrimination provisions of the Florida Education Equity Act (section 1000.05, F.S.).

- The teachers will be encouraged to participate in opportunities for professional development in the district, at the local universities, and to maintain continuous certification. The principal will use the forms available at the Broward County Schools' Training and Development Office to observe and give feedback to the teachers. The school's library will support teacher professional development by subscribing to education-oriented journals.

- Similarly, the support staff will be hired from among individuals who share the school vision.

Certification requirements will be monitored via the Florida Department of Education's website and with the resources available from the District (Charter School Operations, District Certification Office, Student Information System, etc.).

Staff Development:
Before School starts, all teachers and staff will have preplanning training and an orientation about the School's Mission, Vision, Purpose and Goals. First year training will include school policies, procedures, curriculum and RtI. Because the School's focus is on Math and Science additional training will take place to expose staff to preferred strategies for instructional delivery including training from experts in the teaching of mathematics, science and reading. Staff will participate in school-initiated and other relevant and necessary workshops for professional development, and with the intent of consistent and continuous improvement to educators as professionals. The School administration will coordinate, assist and monitor the staff development process. In-house workshops and meetings will be held by administrators and may occur as often as biweekly through team leaders, in order to facilitate support, encourage communication, allow for team planning, and troubleshoot concerns and needs. Faculty members will be requested to have a road map for their professional growth as a means to document and identify areas for personal targeted needs, including the identification of strategies for obtaining specified goals, and a timeframe in which it can occur. Self-evaluations will be done by all staff, as well. Observation of new and challenged teachers by veteran teachers may be conducted and support strategies will be implemented as applicable. Mentoring program will be established for struggling and/or beginning teachers. The principal will ensure that professional development is an integral part of the school improvement process, following the Florida Formula for Effective and Powerful instruction: 3 Fs + 1 S + Data + PD = Effective and Powerful Instruction where the 3Fs are Frequency, Focus, and Format of instruction; 1 S is size of instructional group; plus data and Professional Development = Effective and Powerful Instruction.

11. Education Service Providers

This section is not applicable to The School at this time, since the school does not intend to enter into a contract with an ESP.

12. Employment

12.A. Explain the schools compensation plan, including whether staff will be publicly or privately employed.

The School will be a private employer, and will not participate in the Florida Retirement System. The School will implement performance based salary schedule and value added model which is part of the S.B. 736. The school also implement statewide teacher pay increase if the program still funded by Florida Legislators. The School will provide based upon its budget the following benefits like health insurance, life insurance, long term/short term disability insurance, dental and vision, and the option of using pre-tax income, etc.

12.B. Describe the personnel policies and procedures to which staff will be required to adhere, including expectations for participation in the school's professional development program. If personnel policies and procedures have not been developed provide a clear plan, including timeline, for the development and approval by governing board

A successful implementation of a school curriculum can only be accomplished with highly qualified professional educators and staff. The teachers of the School will be certified as required by Chapter 1012, F.S. and "highly qualified" standards by *No Child Left Behind* (NCLB).

Qualified personnel preferably experienced and infield will be sought in different parts of surrounding counties, states and a nationwide search respectively. The national online network and statewide portals such as TeachinFlorida.com, along with Broward, Miami-Dade, and West Palm Beach area major newspapers and online web sites, including *Sun-Sentinel*, *Miami Herald*, and *Palm Beach Post* job posting sites will be used for finding highly qualified personnel. Further, the principal will participate in teacher job fairs in the Broward County School District and visit local colleges to find and hire qualified personnel.

All administrators and the teachers of the school will possess the necessary knowledge, skills, and personal characteristics required by and consistent with the vision of this charter school. For all its potential employees, the school will look for the individual's ability to work as a team member and the commitment and the enthusiasm to make the school successful in its mission.

The School reserves the right to discharge employees with or without cause provided that state and federal laws are not violated. The school will use thorough, consistent, and fair termination procedures. The School will seek to deal openly and directly with its employees and believes that good communication between the employees and management is critical to solving problems. Co-workers that have a problem with one another will be encouraged to resolve the problem themselves. If a resolution cannot be agreed upon, both employees will meet with the principal, who will work with the employees to determine a resolution. In these instances, the decision of the principal is final. Employees that have a problem with a supervisor should first go to the

supervisor and state the problem. If a resolution cannot be agreed upon, the employee should present his or her problem in writing to the principal. The decision of the principal will be final. The School's policy will be to attempt to deal constructively with employee performance problems and employee errors. The disciplinary process will be determined by the School administration in light of the facts and circumstances of each case. Depending upon the facts and circumstances, the discipline applied to the employee may include oral or written warnings, probation, suspension without pay, or immediate discharge. Each situation will be considered in light of a variety of factors, including, but not limited to, the seriousness of the situation, the employee's past conduct and length of service, and the nature of the employee's previous performance or incidents involving the employee. Corrective action will be taken against an employee in response to a rule infraction or a violation of the school policies. Correction action will continue until the violation or infraction is corrected. Corrective action begins with a verbal warning, followed by a written warning that is placed in the employee's personnel folder. If more serious corrective action is required, the employee may be put on probation, or have his or her employment terminated. The School considers some violations as grounds for immediate dismissal, including, but not limited to: insubordinate behavior, theft, destruction of company property, breach of the confidentiality agreement, untruthfulness about his or her personal background, drug or alcohol abuse, or threats of violence. Employees of the School who are absent for more than two consecutive days without notifying a direct supervisor are considered to have voluntarily abandoned their employment with the school. The effective date of termination will be the last day the employee reported for work.

The School does not have tenure or guaranteed employment. The employee or the School may terminate the employment at any time after giving notices, (employees 60 days and the school 30 days) with or without a reason. Termination may result from any of the following: (i) corrective action measures, which include infractions for violation of company policies, (ii) layoffs, which include the elimination of an employee's job function or headcount reduction due to redundancy or cost reduction, and (iii) involuntary dismissal, which may include poor performance reviews or failure to demonstrate an acceptable attitude in the workplace.

Full-time teacher salaries will depend on the individual's degree and years of teaching experience. Part-time employee salaries will be determined individually. The employees' benefits package will include medical insurance, with paid sick leave (up to 5 days). If employees do not use sick days, they may be able to cash unused sick days for $50 per day. Medical insurance is available for eligible employees and their qualified dependents. The School will offer $50,000 life insurance to full time employees.

The School requires that all employees report job-related accidents or injuries to a supervisor immediately, whether the accident occurred on or off the school premises. Failure to report an injury, regardless of how minor, could result in difficulty with the employee's claim. All workers' compensation claims will be paid directly to the employee, and the employee is expected to return to work immediately upon release by his or her doctor.

The governing board will hire a principal and the principal will hire and fire qualified individuals for staff and faculty positions on behalf of the governing board. The School will be an equal opportunity employer.

131

Teacher Professional Development training will be offered throughout the school year in a variety of forms. Selected teachers will attend local, state and national conferences and serve as trainer to the remainder of the staff upon return to the School. Appropriate and relevant school wide training will occur on teacher planning days as well as on early release dates. All staff will participate in school initiated and other relevant and necessary workshops for professional development, and a member of the administrative team will coordinate, assist and monitor the staff development process. In-house workshops and meetings will be held biweekly, monthly by administrators and may occur as often as biweekly through team leaders, in order to facilitate support, encourage communication, allow for team planning, and troubleshoot concerns and needs. The principal will ensure that professional development is an integral part of the school improvement process, following the Florida Formula for Effective and Powerful instruction: 3 Fs + 1 S + Data + PD = Effective and Powerful Instruction where the 3Fs are Frequency, Focus, and Format of instruction; 1 S is size of instructional group; plus data and Professional Development = Effective and Powerful Instruction.

For more details please refer to "Appendix B - Employee Handbook".

13. Student Recruitment and Enrollment

13.A. Describe the plan for recruiting students, including strategies for reaching the school's targeted populations and those that might otherwise not have easy access to information on available educational options.

The School will prepare public service announcements to inform general public for enrollment season and open house dates of the school. The announcements, flyers, brochures may be prepared in Spanish as well. Local radio, TV stations and a press release for dissemination of all the major print media in the Broward County will be used to reach parents. The School will conduct general information meetings/open house to educate prospective parents and students about the school vision, mission and curriculum. The school will utilize its website for public announcements and will post flyers in local public facilities such as the post office, community centers, and other locations of public access. The School will also provide copies of its promotional materials and announcements to local community organizations and direct mail advertising to the area where its "targeted student" population resides, or that area within a four mile radius of the school.

13.B. Explain how the school will achieve a racial/ethnic balance reflective of community it serves or with the racial/ethnic range of other local public schools.

The School will provide copies of its promotional materials and announcements to local community organizations to make sure that minority population are aware of the School and their eligibility to apply for enrollment. One of the goals of the charter school will be to reach these parents to inform them of the educational opportunities which are available for their children.

All applicants will be considered for admission without regard to ethnicity, national origin, gender, or achievement level. Due to the diverse racial and ethnic mix of Broward County, the school is expected to achieve demographic diversity reflective of the community it serves.

The school will be promoted and publicized reaching the entire community and to all of its racial/ethnic groups. By publicizing the school throughout Broward County, the racial/ethnic balance of the School is aimed to be similar to other area public schools. The School will embrace all students, regardless of their racial, cultural, ethnic or religious orientation. This message will be clearly communicated in all oral presentations and printed materials.

13.C. Describe the school's enrollment policies and procedures, including an explanation of the enrollment timeline, criteria and/or any preferences for enrollment, and lottery process.

The School will be open to any students residing in Broward County who submits a timely application and are eligible to attend Broward County Public Schools. The School will admit

students of any race, color, national origin, religion or gender. The school will have an enrollment season. The deadlines for applications, lottery date, and registrations and waiting-list enrollment will be publicly announced on school website and in the front office. During the lottery process, all applicants who applied by the deadline will have equal opportunity in the drawing. After the capacity is filled, a waiting list will be formed based on the application date and time.

As provided for in Florida's Charter School Legislation, the School will give enrollment priority to the following student populations:

• Students who are the sibling of a student enrolled in the charter school, and
• Students who are the children of an employee or board member of the charter school.

Students in these categories will be admitted automatically. If the applicants in the above priority groups exceed vacancies, a lottery will be held.

Any premature vacancies due to student withdrawals will be filled in the same way described above. Students may withdraw from the charter school at any time and enroll in another public school as determined by policy set by the School Board of Broward County, Florida.

A public lottery will be held before a committee that includes a public notary, an administrator, and a parent.

Table 2 – Tentative timetable for registration and admission of the students and the admission lottery.

Time	Task
January 1 - March 1	Announce information about the school's educational program, application procedure, and admission process through a number of sources, including: Local newspapers Lottery is held if the number of applicants is larger than the targeted number of students. Local radio stations Local public television Open Houses at the Charter School facility Direct mail to parents
February 1 - April 1	Applications are accepted. Review applications for completeness and eligibility of students (e.g. appropriate grade levels, non-district applications etc.).
April	Advise parents of the status of their application, student eligibility, date of lottery (if needed), and date of final notification. Lottery is held if the number of applicants is larger than the targeted number of students.
May	Registrations are completed for lottery winners (within two weeks).
June-July	Invitations are extended to students until all available slots are filled.

13.D. Explain any student and/or family contracts that will be used as a requisite for initial and continued enrollment in the school. Describe if and how the school will enforce such contracts.

The School will maintain a safe learning environment at all times. In order to provide criteria for addressing issues that will ensure the health, safety, and welfare of all students, school will implement student code of conduct attached in "Appendix C - The School Tentative Student and Parent Handbook" reserving the right to amendment as needed.

The Parents are required to read and understand the content of the handbook and to sign the parental contract in the handbook. Breach of the parental contract, may result in the child's losing preferential re-enrollment status at the school for the following school year, meaning they may not automatically articulate to the next grade level without reapplying for open enrollment.

TENTATIVE Broward Science Charter School (BSCS) FAMILY CONTRACT

Student's Name _____ **Grade** _____ **Homeroom Teacher** _____

I/we, the parent(s)/guardian(s) of the above-named student, in consideration of the enrollment of my/our child in the BSCS Elementary School do hereby agree to the following:

- I will help the school to make learning a primary occupation for my child.

- I will send my child to school on time, healthy, clean and prepared to learn.

- I will ensure that my child is dressed and groomed according to the dress code of the BSCS.

- I will supervise my child's homework to ensure that all assignments are completed on schedule.

- I will keep the BSCS informed of a phone number and address where I can be reached during daytime hours.

- I will encourage my child to participate in the school-organized volunteer community activities since these kinds of activities are an important part of the learning experience.

- I will meet with my child's teacher and/or the administration as requested.

- I will take responsibility for the behavior of my child in the school.

- I understand that BSCS is governed by a Board of Directors.

- I understand that the BSCS administration has the authority to suspend or to recommend expelling the student from the BSCS if the student's behavior violates the Code of Conduct and/or the parent(s)/guardian(s) fails to take responsibility for the conduct of the student and/or fails to cooperate with the BSCS to help in correcting the student's behavior.

- I understand that it is my responsibility to stay informed of official announcements made through the BSCS weekly newsletter and/or the BSCS website.

- I understand that it is my responsibility to review my child's report cards issued by the school.

- I understand that this contract is an agreement with all other parents in the school to support the faculty, staff, and the volunteers as they work to help my child be a productive member of the community.

PARENT (S)/GUARDIAN (S)
I/We, the parent(s)/guardian(s) of the above-named student, have reviewed the BSCS Student & Parent Handbook with my/our child. I/We have read and understand the Code of Conduct, Discipline Plan, and the Family Contract and agree to uphold its tenets. I/We agree to support BSCS by volunteering at the school to the degree possible, communicating regularly with my/our child's teacher(s), and promoting positive educational practices at home with my/our child by providing ongoing supervision and guidance with homework and school related projects. I/We have received the BSCS Contact Information Sheet that was supplied with my/our child's student agenda.

Parent/Guardian Signature _____ **Date** _____

Parent/Guardian Signature _____ **Date** _____

STUDENT
I have thoroughly reviewed and agree to abide by each of the policies, procedures and expectations outlined in the BSCS Student & Parent Handbook. I have read and understand the Code of Conduct, Discipline Plan, and the Family Contract and agree to uphold its tenets. I understand that failure to do so may result in my expulsion.

Student's Signature _____ **Date** _____
(Directions: Students are expected to read and discuss the BSCS School Student & Parent Handbook including the Code of Conduct, the Discipline Plan, and this document with their parents/guardians and indicate both understanding and acceptance of these by signing, dating, and **returning this completed contract to the student's 1st period teacher by __, __, 2013)**

13.E. Explain any other efforts to encourage parental and community involvement, if applicable.

Parental involvement in school matters is an integral and a required part of the philosophy and operation of the School. The School will establish a school organization that will include parents, teachers, students and the community members involved in the school. This organization will function to assist, suggest, recommend, inform, and consult in the preparation and implementation of the school's improvement plan. This organization will also elect the members to serve on the school advisory committee.

The following areas represent a sampling of parental involvement:

• Parents will be encouraged to volunteer with their child's teacher and/or be involved in other ways in school activities;
• Programs will be set up and information will be shared with parents about how they can assist their own children to learn;
• Parents will be encouraged to become involved in instructional and support roles at the school and at home;
• Parents will serve on various committees such as the school beautification committee, academic enrichment committees, public relations committee, etc.;
• Through their membership in the School Advisory Committee, parents will participate in curriculum decisions and provide ideas for academic enrichment;
• Parents will attend parent conferences and "open houses" designed to keep communication and active involvement ongoing;
• Parents will be surveyed annually, using parent satisfaction or school climate surveys; and
• Parents' remarks, comments, and suggestions will be heard during regular board meetings.
• Lines of communication between the school's governing board or management team and parents will always be kept open.

The board recognizes and values the parents' rights to information concerning board actions, district policies, and the educational and business operations of the school. Individual board members will be encouraged to maintain contact with the general public and parents for the purpose of keeping the community informed and receiving input in regard to school policies, programs, and needs. Board members' and admin teams' contact information will be available whenever needed and publicized on the school website, and the principal will have an open door policy.

Parental involvement in education is complex and multifaceted. Joyce Epstein, an expert in this area, categorizes parental involvement into five types;

• Basic obligations of the parents, such as providing for their children's health and safety and creating a home environment that supports learning.
• Basic obligations of the schools, such as communicating with parents about school programs and their children's progress.
• Parental involvement at the school site, for example, by attending sports events and student performances, or by working as volunteers.
• Parental involvement in learning activities at home.

• Parental involvement in school governance and advocacy.

In the School, all five types of family involvement will be promoted whenever possible. For example, The School will organize meetings, seminars, and educational activities for parents in order to accomplish the goals mentioned in the second involvement type above.

To develop parental involvement and make it as productive as possible, the School will implement a variety of strategies. These will be classified as policy, organizational, personnel, teacher-specific, and parent-specific strategies.

The parents, guardians or mentors of each student attending the School will be asked to sign a School Family Contract which will ensure their awareness of the importance of the relationships between the family, the students, and the School for the success of the educational process.

The School Parents as Educators project will be put into practice. The goal of this project is to help parents enhance their children's learning at home. Whenever possible the following techniques will be utilized:

• Encourage parents to read to their children regularly or listen to their children read aloud;
• Suggest (and demonstrate) how parents can use home materials and activities to stimulate their children's interest in reading, math and other subjects;
• Lend books, workbooks, and other materials to parents;
• Ask parents to take their children to the public library; (Provide the necessary information about how to get there and how to get a library card, etc. as needed.)
• Establish a formal agreement whereby parents supervise and assist children in completing homework tasks;
• Ask parents to get their children to describe (in detail) what they did in school that day;
• Give an assignment that requires children to ask their parents questions;
• Ask parents to watch a specific television program with their children and discuss it afterwards;
• Suggest ways for parents to include their children in any of their own educationally enriching activities (these could be as commonplace as shopping for groceries, working on the car, taking care of the house, making minor repairs, working in the yard and garden, tending animals, and so forth);
• Suggest (and demonstrate in person whenever possible) games or group activities related to their child's schoolwork that either the parent and the child or the child and the siblings can participate in;
• Establish a formal agreement by which parents provide rewards or penalties (or both) based on the children's school performance and behavior;
• Ask parents to come to The School and observe their child's class and eat lunch with their child's teacher;
• Provide a method (online, questionnaire, etc.) whereby parents can provide feedback about their child's progress;
• Provide parents with certain techniques for teaching, preparing materials, making learning materials, or correcting mistakes appropriately;
• Ask parents to sign and supervise homework to ensure its completion; and

• Ask parents to provide spelling practice, math drills, or other practice.

Faculty will be assigned to work closely with the parents using one-on-one settings and group activities. Working with the parents in this way will be the responsibility of each faculty member. The principal and/or the School board will supervise these activities. If concrete actions are taken on the part of the school personnel, the School will be a place where parents can expect a welcoming environment.

The School will undertake the following actions to improve effective communication and partnerships with parents:

• Attempt to exceed parents expectations at all times;
• Publish a clear policy welcoming parental involvement, publicize it, and post it at the school in an obvious place for all to see;
• Assign the staff so that at least one member knows each student well: how he or she is doing in all subjects, whether he or she is making friends, whether he or she is anxious, afraid of failing, and so forth;
• Sponsor parent-to-parent events, so that the parents can get to know one another and develop common standards for their children's behavior and social life;
• Provide a lobby and equip it with comfortable places to sit, a telephone, books about the needs of school age-children, and access to a copying machine; and
• Provide a contact person for parents whose primary language is not English and be sure that translators are involved in all parent-teacher interaction (as needed).

The School teachers must encourage parents to be intimately involved in their children's education. This requires an understanding on the teacher's part, of what it is like to be a parent. Teachers will attend seminars and meetings to achieve this goal. To build trust with parents, the School will use specific strategies. This will help involve parents in their children's education, including academics and the development of positive self-esteem. Strategies to be used will include:

• Accept parents for who they are and to not try to produce fundamental changes in them;
• Listen carefully and with empathy for the cognitive and emotional content of a parent's message;
• Focus on the parents' hopes, aspirations, concerns, and needs.
• Be available for the parents when needed, even if it creates inconvenience for the staff.

At The School we believe that keeping parents productively involved requires changing the major location of parental involvement from the school to the home, changing the major emphasis from general policies to specific skills, and shifting attention from the general population of students and the school staff to the individual child at home. This is why we value specific behavior and organizational skills rather than the traditional parents' day or teacher-parent conferences.

III. BUSINESS PLAN

14. Facilities

Since the site is not acquired yet, F, G, H, I and J sections will be answered.

14.F. Explain the school's facility needs, including desired location, size, and layout of space.

The Governing Board is looking for a facility that will allow establishing the school with projected number of students and help the district to comply with class size. Between 25,000 and 45,000 SF space is need for the school initially. The layout of the spaces will be planned based upon Florida building code. The facility will have an adequate number of classrooms designed to meet or exceed all pertinent classroom design standards in addition to lunchroom and/or multi-purpose spaces, playground, library/media-lab, science and art labs, computer labs, restrooms, and administrative offices. The Board has quite a bit experience with the renovation process and suitable school facilities. Since current facility went through the same process.

Detailed plans and verifications will be submitted after finding a proper school facility. The school shall use facilities which comply with the applicable state building codes pursuant to Chapter 553, Florida Statutes. The school shall utilize the state fire protection codes pursuant to Section 633.025, Florida Statutes, as adopted by the authority in whose jurisdiction the facility is located. The Governing Board will make sure that the charter school building complies with the all applicable building and zoning codes. Specifically, the facility will be in compliance with ADA, Health Department requirements for food service, drinking water, and sewer and sanitary facilities. Moreover, the facility will be tested the for asbestos and radon gas. The Certificate of Occupancy will be obtained before the facility is occupied. The approval for the school traffic plan will also be obtained from the local agency. The facility will be ADA compliant. The School Governing Board will make sure that the school facility will be safe and secure for all occupants and the building will comply with required codes.

The building will be clearly marked for escape routes for emergency. Security measures will be established for the safety of students, teachers and staff. Access will be limited to the building. A plan will be developed to prevent and minimize the risk of violent and disruptive behavior. A critical incident response team will be formed from among administrators, teachers and staff. This team or representatives of the team will attend the training workshops offered by the district. Below please see Current Orlando Science School's floor plan.

OSMS EMERGENCY EVACUATION MAP

★ YOUR LOCATION
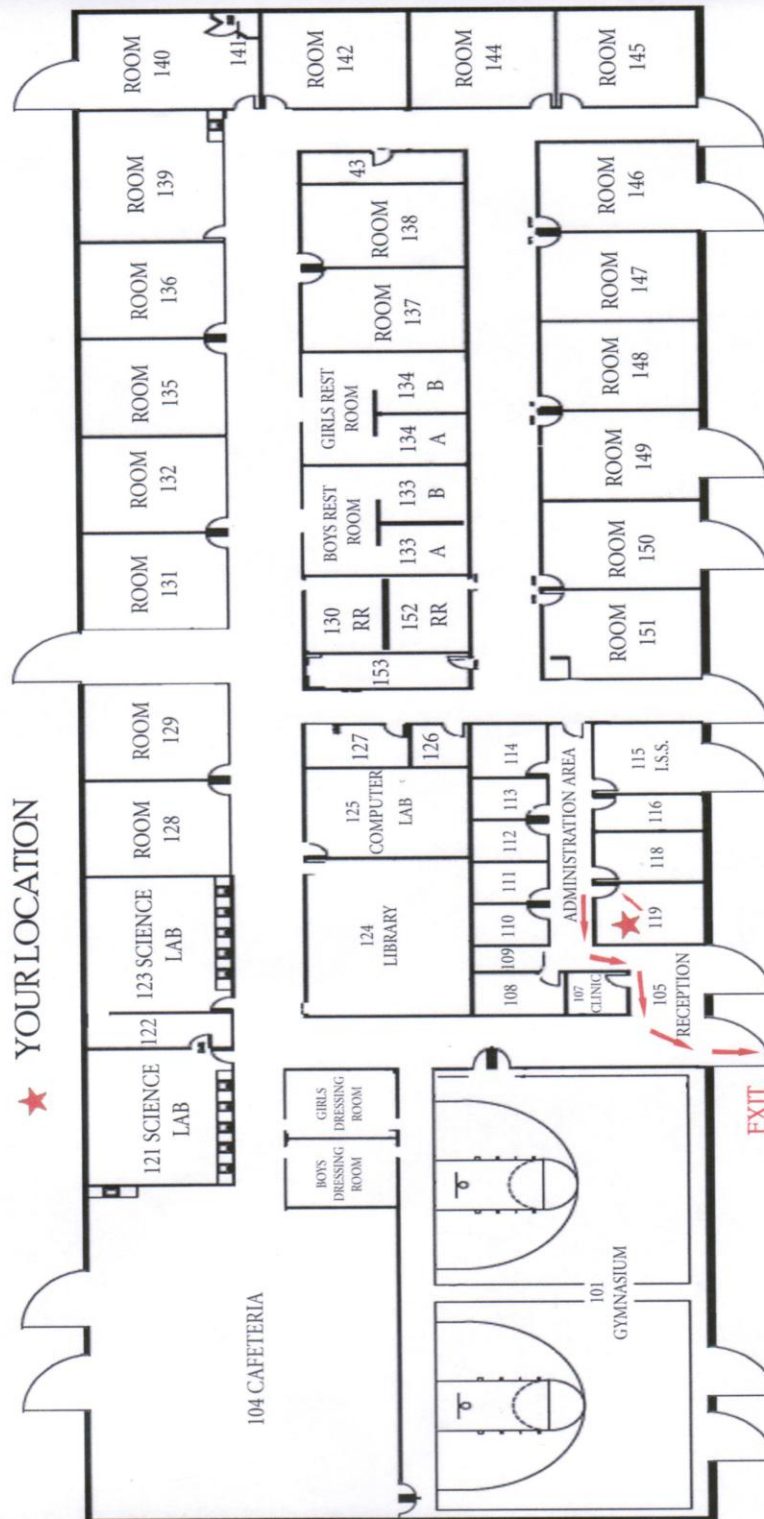

G. Provide an estimate of the costs of the anticipated facility needs and describe how such estimates have been derived.

a. The financial plan for the proposed school should align with the facilities-related costs described.

The Board Members' experience that most of landlords are willing to renovate their building as a school facility for 5- year lease term in this economy. Therefore it is very important for the board to have 5-year charter contract to be able secure a facility without paying any renovation cost. About 30,000 SF facility will be enough for the School and $15/SF which is the average market value is budgeted for lease.

The forecast base rent and all other facilities costs are included for all years of the charter contract in the proposed budget set forth in Appendix G. Utilities and maintenance cost estimates are also shown in the proposed budget. These estimates have been derived from actual historical data from other comparable charter school facilities leased by the Applicant from experienced charter school facilities developers, updated based upon widely-reported cost escalations for land and construction costs.

The School's Governing Board will lease the facility at a fixed annual rate so that the School does not incur construction risks, including unanticipated delay costs, cost overruns, and the like. Lease payments will commence upon the taking of possession of the facility by the School. Long-term leasing provides to the School the ability for the School's Governing Board to focus on its core mission (education and educational programming), outsourcing the design, acquisition, permitting, financing, and construction of facilities to experienced entities in those fields. In addition, long-term leasing separates the School from the vagaries of real estate and financial markets, creating long-term guaranteed access to needed physical plant without the associated risks of ownership.

H. Explain the strategy and schedule that will be employed to secure an adequate facility.

The Governing Board is currently working with a realtor and considering a few alternatives for the school location. Facilities of closed or relocated private schools and charter schools will also be considered.

August 2013 – November 2013	Locating alternative facilities
October – December 2013	Submission for review and approval of the conceptual site and building plans
December 2013 – July 2014	Permitting, Renovations, modifications and/or construction. Certificate of Occupancy obtained.
July 2014	Submission of Certificate of Occupancy to the Broward County School Board.

I. Describe the back-up facilities plan.

The School board will identify alternative facilities in case the one may fail either during negotiations or permitting stage. In case the school needs to utilize a back-up educational facility, the alternative building will also comply with the same safety standards, codes, and requirements as the permanent educational facility. In the event that issuance of the Certificate of Occupancy is for any reason not expected in a timely fashion, the School's Governing Board intends to locate short-term alternative facilities options at the earliest possible time. Any such alternate facility shall be suitable for school use, until such time as the School is able to open.

J. Describe the plan and methods the school will employ to comply with Florida's constitutional class size requirements.

"The Quality Education Act" establishes limits on the number of students in core curriculum classes by grade level. The maximum number of students in core-curricula courses assigned to a teacher in each of the following three grade groups:

- 18 students in Prekindergarten through Grade 3.
- 22 students in Grades 4 through 8

The School will comply with the constitutional charter school class size requirements of Florida, according to Florida Statutes for charter school. Number of students will be enrolled based upon the building capacity and projected numbers. Number of teachers will be hired to comply with the class size act.

15. Transportation

15.A. Describe the school's plan for transportation, including any plans for contracting services. Your plan should discuss, to the greatest extent possible, the issues relevant to the school's transportation plans.

The School will have a transportation plan which will be consistent with the requirements of Sections 1002.20 (21), 1002.33(20)(c), and 1006.21, Florida Statutes. The governing board will work with the sponsor making arrangements that ensure that transportation is not a barrier to equal access for all students residing within a reasonable distance of the charter school as determined in its charter. (Section 1002.33(20)(c), Florida Statutes). Reasonable distance is defined as the area located between two and four miles of distance when measured from a student's home to the nearest school property entrance. Transportation will be funded with a combination of funds allocated by the state for student transportation and funds allocated from the operating budget of the school. The design and implementation of a successful transportation plan will be dependent upon the actual location of the school and the home addresses of all students who are transported.

The School will work with the district for possible transportation services. Alternatively, surplus district busses may be utilized or the School may provide transportation through an agreement or contract with an approved private provider. The specific transportation plan will be finalized after a facility is secured and student enrollment is well underway.

In the case of parents provide the majority of students with transportation, the School will encourage car pooling and alternate means of transportation. However, the School will include a transportation survey with its registration materials to determine the number of children requiring school bus transportation. If enrolled students will require school bus transportation then the School will contract with a vendor or provide transportation using its own buses with appropriately trained and certified/licensed drivers.

 ESE students that need transportation as stipulated in their IEP will receive appropriate accommodations. This includes assisting students in participating in public transportation services, and working with contract services.

16. Food Service

16.A. Describe the school's plan for food services, including any plans for contracting services or plans to participate in the National School Lunch Program.

The School will communicate with the Sponsor to see possibility of contracting food services with the district. The mean time the school will check approved private provider s (caterer) to prepare school breakfast and lunch meals. The School will make sure that every student in the school has access to food, and free/reduced lunch students are served according to their status. The School intents to work with Broward County Food and Nutrition Department to provide lunch and/or breakfast services and will participate in the National School Lunch Program (NSLP). http://www.fldoe.org/FNM/natlschoollunch/. The school will comply with Broward County Public School Wellness policy, 5314.

The school will sign a Food Service Agreement and will adhere to the food service attachments in order to participate in the District's National School Lunch Program.

- The School will contract with approved vendor or the Broward County Food and Nutrition Department to sponsor the program. The school will designate a sanitary and organized area.

- The District or approved vendor will provide food in compliance with the requirements of the National School Lunch program. The School will do the necessary paperwork to satisfy the expectations of the annual sanitary certification.

- At the time of enrollment, the school will hand out or mail copies of the free and reduced lunch application forms to the parents.

- The students from households with incomes that are less than or equal to the benchmark income levels for free or reduced meals will be provided meals in accordance with the National School Lunch program requirements.

- The students' families that satisfy direct certification (receiving food stamps or temporary aid to needy families –TANF) will not be required to fill out the application forms.

Students will be required to fill out new applications at the beginning of each school year; each eligible student will be qualified through the end of the first twenty days of the next school year. The School will implement a record-keeping system to monitor this program.

Meals will be provided in accordance with the National School Lunch and School Breakfast Programs. The School will adhere to all the reporting requirements and document the necessary paperwork to meet the specifications of the annual sanitation certification. The School will provide basic equipment for serving meals and foods will be maintained at the proper temperatures through acquisition and use of necessary equipment. Furthermore, the School will

contact the DOE for all information on applying for the free/reduced lunch for eligible students. The School will process all necessary applications and enter the appropriate data into the system. Children from households with incomes of less than or equal to the income criteria may be eligible for free or reduced priced meals. The School will provide the National School Lunch and Breakfast Programs and will provide free and reduced priced meals for children unable to pay the full price.

17. Budget

17.A. Provide an operating budget covering each year of requested charter term that contains revenue projections, expenses, anticipated fund balances. The budget should be based on the projected student enrollment indicated on the cover page of the application.

Budget is based on 2013-2014 Revised FEFP Calculation, please see Appendix D,

17.B. Provide a start-up budget that contains a balance sheet, revenue projections, including source of revenues, expenses, and anticipated fund balance. The start-up budget must cover any period prior to the beginning of FTE payments in which the school will expend funds on activities necessary for the successful start-up of the school.

The School will apply for a $25,000 planning and design Charter School Start-up Grant. If the grant is awarded, the grant will assist the School with the start-up costs which will be incurred prior to the period when the school will begin to receive operational funding from the Sponsor. In the event that the start-up grant is not awarded, the School's Governing Board will assist the school by providing a zero interest start-up loan.

February- June, 30 2014	
Revenue, Federal Grant	$25,000
Professional Service: Training and workshops for admin and Teachers; consultant services.	$3,700
Marketing and Advertising: To recruit students marketing plan will be development, school flyer will be printed and mailed to students, to hire faculty and staff advertisement will be placed in local news papers and online.	$6,154
Administrator/Personnel with benefits: Salary for 3 months to prepare the school for opening, recruiting students and hiring faculty and staff, organizing professional training and program development, and overseeing facility development	$12,046
Professional Service for bookkeeping	$500
Board Training	$1300
Computer	$750
Office and Misc.	$550
Total Expenses	**$25,000**

Please see Appendix D for details of the operating budget.

17.C. Provide a detailed narrative description of revenue and expenditure assumptions on which the operating and start-up budget are based.

The school's budget forecast has been developed using a budget template that has the statistical revenue and expense data for charter schools. The revenue forecast is based upon data provided by the Florida Department of Education and the school district at informational meetings held by sponsors for new charter school applicants. The revenue forecast is conservative and includes WFTE revenue. Expenses are forecast using the budget template.

Revenues: The net updated FTE revenues per students for 2013--2014 were provided to the School in the workshop. It is known that DOE might change FTEs in each year. As seen from the budget the majority of the revenue comes from FEFP based on projected student numbers. The FTE calculation worksheet is also added to budget section. Estimated revenue from General funds comes from following items:

> FEFP Basic Gross
> Instructional Materials
> Discretionary Lottery Funds
> Class Size Reduction
> Discretionary Local Effort
> Before/After School Care

For Special revenue funds, the followings are included;
- Food Services,
- Capital Outlay Fund
- Implementation Grant

If the School is awarded the Start-up grant, the School is very well aware of the guidelines for allowable expenses under planning and implementation grant.
http://www.floridaschoolchoice.org/information/charter_schools/charter_general_Info_and_forms.asp

The revenue forecast is based upon data provided by the Florida Department of Education and the school district at informational meetings held by sponsors for new charter school applicants.

Number of ESE and ELL students was projected around %10 of the student population. At this moment it is really hard for us to know exact number of ESE and ELL students. Start-up planning grant, first year program design and second year implementation revenues were calculated based upon the information that provided by FL DOE. For lunch fees, it was assumed that 40 % of our student will participate in paid lunch program; and The School will participate in National Schools Lunch Program. Additional operational expense is projected for lunches, since it's high likely that the reimbursement from DOE NSLP will not zero out the total lunch cost for each free and reduced lunch participant.
As can be seen in budget, as the number of students increases, the number of staff, the materials and supply as well as building size, etc. increases and reflected in the budget.

The major expense in the budget is allocated to Staff Salary and facility lease. Based on budget template each expenses are itemized as seen in the budget section. All the expense rates are based on the suggested numbers in the workshop.

Staff: A principal will be hired at a $65,000 base salary. There will be 1assistant principal and 1 Dean of Students will be hired in the second year and after. The projection includes secretaries, bookkeeper, and counselor. The Staffing is based on the class size requirements rate. There will be an ESOL and ESE teacher in the first year and forward. The School will hire one guidance counselor also. There will be a media specialist in the second year and forward.

Teachers' Salary: The School determined an average teacher salary as $37,000 in the first year; then increases 1000. The total number of teachers is 22 including ESE and ESOL teachers in the first year of operation.

Benefits: Benefits are included based on the budget worksheet at 19% and include health insurance, FICA, unemployment taxes and workers compensation for fulltime employees.

Classroom Supp., Furniture and Equipment: The cost is estimated $40 per student, then increased 90 when added upper grade levels which would include any testing materials.

Textbook: Cost of textbook per student is projected $175; second year $250; and third year $300 as we add upper grade levels.

Transportation: It is assumed that 40% of the School students would ride the bus. DOE reimbursement is estimated around 30% of the cost. The bus net cost is estimated around $600 per student yearly not including state fund.

Food: 40% of students are expected to join paid lunch program. It is budgeted that the School would lose some per lunch since the reimbursement from NSLP would not cover the whole cost.

Office Supplies: $4500 is budgeted for office supplies.

Audit: An audit will be completed end of the first fiscal year and projected at $5000.
Payroll: The School intends to work with PayDay USA for the school's payroll.
Legal Services: The School will hire a legal consultant for reviewing contracts and other legal issues. $5,000 is budgeted for legal services.

Furniture & Computers: Each teacher classroom and staff offices and computer lab will have a computer. Total 38 computers budgeted and the cost of each desktop would be around $750.00. Furniture for admin offices and teacher stations will also be purchased under related categories. The School will work with the district's surplus to obtain office furniture and student desks. In the case of not finding, every item in the surpluses, the School has contingency for furniture.

Phone: Monthly phone and high-speed Internet bills will be paid under this category.

Facility Rent: $15 per square feet in the first year for 25,000 SFt; then increases as the school grows. In addition, maintenance and cleaning services added to the budget for the facility.

Insurance: General liability and property insurances will be purchased for the school. Estimated cost is $22,500.

The annual and cumulative surplus will be saved as contingencies and emergency funds.

The School reserved budget for contracted services, such as speech, counseling, therapy, etc.

17.D. Explain how the governing board will monitor the budget, including a strategy for addressing revenue shortfalls due to lower than expected enrollment.

The governing board will be adopting an annual operational budget based upon the realistic enrollment numbers and expenses. The board will be reviewing monthly financial data in each governing board meetings and amending the budget with actual revenue and expenditures as needed. The board will have in place Fiscal Policies and Procedures in place to monitor over all the school's fiscal activities and the budget. The board will identify spending priorities and work with financial institutions to bring long term loans or line of credit to address revenue shortfalls due to lower than expected enrollment. The school will be hiring teachers and staff according to actual enrollment numbers. The board strongly believes that two major expenditures of a school's operation should be controlled and monitored which are lease amount of the school facility and salary of teachers and staff.

The school's spending priorities are focused on providing the best educational environment for all students. Expenditures are directed first and foremost to ensure a safe learning environment and to provide a certified teaching staff and qualified administrative team. The School spending priority will be first on recruiting, hiring and retaining quality teachers, since quality instruction begins with quality instructors. The School recognizes that hiring highly qualified teachers and providing them continuous professional development are very important for students' success. Then, the followings: the purchase of quality and proven curriculum and assessment materials; professional development and teacher training activities; safe suitable school facility; comfortable and durable furniture and equipment; media and technology. The School also believes importance of physical quality of learning environment on education. Students should feel safe and secure while they are in the school.

17.E. Provide monthly cash flow projections for the school's start-up period (i.e. from the date on which the application is approved to the beginning of the first fiscal year of operation).

The cash flow for the start-up period as follow. The details of the cash flow for each year are presented in the Appendix D, budget section.

	Feb	March	April	May	June	Total
Professional Service			1000	1000	17000	3700
Marketing and Advertising	3000		3154			6154
Admin with benefits; for three months			4015	4015	4015	12,046
Professional services for bookkeeping	100	100	100	100	100	500
Board Training				1300		1300
Computer	750					750
Office and Misc.	150	100	100	100	100	550
Total						25,000

The School will apply for a $25,000 planning and design grant Charter School Start-up grant. If the grant is awarded, the funds will assist the school with the start-up costs which will be incurred prior to the period when the school will begin to receive operational funding from the sponsor.

17.F. Describe the school's fundraising plan. Report on the current status of any fundraising efforts, including verification of any fundraising monies reported in the school's start-up or operating budgets.

The governing board will develop a fund raising plan and actively work on it to reach the goals after the charter has been approved by Broward County School Board. Additionally, the principal and School Parent Volunteer Organization (PVO), similar to PTA, will work together to set fundraising activities in first year of the school. Examples of fundraising activities include Book Fairs, Yearbook Sales, Bake Sales, Parent Socials, School Pictures, and a School Fair. The School may also apply for grants from national, state, and local foundations, as well as other sources for education grants, including the Charter School Implementation Grants, Gate Foundation and Walton Foundation. Specific grant sources will be determined, based on appropriateness and feasibility, by the school administration and Governing Board. Additionally, the School will also receive a percentage of the sales made from school pictures, uniform sales, and yearbook sales. The School will also welcome and encourage sponsorship and donations from local business partners within the local community. This includes financial and material donations that will promote the educational program from the benefit of the community.

18. Financial Management and Oversight

18.A. Describe who will manage the school's finances and how the school will ensure financial resources are properly managed.

The Governing Board will adopt and maintain an annual operating budget prior to the beginning of the fiscal year. The Principal of the School will prepare a school budget, which will include anticipated revenues and expenditures based on student enrollment. The Principal will manage the day to day operations and school finances, including expenditures and receivables. The Board will adopt a policy whereby the Principal will need to seek prior approval from the Board for expenditures over a pre-approved amount. The Governing Board has the ultimate responsibility of overseeing and ensuring that the school's finances are managed properly. An experienced bookkeeper who is knowledgeable in QuickBooks will be hired to keep the records and prepared monthly and quarterly reports in accordance with standards and generally accepted accounting principles. Bookkeeper will work closely with the Principal. They will be responsible for recording, tracking and reporting all financial transactions such as; receivable/payable, payroll processing, employee benefits, bank record reconciliation, monthly & quarterly reports, Sponsor & DOE reporting, insurance requirements, audit preparation, and financial management. The board will make sure the financial resources are properly managed based on yearly approved annual budget. Financial data will be shared with the District regularly. The Governing Board of the School will review and monitor the financial statements of the School on a standard basis during regularly scheduled Board Meetings. The Principal will report to the Governing Board on the progress of the school budget and make recommendations and seek approval for large expenses.

According to the new rule, 6A-1.0081, the following provisions have been established to prescribe the format for a charter school monthly financial statement required by Sections 1002.33(9)(g) and 1002.34(11)(f), Florida Statutes, respectively, and to administer the requirements of Section 1002.345(4), Florida Statutes for Monthly financial statements;

A charter school shall provide a monthly financial statement to the sponsor in accordance with Sections 1002.33(9)(g) and 1002.34(11)(f), Florida Statutes, respectively, that contains the following information:
1. Projected enrollment for current school year upon which the school's budget is based.
2. Actual enrollment at time statement is submitted.
3. A balance sheet with assets, liabilities, and fund balances.
4. Year-to-date comparison of budgeted versus actual revenues and expenditures.
5. Notes to the monthly financial statement to include other information material to the monthly financial statement. Material is defined as when the magnitude of an omission or misstatement of accounting information that, in the light of surrounding circumstances, makes it probable that the judgment of a reasonable person relying on the information would have been changed or influenced by the omission or misstatement.

Monthly financial statements shall be formatted in accordance with the accounts and codes prescribed in the publication titled, "Financial and Program Cost Accounting and Reporting for Florida Schools," which is adopted in Rule 6A-1.001, F.A.C.

18.B. Describe the financial controls, including an annual audit and regular board review of financial statements, which will be employed to safeguard finances.

The School shall establish financial procedures to further safeguard its finances. The Governing Board shall annually adopt and maintain an operating budget, retain the services of a certified public accountant or auditor for the annual independent financial audit and review, and will approve the audit report, including audit findings and recommendations. In the event a financial recovery plan is necessary, the Board will monitor it and ensure such plan is appropriately maintained. The Governing Board of the School will also review and monitor the financial statements of the School on during regularly scheduled Board Meetings.

Internal accounting procedures for the School pertaining to receivables and disbursements are as follows:

Internal control is defined as a process affected by an organization's structure, work and authority flows, people and management information systems, designed to help the organization accomplish specific goals or objectives. It is a means by the School's resources are directed, monitored, and measured. It plays an important role in preventing and detecting fraud and protecting the School's resources, both physical (e.g., machinery and property) and intangible (e.g., reputation or intellectual property such as trademarks). At the organizational level, internal control objectives relate to the reliability of financial reporting, timely feedback on the achievement of operational or strategic goals, and compliance with laws and regulations. All employees of the School are responsible for managing internal controls. The School Board and School Administration is specifically responsible for ensuring that internal controls are established, properly documented, and maintained in the school. The School, under the direction of the Board will establish and maintain adequate accounting records and internal control procedures. Internal control consists of five components: control environment, risk assessment, control activities, information and communication, and monitoring. The objectives of internal control relate to financial reporting, operations, and compliance.

Control Activities - Approvals
- Written policies and procedures
- Limits to authority
- Supporting documentation
- Question unusual items
- No "rubber stamps"
- No blank signed forms/checks

An important control activity is authorization/approval. Authorization is the delegation of authority; it may be general or specific. Giving the school principal permission to expend funds from an approved budget is an example of general authorization. Specific authorization relates to individual transactions; it requires the signature or electronic approval of a transaction by a

person with approval authority. Approval of a transaction means that the approver has reviewed the supporting documentation and is satisfied that the transaction is appropriate, accurate and complies with applicable laws, regulations, policies, and procedures. Approvers, the School principal or the Board should review supporting documentation, question unusual items, and make sure that necessary information is present to justify the transaction-before they sign it. Signing blank forms will never be allowed. Approval authority, the Principal and the Board may be linked to specific dollar levels. Transactions that exceed the specified dollar level would require approval at a higher level, the Board. Under no circumstance should an approver tell someone that they could sign the approver's name on behalf of the approver. Similarly, under no circumstance should an approver with electronic approval authority share his password with another person.

To ensure proper segregation of duties, the person initiating a transaction should not be the person who approves the transaction.

Control Activities - Reconciliations
- A reconciliation is a comparison of different sets of data to one another, identifying and investigating differences, AND taking corrective action, when necessary.
- For example, verifying charges in the general ledger to file copies of approved invoices.

Broadly defined, a reconciliation is a comparison of different sets of data to one another, identifying and investigating differences, and taking corrective action, when necessary, to resolve differences. Reconciling monthly financial reports from the QuickBooks (e.g., Statement of Accounts, Ledger Sheets, etc.) to file copies of supporting documentation is an example of reconciling one set of data to another. This control activity helps to ensure the accuracy and completeness of transactions that have been charged to the School. To ensure proper segregation of duties, the person who approves transactions or handles cash receipts should not be the person who performs the reconciliation. Reconciliation will be done by the School admin and/or the School Board member. The School Board will review all of the financial statements in each of their meetings. Another example of a reconciliation is comparing vacation and sick leave balances per departmental records to vacation and sick leave balances per the payroll system. A critical element of the reconciliation process is to resolve differences. It does no good to note differences and do nothing about it. Differences should be identified, investigated, and explained--corrective action must be taken by the Principal and the Board. If an expenditure is incorrectly charged to the School, then the approver, in daily operation the Principal, should request a correcting journal entry; the reconciler should ascertain that the correcting journal entry was posted. Reconciliations should be documented and approved by the School Board.

Control Activities - Reviews
- Budget to actual comparison
- Current to prior period comparison
- Performance indicators
- Follow-up on unexpected results or unusual items

Reviewing reports, statements, reconciliations, and other information by the Board and Administration is an important control activity; the school admin and the Board will review such

153

information for consistency and reasonableness. Reviews of performance provide a basis for detecting problems. The school admin and the Board will compare information about current performance to budgets, forecasts, prior periods or other benchmarks to measure the extent to which goals and objectives are being achieved and to identify unexpected results or unusual conditions which require follow-up. The Board and Administration review of reports, statements, reconciliations, and other information should be documented as well as the resolution of items noted for follow-up.

Control Activities – Asset Security
- Security of physical and intellectual assets
- Physical safeguards
- Perpetual records are maintained
- Periodic counts/physical inventories
- Compare counts to perpetual records
- Investigate/correct differences

Liquid assets, assets with alternative uses, dangerous assets, vital documents, critical systems, and confidential information must be safeguarded against unauthorized acquisition, use, or disposition. Typically, access controls are the best way to safeguard these assets.

The School for capital assets or significant inventories will establish perpetual inventory control over these items by recording purchases and issuances. Periodically, the items will be physically counted by a person who is independent of the purchase, authorization and asset custody functions, and the counts should be compared to balances per the perpetual records. Missing items will be investigated, resolved, and analyzed for possible control deficiencies; perpetual records should be adjusted to physical counts if missing items are not located.

Control Activities – Segregation of Duties
No one person should...
- Initiate the transaction
- Approve the transaction
- Record the transaction
- Reconcile balances
- Handle assets
- Review reports

At least two sets of eyes
Segregation of duties is critical to effective internal control; it reduces the risk of both erroneous and inappropriate actions. In general, the approval function, the accounting/reconciling function, and the asset custody function should be separated among employees, the accountant, admin and the Board. When these functions cannot be separated, due to small department size, a detailed supervisory review of related activities will be required as a compensating control activity. Segregation of duties is a deterrent to fraud because it requires collusion with another person to perpetrate a fraudulent act. Specific examples of segregation of duties are as follows:

- The person who requisitions the purchase of goods or services should not be the person who approves the purchase.
- The person who approves the purchase of goods or services should not be the person who reconciles the monthly financial reports.
- The person who approves the purchase of goods or services should not be able to obtain custody of checks.
- The person who maintains and reconciles the accounting records should not be able to obtain custody of checks.
- The person who opens the mail and prepares a listing of checks received should not be the person who makes the deposit.
- The person who opens the mail and prepares a listing of checks received should not be the person who maintains the accounts receivable records.

Monitoring

Monitoring is the assessment of internal control performance over time; it is accomplished by ongoing monitoring activities and by separate evaluations of internal control such as self-assessments, peer reviews, and internal audits. The Board will be overseeing the financial activities monitoring them closely. The purpose of monitoring is to determine whether internal control is adequately designed, properly executed, and effective. Internal control is effective if the school and interested stakeholders have reasonable assurance that:
- They understand the extent to which operations objectives are being achieved.
- Published financial statements are being prepared reliably.
- Applicable laws and regulations are being compiled.

Just as control activities help to ensure that actions to manage risks are carried out, monitoring helps to ensure that control activities and other planned actions to affect internal control are carried out properly and in a timely manner and that the end result is effective internal control. Separate evaluations, on the other hand, such as self-assessments and internal audits, are periodic evaluations of internal control components resulting in a formal report on internal control. Administration and Board role in the internal control system is critical to its effectiveness. The use of spot checks of transactions or basic sampling techniques can provide a reasonable level of confidence that the controls are functioning as intended.

Purchasing

The School will develop cost-effective and efficient purchase requirements in order to achieve full and open competition, meet delivery schedules, control inventory and material, and expedite purchases.

The School selects the most responsive and responsible vendor to provide required materials and services, and promotes competition in order to obtain fair and reasonable prices.

After approval of the annual budget, the School Principal reviews the School's needs to uncover patterns of orders, and opportunities for clustering orders, to achieve volume discounts. In preparing purchase requisitions, the School Principal or designee identifies minimum needs.

Processing Purchase Requisitions

1. Purchase Requisitions are forwarded to the School Administrative Assistant or Receptionist. The School Administrative Assistant or Receptionist prepares a spreadsheet by vendor for the items requisitioned.

2. The Purchase Requisitions includes the following:

    (i)   A description of items ordered

    (ii) A cost estimate

    (iii) The required delivery information

    (iv) A statement of the nature and purpose of the procurement

3. Purchase Requisitions are approved by the School Principal, after review of the remaining budget.

4. The Administrative Assistant presents Purchase Requisitions to the School Principal for review and approval.

5. Approved Purchase Requisitions are forwarded to the School Bookkeeper or School Principal.

Processing Purchase Orders

1. A Purchase Order is prepared by the School Principal or approves the information that was input by the Bookkeeper.

2. Before a Purchase Order is sent to a supplier, it is reviewed by the School Principal for accuracy of the dates, account coding, quantities listed, and arithmetic extensions.

3. Purchase Orders are approved by the School Principal.

4. Two copies of the Purchase Order are prepared. One copy is forwarded to the vendor, and the other copy is filed alphabetically by vendor in the business office and entered in the Purchase Order Log by pre-assigned number to track outstanding commitments.

In all purchases, the school will use the State Sales Tax exempt form, which is currently in place.

The School may not be operated for the benefit of an affiliated or unaffiliated organization or an individual in his or her own private capacity or individuals related to the School or members of its management, unless the private benefit is considered merely incidental. The School will follow Florida statute of Director conflicts of interest (607.0832) (http://www.leg.state.fl.us/statutes/index.cfm?mode=View%20Statutes&SubMenu=1&App_mode=Display_Statute&Search_String=conflict+of+interest&URL=CH0607/Sec0832.HTM) conflict of interest laws and disclosures which restrict public officials and employees from taking advantage of their position to gain improper benefits for themselves, relatives, their associates, or their friends. The law also restricts board members from voting on matters affecting their financial interest and limits the circumstances under which they can receive anything of value because of their official position. A board member may not vote or enter into any discussion if one of the following groups will receive financial benefit:

A. The Trustee, his/her immediate family, or his/her business partner;

B. A business organization in which the Trustee is serving as an officer, director, trustee, partner or employee; or

C. Any person or organization with which the Trustee is negotiating or has any arrangement concerning prospective employment.(Florida Statute of Restriction on employment of relatives 112.3135) (http://www.leg.state.fl.us/statutes/index.cfm?mode=View%20Statutes&SubMenu =1&App_mode=Display_Statute&Search_String=employment+of+relative&URL= CH0112/Sec3135.HTM)

The private benefit preclusion will extend to:

A. Sale or exchange, or leasing, of property between the school and an affiliated or unaffiliated organization or a private or related individual.

B. Lending of money or other extension of credit between the school and an affiliated organization (excluding component units) or unaffiliated organization or a private or related individual.

C. Furnishing of goods, services or facilities between the school and an affiliated organization (excluding component units) or unaffiliated organization or a private or related individual.

D. Payment of compensation, unless authorized by the Board of Trustees or its governing body, by the school to an affiliated or unaffiliated organization or a private or related individual.

E. Transfer to, use by, or for the benefit of a private or related individual of the income or assets of the school.

Thus, the School will be guided by the principle of arms-length standards with all affiliated or unaffiliated organizations or with a private or related individual(s).

Related party transactions shall include transactions between a school and members of the board, management, contracted management organization, employees, related individuals and affiliated companies. Related individuals within the scope of this definition include spouses, parents, and children, spouses of children, grandchildren, siblings, father-in-law, and mother in law, sister-in-law and brother-in-law of a board member or school employee.

The School follows the policy of capitalizing all fixed assets purchased greater than $750 per unit. The School will inventory, register, and tag all tangible personal property purchased with public funds and implement a fixed asset management system recording such inventory as registered and tagged. The school will develop guidelines for the inclusion and exclusion of items from the fixed asset inventory system and identify the district the person responsible for maintaining the fixed asset inventory system. Fixed assets are accounted for by the following classifications: land, building, equipment, betterment, leasehold improvements, equipment, furniture, and computer hardware and software. The fixed assets subsidiary ledger contains the full history of each capital asset acquired: original acquisition cost, and any costs incurred to prepare the asset for use.

Procedures

1. Asset acquisitions, transfers, and dispositions are entered in the fixed assets subsidiary ledger on a periodic basis.

2. The fixed assets subsidiary ledger is reconciled with the control account in the general ledger on a monthly basis. Any differences are analyzed and resolved by the School Principal.

Depreciation

Procedures

The School capitalizes all fixed assets when acquired, and records the historical cost of these items in the general ledger. In accordance with generally accepted accounting principles as they relate to special purpose business-type activity, government entities, depreciation expense must be recorded in the general ledger at the end of each year. The School will use the straight-line method of depreciation over the assets useful life as determined as follow:

Computers	3 years
Office Equipment	5 years
Vehicles	5 years
Office Furniture	7 years
Leasehold Improvements	Useful life or life of lease, whichever is less
Building Improvements	20 years
Building	40 years

To ensure that all recorded assets exist and are in use;

(i) All property and equipment is tagged when received.

(ii) Physical inventories are performed bi-annually.

(iii) Differences between physical inventories and amounts recorded in the control account are analyzed and reconciled monthly.

Disposal of Property & Equipment
To ensure that assets no longer in use are disposed of in accordance with existing policies.

(i) Use of fixed asset disposal authorization forms.

(ii) Disposal or transfer of fixed assets only with proper authorization.

(ii) Periodic count of fixed assets that is reconciled with fixed assets recorded in the control account in the general ledger.

Procedures

1. A determination is made by the School personnel as to the usefulness of a fixed asset.

2. An Asset Disposal Form, including a description of the asset, purpose for disposal and methodology of disposal is prepared with proper written authorization from the School Principal.

3. The Asset Disposal Form is reviewed and signed by the School Principal.

4. A copy of the Asset Disposal Form is routed to the School Principal, who enters the dollar amount of the disposed fixed asset as a reduction in the fixed asset subsidiary ledger, and adjusts the control account in the general ledger. The treatment of any

proceeds from the disposition, and the recognition of any gain or loss on sale of the disposed asset, is recorded in the general ledger.

All depreciation related to the maintaining of these assets will be calculated by the database. At least annually, a physical inventory of the School will be performed by the Board and Principal. All requests for removal of surplus property, deletions and discards must be approved by the Principal and the Board. In no case should equipment be removed or discarded without prior authorization from the Principal.

The School Principal is responsible for the monitoring the hiring of employees, authorizing salaries, initiating employment contracts and maintaining the staffing levels approved in the annual budget. All approved employment contracts, which will be approved by the Board, and other required employee data is entered into the payroll system. A payroll company (i.e. Payday or ADP) will do the payroll, provide personnel benefits and payroll tax services.

The Board will review all the financials in each Board meeting and approve it. The Board will hold Principal accountable for implementing accounting, bookkeeping, payroll, auditing, and financial management functions. Bookkeepers will be accountable to perform payroll and accounts payable as well as other accounting duties with control of Principal. The School will have a contract with an external payroll company for the payroll. The School bookkeeper will provide approved information by the principal to the payroll company.

Audit

Fiscal year will start July 1st of current year through June 30th of the following year. The School Board contracts annually with a qualified independent certified public accounting firm to conduct an audit of the Charter School's financial statements in accordance with auditing standards generally accepted in the United States of America, Government Auditing Standards issued by the Comptroller General of the United States, 2003 Revision (GAS) and, if applicable, the U.S Office of Management and Budget's Circular A-133. The selected audit firm must be familiar with these standards, related Florida State and Charter School regulations, in order to properly conduct the audit engagement.
The qualifications for the Auditor will include experience with audits of governmental and not-for-profit organizations in accordance with American Institute of Certified Public Accountants (AICPA), pursuant to yellow book and single audit act standards. The audits will be of assistance to the Board in carrying out its responsibility to assure that its financial resources are properly managed.

The School will adhere to the audit selection requirements per Florida Statute and the Auditor General Requirements and ensure that the Audit Report checklist (§11.45(3)(a), Florida Statutes accompany the audit in a timely manner according to the dates agreed upon for audited and unaudited reports between the Sponsor and the Board in the Charter. The auditing firm shall be selected by competitive bid and only those firms experienced in governmental accounting including GASB 34 will be considered.

If the auditor determines that a deteriorating financial condition as defined by Section 1002.345(1) (a)3., Florida Statutes, exists based on an annual audit performed pursuant to

Section 218.39, Florida Statutes, the auditor shall notify each member of the charter school governing board in accordance with Section 218.39(5), Florida Statutes. Upon receipt of notification, the governing board shall notify the sponsor of the deteriorating financial condition in writing within seven (7) business days.

(b) Upon determination under subparagraph (2)(a)1., of this rule or receipt of notification under subparagraph (2)(a)2., of this rule that a deteriorating financial condition exists, the sponsor shall notify the governing board of an expedited review, and both parties shall develop a corrective action plan pursuant to Section 1002.345(1)(c), Florida Statutes.

The corrective action plan shall include the following components:

- A statement of the condition in Section 1002.345(1), Florida Statutes that initiated the development of a corrective action plan. If the corrective action plan is required due to a deteriorating financial condition, the plan must include the three (3) most recent monthly financial statements submitted to the sponsor pursuant to subsection (1) of this rule and the most recent annual financial audit.
- A description of actions that will be taken to resolve the condition, including a timeline.
- A summary of the governing board's procedures for monitoring implementation of the plan.
- A schedule for the governing board to provide progress reports to the sponsor.
- Any additional components deemed necessary and agreed upon by the charter school governing board and the sponsor.

Financial Reporting

The School will provide an annual financial report and program cost report information in state-required formats for inclusion in the District's reporting in compliance with §1011.60(1), Fla. Stat. In addition, the School will provide the Sponsor with reports showing balance sheet, income statements, bank reconciliations, and the like as agreed to and provided in the Charter.

The board will make sure the financial resources are properly managed based on yearly approved annual budget. Financial data will be shared with the District regularly. The Governing Board of the School will review and monitor the financial statements of the School on a standard basis during regularly scheduled Board Meetings. The Principal will report to the Governing Board on the progress of the school budget and make recommendations and seek approval for large expenses.

According to the new rule, 6A-1.0081, the following provisions have been established to prescribe the format for a charter school monthly financial statement required by Sections 1002.33(9)(g) and 1002.34(11)(f), Florida Statutes, respectively, and to administer the requirements of Section 1002.345(4), Florida Statutes for Monthly financial statements;

A charter school shall provide a monthly financial statement to the sponsor in accordance with Sections 1002.33(9)(g) and 1002.34(11)(f), Florida Statutes, respectively, that contains the following information:

1. Projected enrollment for current school year upon which the school's budget is based.
2. Actual enrollment at time statement is submitted.
3. A balance sheet with assets, liabilities, and fund balances.

4. Year-to-date comparison of budgeted versus actual revenues and expenditures.

5. Notes to the monthly financial statement to include other information material to the monthly financial statement. Material is defined as when the magnitude of an omission or misstatement of accounting information that, in the light of surrounding circumstances, makes it probable that the judgment of a reasonable person relying on the information would have been changed or influenced by the omission or misstatement.

Monthly financial statements shall be formatted in accordance with the accounts and codes prescribed in the publication titled, "Financial and Program Cost Accounting and Reporting for Florida Schools," which is adopted in Rule 6A-1.001, F.A.C.

18.C. Describe the method by which accounting records will be maintained.

Program Cost Accounting and Reporting for Florida Schools, as a means of codifying all transactions pertaining to its operations for both internal and external reporting. Financial reporting will be subject to any directives issued by the State of Florida and the local school district. Accounting and maintaining will be in accordance with Governmental Accounting and Financial Reporting Standards using the "Redbook." The financial reports and records will reflect the Governmental Accounting Standards Board (GASB) Statement 34 guidelines, applicable for state and local governments and their units. These reports will contain reports showing in detail the revenues, expenditures, and changes in the fund balance. The statements will be prepared based on Generally Accepted Accounting Principles and will abide by the conventions of Financial and Program Cost Accounting and Reporting for Florida Schools, Rule 6A-1.087, Florida Administrative Code (the Redbook).

18.D. Describe how the school will store student and financial records.

The School will maintain the students' and financial records in accordance with Chapter 119 of the Florida Statutes. The files containing cumulative folders on students enrolled in a public school will be the principal's responsibility and will be housed in a location where they are secure from general scrutiny, in locked file cabinets or a locked location, and, so far as possible, secured from fire and vandalism, but where they are accessible to authorized school personnel. The school will be responsible for the privacy and security of all student records maintained in the school. A permanent cumulative record shall be maintained for each student who is enrolled in the School in accordance with State Board of Education Rule 6A-1.0955, Florida Statutes and the Family Rights and Privacy Act of 1974. The principal or designee will provide directions for instructional personnel on record maintenance and access to information pursuant to Federal Laws, Florida Statutes, State Board of Education Rules, and District guidelines.

Financial Record Retention and Disposal
      A.   Records are maintained for the following minimum periods:
            1.   Books, records, documents, and other supporting evidence including paid, cancelled, or voided checks, accounts payable records, vendors' invoices, payroll sheets and registers of salaries and wages, tax withholding statements, employee timesheets and other public documents are retained for five years after the original entry date.

B. The following records supporting federal contracts, as required by U.S. Office of Management and Budget, are retained for the indicated minimum periods:
   1. For five years after submission of the final report of expenditures: general ledger, trial balance, accounts payable and accounts receivable ledger, payroll register, and petty cash book, check register and checks, invoices. Except for:
      a) If any litigation, claim, or audit is started before the expiration of the 5-year period, the records shall be retained until all litigation, claims or audit findings involving the records have been resolved and final action taken.
      b) Records for real property and equipment acquired with Federal funds shall be retained for 5 years after final disposition.
   2. Permanently: Audit reports, annual corporate reports, charter, board minutes, tax and legal correspondence, labor contracts, insurance claims and policies, and retirement and pension records.
C. The disposal date determined under this policy is the end of the fiscal year, or the date of final payment of government grants.
D. All records not supporting government grants or otherwise covered by rules of the Internal Revenue Service are retained for five years from the end of the fiscal year in which the records were originally prepared.
E. All financial records are maintained in chronological order, organized by fiscal year.
F. In connection with the disposal of any records, a memorandum of record disposal is prepared by the School Principal listing the record or the class of records disposed of. The Board certifies this memorandum of records disposal.

18.E. Describe the insurance coverage the school will obtain, including applicable health, worker's compensation, general liability, property insurance and director's and officers' liability coverage.

The Governing Board will ensure that the School purchases all required insurance coverage with mention minimum limits in the Charter contract with Broward County School Board. Below converges are only example, actual limits will be adjusted according to the district charter contract.

• **School Leaders Errors and Omission Insurance**: 1 million dollars per claim/annual aggregate will be obtained for the purposes of maintaining this insurance.

• **Commercial General Liability Insurance**: The School will maintain the minimum limits (inclusive of any amounts provided by an umbrella or excess policy) of one million dollars ($1,000,000) per occurrence/two million dollars ($2,000,000) annual aggregate.

• **Automobile Liability Insurance**: The School will purchase and keep Automobile Liability Insurance. This insurance will be in line with the minimum limits of one million dollars ($1,000,000) per occurrence. If subject to an annual aggregate, it will procure three million dollars ($3,000,000) annual aggregate.

- **Workers' Compensation/Employers' Liability**: The School will also obtain and maintain Workers' Compensation/Employers' Liability Insurance. This insurance will cover the school and to the extent that its subcontractors and sub-subcontractors are not otherwise insured, also its sub-contractors and sub-subcontractors, for the liability covered by the latest edition of the standard Workers' Compensation Policy, as filed for use in Florida by the National Council on Compensation Insurance, without restrictive endorsements. In addition to coverage for the Florida Worker's Compensation Act, where appropriate, coverage is to be included for the Federal Employers' Liability Act and any other applicable federal or state law. The minimum amount of coverage for those coverage customarily insured under Part Two of the Standard Workers' Compensation Policy (inclusive of any amounts provided by any umbrella or excess policy) shall be One Million Dollars ($1,000,000) per occurrence/Two Million Dollars ($2,000,000) annual aggregate.

- **Property Insurance**: The School's property, including but not limited to its furniture and equipment, will be insured with the appropriate coverage that matches these items' market value.

- **Any additional insurance** that is required by the Broward County Schools Board, including but not limited to the **Crime Coverage**, will be timely obtained with the necessary minimal limits.

The estimated insurance figures are reflected in the proposed budget authorized by subsisting certificates of authority by the Department of Insurance of the State of Florida, or an eligible surplus lines insurer under Florida Statutes. In addition, the insurer must have a Best's Rating of "A+" or better and a Financial Size Category of "VI" or better, according to A.M. Best Company within the last 30 days of certificate issuance.

19. Action Plan

The School is proposed to have an initial 5-year term, starting from 2014-15 school year. If the school does not start its operations in 2014 due to for any unforeseen reasons or any other reason, the five-year term will start from the year that the school starts operation.
The timetable for the charter opening will be implemented broadly as indicated in Table 7.

Table 3 - Timetable for school startup

Time	Task	Responsible Party
August 1st , 2013	Submit charter application	Discovery Education Services, Inc. Board
October –November 2013	Application approved	Broward County School District
January - February 2014	Contract negotiations with Broward County Public Schools	Discovery Education Services, Inc. Board and Broward County School District
October 2013 – January 2014	Identifying and securing facility- Obtain permits for pre-opening check list	Discovery Education Services, Inc. Board
January 2014	Approval of contract	Broward County School District
February – July 2014	Marketing and Student recruitment	The School
February - March 2014	Initial registration period	The School
April 2014	Hold lottery, if number of applicants exceeds capacity and student enrollment	The School
March - August 2014	Preparing the school to comply with physical and administrative regulations	The School
March – July 2014	Recruiting and hiring staff. Governing Board training and Policy Adoption by the Board.	The School
On or Before August 1, 2014	Teacher fingerprinting, drug-testing (if required), and background checks completed	The School
June – August 2014	Staff trainings	The School
A week before School Starts August 2014	Student and parent orientation for officially enrolled students	The School
August 2014	The School opens its doors Classes commence as per District calendar	The School

The staff at the School will be aware of the potential emergency risks, which include but are not limited to medical, fire, hazardous weather, security and other unanticipated events. Even though these occurrences cannot be predicted, a general plan is outlined below to ensure security and well-being of the School students and staff.

The School recognizes that the school staffs are the first respondents to any emergency situation. The School teachers would, therefore, handle minor cases of unexpected occurrences in their classrooms. However, in the event of more serious encounters, the School administration may seek an outside help. To plan and coordinate the onsite emergency preparedness plan, the School principal will designate an Emergency Coordinator, who would advise the principal on the emergency preparedness, preside over the School Emergency Team, designate the relevant duties to the member of the emergency team, ensure the emergency-related equipment is in the functional condition, and serve as a liaison with the local emergency-related agencies.

In addition to the School Emergency Coordinator, the School will also designate the Emergency Team, which would consist of the school administration, Governing Board members, teachers, other school employees, parents and potentially local law enforcement officers, the representatives of ambulance and other emergency-related agencies in the area, the School Emergency Team will be responsible for devising specific policies regarding safety of the school students and staff, educating the school's attendees about emergency-related risks, and revising emergency plans.

The School Emergency Team will be the primary school body that plans preventive measures related to potential hazards. It will assess the inventory capability of the school's preparedness and make recommendations to the school administration in that regard. Further, the Team will identify preventive actions that reduce the risk of hazard and determine and monitor potentially hazardous events and objects. The School administration, other school staff in conjunction with the school Emergency Team will also increase the efficiency of communication with students and parents regarding emergency-related situations. As a part of this effort, two-way radio devices will be supplied to the school personnel who are expected to carry them at all times. This will ensure the timely warnings, which could promptly be transmitted to students and staff.

The School will be responsible for regularly arranging and conducting emergency related training and practice. This training and drills may include, but are not limited to lockdown procedures, general evacuation plans, emergency dismissal and school cancellation plans, identification of shelters and assembly sites.

For addition information regarding emergency preparedness please refer to Appendix G.

III. STATEMENT OF ASSURANCES

This form must be signed by a duly authorized representative of the applicant group and submitted with the application for a charter school.

As the authorized representative of the applicant group, I hereby certify that the information submitted in this application for a charter for Broward Math and Science School is accurate and true to the best of my knowledge and belief; and further, I certify that, if awarded a charter, the school:

- Will be nonsectarian in its programs, admission policies, employment practices and operations.

- Will enroll any eligible student who submits a timely application, unless the school receives a greater number of applications than there are spaces for students, in which case students will be admitted through a random selection process.

- Will adhere to the antidiscrimination provisions of section 1000.05, F.S.

- Will adhere to all applicable provision of state and federal law relating to the education of students with disabilities, including the Individuals with Disabilities Education Act; section 504 of the Rehabilitation Act of 1974; and Title II of the Americans with Disabilities Act of 1990.

- Will adhere to all applicable provisions of federal law relating to students who are limited English proficient, including Title VI of the Civil Rights Act of 1964 and the Equal Educational Opportunities Act of 1974.

- Will participate in the statewide assessment program created under section 1008.22, F.S.

- Will comply with Florida statutes relating to public records and public meetings, including Chapter 119, Florida Statutes, and section 286.011, F.S., which are applicable to applicants even prior to being granted a charter.

- Will obtain and keep current all necessary permits, licenses and certifications related to fire, health and safety within the building and on school property.

- Will provide for an annual financial audit in accordance with section 218.39, F.S.

The governing board, at its discretion, allows _Dr. Yalcin Akin_ , Executive Director_ to sign as the legal correspondent for the school.

Appendix A - Instructional Methods and Techniques

Exemplary Computer-enhanced Support

Computers will play an important role in the school. All teachers will be encouraged to integrate computers into the classroom. Technology assessment reports indicate that computers have often been used by teachers as a replacement for existing tools, such as books and chalkboards, or the only instructional medium to teach rather than an alternative medium through which different tasks might be performed and different objectives might be achieved. From this perspective, the insufficient computer-based applications drive the curriculum in the classroom.

However, in the designing alternative school systems, the vision of classroom instruction should be changed and computers should play an important role in this change process. It is our perception that computers have to be integrated into curriculum; namely, the curriculum should drive technology usage.

In the School, the computer technology will become a prominent part of the classroom; the teacher will no longer serve as the sole expert with absolute mastery and control of content knowledge and instructional procedures. Instead, with the help of the computer, learning will become more interactive with responsibility shared among teachers and students. The teachers no longer function solely as transmitters of content knowledge. Instead, they become facilitators of learning. Students play a more active role in their own learning.

Thinking differently from many other schools, the School will look at the technology integration from a broader perspective and promote the use of computers in the classroom whenever and however it is appropriate and efficient. More specifically, through our exemplary computer integration we will achieve the following:

Students in the School will use computers to design their own products. Schools have to generate creative people. Students in the School will use the capabilities of computers, such as word-processing, database, spreadsheets, presentation and graphic software, to create high quality homework and class work, so that they will be able to better accomplish tasks and express their ideas with different illustrations and demonstrations to teachers as well as their classmates.

Students in the School will explore instructional programs on their own. In our opinion, a teacher should not be the only information source in the classroom. Today there are many interactive computer software programs very well designed to teach the same objectives the School wants to teach. Our students will use and explore appropriate instructional software programs in or out of the classroom to expand their knowledge and skills and have a better grasp on the objectives in specific areas or topics.

Teachers in the School will teach ideas or skills directly from computers. We consider the computer as an educational tool that should be used in the classroom whenever and wherever it fits in the curriculum. Appropriate teachers will use a computer's unique features to combine different mediums, such as sound, animation, color picture, interactivity etc., in one environment so that they will create presentations that are visually appealing to students and capable of illustrating ideas, knowledge and skills from different perspectives.

Teachers in the School will employ computers to create an alternative teaching environment in the classrooms. A traditional classroom where a teacher gives lectures and students passively listen to the teacher is not responding to the need of modern and hi-tech society any more. Learning should be active and student-centered, that is, students should actively take a part in the learning process and perform classroom activities by themselves rather than sitting and listening. Also, teachers should be mentoring and coaching students to direct and help them find and use information they need to gain necessary objectives. The computer is a unique tool that helps teachers design and implement student-centered applications that keep the students active in the learning process.

Teachers in the School will tailor curriculum to students' individual needs through computers. It is known that not all students in the same classroom are equal. For effective instruction teachers should generate different instructional approaches to different student groups. Using the unique features of computers, teachers in the School will design and implement individualized instructions that eliminate the personal differences among the students for quality instruction.

Teachers in the School will use computers to create simulations of real life applications. Learning transfer is a critical issue in education. Most of the time students learn abstract knowledge in classroom and are not able to use it in the practical life. Our teachers will employ computers to design and use real life simulation programs that help students apply their knowledge and skills to deal with realistic problems.

Students in the School will develop critical or higher-order thinking skills using computers. The foundation of scientific information is critical thinking, which is collecting data about a problem, analyzing it, considering alternative solutions and applying the most effective solution. Computers are excellent tools to perform the aforementioned tasks to gain the higher-order thinking skill. Our students will learn and apply appropriate computational techniques to collect and analyze data to deal with problems, so that they will be able to produce scientific information.

Project-Based Instruction

Project-based learning is an instructional approach to engage students in sustained, cooperative investigation. Within its framework students collaborate, working together to make sense of what is going on. Additionally, project-based instruction emphasizes students' own artifact construction to represent what is being learned.

In project-based instruction, students pursue solutions to nontrivial problems by

- Asking and refining questions
- Debating ideas
- Making predictions
- Designing plans and/or experiments
- Collecting and analyzing data
- Drawing conclusions
- Communicating their ideas and findings to others
- Asking new questions
- Creating artifacts.

Projects can serve as bridges between phenomena in the classroom and real-life experiences. Questions and answers that arise in daily enterprise are given value and are proven open to systematic inquiry. Three important features of project-based learning are as follows:

- Project-based education requires active engagement of students' effort over an extended period of time.
- Project-based learning also promotes links among subject matter disciplines and presents an expanded, rather than narrow, view of subject matter.
- Projects are adaptable to different types of learners and learning situations.

There are two essential components of projects:

- A driving question or problem that serves to organize and drive activities, which taken as a whole amount to a meaningful project
- Culminating product(s) or multiple representations as a series of artifacts, personal communication, or consequential task that meaningfully addresses the driving question.

The School will facilitate project-based instruction in the classroom with:

- A "driving question" that is anchored in a real-world problem and ideally uses multiple content areas.
- Opportunities for students to make active investigations that enable them to learn concepts, apply information, and represent their knowledge in a variety of ways
- Collaboration among students, teachers, and others in the community so that knowledge can be shared and distributed between the members of the "learning community"
- The use of cognitive tools in learning environments that support students in the representation of their ideas: cognitive tools such as computer-based laboratories, hypermedia, graphing applications, and telecommunications.

Interdisciplinary Learning:

Students in the School will prepare projects that require cooperative teaching efforts in Language Arts, Fine Arts, Math, Social Studies and Science. Teachers will make cooperative lesson plans and student products will consist of material covered in different subjects.

Alternative Assessments:

Alternative forms of assessments provide more complete information about what students have learned and are able to do with their knowledge, and to provide more detailed and timely feedback to students about the quality of their learning than traditional multiple choice tests. Using alternative assessment the School faculty will be able to capture how students think, reason, and apply their learning, rather than merely having students "tell" the teacher what they have remembered or show that they can perform a task or carry out a specific procedure correctly. Some of these alternative methods - portfolio assessment, authentic assessment, and performance assessment - are described below:

- Portfolio assessment: The collection and evaluation of a carefully chosen selection of students' work. The number and types of selections included in a portfolio may vary, but

170

are typically agreed upon by the teacher and student for the purpose of representing what that student has learned.

- Authentic assessment: A method of obtaining information about students' understanding in a context that reflects realistic situations, and that challenges students to use what they have learned in class in an authentic context.
- Performance assessment: Presenting students with a task, project, or investigation, and then evaluating the products to assess what students actually know and can do.

Contextual Learning (Real-life Context)

According to constructivist learning theory, learning occurs when students process new information or knowledge in such a way that it makes sense to them in their frame of reference. This approach to learning and teaching assumes that the mind naturally seeks meaning in context where the person is located and that makes sense and appears useful. In contextual learning students carry out activities and solve problems in a way that reflects the nature of such tasks in the real world.

Because knowledge is better transferred when it is embedded in a more general understanding of its entire structure and contextualized into the content familiar to the learner, The School will rethink curriculum and instruction under the light of contextual learning. Whenever appropriate, the School will modify traditional methods and disciplines to teach material in meaningful contexts. More specifically in designing real-life context in the School classrooms:

- Artificial distinctions between actual applications and academic studies will be eliminated.
- Students will be provided with hands-on experiences in which they learn about and participate in workplaces.
- New teaching strategies and instructional principles will be designed and implemented based on the notion that teacher is no longer the presenter of information and the textbook is not the only information sources in the classroom.

The instructional principles can be articulated as follow (but not limited to those):

- anchor all learning activities to a larger task,
- support the learner in developing ownership of the task,
- design an authentic task,
- design the task to reflect the complexity of the environment the learner will face,
- support and challenge the learner's thinking,
- encourage testing ideas against alternative views and alternative contexts, and
- provide opportunity for reflection on the content learned and the learning process.

Direct Instruction

Direct instruction, the classical teaching method, is based on the notion that learning can be facilitated through clear instructional presentations that rule out likely misinterpretations and facilitate generalizations. As a teaching strategy, it is a systematic and highly structured instructional process that focuses on teaching and practicing basic skills and knowledge to prepare students to advance to higher-order skills. Some key components of this process are

scripted lesson plan that is evaluated and revised, curriculum designed to build new skills on previous learned ones and group sessions where teacher and students interact.

It is our empirical finding that through direct instruction, students learn and master information at the knowledge level, rather than the application level, in an extremely efficient and very cost-effective manner. Under the light of this finding, The School will adopt an effective direct instruction module to teach students introductory and fundamental skills and knowledge. More specifically, our one unit direct instruction module will involve the following activities:

i)-Motivating Learners: Gaining learners' attention and maintaining that attention throughout the lesson.
- Arousing learners' curiosity (showing interesting graphs, video clip, music, or sounds, etc.)
- Making instruction relevant to learners' interest (relating instruction to events going on in the learners' lives, experiences)
- Entertaining learners (incorporating humor in to the lesson, using game-like activities, setting up simulated version of real life events)
- Getting learners to be involved actively in the lesson (asking questions, requiring learners to solve problems, small group activities)
- Arranging conditions for students success (asking questions and presenting problems that are at the right level of difficulty)
- Being enthusiastic
- Providing learners with rewards that may be tangible or intangible (snacks, tokens, praise, etc.)

ii)-Informing Students of Objectives: Telling learners what they are about to learn.
- Listing components of objectives
- Describing outcomes of instruction
- Giving examples of what the learners will be able to do

iii)-Helping Students Recall Prerequisites: Helping students retrieve memories that are necessary or helpful in achieving new objectives and make sense of new information to relate it to something they already know or something already experienced.
- Relating new knowledge and skills to knowledge and skills that have already been learned
- Reminding learners of the necessary prerequisite knowledge and skills
- Asking students to recall the prerequisite knowledge
- Asking students to demonstrate the prerequisite knowledge
- Providing special instruction for learners that have lack of the prerequisites in order to make them ready like the rest of their classmates.

iv)-Presenting Information and Examples: Stating, describing and explaining information those learners will be learning, presenting relevant examples.
- Informing rule or rules and conditions of the problems
- Providing learners with a verbal or visual description of process
- Arranging conditions so that learners are able to discover information for themselves
- Guiding students to information and directing and correcting as necessary

- Giving examples so that learners can see how they can use the information

v)-Providing Practice and Feedback: Giving learners adequate, relevant practice and corrective feedback.
- Providing appropriate practice exercises
- Providing learners with informative feedback

vi)-Summarizing Lesson: End lesson with some type of summary to bring closure to the lesson.
- Ending a lesson some type of summary
- Restating in simple terms the lesson objectives
- A brief review of the skills that were taught during the lesson
- Having learners summarize what they learned
- Having learners apply what they learned in order to solve a final problem or question

Higher Order Thinking

With the emphasis on accountability and increased student achievement, educators, parents, and legislators have been considering more about how we want our teachers to teach our students to think. As children move from elementary to middle to high school, the ability to think in more than one way becomes more and more important.

Higher Order Thinking is thinking on a higher level. It is more than memorizing facts or telling something back to someone exactly the way it was told to you. We must understand information, connect them to each other, categorize them, manipulate them, put them together in new or novel ways, and apply them as we seek new solutions to new problems.

Higher-Order Thinking Skills can be articulated as follow:
- It is the way you solve problems, process information, perceive information, encode information for storage, then retrieve the information and then how you decided what to do with that information. (cognitive strategies)
- It is the way you monitor understanding and comprehension, evaluate progress towards one's goals, decide the effectiveness and efficiency of solutions strategies and modify the approach to problem solving. It has a lot to do with knowing how you think about things. To make these decisions one would have to know about different types of strategies and the tasks to do them.
- It is to know how to construct knowledge. What is your schema? Or, what do you already know about this topic of study? What are the previously acquired ideas and relationships organized in your memory?

The School will use the following strategies to teach higher-order thinking skills:
Teach students how to learn, how they learn themselves, and how others learn and can learn from them.
- Challenge student to use a number of different approaches to solving real problems.
- Link information new to students to already learned information
- Give support, reinforcement as students try new approaches to problems.
- Give complex tasks to students so they will be forced to consider multiple tasks.

173

- Offer models of how to solve problems and plan out loud with them.
- Give feedback about how to think or operate differently to solve the problem.
- Help students plan their approach to solving problems.
- Give students reasons to engage in higher-order-learning.
- Allow students to peer monitor, peer tutor and peer evaluate solutions using a rubric, which they understand and commit to.
- Compile information about solutions, and about important problems that our society and our world face, from a variety of sources for students.
- Explain to students how to make decisions based on organization and interpretation of data.
- Explain to students how to create and present original works through writing, graphics and performance by analyzing information and making evaluations, supported by well-reasoned arguments.

Scientific Reasoning Skills:

The Scientific Reasoning Skills will be utilized at the school. We believe that children learn science best when the content is developmentally appropriate. For this reason, STC program has been chosen as a science curriculum, which is structured on the basis of a sequence of scientific-reasoning skills. This sequence begins in grade 1, where students focus on observing, measuring, and identifying properties. By grade 2, they are able to begin to recognize patterns and cycles. By grade 4, many students are able to identify cause-and-effect relationships. Finally, by grade 6, students can design and conduct their own controlled experiments. As they progress through this sequence, students not only gain an understanding of science concepts and phenomena but also develop critical-thinking skills. Table below shows the order of skill development in grades K - 8.

Grade Levels	Scientific-Reasoning Skills			
	Observing, Measuring, and Identifying Properties	Seeking Evidence; Recognizing Patterns and Cycles	Identifying Cause and Effect; Extending the Senses	Designing and Conducting Controlled Experiments
K-1	✓			
2-3	✓	✓		
4-5	✓	✓	✓	
6-8	✓	✓	✓	✓

Inquiry-Based Curriculum:

STC® and DASH are inquiry-based curriculums. Each unit provides students with an opportunity to explore science concepts and phenomena firsthand, to reflect on their observations, to share them with classmates, and to apply their learning in new situations. Each unit is based on a four-stage learning cycle that is grounded in research on how children learn. The four steps in this cycle are Focus, Explore, Reflect, and Apply.

➢ Focus: Focus on what they know about a topic and what they would like to learn about it. In other words, learning begins with the student's existing knowledge and experience.
➢ Explore: a scientific concept or phenomenon by completing a sequence of activities. Classroom explorations are usually done in groups of two or four children.
➢ Reflect: students reflect on their findings, record them in their science journals, and discuss them with their classmates to reinforce learning.
➢ Apply: Students apply their new learning to real-life situations and to other areas of the curriculum.

Integrating Science with Non-Science Curricula

Research about how the brain functions and how students learn has given momentum to the curriculum integration approach to instruction-teaching subject areas according to their natural connections rather than in isolation from one another. Teaching across the disciplines connects subjects in ways that reflect the real world, which in turn improves student understanding. STC® provides an instructional program that teachers can use as a framework for integrating other areas of elementary curriculum, such as reading, writing, math, and social studies.

All facets of a language arts program will be incorporated in the STC® classroom. Children will develop reading, writing, speaking, and listening skills as they complete record sheets, maintain science journals, read stories about topics that they are studying in science class, and share findings in both formal and informal settings. Reading, however, is given special emphasis in STC® because students who read well and widely build a strong foundation for learning in all areas of life.

➢ Language Arts: Educational studies indicate that children are more likely to engage in a reading exercise when the literature is related to an activity in which they have just participated. In other words, the activity has made the reading exercise contextually relevant. Each STC® unit's hands-on investigations provide a natural transition to literacy activities, and each unit offers a variety of literacy methods and materials that give students opportunities to practice their reading skills and improve their reading comprehension.
➢ Other Subjects: The integration of mathematics with science activities occurs seamlessly within the STC® units. Students develop math skills as they measure, weigh, compare, design data tables, and create graphs and charts. Stimulating ideas for the integration of other subjects (such as social studies and the arts) with science appear as extensions in every STC® lesson. The extensions offer ideas for field trips, visits from local experts, ways to relate science to art and music, and a host of other activities. Each STC®

Teacher's Guide includes a bibliography that provides information on science trade books, videotapes, software, and other learning resources.

Language-Based Approach:

Everyday Mathematics, the math curriculum that will be implemented for grades K thru 5, uses a language-based approach to help build understanding of math concepts. The program builds on research that demonstrates a strong correlation between children's development and their ability to learn mathematics. In Everyday Mathematics, the child's development is modeled as a spiral. The child's everyday language is a starting point from which mathematical and symbolic language grow.

Building on everyday experiences, the program provides a range of activities that ensure children are constantly discussing, representing and reasoning mathematically. Mathematical language and symbols include all the words, expressions, and symbols that are necessary to communicate in the world of mathematics. Understanding he mathematical relationships expressed in these terms is crucial to concept and skill development.

Multi-sensory approach to learning:

Students will be provided with opportunities to learn through auditory, visual, tactile, and kinesthetic activities. Students will be guided through the process of determining which learning style is best suited to their needs.

Multiple Intelligences:

The school will take into consideration the ways children learn. Eight different intelligences are named to account for a broader range of human potential in children and adults. These intelligences are: Linguistic, Logical-mathematical, Spatial, Bodily-Kinesthetic, Musical, Interpersonal, Intrapersonal, and Naturalist. Teachers will present their lessons in a wide variety of ways using text, storytelling, visuals, multimedia, music, cooperative learning, art activities, role play, field trips, inner reflection, and much more. Each child will have the opportunity to learn in ways harmonious with his or her unique mind.

Data-Driven Decision-Making

Data-driven decision-making (DDDM) is a system of teaching and management practices that gets better information about students into the hands of classroom teachers. The School will implement DDDM that yields substantial improvements in student learning and achievement. Intelligent and pervasive uses of data at The School will improve the instructional interventions for students, re-energize their enthusiasm for teaching, and increase their feelings of professional fulfillment and job satisfaction.
Essential Concepts
Data-driven decision-making is about getting better information into the hands of classroom instructors,, which have been shown to have positive impacts on student learning and achievement gaps. Data-driven educators at the School will articulate the essential elements of

effective data-driven education outlined in the diagram below. The five major elements of data-driven instruction are:

- Good baseline data,
- Measurable instructional goals,
- Frequent formative assessment,
- Professional learning communities, and
- Focused instructional interventions.

These elements interact to enhance student learning and to inform teacher practice.

Data-driven teachers of the School will utilize multiple measures, and multiple indicators within measures, when assessing school and student success. For example, data from a single administration of a statewide reading test do not give teachers the information they need to improve student learning. Information from other assessments, measures of student engagement, previous programmatic interventions, and other data are needed for teachers to design appropriate instructional interventions. Similarly, use of a single formative assessment to measure students' reading progress is not as reliable as using multiple, different assessments to triangulate on the complex concept of student reading. Data-driven teachers will be savvy consumers of summative assessment data, such as those from yearly state tests, who understand when and how the data can, or can't, inform teacher practice.

Principal of the School will support this phase of the DDDM process by helping teachers understand the five essential elements and by helping staff envision what good data-driven education looks like in practice. Principals will work with district personnel to create and implement a comprehensive, long-term professional development plan that is designed to ground teachers in the skills they need to be effective data-driven instructors.

Collecting and Analyzing Summative Data

Teachers at the School will utilize data from yearly summative assessments to improve student learning. In other words, teacher will be able to get their hands on the data from yearly summative assessments that will help them improve instructional practice. Access to the raw data is crucial, because educators invariably want more detailed data, or want data presented in different ways, than paper reports typically provide.

Once teachers have access to good baseline information, they will work with their administration to select key indicators of success for their classrooms. In order to do this, teachers will be well-grounded in assessment literacy concepts so that they can appropriately interpret summative baseline data. Teachers will also give ongoing feedback to the administrators about the usefulness of the data and/or reports that they are receiving.

Principal will ensure that the data teachers receive is accurate, timely, and in a format that can inform classroom instruction. Principal will work with district personnel to design and implement data systems that allow for exploration and reporting of raw data. Principal also play a key advocacy role in enabling teacher and counselor access to that data. Most importantly, school administration will actively help teachers identify key indicators of classroom success, appropriately analyze their data, and then turn those data into strategic pedagogical interventions.

Setting Measurable Goals

Once armed with key summative indicators of classroom success, teachers at the School will use those baseline data to identify mastery levels and learning needs of classes, demographic subgroups, and individual students. Data-driven educators of the School then use that information to set measurable year-end instructional goals, which serve as meaningful targets to guide their pedagogical strategies. These goals are often referred to as SMART goals. The acronym stands for Specific, Measurable, Attainable, Results-Oriented, and Time-Bound. An example SMART goal might look something like the following:

Example: The percentage of third grade students scoring at proficient or higher on the state mathematics test will increase from 64% in Spring 2004 to 82% in Spring 2005.

Focus areas for improvement
   1. Number sense
   2. Computation
   3. Measurement

Data-driven educators recognize that formalized goal-setting can lead to improved student learning outcomes. All SMART goals created by teachers and administrators should have the following six components (with example language from the SMART goal above):
   1. A measurable baseline (64%);
   2. A measurable target (82%);
   3. A specific time frame (Spring 2004 to Spring 2005);
   4. Specificity about what is being assessed (percentage of third grade students scoring at proficient or higher);
   5. Specificity about the method of assessment (the state mathematics test); and
   6. Focus areas that guide future action needed to reach the learning target (number sense, computation, and measurement).

Inclusion of these six components ensures that SMART goals meet the criteria represented by the acronym. SMART goals can be used with common assessments, teacher-made rubrics, and other types of assessments as well as with standardized tests from publishing companies and state departments. Principal will visibly model the goal-setting process by actively assisting teachers as they work to create appropriate, targeted goals for their classrooms and students.

Collecting and Analyzing Formative Data

Teachers at the School will have a good sense of where their students are at the beginning of the year and have measurable goals for where they want their students to be at the end of the year. The next step for teachers is to implement a system of frequent formative assessments in order to benchmark the progress of their students during the school year toward those year-end goals. Effective formative assessment practices, implemented during the school year, have been shown to be a powerful mechanism for improving student learning. Research meta-analyses have shown that good formative assessment has a greater impact on student learning, and on achievement gaps, than any other instructional practice (see, e.g., Black & Wiliam, 1998).

Teachers at the School will have the opportunity to meet regularly and frequently to have collaborative, data-based discussions about student progress. During these meetings, teachers identify emergent patterns from the formative data and discuss what the data tell them about students' progress toward year-end learning goals. Teachers will then collaboratively identify appropriate instructional interventions that will be implemented during the next instructional cycle and collectively commit to implementing those interventions.

Data-driven teachers of the School will utilize their instructional expertise to identify key formative indicators of success that can be used to measure student progress during the school year. They will also use appropriate technologies to collect, organize, analyze, and report that data to students, parents, administrators, and other teachers.

The School recognizes that the driving engine behind substantial improvements in student learning outcomes is a strong system of formative assessment, coupled with the opportunity for teachers to collaboratively make sense and act upon the formative data they receive. Principals will work with district administrators and local communities to implement creative solutions that give teachers the necessary time to collaboratively analyze and act upon data.

Making Changes

Data analysis is meaningless if it does not result in meaningful instructional change. Data-driven educators of the School will use summative and formative assessment data together to implement strategic, targeted, focused instructional interventions to improve student learning. These interventions will be aligned with state standards and district curricula as well as content-specific, developmentally-appropriate best practices.

Data Transparency and Safety

Information transparency is a necessary condition for successful data-driven education. Data-driven decision-making practices are only possible in school climates where data are valued and visible. At the School graphs, tables, and other indicators of data usage permeate the school environment. Discussions about data are frequent and analysis of student data is considered to be integral to the teaching and learning process.

Students and parents are important allies in this process. Rather than serving as gatekeepers, and hindering access to student learning data, the School will strive to ensure that relevant data are accessible to parents and students in order to enlist their buy-in and support. Data will be anonymized in order to comply with data confidentiality requirements.

The School will use print publications such as newsletters, notes home, flyers, and other mechanisms to disseminate status and progress information on key summative and formative assessment indicators to parents and students. Electronic communication channels such as web sites, listservs, and e-mail newsletters will be utilized to communicate with local communities as well. The School will utilize data to celebrate instructional progress and successes as well as to address continuing gaps or needs.

Data-driven teachers of the School will view data as feedback, not as indictments. They use data to inform pedagogical modifications and actively seek out more data to judge the success of those changes. Data-driven teachers at the School will discuss their instructional strengths and weaknesses with peers in order to facilitate shared communities of practice that are focused on individual and organizational learning. By recognizing and acting upon the fact that all educators, like students, have areas in which they could improve, teachers will be models of life-long learning for the students that they serve.

One of the most important things school principal will do to foster data-driven educational practices is to facilitate school climates where it is professionally and emotionally safe to look at student data. Teachers will collaboratively examine classroom-level data so that they can identify and learn effective instructional techniques from each other. In the School, data will be used to highlight faculty strengths and structure professional development opportunities. Administrators

bear the primary responsibility for fostering these kinds of climates. Principal will conduct a needs assessment of their staff's concerns and fears and then work diligently to address those needs in collaboration with their faculty.

Alignment for Improving Learning Outcomes

Results-driven educators understand the importance and impact on student learning of continuous and progressive improvement, and recognize that even small improvements add up over time to become large ones. This latter point is particularly important, because ambitious long-term goals like "achieving 100% proficiency" can be disabling rather than motivating. Turning desired outcomes into minute, concrete, short-term goals and then successfully achieving those goals is inherently motivating and can turn organizational inertia into desired progress.

Teachers and administrators at the School will work together to ensure that professional development opportunities are aligned to student, school, and district learning needs. Similarly, curricular design and delivery also should be aligned to meet these needs. In results-driven school systems, all processes and programs are designed to facilitate maximal student learning. Teachers will incorporate results into their instructional practice continually seek out evidence about the success or failure of their pedagogy. Ineffective strategies will be discarded, and successful strategies will be tweaked or modified to achieve even larger learning gains. The School Teachers will exhibit a constant dissatisfaction with the status quo and continually strive for further improvement, even when already exhibiting high levels of success. The teachers also are willing risk-takers who understand that trying something new and different may be the only path to improved outcomes.

Data-driven principals of the School will align, and help teachers connect with, necessary resources to facilitate effective educational interventions. Two other important roles of principals are helping teachers "chunk" ambitious long-term objectives into short-term SMART goals and facilitating teachers' understanding that taking greater responsibility for student learning can result in improved student achievement.

Improving Motivation

The School agrees with the idea that every student is motivated and that reluctance to learning is not a lack of motivation; students are motivated for the wrong reason. To avoid failure, some students choose not to participate in many activities. Others see the system as being useless and irrelevant to their lives; thus, they choose to defy it. We also believe that the reasons for lack of motivation towards learning depend on the kinds of incentive systems that prevail in classrooms. From this perspective, the challenge for the School is to create an environment of motivation where everyone strives for positive results. Providing incentives for learning will promote curiosity and result in increased knowledge.

We believe that an important factor influencing behavior is one's sense of identity. The view that an individual holds of him of herself has a direct impact on personal perception of reality at any given moment. For example, students who believe that they cannot understand math behave in ways that reinforce this perception. This may cause them to spend little effort towards completion of an assignment. With this in mind, the School will strive to enhance students' view of themselves.

It is the goal of the School to give every student the opportunities to meet the need for self-worth, autonomy and self-determination, competence and belonging and relatedness in a secure environment. In order to achieve these goals, the School will establish an appropriate classroom climate that cultivates a sense of security in students by;

• "Setting realistic, clearly defined limits, procedures, routines and expectations,
• Enforcing rules consistently and using natural and logical consequences rather than punishments,
• Encouraging the development of self-respect and responsibility and building trust."

In order to enhance student self-esteem, The School is planning to;

• "Set high expectations for all students and assist students in achieving them since   we believe that when teachers believe in students, students believe in themselves,
• Provide all students with ample amounts of positive information feedback regarding student strengths, achievements, attitude, actions, skills or social behaviors,
• Always try to explain the reasons or purpose for rules, assignments and learning activities,
• Value students' efforts as well as their accomplishments,
• Help students learn to accept their mistakes and successes,
• Accept students as valuable, worthwhile human beings,
• Celebrate the accomplishments and achievements of all students,
• Encourage students to evaluate their behavior related to their goals and prior level of achievements,
• Create a psychologically safe climate in which students are encouraged to express their opinions and risk being different."

The School will enhance self-reliance by;

• "Allowing students to choose from several learning activities that meet the same objective."
• Providing opportunities for students to determine where, when and in what order to complete assignments when possible,
• Using minimally sufficient controls when behavior must be required or restricted,
• Encouraging students to use the skills of individual goal setting to define monitor and achieve self-determined objectives,
• Holding them accountable for the consequences of their choices instead of value judgments."

Student competence will be enhanced by;

• "Evaluate achievement against the attainment of clearly stated instructions and objectives,
• Keep the achievement as the constant and time as the variable in the class,
• Use individual goal setting strategies to allow students define their own personal criteria for success,

• Use formative tests to identify the specific objectives not yet mastered by each student after initial instruction,

• Use criterion referenced rather than norm referenced evaluation procedures to determine students' grades,
• Allow students to retake, without penalty, parallel forms of exams that cover clearly stated objectives,
• Design learning and evaluation activities, so that performance outcomes are related to the level of effort expended,
• Match learning paths and pace of learning to the skill level of individual students,
• Provide faster learning students with challenging opportunities to enrich and extend their content mastery."

The School will enhance group relation and teamwork skills by;

• "Extensive use of using cooperative learning settings and helping students to learn the skills of empathetic listening,
• Helping students learn to express their feelings in ways that do not attack or injure others,
• Taking time to systematically help students learn to communicate acceptance and support for one another,
• Helping students learn to practice the skills of conflict resolution,
• Attempting to develop group goals and positive interdependence in the classroom,
• Cultivating individual accountability for contributing to the class and group goals,
• Avoid penalizing some students for the behavior of others and avoid forcing students to compete for a limited number of rewards,
• Affirming the importance of effective cause within the classroom,
• Using feedback procedures to assess and discuss the interpersonal climate and personality of the classroom."

Student interest and involvement will be enhanced by:

• "Relating content and objectives to student's experiences and everyday life,
• Assessing students' interests, hobbies and extracurricular activities,
• Supporting instruction with humor, personal experiences, incidental information and anecdotes that present the human characteristics of the content,
• Using divergent questions and brainstorming activities,
• Varying instructional activities while maintaining curricular focus and structure,
• Supporting spontaneity when it reinforces student academic interest."

Family Involvement

Parental involvement in education is complex and multifaceted. Joyce Epstein categorizes parental involvement into five types;

• "Basic obligations of parents, such as providing for their children's health and safety and creating a home environment that supports learning.
• Basic obligations of schools; such as communicating with parents about school programs and their children's progress.

• Parental involvement at the school site, for example, by attending sports events or student performances or by working as volunteers.
• Parental involvement in learning activities at home.
• Parental involvement in school governance and advocacy."

In the School, all five types of family involvement will be addressed wherever appropriate. For example, the School will provide meetings, seminars and educational activities for parents in order to assist the obligations in the second type mentioned above.

To develop parental involvement and make it as productive as possible, a variety of strategies will be considered. These strategies can be classified as policy, organizational, personnel, teacher specific, and parent-specific.

The parents, guardians or mentors of each student attending the School will be asked to sign the School Family Contract (see Appendix C - The School Tentative Student and Parent Handbook) which helps incite awareness about the importance of the Family-Student-The School triangle for the success of the education.

Parents as Educators project will be put into work. The goal of this project is to help parents enhance their children's learning at home. Whenever possible the following techniques will be utilized:

• "Ask parents to read to their children regularly or listen to the children read aloud.
• Lend books, workbooks, and other materials to parents.
• Ask parents to take their children to the public library. (Provide the necessary information about how to get there, how to get a library card, and so forth needed)
• Ask parents to get their children to describe (in detail, daily) what they did in school.
• Give an assignment that requires children to ask their parents questions.
• Ask parents to watch a specific television program with their children and discuss it afterward.
• Suggest ways for parents to include their children in any of their own educationally enriching activities. (These could be as commonplace as shopping for groceries, working on the car, taking care of the house, making minor repairs, working in the yard/garden, tending animals, and so forth)
• Suggest (and demonstrate in person whenever possible) games or group activities related to the children's schoolwork that can be played by either parent or child or by child and siblings.
• Suggest (and demonstrate) how parents can use home materials and activities to stimulate their children's interest in reading, math and other subjects.
• Establish a formal agreement whereby parents supervise and assist children in completing homework tasks.
• Establish a formal agreement by which parents provide rewards or penalties (or both) based on children's school performance and behavior.
• Ask parents to come and observe the class, not help.

• Give a questionnaire to parents, so that they can provide feedback about their children's progress.
• Explain certain techniques for teaching, making learning materials, or correcting mistakes appropriately.
• Ask parents to sign homework to ensure its completion.

• Ask parents to provide spelling practice, math drills, or other practice."

To avoid assignments being used as useless attachments to current duties, faculty will be assigned to work closely with parents using one-on-one settings and group activities. Working with parents in this way will be the responsibility of each faculty member. The principal and/or school board will supervise these activities.

If concrete actions are taken on the part of school personnel, the school can be a place where parents can expect a warm environment. The following actions will be taken to improve the effective communication and partnerships with parents as described as:

• "Publish a clear policy welcoming parental involvement, publicize it, and post it in the school buildings in an obvious place for all to see.
• Organize the staff, so that at least one person knows each student well- how he or she is doing in all subjects; whether he or she is making friends; whether he or she is anxious, afraid of failing, and so forth.
• Make sure that the school office is friendly and open and that parents are treated with respect and are not kept waiting.
• Sponsor parent-to-parent events, so that parents can get to know one another and develop common standards for their children's behavior and social life.
• Hire a full-time parent contact person whose job is to help parents understand how they can help their kids learn at home and understand the school structure. The parent contact person should also talk to teachers about parent's concerns and make home visits.
• Set up a parent room in the school building. Equip it with comfortable places to sit, a telephone, books about school age-children and what they need, and access to a copying machine. Some schools have even included a kitchen, a laundry room, sewing machine, computer and typewriter.
• Ensure that parents and school staff work together to determine parents' needs and provide necessary services. Sometimes Parents will need things that do not seem directly related to their children's education, such as help in understanding the immigration laws or in getting their electricity turned back on.
• Provide in-person contact with parents whose primary language is not English, and be sure that translators are involved in all parent-teacher interaction as needed."

Teachers must allow parents to be intimately involved in their children's education. This requires an understanding, on the teacher's part, of what it is like to be a parent. Teachers will hold seminars and meetings to achieve this. To build trust with parents, strategies specific for each will be used. This will help involve parents in their child's education, from academics to the development of healthy self- esteem to the formation of good social skills. Among its strategies The School will:

• accept parents as they are without inducing fundamental changes. Trying to change parents communicates that something is wrong with them.
• attend carefully and with empathy for the cognitive and emotional content of the parents' message.
• help parents feel comfortable and share information and resources when permissible.

• focus on the parents' hopes, aspirations, concerns, and needs. Attending parents' concerns communicates caring.
• keep promises.
• be there when needed even if it creates inconvenience."

At The School we believe that "involving more parents more often and more productively requires changing the major location of parent involvement from the school to the home, changing the major emphasis from general policies to specific skills, and changing the major target from the general population of students or school staff to the individual child at home. This is why we talk about specific behavior and organizational skills rather than traditional parents' day, or teacher parents' conferences. Traditional participation options will certainly be offered such as volunteer hours for school tasks, teacher meetings and conferences on specific needs of parents.

Improving Student Attendance

Poor attendance arises from a multitude of factors including family background, environmental or ecological, and psychological and social. Students are influenced by the educational system, the schools managerial aspects and teachers' attitudes. To improve attendance there needs to be a relationship between student, school, and home. If the atmosphere within the school is not positive and friendly and if there are insufficient resources, then there is no use in students being physically present. If the environment is not one in which the students are attracted to and can feel a sense of belonging, they will feel alienated.

Specific things that will be done to improve school attendance:

• Notifying the parent by phone.
• Warning letters sent to parents making them aware of the problem and possible actions that may be taken if the situation does not improve.
• Arranging conferences with the parent and student to help resolve the issue.
• Sending up a follow-up letter that explains the compulsory school attendance law or school policy.
• For students to avoid being alienated there must be an effective counseling and guidance system. Students are important and valued and must be made to feel as such using a spirit of collaboration and sense of solidarity.
• Schools must be student friendly. Making them rewarding institutions has been a major challenge. If students are to be positively educated, good student-teacher relationships in addition to good friendships with classmates are necessary. "To the extent a student does not feel cared for at school, he or she does not feel 'present' at school."

At The School the atmosphere and standards which enable the majority of students to succeed and have a good quality of life will be maintained through continuous development of awareness of teaching staff that teacher's attitudes, expectations and personal characteristics play a significant role in influencing the nature of student-teacher interactions, relationships and attendance. In particular, the staff at The School will endeavor to:

• "be approachable,
• cultivate a greater sense of confidentiality concerning the students and their families, and avoid staff room 'gossip',
• enable students to feel they belong and offer them positions of responsibility, so that they feel trusted and are empowered to be good leaders,
• improve staff/student communication and offer students an effective channel through which they can express their grievances,
• praise and encourage students for their efforts,
• show no favoritism,
• speak politely, avoid being sarcastic, rude or moaning,
• speak in a 'normal' tone and pitch of voice,
• treat students with respect and as young adults,

Parents must play an important role in the development of young people. Those who do not take an active part in their child's education tend to be uncooperative. This is why positive contact between parents and teachers is important in solving attendance problems more effectively.

Self Directed Learning with Technology

It is said that knowledge can double every 6 months. This being the case students must be trained to educate them while focusing their attention on their own work habits, knowledge bases, insights, aspirations, value systems and personal talents. If this can be achieved, schools will cease to be merely transmitters of knowledge.

Consequently, another method that will be utilized in the School is Self-Directed Learning (SDL) of individually prescribed materials. SDL consists of planning and conducting a program of studies with each student that is tailored to his learning needs and to his characteristics as a learner.

SDL is based on a carefully sequenced and detailed listing of instructional objectives. The main difference between SDL and traditional instruction is that in SDL the role of teacher is changed. The instructor will spend little time in lecturing to group of people; spend much time evaluating students' record diagnosing needs, and preparing individual learning prescriptions for each student. SDL relies heavily on student self-direction. "There are two reasons for regarding self-directed learning as a master key to educational reform. First, a sound education is one that prepares the individual to be an expert problem solver in responding to situations he or she encounters in his or her role as worker, citizen, family member, community member or private person. Competencies in self-direction enable a person to chart a life that expresses his or her individual choices of ends and means. Further, such competencies prepare a person to deal with various kinds of novel problems that are confronted in this world of rapid and unpredictable change. The second reason for viewing self-directed learning as a necessity for educational reform arises from the fact that effective instruction must be tailor-made to suit the characteristics of each individual learner. In The School, we believe that SDL students will become more independent, more highly motivated, and much more able to work effectively on their own without constant direction.

One other advantage of self–directed learning is that it induces the necessary self-discipline for sake of learning. "If students do not understand that they have the freedom to learn, they are only a product of conditioning. Such students feel that school controls them; the individual feels

186

shaped by outside forces and experiences. But self-directed students, while recognizing that schools have rules that must be followed, do not turn total control over to the school. Instead, they begin to face the paradox early in life that there are some things outside ourselves over which we have no control, but also a dimension of life over which we do. This dimension-choice and responsibility shapes our lives. Self-directed learners can choose what they conform to. Whereas conforming students tend to lack insight into their own motives and may simply go along with the crowd, self-directed learners have good self-understanding and are more independent. They follow rules, seek advice, and conform to policy, but for their own purposes-to get what they need to be better persons"

Technology makes it easier for teachers to individualize instruction and for students to engage in self-directed learning. Video, computer, and multimedia technologies can accommodate students with a variety of learning styles more flexibly than conventional materials. Some students, for example, may learn more readily with graphics or sound than through text alone. New technologies also allow students and teachers to tap into vast "digital libraries" of information and real-world resources. Students can search excellent collections, such as the Library of Congress, retrieving text, photos, and multimedia information around the clock. According to Len Simutis, director of the Eisenhower Clearinghouse for Mathematics and Science Education, retrieval skills will become more important than remembering, and the traditional transmission mode of "oral authority" will diminish in significance.

These are a few of the many reasons that we believe why technology should be used for its own sake and as a tool for SDL. For this purpose, Internet connection and necessary software will be ready for students in the library and computer lab. However, SDL will not be restricted to only computer and related media. Whenever necessary, video films, tapes and printed media will be exploited in order to achieve the requested mastery of the objective for specific students.

Appendix B - Employee Handbook

2.1. About This Handbook

The following pages contain information regarding many of the policies and procedures of Discovery Education Services, Inc. (hereby referred to as "The School"). This is not an employment contract and is not intended to create contractual obligations of any kind.

    The policies and procedures outlined in this handbook will be applied at the discretion of The School and The School reserves the right to deviate from the policies and procedures of this handbook, or to withdraw or change them, at any time. We will notify you when an official change in policy or procedure has been made.

    The School values the many talents and abilities of its employees and seeks to foster an open, cooperative, and dynamic environment where employees and the company alike can thrive. If you would like further information or have questions about any of the policies and procedures outlined in this handbook, please feel free to bring them to the attention of Principal.

2.2. Standard Employment Practices

2.2.1. At Will Employment

The School does not offer tenured or guaranteed employment. Except as The School has otherwise expressly agreed in writing, your employment is at will and may be terminated by you or by The School at any time after giving proper notices as indicated in the hand book.

2.2.2. Equal Employment Opportunity

The School is committed to providing equal employment opportunities to all individuals without regard to race, color, religion, sex, national origin, age, disability, marital status, sexual orientation, or any other characteristic protected by law.

    The School will make reasonable accommodations for qualified individuals with known disabilities unless doing so would result in an undue hardship. An employee with a disability for which reasonable accommodation is needed should contact an administrator to discuss possible accommodations.

    Employees with questions or concerns about any type of discrimination in the work place are encouraged to bring these issues to the attention of Principal. Employees can raise legitimate concerns and make good faith reports without fear of reprisal. Anyone found to be engaging in any type of unlawful discrimination will be subject to disciplinary action, up to and including discharge.

2.2.3. Sexual and Other Unlawful Harassment

The School will endeavor to maintain a work environment that nourishes respect for the dignity of each individual. This policy is adopted in furtherance of that tradition.

It is against the policies of The School for an employee to harass another person because of the person's sex, race, color, religion, national origin, age, disability, sexual orientation, marital status, or other characteristic protected by law. Actions, words, jokes, or comments based on such characteristics will not be tolerated.

Consequently, it is against the policies of The School for an employee to sexually harass another person. Unwelcome sexual advances, requests for sexual favors, and other verbal or physical conduct of a sexual nature constitute sexual harassment when: (1) submission to such conduct is made either explicitly or implicitly a term or condition of an individual's employment; (2) submission to or rejection of such conduct by an individual is used as the basis for employment decisions affecting such individual; or (3) such conduct has the purpose or effect of unreasonably interfering with an individual's work performance or environment.

Any employee who believes that he or she is being unlawfully harassed should immediately contact their immediate supervisor or Principal.

All complaints of harassment will be promptly, thoroughly and confidentially investigated, and where necessary, appropriate corrective action will be taken. Any person found to have unlawfully harassed another employee will be subject to appropriate disciplinary action, up to and including discharge.

2.2.4. Immigration Law Compliance

The School does not hire anyone that is not a citizen of the United States, or is not a non-citizen that is authorized to work in the U.S. under the Immigration Reform and Control Act of 1986. As a condition of employment, all new and past employees must show valid proof that they are eligible to work in the United States.

2.2.5. Criminal Convictions

The School reserves the right not to hire, or retain anyone that has been convicted of a criminal offense. Conviction of a crime that involves dishonesty may result in an automatic termination of employment. Before any decision is made, the nature of the crime and circumstances surrounding the conviction will be considered. All employees have to be fingerprinted when they are employed.

2.2.6. Standards of Conduct

The School expects that all employees conduct themselves in a professional and ethical manner. An employee should not conduct business that is unethical in any way, nor should an employee influence other employees to act unethically. Further, an employee should report any dishonest activities, or damaging conduct to an appropriate supervisor.

In the event that you become aware of another employee's behavior or actions which you believe, are inappropriate, illegal, problematic, or in any way inhibit or affect your job performance or The School work environment, you should discuss such behavior or actions with the Principal.

All reasonable concerns will be promptly, thoroughly and confidentially investigated by The School and, where necessary, appropriate corrective action will be taken. You should not discuss such actions or behavior with other The School employees. Your discussing such matters with

other employees may – in and of itself – create an unacceptable work environment for which you will be held responsible and for which you may be disciplined in accordance with The School's disciplinary policy.

2.2.7. Personnel File

The School keeps personnel files on each of its employees. These files are confidential in nature, and are managed by Principal or designee. They will not be copied or removed from the premises unless there is a legitimate business reason to do so.

All employees may view his or her personnel file by contacting Principal during normal business hours. No employee may alter or remove any document in his or her personnel file.

2.3. General Policies and Procedures

2.3.1. Orientation

In accordance with federal law, both new employees and re-hires will be required to provide documentation of identity and eligibility to work in the United States. The I-9 form will be used for this purpose.

New employees will also receive a copy of the Employee Handbook, and will be given the time to read it, and ask any clarifying questions of a Principal. The signed copy of the "Acknowledgement & Receipt of Understanding" will be placed in the employees personnel file.

2.3.2. Reporting Changes

You are responsible for promptly notifying Principal of any change in your name, address, telephone number, marital status, citizenship, tax withholding allowances, emergency contact information, insurance beneficiary, or dependent insurance coverage. Accurate and correct information is vital for benefits and insurance records and other school files.

Each employee is required to notify Administration, in advance, of the dates of all approved vacation or leave time to be taken. Additionally, employees are to inform Administration of sick days taken and excessive lateness in arriving at work.

2.3.3. Job Classifications

Employees are classified as one of the following three statuses:

(1) Full-time: any employee that is regularly scheduled to work 40+ hours a week or more. Full-time employees are eligible for standard The School benefits.
(2) Part-time: any employee that is regularly scheduled to work less than 40 hours per week. Part-time employees are not eligible for the standard The School benefits.
(3) Temporary: any temporary worked that has a predetermined start and end date of employment. Temporary employees are not eligible for the standard The School benefits.

2.3.4. Pay Periods

All employees are paid on the last day of each month. When the last day of the month falls on a holiday or weekend, employees will be paid the day before the holiday or weekend.

2.3.5. Hours of Work

The School's standard workweek for full-time employees is five days. Employees may not deviate from the School's hours of work, unless Principal specifically approves a request.

The school is open from 8:00 a.m. to 5:00 p.m., Mondays through Fridays. Employees have to attend any late evening parent-teacher conferences held during the week or on Saturdays if it is scheduled so without compensation.

2.3.6. Payroll

Both full time and part time employees will have federal and state taxes withheld from their wages. Payroll checks will not be released prior to the set pay schedule for any reason, nor will they be released to anyone other than the employee.

2.3.7. Performance Assessment

Every The School employee will be subject to a performance appraisal at least once a year. The employee's supervisor or Principal will give these assessments. The reviews will focus on job-related strengths and weaknesses, as well as overall fit with The School. Goals and improvement plans will be mapped out each review period, and progress will be measured at the next review.

Employees will have the opportunity to thoroughly review all performance appraisals, and provide a written opinion on it. All performance reviews and responses will become part of an employee's personnel file.

2.3.8. Expense Reimbursement

The School will reimburse employees for reasonable pre-approved expenses All expenses must be submitted with a receipt.

2.3.9. Attendance & Punctuality

Punctuality and regular attendance are important to the smooth operation of The School. If you are consistently late or excessively absent, The School's ability to perform work is affected and an unfair burden is placed on your co-workers. Therefore, unless your absence is permitted or excused under The School's holiday, vacation, sick or other policies, you are responsible for being at work and arriving on time (8:00 am). If you feel sick, it is your responsibility to call your supervisor as soon as possible, preferably in advance of lateness and no later than one hour before the start of the workday

An employee who is absent for reasons other than those permitted or excused by The School's holiday, vacation, or leave policies, or who repeatedly fails to provide notice as required, will be subject to appropriate disciplinary action, up to and including discharge.

2.3.10. Availability for Work

Employees must be available for work during normal business hours (8:00 am and 5:00 p.m.). If, for any reason, there is a change in your work availability status, you must notify principal at least 60 days prior to the change.

2.3.11. Mandatory Meetings

Employees may be required to attend mandatory meetings. In the event that a mandatory meeting interferes with an employee's regular schedule, no overtime will be paid for attendance.

2.3.12. Holidays

The following are paid holidays for eligible employees:

New Year's Day
President's Day
Memorial Day
Independence Day
Labor Day
Thanksgiving Day and the following Friday
Christmas Eve
Christmas Day

2.3.13. Vacations

Vacation time is offered to full-time 12-month employees based on the following schedule:

Year of Service:

1st& 2nd years: 10 working days per year.
3rd & 4th years: 15 working days per year.
5th year +: 20 working days per year.

The 1st year of service is considered the year in which Eligible Employee status is attained. For example, 2002 would be considered the 1st year of service for an employee whose start date falls in October, November or December of 2001.

Vacations are earned from January 1 to December 31 of each calendar year, and are taken in the same year in which they are earned (for example, vacation time earned in 2002 is to be taken between January 1, 2002 and December 31, 2002). Vacation time must be scheduled and approved in advance by your supervisor. The School will not carryover or pay out any unused vacation time from one year to the next.

An authorized The School holiday that falls on a normal business day during your vacation is not counted as a vacation day.

When given advance notice, The School will consider requests for additional time without pay. If you have a special type of vacation in mind, talk to Principal to see what can be worked out.

2.3.14. Drugs and Alcohol

The School will not tolerate the use or possession of alcohol or illegal drugs on the job or on School property.

Employees using or possessing alcohol or illegal drugs on School property or while at work or who report to work under the influence of alcohol or illegal drugs will be subject to disciplinary action, up to and including discharge. Proper actions will be taken following the Broward County Public Schools employee policies.

2.3.15. Violence & Weapons

The School takes threats of violence extremely seriously. Any act or threat of violence by or against any employee, parent, student or visitor is strictly prohibited. This policy applies to all School employees, whether on or off School property.

Any use or possession of weapons, whether illegal or not, is prohibited on School property, or while on School hours. This includes knives, guns, martial arts weapons, or any other object that is used as a weapon. Any employee caught possessing a weapon will be disciplined, up to and including termination.

2.3.16. Staff ID Cards

Staff ID cards are issued at the beginning of the school year. Staff must wear his/her ID all times during the work days and hours. IDs can be replaced if lost with a $30.00 renewal fee.

2.3.17. Keys

The school entrance and classroom/office keys are issued to employees at the beginning of the school year. Keys can be re-cut by the school with a fee of $10.00 per key

2.3.18. Smoking

Smoking is not allowed in The School premises.

2.3.19. Food and Beverages

The School sometimes has visitors in the school building. The School's surroundings should always reflect a professional appearance. Eating at your desk is acceptable, but should be done unobtrusively and in a manner so as to prevent damage to valuable School equipment and other property. All employees are personally responsible for keeping the area around their workstation clean and presentable. Employees are also responsible for returning meeting areas to a clean and presentable condition after use.

2.3.20. Conserving Energy

Employees are encouraged to conserve energy by shutting down their computers, monitors and printers at night, and by turning off the lights when not needed.

2.3.21. Visitors

Only authorized visitors are permitted at The School premises. All visitors must enter through the reception area, and receive a name badge. Any employee that notices an unauthorized visitor should notify their supervisor immediately.

2.3.22. Workplace Attire

The School has a professional dress environment. Employees are expected to use good judgment and taste, and to show courtesy to their co-workers, students and parents by dressing in a fashion that is presentable and appropriate. Male teachers have to wear tie.
Employees are to dress in appropriate business attire for meetings with parents at School's offices or other locations. No jeans, miniskirts, cargo pants, flip flops are allowed.

2.3.23. Telephone Use

Telephones are provided to enable employees to carry out work assignments in an efficient manner. Personal telephone calls should be kept to a minimum and personal toll calls should not be made at The School's expense. Phone calls from parents, co-workers and administration must be responded within 48 hours.

2.3.24. Voice Mail and Electronic Mail

All electronic and telephone communication systems and all communications and information transmitted by, received from, or stored in these systems are the property of The School and as such are intended for job-related purposes. Personal use should be kept to a minimum. Electronic or telephone communication systems may not be used to transmit messages that may be considered inappropriate under The School's policies, including those prohibiting harassment. Employees are not permitted to use a code, access a file, or retrieve any stored communication unless authorized to do so or unless they have received prior clearance from an authorized School representative. All pass codes are the property of The School and may be used by The School to access electronic and telephone communications at any time. The School reserves the right to monitor any electronic, telephone, or other communications made using The School systems or property. E mails from parents, co-workers and administrators must be replied within 48 hours

2.3.25. Use of School Property

All School workspace, including file cabinets and lockers are the property of The School, and must be available to management at all times. The use of personal locks on any School property is strictly forbidden. No School property may be used to house personal files or items. No School equipment, including computers, photocopiers or printers may be used for personal business.

2.3.26. Postage, Shipping and Office Supplies

Postage, shipping, and office supplies paid for by the school are for business purposes and are not to be used for an employee's personal purposes.
2.3.27. Personal Property

The School does not assume responsibility for any personal property located on its premises. Employees are to use their own discretion when choosing to bring personal property into the school property, and do so at their own risk. Additionally, employees may not bring or display in the school any property that may be viewed as inappropriate or offensive to others.

2.3.28. Personal Safety

The safety of each employee's health and security is very important to The School. The School is willing to make reasonable efforts to address an employee's safety concerns. Employees should remember to use caution and good judgment in all activities, and should notify their supervisor or principal if they believe there is a safety issue that should be addressed.

2.3.29. Office Security

Shortly after an employee's start date, he/she may be given a key to gain access to the offices and/or classrooms. The last employee to leave the school at night is responsible for making certain that all doors are locked.

2.3.30. Monitoring & Searches

All School property is subject to monitoring and review at all times. This includes, but is not limited to, desks, lockers, computers and email files. Reasons for searches and reviews include, but are not limited to, personal abuse of company property, theft investigation and improper disclosure of confidential information.
   The School retains the right to conduct searches at any time. This includes the right to search individual computers or files, even if protected by a password. Any employee that attempts to obtain or alter a password for the purpose of accessing restricted files will be subject to disciplinary action, up to and including termination.

2.3.31. Confidential Information

The School requires that employees not disclose information held to be confidential by The School. Any questions about this policy should be addressed to Principal.

2.4. Leave Policies
2.4.1. Personal Days

Full time Employees are eligible for 3 personal days per year. Employee has to inform the principal or his/her designee for his/her intention to use the personal day(s) 1 week in advance. This procedure allows your supervisor to arrange substitutes in your absence.

2.4.2. Sick Leave

Full time Employees are eligible for 5 sick days.

The following guidelines are designed for the proper use of sick leave:

a) If you do not report to work, you must phone your supervisor or have someone call for you as early as possible after the office opens. This procedure allows your supervisor to arrange substitutes in your absence.

b) If you must leave the school before closing time because of illness, inform the principal.

c) If you foresee the need to take sick leave (e.g., for non-emergency surgery or for a doctor's appointment), tell the principal as soon as possible so that plans can be made to cover your absence.

d) Disabilities related to pregnancy or birth of a child will be treated as all other disabilities for purposes of The School's leave policies.

e) If you are absent because of sickness or disability, The School may require that a doctor of The School's choice examine you.

f) Sick leave unused at the end of the year may not be carried over into the next year.
g) Employees will not be paid for unused sick leave when their employment ends.

If you are eligible for sick leave, you may use the leave to care for your sick or injured children on the same terms that apply to use for your own illnesses or injuries.

2.4.3. Unused Sick and Personal Days

Unused sick and personal days will be cashed as $50.00/day if employee stays for the whole school year and paid to employee in the last working day of that school year.

2.4.4. Short-Term Disability Leave

Paid short-term disability leave is available for an absence due to an employee's illness or disability, including pregnancy-related disability, which extends for six or more consecutive scheduled working days. Full-time employees are allowed ten days of short-term disability leave per calendar year. Unused short-term disability days may not be cashed out or carried over into subsequent years.

An employee seeking short-term disability leave benefits must submit a statement from a doctor demonstrating that he or she is unable due to illness or injury to perform the job and stating the expected duration of the inability to work. If the medical information submitted is not, in the discretion of The School, sufficient to establish inability to work, the employee may be required to submit to an examination by a doctor selected and paid by The School.

2.4.5. Personal Leave of Absence

Requests for personal leave without pay are considered individually and granted at the discretion of administration. The reason for the request, the employee's length of service, the employee's work record, and the demands of the individual's job are examples of the type of factors typically considered in evaluating a request for personal leave of absence. A request for personal leave of absence will be granted only if the employee is not eligible for any other type of leave. An employee may not be on personal leave of absence for more than 3 days when school is in session and 1.5 months when school is not in session during summer months.

2.4.6. Jury Duty

Employees summoned for jury duty will be allowed the necessary time off from work to perform this civic responsibility. Employees must give The School 15 days advance notice. The School will pay such employees the difference between their regular salary and any jury duty fees received. Employees will be expected to report to work during all regular hours if their presence is not required in a jury room or court. The School may require the employee to supply documentation from the court affirming the employee's jury duty service.

2.4.7. Military Duty

Employees who are absent from work in order to attend an annual encampment in a recognized reserve branch of the armed forces of the United States will receive a paid leave of absence of up to a maximum of two weeks per year. Leaves for military service and reinstatement after performing military service will be provided in accordance with the requirements of law.

2.4.8. Funeral Leave

When a death occurs in an employee's immediate family, an employee may take up to three days with pay in order to attend the funeral or make funeral arrangements. In unusual circumstances, additional time off may be granted, with or without pay, at the discretion of The School. For purposes of the funeral leave policy, "immediate family" means an employee's spouse or child, as well as a parent, grandparent, brother, or sister of the employee or the employee's spouse.

2.4.9 Forced Closings and Severe Weather

Unless notified by your supervisor, you are to report to work on all regularly scheduled days, regardless of weather conditions. If you are unable to report to work due to weather conditions, you must notify your supervisor as soon as possible. In the event that The School closes due to

severe weather conditions or another reason, you will not be required to report to work. You will be paid for that day, and it will not be counted as a vacation day.

2.5. Employee Benefits

The following is a list of benefits that The School makes available to Eligible Employees. The descriptions in this handbook are a summary only. The separate plan documents explain each benefit in more detail and the language of the plans' documents controls the various plans. Benefits may be modified, added or terminated at any time by the insurance company or benefit provider, per the terms of the plan, or by The School, at its discretion.

2.5.1. Benefits Eligibility

Full-time employees are eligible for the benefits outlined below. Part-time employees (less than 40 hours per week) are not eligible for these benefits.

2.5.2. Medical Insurance

Medical insurance is available for Eligible Employees and their qualified dependents. Refer to the plan summary for details regarding coverage, eligibility, waiting periods and cost.

2.5.3. FRS

Eligible Employees (Administrators, Teachers, Counselor) will be enrolled in the Florida Retirement System. Social Security will be paid for the other employees.

2.5.4. Worker's Compensation

The School requires that all employees report job-related accidents or injuries to a supervisor immediately, whether the accident occurred on or off School premises. Failure to report an injury, regardless of how minor, could result in difficulty with the employee's claim.
All workers' compensation claims will be paid directly to employees, and employees are expected to return to work immediately upon release by their doctor.

2.5.5. COBRA

The Consolidated Omnibus Budget Reconciliation Act (COBRA) gives employees and their qualified beneficiaries the opportunity to continue health coverage under the Company's health plan, should the employee lose his or her eligibility (e.g., upon termination). Under COBRA, the employee pays the full cost of coverage at The School's group rate, plus an administrative fee. Details of COBRA coverage and how to apply for it will be provided by Principal at the time eligibility is lost.

2.5.6. Child Acceptance Eligibility

Regardless of being in residence in the School Board of Broward County, Employees of The School can bring their children to The School without being exposed to any lottery only if room is available at the child's appropriate grade level.

2.6. Disciplinary Policies

2.6.1. Problem Resolution

The School seeks to deal openly and directly with its employees, and believes that communications between employees and administration is critical to solving problems. Co-workers that may have a problem with one another should attempt to resolve the problem themselves. If a resolution cannot be agreed upon, both employees should approach the principal, who will work with the employees to determine a resolution. In these instances, the decision of the principal is final. Employees that have a problem with a supervisor should first go to the supervisor and state the problem. If a resolution cannot be agreed upon, the employee should present his or her problem, in writing, to the principal. The decision of the principal will be final.
2.6.2. Discipline

The School's policy is to attempt to deal constructively with employee performance problems and employee errors. The disciplinary process will be determined by The School in light of the facts and circumstances of each case. Depending upon the facts and circumstances, the discipline applied may include, among other things, oral or written warnings, probation, suspension without pay, or immediate discharge. Each situation will be considered in light of a variety of factors including, but not limited to, the seriousness of the situation, the employee's past conduct and length of service, and the nature of the employee's previous performance or incidents involving the employee. Details of this process are outlined further in the Corrective Action section below.
2.6.3. Corrective Action

Corrective Action is taken against an employee in response to a rule infraction or a violation of School policies. Correction action will continue until the violation or infraction is corrected.

Corrective Action usually begins with a verbal warning, followed by a written warning that is placed in the employee's personnel folder. If more serious corrective action is required, the employee may be put on probation, or have his or her employment terminated.

The School considers some violations as grounds for immediate dismissal, including, but not limited to: insubordinate behavior, theft, destruction of company property, breach of confidentiality agreement, untruthfulness about personal background, drug or alcohol abuse, or threats of violence.

2.7. Separation Policies

2.7.1. Job Abandonment

Employees of The School that are absent for more than two consecutive days without notifying a direct supervisor are considered to have voluntarily abandoned their employment with the School. The effective date of termination will be the last day the employee reported for work.

The Florida Education Standards Commission (ESC) will be informed of the employee's practice.

2.7.2. Termination

The School does not have tenure or guaranteed employment. You or The School may terminate your employment at any time after giving notices.(Employees 60 days and School 30 days) with or without a reason.
    Termination may result from any of the following: (i) Corrective action measures, which include infractions for violation of company policies, (ii) layoffs, which include the elimination of an employee's job function or headcount reduction due to redundancy or cost reduction, and (iii) involuntary dismissal, which may include poor performance reviews or failure to demonstrate an acceptable attitude in the workplace.

2.7.3. Termination Process

The School requires that employees return all documents, files, computer equipment, school tools, keys and other School owned property on or before the last day of work. When all School owned property has been collected, the employee will receive his or her final paycheck.

2.7.4. Employment References

Due to confidentiality considerations, The School will provide employment references for former employees only with the employee's consent or as required by law.

The School Employee Handbook

Acknowledgement of Receipt & Understanding

     I hereby certify that I have read and fully understand the contents of this Employee Handbook. I also acknowledge that I have been given the opportunity to discuss any policies contained in this handbook with a School official. I agree to abide by the policies set forth in this handbook, and understand that compliance with The School's rules and regulations is necessary for continued employment. My signature below certifies my knowledge, acceptance and adherence to The School's policies, rules, and regulations.

     I acknowledge that The School reserves the right to modify or amend its policies at any time, without prior notice. These policies do not create any promises or contractual obligations between this The School and its employees.

16. Assists in the protection of student and school property.
17. Responsible for keeping up to date on current technology, as job appropriate, being used by the school. With the support of the school, attends training to ensure skill level in various technologies is at the level required to perform in current position.
18. Responsible for timely and accurate information they maintain as part of their job responsibilities.
19. Performs other duties as assigned by the Principal.

Evaluation:
Performance of this job will be evaluated in accordance with provisions as set forth by the School.

School Secretary

General Description Of Duties

Under general direction, the purpose of this position is to perform the school based duties associated with providing administrative and secretarial support to a departmental director level or above; may include coordinating the activities of other clerical support positions in the department. Employees in this classification function at a complex clerical capacity and coordinate schedules and meetings, create complex documents and reports, maintain filing systems, as well as provide general office support. Employees also assist with the resolution of emergency situations. Performs related work as directed.

Specific Duties And Responsibilities Examples Of Essential Functions

Performs administrative and secretarial assignments with minimal direction for departmental director level administrators. May include support for others in department as well.

Creates finished documents from notes or outlines including letters, memos, project summaries, meeting agendas, meeting minutes, spreadsheets, and presentations.

Coordinates and schedules meetings, meeting rooms, and required equipment for internal meetings and those with other departments, vendors, or the business community.

Coordinates the activities of other clerical staff in the department for telephone coverage, vacation coverage, daily break and lunch coverage, and distribution of clerical workload; may conduct meetings with other departmental clerical staff to enhance communication and discuss and clarify administrative and secretarial issues, as needed.

Creates and maintains filing systems and files for the department including vendors, departmental personnel, contracts, projects, state and federal correspondence, budget and audit, general files, and information files.

Processes departmental information; sorts, dates, highlights, and distributes to other areas of the department, as needed.

Handles emergency situations and notifies appropriate personnel for resolution.

Prepares PowerPoint computer presentations for outlines or notes.

Answers incoming telephone calls for the main department number, as needed; answers questions, resolves issues, take messages or forwards calls to the appropriate person or department.

Prepares and processes leave requests and certificates of absence for department administrators.

Coordinates travel arrangements for department administrators; prepares and processes expense reports for departmental travel.

Maintains an adequate supply of materials and supplies for the department.

Prepares and processes payroll transactions and computer personnel transactions.

Maintains electronic calendar, task list, and contact list for department using computer software.

Responsible for keeping up to date on current technology, as job appropriate, being used by the school. With the support of the school, attends training to ensure skill level in various technologies is at the level required to perform in current position.
Responsible for timely and accurate information they maintain as part of their job responsibilities.
Performs related duties as directed.
The list of essential functions, as outlined herein, is intended to be representative of the tasks performed within this classification. It is not necessarily descriptive of any one position in the class. The omission of an essential function does not preclude management from assigning duties not listed herein if such functions are a logical assignment to the position.

Marginal Functions

While the following tasks are necessary for the work of the unit, they are not an essential part of the purpose of this position and may also be performed by other unit members.
Filing.

Minimum Training and Experience

High school diploma or GED; supplemented by up to five (5) years of previous experience in more progressively responsible assignments training in an office environment, or any equivalent combination of related education, training and experience which provides the required knowledge, skills and abilities to perform the essential job functions.

Performance Aptitudes

Data Utilization: Requires the ability to calculate, compute, summate, and/or tabulate data and/or information. Includes performing subsequent actions in relation to these computational operations.
Human Interaction: Requires the ability to apply principles of persuasion and/or influence.
Equipment, Machinery, Tools, and Materials Utilization: Requires the ability to operate, maneuver and/or control the actions of equipment, machinery, tools, and/or materials used in performing essential functions.
Verbal Aptitude: Requires the ability to utilize a wide variety of reference, descriptive, and/or advisory data and information.
Mathematical Aptitude: Requires the ability to perform addition, subtraction, multiplication, and division; ability to calculate decimals and percentages; may require ability to utilize principles of fractions and/or interpret graphs.
Functional Reasoning: Requires ability to carry out instructions furnished in written, oral, or diagrammatic form. Involves semi-routine standardized work with some latitude for independent judgment concerning choices of action.
Situational Reasoning: Requires the ability to exercise the judgment, decisiveness and creativity required in situations involving evaluation of information against measurable or verifiable criteria.

Teacher - Area ESOL Resource

Qualifications:
1) Bachelor's degree in English, Elementary Education, or a foreign language with the ESOL endorsement or ESOL certification.
2) Experience as an ESOL coordinator.
3) Successful teaching experience with LEP students.
4) Successful experience in conducting and/or developing staff development activities.
5) Demonstrated ability to work with diverse groups, and effectively communicate, both orally and in writing.
6) Knowledge of current computing technologies and software applications appropriate to the

   position's job responsibilities.

Performance Responsibilities:
Essential Functions:

3.4. Administrative Staff

Name	Contact Info

3.5. Mission Statement

The mission of Discovery Education Services, Inc. is to execute the instruction of math-science curriculum with the help of proven successful methods in a stimulating and supporting environment with a special emphasis on reading to prepare the entire student body to their maximum potential in these subjects so that on this basis they will get the most out of their education which is the key for future success.

3.6. Attendance

Florida Law requires that a child from the age of five to sixteen attend school on a daily basis. In order to participate in an after school extracurricular activity, including music performances, plays, etc., students must arrive in time to be counted present for the school day.

3.6.1. Absences and Tardiness

The School recognizes two kinds of absences and tardiness: excused and unexcused. Please read through the definitions of each carefully so that you understand what you and your parents' or guardians' responsibilities are. Also, you need to be very aware of your responsibilities regarding homework, quizzes, and tests when you have an excused absence and the consequences for unexcused absences.

3.6.2. Excused Absences

The School accepts only the following as excusable reasons for absence from school. Parents or guardians must notify the school any morning their child is not attending. The excuse shall be submitted to the attendance office and filed as part of the student's school record. An excuse for absence from school may be approved for one (1) or more of the following reasons or conditions:

- Personal Illness: Your parent or guardian must call the school each morning you are home ill. When you return to school, you must bring an explanatory note from your parent or guardian. The school may require a doctor's confirmation.

- Illness in the Family: Your parent or guardian must call the office to explain the situation and estimated time of absence. When you return to school, you must bring an explanatory note from your parent or guardian.

- Quarantine of the Home: Your parent or guardian must call the office to explain the situation and estimated time of absence. When you return to school, you must bring an explanatory note from your parent or guardian. Such an absence is limited to the length of the quarantine as fixed by the proper health officials.

- Death of a Relative: Your parent or guardian must call the office to explain the situation and estimated time of absence. When you return to school, you must bring an explanatory note from your parent or guardian.

- Religious holiday

3.6.3. Makeup-Work for Excused Absences

An absence from school, even for several days, does not excuse you from responsibilities in the classroom on the day you return. If you have an excused absence, you will be given the same number of days that you were absent to make up missed work. To be eligible for make-up work, you must show each teacher the "excused absence slip." On the day you return to school, it is your responsibility to find out what work is required and when the work needs to be completed.

If you are absent for school-related reasons or for an anticipated or planned absence, make arrangements with your teacher(s) for assignments prior to your absence. For students with excused absences, make-up tests will be scheduled at a time designated by the teacher. It is the students' responsibility to take the test at that time. If you fail to do this, the teacher is not obligated to set another time for the make-up. If you fail to make up a test without making other arrangements, the teacher may decide not to give you the test.

3.6.4. Unexcused Absences

An unexcused absence does become part of a student's school record. You will be marked for an unexcused absence if you:

• Fail to bring a written note within two school days following an absence,

• Leave school without signing out of school at the office,

• Are absent from class without permission - including walking out of class,

• Are absent from school without parental permission,

• Get a pass to go to a certain place but do not report there, and/or

• Are absent for reasons not acceptable to the administration, such as oversleeping/missing the bus, babysitting, shopping, etc.

3.6.5. Makeup-Work for Unexcused Absences

If you have an unexcused absence, your grade(s) in a class or classes will be affected in one of these ways. You may not make up work following an unexcused absence. Unexcused absence may result in an "F" or "zero" for the day in each class missed. Teachers are not obligated to allow you to make up quizzes or tests but may choose to do so.

3.6.6. Truancy

Truancy means that a student is not excused and absent from his or her assigned location without the knowledge of a parent. The School shall consider any student truant if he/she is inexcusably absent from his/her assigned location without the knowledge of a parent. Truancy shows a deliberate disregard for the educational program and is considered a serious matter that will have immediate consequences. If you are truant, no credit will be recorded for work you missed as result of truancy. A record of the truancy will be entered into your record file. A conference with your parents will be held.

3.6.7. Habitual Truancy

The School will consider a student a "habitual truant" when, in spite of warnings and/or his/her parent's efforts to ensure attendance, he/she has accumulated during a semester ten (10) total unexcused days. When the total of unexcused absences exceed more than 5 days The School will refer the student to Broward County Social Worker.

3.6.8. Tardiness

Tardiness to school and to class – whether the result of oversleeping, missing the bus, car problems, baby-sitting, athletic workouts, socializing or lingering in the halls is unacceptable. If a student is tardy to school three times in one semester he/she will be assigned to detention—each time he or she achieves three tardy.

3.6.9. Excused Tardiness

You must have your parent or guardian call the office and write an explanatory note if you arrive late to school. You must report to the office when you arrive. If you fail to do this, you will receive an unexcused tardy. Only three excused tardy explanations will be accepted per student each school year. All subsequent tardy notices will be registered as unexcused. Oversleeping or car trouble is NOT a legitimate excuse for tardiness.

3.6.10. Unexcused Tardiness

If you arrive at school late but without a note, report to the office to check in. You will get a "late slip" for admittance to class. You will have two days to bring in a note to change this to an excused tardy providing that the three excused tardy limit has not been achieved.

3.6.11. Class Tardiness

Tardy's to school are handled by way of lunch detention for each 2nd offense. Three lunch detention for school tardiness, which amounts to six (6) tardy's, will result in one day of ISS. If you are late between classes, you will NOT be permitted to enter the classroom. Late students must report to the school intervention room for one class period. You are responsible for making up work you miss due to tardiness. While assigned to the intervention room you will be required to complete assignments assigned by the intervention teacher. Being late to class three times in one quarter will result in an assignment to detention. On the forth late charge you will be assigned to one day of ISS, on the fifth late charge two days of ISS, and on the sixth late charge three days of ISS. On the seventh late charge, you will receive OSS.

3.6.12. Checkouts

Photo ID is required to check a student out of school.

3.6.13. Communication with School Personnel

It is important that the school officials are able to contact parents at any time; therefore, it is necessary that these officials have parents' home and business phone numbers on file.

3.7. Code of Conduct and Discipline Plan

3.7.1. Due Process and Student's Rights and Responsibilities

All students at The School are entitled to the rights guaranteed by the United States Constitution and Bill of Rights, and their rights will not knowingly be denied by the required code of conduct or by any disciplinary actions taken by the school. Any student who exhibits any of the Unacceptable Student Behaviors listed in this handbook or added to this list at a later date will suffer immediate consequences. These consequences range from notification of parents, detention, and emergency removal from a school activity to suspension, recommendation for expulsion to the School Board of Broward County, and criminal prosecution. In all instances, The School's policies and procedures governing due process for suspensions and expulsions will follow School Board of Broward County and state policies. All students at The School have the right to feel physically, emotionally, and intellectually safe. Therefore, if at any time you feel you are the subject of harassment, hazing, threats, or other intimidating behavior, you should immediately speak to an administrator about the problem. The situation will be investigated as soon as possible. All reports like this will be kept completely confidential. Similarly, if you are concerned about the safety of a student who seems to be the subject of harassment, hazing, or threats, you should immediately speak to an administrator about the problem. The situation will be investigated as soon as possible, and reports will be kept completely confidential.

3.7.2. Individual Actions

It is expected that every individual will accept responsibility for his/her own actions, whether intentional or unintentional. Often harm caused to other persons or their possessions is unintentional or the result of careless behavior. This, however, does not excuse or diminish the personal responsibility of the student (and/or his/her parent) to make appropriate restitution. When known and verified by an administrator, any harm caused to another will be reported to parents. The School, its employees, nor the board, assumes any liability for the intentional or unintentional harm caused by any student to another individual or his/her possessions.

The School has as its goal to help every student fulfill his/her intellectual, social, physical and emotional potential. Everything in and about the school has been designed to create an orderly and distraction-free environment in which all students can learn effectively and pleasantly. To foster this kind of learning environment, The School administrators and teachers

shall not allow the following behaviors during school, on school property, or at any school-sponsored activities.

Our ultimate goal is to develop in students a sense of responsibility and self-discipline. Firm but fair is the basis for this school wide discipline program. Guidelines are provided in order to foster mutual respect and cooperation within the school setting. The School takes seriously its responsibility to educate its students in safe and drug free school where they are free from fear of harm or intimidation. Weapons, drugs and gang activity will not be tolerated. Students who violate The School rules or local or state laws related to these offenses will be suspended from school or will be recommended to the Broward County Public Schools to be considered for expulsion. Violators will also be reported to police and may be arrested. These rules apply to all students at school or school-sponsored activities including field trips and on buses, athletic fields, stadiums, parking lots, official school bus stops, and other sites used for school-sponsored activities.

3.7.3. Conduct Information

It is our belief that good discipline is one of the cornerstones of a good education, and that to ensure good discipline; close and cooperative relationship must exist between the home and the school. The policy developed provides close communication with parents at the onset of discipline problems, so that together we can find alternatives for students so they can experience success in relationships at home and school.

For this discipline program to be successful, students must make choices for themselves and be responsible for their own behavior as well as for their academic performance. Students who make poor choices cannot and should not place blame on the environment, parents, the school, and/or peers. While the school will help students develop good decision-making skills, ultimately, the future is determined by each student's own actions. The procedures in the discipline program will be followed in a fair and consistent manner.

Certain forms of misconduct or disobedience of classroom, school, or bus rules and Board of Education policy by students make it necessary for disciplinary action to be taken. This misbehavior may occur at school, on the way to and from school, or at any school-sponsored activities.

Violations

Discipline violations will result in referrals to the office for disciplinary action. The final determination of consequences will be made by the principal or designee. Most consequences for violations will be teacher detention, administrative detention, in-school or out-of-school suspension.

Offenses include but are not limited to:
1. Horseplay, wrestling, pushing, scuffling, clowning, acting out
2. Verbal exchanges
3. Excessive talking
4. Throwing objects in class
5. Pencil pops, spit balls
6. Hall disruptions such as yelling and running
7. Name calling

8. Possession of hats, sunglasses, curlers, radios, electronic games, water guns, skateboards, etc.(These items will be taken up and kept by the appropriate assistant principal until they are picked up by the parent.)
9. Chewing gum
10. Inappropriate behavior in the lunchroom (loud talking, being out of seat, playing in food, cutting in line, failure to return tray, failure to clean up, throwing food, etc.)
11. Eating in unauthorized areas
12. Public displays of affection
13. Unexcused tardiness
14. Being in the hall without a pass or in an off-limits area (teachers' workroom, conference room, etc.)
15. Disruptive behavior
16. Possession or use of drugs, alcohol, controlled substances or related products or paraphernalia
17. Failure to serve public or private detention (double detention assigned)
18. Fighting (exchange of blows with intent to do bodily harm) or provoking a fight
19. Forgery or altering school form/documents
20. Leaving campus without permission
21. Obscene or inappropriate language, gestures, or acts; profanity; disrespectful/abusive gestures and or language
22. Smoking, dipping, or possession of tobacco-related products such as lighters, matches, or papers
23. Theft, attempted theft, or possession of stolen/lost property
24. Truancy from school
25. Cutting class (being more than 5 minutes late to class without a legitimate pass) 1st occurrence = 2 days public detention
26. Leaving class or designated area without permission
27. Unexcused tardiness to school or class (1st referral = 2 day public detention)
28. Failure to identify oneself or giving false identification
29. Selling items on school property or enroute to or from school
30. Unauthorized possession of a beeper or pager
31. Gambling, including flipping and matching coins
32. Acts of bigotry
33. Violation of state or federal laws or Board Policy
34. Willful or dangerous acts (Examples: firecrackers, stink or smoke bombs, and throwing objects such as bottles or rocks with intent to do harm)
35. Insubordination (defiance of authority or failure to follow directions)
36. Refusal to follow directions or school rules
37. Vandalism
38. Trespassing
39. Dress code violations
40. Extortion
41. Unauthorized possessions of dangerous instruments
42. Promiscuous/immoral acts
43. Sexual harassment

44. Verbal abuse
45. Providing false information, lying
46. False fire alarm
47. Bus misconduct
48. Cafeteria misconduct
49. Technology tampering
50. Being in an off-limits area
51. Dangerous acts
52. Continuous disregard of school rules
53. Deadly weapon
54. Verbal threats or physical assaults of staff members
55. Student assault or battery upon a student or school employee
56. Use of a dangerous weapon/dangerous instrument to intimidate or injure
57. Substantial damage to personal or school property
58. Issuance of a bomb threat
59. Arson
60. Sale, attempted sale or distribution of alcohol, controlled substances, and/or controlled paraphernalia
61. Chronic use of alcohol or controlled substances
62. Use of any weapon, mace, or pepper gas

3.7.4. Conduct Guidelines Outside the Classroom

Minor misconduct reports issued to students outside the classroom (examples may include but are not limited to inappropriate peer interactions, inappropriate hallway behavior, late to class, horseplay) will be handled by the issuance of citations. Any The School teacher or administrator who observes a student engaged in inappropriate behavior outside the classroom can issue a citation. Three citations issued due to inappropriate student behavior exhibited in the following areas, will result in an office referral. Two office referrals (or, a total of six citations) in one semester, due to inappropriate behaviors exhibited in the following areas will result in a student being escorted to transition locations by a designated staff member.

In the Cafeteria
1. Return disposable trays, trash and debris to trashcans.
2. Keep tables, chairs, and floors clean.
3. Push chairs back after eating.
4. Talk in a normal voice (classroom voice). Even less than that voice.
5. Keep lines orderly, meaning no pushing, running, or cutting in lines.
6. No loitering.
7. Keep hands, feet, personal belongings and food to yourself.
8. No backpacks or books allowed.
9. Students who mutilate or deface school property will be fined an amount necessary for covering the cost of restoring the damaged property. Such students will also receive appropriate disciplinary action.

Group Assemblies

Team or grade school assemblies are held for the benefit of the students and the faculty. Courtesy will be shown to those in charge of and participating in the program.

Technology Labs and Classrooms

Students should respect all of the technological equipment. Any mishandling or tampering with computers or systems may result in losing computer privileges at school. In addition, disciplinary action, including suspension, may occur for situations considered serious by the school administration. Any damage, requiring repair to hardware or software will result in financial charges being assessed. Students shall not alter or attempt to alter school or private property including technology hardware and software. Students may not bring computer software to campus to be used on school computers without prior approval of the school administration. Students should not bring food items or beverages into the classroom setting; this includes candy and gum.

Halls, Lavatories, Stairwells, Media Center

Students are not permitted in the halls during class periods unless they are accompanied by a teacher or have a hall pass from an authorized staff member. Students who are found in the halls without passes will be given an administrative referral. Hallways, stairwells, and lavatories are areas used by all members of The School. Because everyone uses these areas, there are rules of conduct that all students must follow.

1. You may not loiter in the halls, lunchroom, lavatories, or media center.
2. You may not eat in halls, and lavatories.
3. You may not run in the halls, lunchroom, and lavatories.
4. You may not use any profane or vulgar language while in these areas.
5. You may not yell, scream, hit lockers or make excessive noise while in these areas.
6. You must do your part to keep these areas clean and safe.
7. Do not leave belongings on the floor outside your locker.
8. Make sure you clean up after yourself and appropriately dispose of all trash.
9. Report any leaks, spills, or other problems in the lavatory to a teacher or the office.
10. Do not roughhouse, push, or wrestle.

Transportation

Conduct in the vehicles and other means of transportation is expected to be the same as the classroom. Safety depends on the skill of the drivers and nothing should be done to distract him or her. Students may be denied bus privileges when behavior is inappropriate. All students' are expected to follow rules and procedures listed in, School Bus Safety Rides With You, a brochure given to each student at Open House.

Riding the bus is a privilege. Students who wish to enjoy this privilege must abide by the following rules and regulations in order to help to ensure safe and orderly bus transportation. Students receiving four or more bus conduct reports or students who engage in severe bus misconduct, may be suspended from the bus for 1 to 10 days or recommended to The School board for bus expulsion. Parents will be notified of student bus violations. Failure to abide by these safety procedures will result in the following sequence of events:

• First Referral - Student will receive consequences as determined by The School.
• Second Referral - Student may be suspended from riding the bus for one (1) to three (3) days with parent contact or conference requested.
• Third Referral - Student may be suspended from riding the bus for one (3) to three (5) days with parent contact or conference requested.
• Fourth Referral - Student may be suspended from riding the bus for three (6) to five (10) days with parent contact or conference requested.
• Fifth Referral - Student may be suspended from riding the bus for ten (10) days in addition to consequences determined by The School and may be referred to a disciplinary hearing. A conference may be requested with the school official or administrator, parent or guardian, bus driver, and bus supervisor.

Bus Conduct Expectations:

1. No out of seat behavior
2. No physical violence
3. No unauthorized physical contact with others on the bus
4. No bullying
5. No profanity
6. No disrespecting the bus driver
7. No throwing objects
8. No unnecessary noise
9. No vandalism
10. No tampering with emergency doors
11. No placing of body parts outside of windows

3.7.5. During an Emergency

Fire, intruder, and tornado drills are held at different intervals throughout the school year. Students must follow their teachers' instructions and go to designated areas as quickly as possible. Students must not talk, run or push. A signal bell will be given for returning to class.

3.7.6. Classroom Management Procedures

The School will use School-wide Student Management Plan in which all faculty and staff work in a cooperative systemic effort to encourage a successful learning environment. This plan is designed to ensure an effective learning atmosphere for all students aimed at curtailing any minor inappropriate behaviors that disrupt the learning environment. The structure of the Discipline Plan consists of three main parts; Rules: What the expected behaviors are; Consequences: What the student chooses to accept if a rule is broken; and Rewards: What the student receives for appropriate behavior.

3.7.7. School-Wide Rules

1. Respect yourself and others.
2. Follow directions the first time.
3. Be prepared for each class.
4. Keep yourself to yourself.
5. Transition quickly and quietly.

3.7.8. Teacher Intervention Process for Misconduct

The teacher in response to MINOR disciplinary problems in the classroom will take the following steps when students fail to abide by the established behavioral expectations:

Step 1. Verbal Redirect
Step 2. Verbal Warning
Step 3. Isolation in Classroom

If after the teacher has worked through and documented steps 1-3 of the School-Wide Classroom Management Plan, the inappropriate behavior persists, a referral to the Assistant Principal is submitted;

Step 4. Office Referral

Parents will be notified each time their student reaches step 3, and step 4 on the discipline cycle, and immediately in the case of severe disruptions (listed below). Teacher detention is assigned each time a student reaches step 3 in the management process. Teacher detention will not be noted on a student's permanent discipline transcript UNLESS this offense is repetitive and consequently results in an office referral. Students who are assigned to serve teacher detention three times in one semester will receive an office referral, the consequence of which is one day of ISS, two days of ISS on the forth assignment to isolation, three days of ISS on the fifth assignment to isolation.

Students who violate The School school rules will also be required to make a face-to-face and/or written apology to all persons affected by his/her behavior, as this is critical, The School believes, to engendering youth responsibility.

3.7.9. Intervention Room

There are some types of behavior, which are very disruptive to the learning environment. Consequently, the 3-step classroom management process as detailed above cannot be utilized. Therefore, in such situations, the teacher will first warn the student. If the warning does not result in a desired effect, the teacher then would refer the student to The School's intervention specialist where the student will remain for the remainder of the class period. If you receive three misconduct reports in one semester you will be assigned one day of ISS, and a formal discipline referral. If you receive a forth misconduct report you will be assigned two days of ISS. If you receive a fifth misconduct report, you will be assigned to serve three days of ISS. If you receive a

sixth misconduct report, you will be referred to the School Board of Broward County for expulsion due to repetitive misconduct.

3.7.10. Severe Disruptions Policy

Serious violations as outlined below should be immediately reported to the administration. Such offenses are considered serious and therefore, the consequences for such action may result in immediate short term or long term suspension pending a board recommendation to School Board of Broward County for hearing for expulsion.

Examples of Severe Misbehavior:

• Fighting
• Absent With-Out Leave (AWOL)
• Profanity/obscenity
• Weapons, drugs, alcohol, smoking
• Robbery, involvement in, knowledge of, or an accomplish to
• Severe or repetitive disruptions
• Assault and/or battery on faculty, staff members, or student
• Defacing and/or destroying property
• Gross Insubordination
• Stealing or extortion
• Forgery of passes, excuses, or any other forms
• Sexually offensive behavior

3.7.11. Consequence

Once an office referral has been submitted, the administrator will determine the consequence of any unacceptable student behavior. The parent/guardian will receive notice of student's discipline problems and the consequence administered for any infraction resulting in disciplinary action that will be filed on the student's discipline transcript. The consequence may be one of the following according to the seriousness of the misbehavior, not necessarily in this order:

• Withholding of Privileges
• Administrative Warning
• Student/Administrator Conference
• Student/Teacher Administrator Conference
• Student/Teacher/Parent Administrator Conference
• Weekly Behavior Report
• Parent Shadowing
• Temporary Office Assignment
• Lunch Detention
• Administrative Detention
• In School Suspension

• Out of School Suspension
• Option to Withdraw
• Recommendation for Expulsion

3.7.12. Description of Discipline Options

Withholding of Privileges Student may be denied an opportunity to partake in school-related activities and/or events as deemed appropriate by an administrator.

Weekly Behavior Contract
A weekly behavior contract is simply an informal tracking tool used by the school to monitor a student's day-to-day behavior and academic progress until such time that satisfactory results have been achieved. The student's teachers complete this report each day, the administrator of discipline reviews it before dismissal, and his/her parents signed and returned it to school for filing. This process is not recorded on the student's discipline transcript.

Parent Shadowing
Parent shadowing is a very effective tool that is used when other informal and/or formal discipline measures have been ineffective. When parents visit the school and "walk in their child's shoes," they are often better equipped to understand and assist their child and the school in resolving the identified problem.

Office Assignment
An office assignment is a period of time not to exceed 3 1/2 hours where a student may be required to complete classroom work in a supervised place designated by an administrator. This is an informal disciplinary action that must have The School administrative approval.

Teacher Detention
A teacher will assign detentions to students whose behavior does not improve after an initial warning and one-on-one discussion. Parents will be sent a notification when a detention is assigned. Should a student fail twice to appear for a teacher assigned detention, he/she will be assigned to administrative detention. Students who are assigned to teacher detention three times in one semester will receive an office referral.

Administrative Detention
An administrator may assign administrative detention to students who fail to comply with school rules or fail to report to an assigned teacher detention. Parents will be sent a notification when administrative detention is assigned. All administrative detentions are documented on the student's permanent discipline record. Failure to appear for administrative detention will result in the student being assign to in-school or out-of-school suspension. Students assigned after school detention must be picked up no later than 5:00 at the front of the school.

In-School Suspension
In-School Suspension is a formal disciplinary action that can only be assigned by The School administrative staff and requires written correspondence to parents. In school days of suspension

may increase on successive occasions where it becomes necessary for the same student to be placed in in-school suspension. All students under suspension are prohibited from participating in after school activities and therefore required to leave the school campus immediately upon dismissal. In-school suspension assignments will be notated on student's discipline transcript.

Out-of-School Suspension

Out-of-School Suspension is a formal disciplinary action that can only be assigned by The School administrative staff and requires written correspondence to parents. Out-of-school suspension may increase on successive occasions where it becomes necessary for the same student to be suspended from school. A meeting between a parent and an administrator is required prior to any out-of-school suspended student's return to The School.

All students under suspension are prohibited from participating in after school activities and therefore required to leave the school campus immediately upon dismissal. In-school suspension assignments will be notated on student's discipline transcript.

Expulsion

Expulsion is a formal disciplinary action that can be recommended to the School Board of Broward County by The School board after receiving a recommendation from The School administrative team due to the student's involvement in a serious discipline offense or the student's involvement in repetitive discipline offenses, which are clearly defined in the Broward County Public Schools' Code of Conduct. A written correspondence to the students parents containing the date and time of a board hearing will be mailed to the parents within ten days of the suspension.

Reward System

Group and/or individual rewards will be planned for the end of each nine-week period for The School students who have been assigned to detention or the intervention room, or have not receive an office referral. Rewards may include: a letter or certificate of commendation to a student's parents complimenting the student's attributes; citizenship award or nomination, homework passes, positive phone call, movie pass, smorgasbord lunch, field day, field trip, music in the lunchroom, special assembly, social activities, etc.

3.8. Dress Code

Students are expected wear The School uniform at all times and to dress and groom themselves in such a way as to reflect neatness, cleanliness and safety. All students should dress appropriately so as not to disrupt or interfere with the educational program or the orderly operation of the school. The principal or other duly authorized school official shall determine whether any particular use of the school uniform is in a violation of the spirit and/or the intent of this school uniform policy. Students and parents are expected to honor the uniform code in order that valuable school time is not spent examining student attire to determine appropriateness.

Students who violate the uniform code will NOT be allowed to call home for an appropriate change of clothing. The student will be permitted to change clothing if he/she has a uniform available at school. Otherwise, the student will be isolated in the ISS room for the remainder of the school day. The student's parent will be notified of this violation. If a student comes to

school on a second occasion inappropriately dressed, he/she will be isolated in the ISS room for the remainder of that school day and a parent conference will be requested. A student who violates the uniform code on the third occasions will be suspended from school for one day, and upon his/her return a parent conference requested wherein the student will be placed on a "Uniform Code Violation," contract. A fourth uniform code violation will result in a suspension pending a board hearing for possible recommendation to the Broward County School Board for expulsion. Inappropriate attire jeopardizes the instructional climate and therefore, will not be tolerated.

Guidelines for clarification are as follows:

1. Clothing should be neat and clean.
2. Clothing may not be worn inside out or backwards.
3. Hats, caps, curlers, headscarves, bandanas, sweatbands, chains, sunglasses, tennis skirts, gloves, and coats are not to be worn during school hours.
4. All t-shirts must be in good taste (no suggestive wording or illustrations or advertisements for items which are illegal for middle school students - i.e., alcohol and tobacco products, etc.). Sleeveless shirts NOT allowed.
5. Shorts and/or skirts must align with the tip of your middle finger when your arms are at your side.
6. Pants should be worn at the waist and not sag. Pants should also not fit too snuggly.
7. Athletic type shorts, such as those used for biking, are not permitted. P.E. uniforms are permitted only in P.E. classes.
8. Clothing with rips, tears, holes or frayed edges is considered inappropriate for school.
9. Shoes must be worn at all times. Proper dress does not include bedroom slippers or flip-flops.
10. Undergarments must not be exposed.
11. Clothing that is excessively revealing, such as short mini-skirts, short-shorts, tank tops, loosely fitting, low-cut blouses or halter tops, mesh shirts, or shirts exposing the midriff are not to be worn to school.
12. Hair, face, and body paint are inappropriate for school.
13. Jewelry and accessories should be appropriate for school and not attract undue attention or pose a safety risk.
14. Cosmetics make-up should be appropriate for school and not attract undue attention.
15. Extreme hairstyles, such as Mohawk cuts, are not permitted.

3.9. General Information

3.9.1. Book bags

Students may use book bags to transport only school materials to and from school. During the school day, however, The School requires that all book bags remain in students' lockers. Roller bags are NOT ALLOWED.

3.9.2. Emergency Drills

Regular emergency preparedness drills will be held throughout the school year so that students will be trained to act properly in an emergency. These drills will include fire, tornado, and other crisis emergency drills. A comprehensive emergency preparedness plan is on file in the office.

3.9.3. Hall Passes / Student Agenda

All students in the hall while classes are in session must have an agenda. There is a section for hall passes at the bottom of each page. Teachers will issue hall passes to students who have justifiable reasons for leaving the room.

3.9.4. Lockers

Each student will be assigned a locker for his/her individual use at The School. This locker is for storing books, coats, and personal items necessary for school. Students should not bring valuable items from home. The School will not be liable for personal items you leave in your locker or bring to school with you. To keep your school items safe, we strongly advise you to keep your locker private. Do not trade lockers with another student. Do not let another student share your locker. It is your responsibility to see that your locker is kept locked and in order at all times. You should report any damage, vandalism or non-working condition of your locker to the office. If you do not report vandalism, damage or the non-working condition of your locker, you will be held responsible for it. Please remember that your locker is school property and remains at all times under the control of
the school; however, you have full responsibility for the security of your locker and what is in it. Lockers must be kept neat at all times. School officials may make inspections. No item considered dangerous by the administration may be kept in the lockers and will be removed if found there. This includes glass or any other object that may be potentially dangerous. Students attending The School should not expect privacy of the contents of their lockers, desks, or other school property. Due to the small size of The School lockers, roller book bags or extra large book bags are not advised. The cost of renting a school locker is $5.

3.9.5. PE Lockers

The PE department on a rental basis provides lockers and locks. Students are required to lock up all valuables in their own lockers. Students will be charged $3 for each lost lock. Lock combinations will be given only to the persons assigned to the locker. The PE staff or the school administration without prior notice may make routine locker checks. Every student must have a combination number for his or her locker. Lockers are provided for the safekeeping of personal

property, remain the property of the school, and may be checked by school administrators on a random basis throughout the year without prior notice.

3.9.6. Lost and Found

Personal items that are found should be turned into the front office. Students should check with the front office secretary for lost articles. Unclaimed item will be donated to charity every month after students are informed about the deadlines to check lost and found items .

3.9.7. Payment by Check

Parents may take care of monetary obligations by cash or check. Checks should be made payable to the school. There will be $25 charge for any check returned to the school by the bank.

3.9.8. Telephone Calls

Students may not be called from class to talk on the telephone during school hours, nor are they allowed to make outgoing calls except in the most necessary circumstances. As part of an effort to teach responsibility, students are discouraged from calling home for forgotten items. Students must have written permission from a classroom teacher stating a reason in order to use the office phones between 8:20 and 5:00. The school does not have sufficient phone lines to accommodate student phone calls at the end of the school day. All arrangements regarding after school activities must be made before the student leaves home in the morning. Calls of an emergency nature, that may involve the interruption of a class to deliver a message to a child, must be directed to the principal or assistant principal for approval.

We ask that all students please come to school in the morning clearly knowing whether their parents expect them to ride the bus, or be picked up by car in the afternoon. We also ask that parents please know whether or not their children are planning to stay for an after-school activity.

3.9.9. Visitors to the Building

All visitors must first check in at the main office and wear a visitors badge before going to other parts of the building.

3.9.10. Classroom Observations

The School value the concept of parents as partners in education. Parent and community support and assistance are vital in all facets of the school program. Parents of currently enrolled students or prospective students may wish to observe the classroom setting or perhaps volunteer to serve

as an instructional partner in the classroom. Related requests are welcomed. Contact the office for more information.

3.9.11. Parent Participation

There are a number of opportunities at The School for which a parent can volunteer. Among these are jobs as library assistants, cafeteria aides, clinic volunteers, room representatives, and instructional partners. Contact the office for more information.

3.10. Health and Safety

3.10.1. Illness and Injury

The School will have a school nurse or first-aid-trained-professional available to discuss or assist with medical problems or concerns. Unless you are ill, you must make appointment in advance with the nurse. Please follow these three rules if you become ill or are injured during the school day. If the nurse is not available, you should report to the secretary. If you do not inform the office and simply miss class, it is an unexcused absence.

3.10.2. Medication Policy

Medication should not be brought to school unless it is essential to the health of the student. If a student must take medicine at school, these procedures must be followed: The medication to be administered by designated school personnel must be sent directly from the pharmacy or physician's office or brought to school by the student's parent/guardian. The school must receive a Medication Administration Directions Form signed by the student's physician and parent/guardian.

On the medication container must be clearly printed the following information:

Student's Name
Name of the medication
Dosage
Time the medication must be taken.
Bring in only the amount of medication that is needed for a school day. In the case of prolonged need, send in the amount for a clearly specified period such as one week or one month. Extra medication will not be sent home with a student. All medication will be kept in a secure location in the clinic.
Students are not allowed to carry any medication with them to school. Aspirin, Tylenol, and other patent drugs are not available from school. Students may carry and administer their medication if these two conditions are met:
It is warranted by a potentially life-threatening condition and advised by their physician AND A Medication Self-Administration Form is on file in the office signed by the student's parent physician, and the principal.

3.11. Instructional Program

3.11.1. Grade Reports

E-mail grade reports are sent home each week and a progress report at the four-week mark of each grading period. Parents should contact their child's teacher if there are any questions concerning grades recorded or information contained on the child's report card. Parents can also see their children's academic improvement, due assignments and projects through The School connect. Parents will be provided username and password. Parents can connect to The School Connect at school website.

3.11.2. Grading System

Students receive progress reports throughout the semester final grades for core academic courses are received at the end of the semester (18 weeks). The School Board approves the grading scale. Grades are reported numerically on all progress reports and report cards.
GRADING SYSTEM FOR STUDENTS IN GRADES 6-12:
A (Outstanding Progress)* 90 - 100%
B (Above Average Progress)* 80 - 89%
C (Average Progress)* 70 - 79%
D (Lowest Acceptable Progress)* 60 - 69%
F (Failure) 59% and below
S (Satisfactory Progress) for elementary report cards**
N (Needs Improvement) **
P (Pass) ***
NG (No Grade/Insufficient Enrollment)****
I (Incomplete) All grades of "I" (Incomplete) shall be made-up as soon as possible but no later than the end of the next grading period or a failing grade shall be assigned.
* Note: Teachers may use plus (+) and minus (-) symbols as part of this grading system with the letter grades in reporting to parents.
** Note: The grades of S or N shall be used on the elementary report cards in handwriting, art, music, and physical education for grades 2-5 and in social studies and science/health for grade 2.
*** Note: This grade is used in Extended Year Recovery Program, if offered.
****Note: For secondary schools the alphabetic letter "O" is recorded on the scan document and report card screen.

3.11.3. Conduct Scale

The teacher will record conduct grades, which is based on student behavior in each subject as follows:

E = Excellent
S = Satisfactory N = Needs Improvement
U = Unsatisfactory

3.11.4. Homework

Homework is an essential part of your successful educational program at The School. Doing homework will help you develop many valuable skills such as good study habits, time management, responsibility, and perseverance. Teachers will assign homework that will foster individual learning and growth and that is appropriate for the subject area. Homework is part of all students' regular evaluations. It is your responsibility to complete and turn in homework on time. In case of conflict regarding homework assignments the teacher's record is final. If you or your parents have questions about homework, immediately contact the teacher who assigned it. Teacher's e-mail is available and weekly assignments are posted at our web site. Teacher homework hotline numbers can be accessed from The School website.

The School HOMEWORK POLICY:

Homework will be given regularly by The School teachers and students are expected to completed homework assignments. The following policy applies for students who routinely fail to do so: teachers will document the incident on the School Non-completion of Homework Log in the following manner:

1. Verbal warning (the missing homework assignment will be accepted one day late)
2. Teacher/parent discussion initiated and documented by the teacher.
3. Parent/administrator conference request forwarded to the AP of instruction.
4. Office Referral to AP of instruction for Repetitive Negligence with regards to the Homework Policy

3.11.5. Consequences

Once an office referral has been submitted, the instructional administrator will determine the consequence for the student behavior.

On first referral the following consequence may apply:

• In School Suspension
• Withholding the Privileges
• On second referral the following consequences may apply:
• Out of School Suspension (1 Day)
• On third referral the following consequences may apply:
• Out of School Suspension (3 Day)
• On fourth referral the following consequences may apply:
• Option to Withdraw
• Recommendation for Expulsion

236

3.11.6. Promotion

At the end of each academic year students who have made satisfactory progress in academic subjects are promoted to the next grade level. In cases where promotion is questionable, the school notifies parents in advance and a cooperative/partnership stance implemented to ensure student success.

Middle school students must have a passing grade in language arts, mathematics, social studies, and science.

Promotion of students for grades K thru 12 will be based on the following criteria:

1) A minimum final grade of "D" in all core courses (language arts, math, science, and social studies) and an annual overall GPA of 2.0.
2) Teacher judgment based on adequate documentation, that the student has met the course objectives and intended outcomes for all courses.
3) The student's final grade as determined by his/her nine weeks grades, the final exam, and the appropriate district assessment if applicable.
4) Compliance with the school attendance policy.
5) Students who fail to meet promotional requirements may be eligible to fulfill course requirements in the Extended Year Recovery Program, if offered, as determined by the School Board.

3.11.7. Recognition

Students are recognized on a regular basis and rewarded for accomplishments. The principal's Honor Roll students achieving an academic average of 95, or above will be listed on the principal's Honor Roll. Honor Roll-students achieving an average of 90, or above in all subjects will be recognized as Honor Roll Students. Achievement Roll-students achieving an average of 85, and above in all subjects will be recognized as Achievement Roll Students.

3.11.8. Textbooks

Textbooks for pupils will be furnished by The School. Restitution for lost and/or damaged textbooks or related materials and supplies will be required BEFORE a second text or additional materials will be made available to a student. Students who owe money for lost or damaged texts or materials will be permitted to use a text during classroom instruction however; they will not be permitted to take the text or materials home for homework purposes. Report cards may also be withheld until textbooks fees are collected.

3.11.9. Preparedness for Class

Students must bring the needed materials, as identified by each teacher, to class each day. Failure to do so will result in an immediate assignment to the intervention room. Three charges of being unprepared for class will result in detention, the forth will result in one day of ISS, the fifth

charge will result in two day of ISS and the sixth will result in OSS pending a board hearing for recommendation to The School for expulsion.

3.12. Services for Students

3.12.1. After-School Activities

A limited number of extracurricular clubs and/or enrichment activities will be offered for students. A brochure describing these activities will be available in the school office. Nominal fees may be charged for participation in order to cover the cost of materials and/or supplies. In order to participate in any after school extra-curricular activity, including music performances, plays, etc., students must arrive in time to be counted present during the school day. Students serving in-school suspension may not participate in after school activities on the day(s) the suspension(s) is served. There is no better way for students to enrich their education than by taking part in clubs and after-school activities or working with a teacher. These opportunities will allow you to explore things you already enjoy and to try other areas that sound interesting. If you stay for an after-school activity, you will be expected to follow these rules. If you do not follow these rules you will be banned from after school activities.

- You must be with a teacher or other staff member at all times.

- You must arrange for your own transportation to arrive promptly at the end of the activity.

- You must abide by the School code of student conduct while participating in the activity.

- You may not stay after school to wait for another student.

- You must clear the school building immediately following after school activities by using the front door.

- Your school activity privileges will be cancelled if discipline becomes a problem.

3.12.2. Communications Between School and Home

Every effort will be made to ensure good communication between the home and the school. Parent may communicate directly with the school's staff members via e-mail, voice mail, written request, or by accessing the school's web page. Parents may also call the homework hotline for instructional information. A newsletter will be sent home each Friday announcing upcoming school activities and events.

3.12.3. Conferences

Parents and teachers should maintain a good working relationship to help students get the best possible education. Conferences are good communication tools. Our most important form of communication is the parent-teacher conference. The student's homeroom teacher will contact parents at some point during the first semester to arrange a time to talk on an individual basis about the student. Additional conferences may be held at any time during the school year. If you would like to have a conference with any staff member, please contact the school and arrangements will be made.

3.12.4. Counseling Services

The School will offer counseling services. The school counselor or his/her designee can help you plan and succeed in your Middle school program and help you look ahead to high school and college. The school counselor can also help with personal issues and concerns. To see the school counselor, make an appointment in advance unless it is an emergency. Your parents may call the office to arrange an appointment with a counselor. If the counselor is not available and you have a problem, make sure you speak with a teacher or administrator.

3.12.5. Field Trips

Grade level and/or team sponsored day field trips will be offered to most students. Students suspended during the semester that the trip is scheduled are not permitted to participate. Any student who has demonstrated the inability to follow rules may also be prohibited from participating. This determination will be made by the administration. Field Trips offer exciting ways to learn. The School students will have the opportunity to go on field trips at various times throughout the school year. For all field trips, you will be expected to follow these rules:

- You must bring to school the Field Trip Permission Slip signed by your parents or guardian by the specified date. No phone calls will be accepted as permission.

- You must follow the Dress Code unless otherwise specified.

- You must abide by The School codes of student conduct while on the field trip.

- Students will be responsible for the class they missed.

3.12.6. Lunch/Nutrition Program

Students may purchase a nutritional lunch in the school cafeteria or may bring their lunch from home. The cost for student lunch is announced at the beginning of school and can be paid daily or weekly. Student may purchase milk, bottled water, and other nutritional beverages at school.

Ice cream, which has nutritional value, will also be available for purchase by the student. Students needing free or reduced lunch should contact the administration.

3.12.7. Media Center

The media center is a resource center for all print and non-print materials. Media center services offered to students include assistance with research assignments and book selections.

3.12.8. School Pictures

A contracted photographer will photograph students in school sometime in the fall. Students may purchase the entire package of photos or a partial packet.

3.12.9. Special Education Services

The School recognizes that Federal law governs services to students with disabilities and it is the school's responsibility to ensure compliance with those laws. Students with disabilities will be educated in the least restrictive environment (LRE). This means that they will be placed in the setting that puts the fewest limits on their opportunity to be educated with students who do not have disabilities. The School utilizes an inclusive and holistic approach to special-education services. All identified students will receive support, remediation, modifications, and consultation services as designated within the multi-age classroom. A certified learning consultant will be available to provide consultation services to classroom teachers who serve special education students, as needed. The School shall comply with federal and state law that ensures that all students with disabilities will be provided with a free appropriate education (FAPE).

3.12.10. Student Support Team (SST)

The purpose of the student support team (SST) will be to identify and plan alternative instructional strategies for students who are experiencing academic, social, or behavioral problems. The student support team is a committee consisting of the referring teacher, the chairperson, and at least one other participant. Parents are invited to attend the SST process in their child. The SST process provides problem-solving strategies and instructional support for teachers. Questions concerning the referral process should be referred to an administrator.

3.12.11. Supervision of Students Before and After School

Teachers arrive at 8:00 a.m. Students should not arrive before 8:20 a.m. (unless transported by school bus) or remain after 3:45 p.m. unless they are in a specific activity under the supervision of a teacher. Adults will supervise those students participating in activities at times prior to 8:20

a.m. and after 3:45 p.m., for 15 minutes before and 15 minutes after the scheduled activities times ONLY. The school staff does not assume responsibility for any student remaining at the school beyond the guidelines outlined above. All students must be picked up by the end of school day. Students who are consistently retrieved late from after-school activities may be prohibited from participation. Students who are consistently retrieved late from school will be referred to the board for possible expulsion.

3.12.12. Transportation to and from School

3.12.12.1. School Buses

Transportation will be provided for students living in areas designated by the county transportation department. Students should understand that riding the bus is a privilege contingent upon proper and courteous conduct. Students are expected to follow the instructions of the driver and local school. Any student failing to do so may be denied the privilege of riding the bus. Students may not ride buses other than the one to which they are assigned, and they must get on and off the bus at their regularly scheduled stop. Any student who misses the bus on purpose will be referred to the board for recommendation to the Broward County School Board for expulsion due to safety and liability issues.

3.12.12.2. Car Riders

Students who are transported in cars should be dropped off in the designated area in front of the school. Automobiles must not drive through or park in the bus loading areas. When picking a student up at dismissal time, please use the driveway at the front of the building. The School employs a resource officer who has registered police credentials. He has the authority to issue traffic citations with fines payable to Broward County municipal government. Your cooperation with this officer is expected in order to make arrival/dismissal as safe and efficient as possible.

3.12.12.3. Walkers

The School takes no responsibility for student walkers. Due to limited sidewalks and high volume traffic in the immediate area, walking is strongly discouraged.
    Bicycles, Skateboards, Roller Blades, and Scooters
    Bicycles, skateboards, roller blades, and/or scooters, are not permitted on school property.

3.13. Family Contract (Tentative Example)

Students are expected to read and discuss the Code of Conduct and Discipline Plan with their parents/guardians and indicate both understanding and acceptance of it by returning this contract as completed and signed.

Student's Name _____ Grade _____ Homeroom _____

I/we,_____, the parent(s)/guardian(s) of the above-named student, in consideration of the enrollment of my/our child in the Broward Science Charter School do hereby agree to the following:

- I will help the school to make learning a primary occupation for my child.

- I will supervise my child's homework to ensure that all assignments are on schedule.

- I will ensure that my child is dressed according to the dress code of the academy.

- I will meet with my child's teacher as requested.

- I will volunteer to spend some time to help the Governing Board to discuss the needs of the academy.

- I will encourage my child to participate in the school-organized volunteer community activities since these kinds of activities are an important part of learning experience.

- I understand that this contract is an agreement with all other parents in the school to support the faculty, staff, and the volunteers as they work to help my child be a productive member of the community.

- I understand that the Governing Board has the authority to suspend, recommend the student to the Broward County School Board to be expelled or withdraw from the academy if the student's behavior violates the Broward County Schools' Discipline Code and/or the parents, guardian or the mentor fails to take responsibility for the conduct of the student or fails to cooperate with the academy to help in correcting the student's behavior.

- I understand that the policy of the Broward Science Charter School is to promote students on academic performance.

- I will take responsibility for the behavior of my child in the school.

• I will keep the academy informed of a phone number and address given below where I can be reached during day and or evening time hours.

• I will send my child to school healthy, clean and prepared to learn.

3.14. The School Handbook Agreement Page

Directions: After thoroughly reviewing this document, parent and student both must sign, date, and return this handbook agreement form to the student's homeroom teacher.

STUDENT

I, _____& _____ have thoroughly reviewed and agree to abide by each of the policies, procedures and expectations outlined in the Discovery Education Services, Inc. Student and Parent Handbook. I understand that failure to do so may result in me being recommended to School Board of Broward County for expulsion.

Signature (s): _____ Date: _____

PARENT (S)

I, _____ (and) _____, parent (s) of _____, have reviewed the Parent/Student Handbook with my child. I agree to support the Broward Science Charter School by volunteering at the school to the degree possible, communicating regularly with my child's teacher (s), and promoting positive educational practices at home with my child by providing ongoing supervision and guidance with homework and school related projects. Additionally, I agree to adhere to each of the policies, procedures and expectations outlined in the Broward Science Charter School Student and Parent Handbook and Family Contract.

Appendix E - By Laws of Discovery Education Services, Inc.

POLICIES OF BROWARD SCIENCE CHARTER SCHOOL / GOVERNING BOARD BYLAWS OF DISCOVERY EDUCATION SERVICES, INC.

The Governing Board of Broward Science Charter School ("Board") is committed to the education of all students appropriate to the best of their individual abilities; to a constant awareness of the concerns and desires of the community regarding the quality and performance of the School, with the Board assuming an educational leadership role; and to the employment of school personnel who, under the direction of the Principal, will see that the school maintains an outstanding position and will carry out the policies of the Board with imagination and dedication.

Additionally, the Board's specific policy and direction goals are:

- To interpret the education needs and aspirations of the community through the formulation of policies which stimulate the learner and the learning process;

- To manage the school in accordance with federal and state laws;

- To provide leadership in school in order that the goals and objectives of the school can be effectively carried out;

- To maintain two-way communication with the various persons served by the school in order to understand public attitudes and encourage community involvement with an understanding of the schools; and

- To develop and provide the data appropriate for the management functions of planning, evaluating, organizing, controlling and executing.

The Board is responsible to the people and therefore should attempt to reflect the opinion of the community. However, Board members must look to the future more clearly than is required of the average citizen. The results of many of the decisions and actions of the Board will not be realized at once, but will set the course of education for future years. The Board should fearlessly support those educational philosophies and procedures needed to promote proper education for this community based upon the needs of the students.

The founding board of directors of the Discovery Education Services, Inc. which are consist of five (5) people will automatically serve as the Governing Board members of the school initially. Vacancies in the board will be filled by individuals (parents, community members, and private entrepreneurs) who are nominated and elected by a majority vote. New elected board members will have 30 days after their election to get fingerprinting complete. If Board members fail to complete fingerprinting in 30 days, their board member status will be null and void.

A director of the Corporation may resign at any time by tendering his resignation in writing to the Corporation, which resignation shall become effective upon the date specified therein, or if no date is specified, upon receipt by the corporation at its principal place of business. Any elected director may be removed at any time if fails to comply with The School charter and the policies of the Governing Board or without a cause by a majority vote of the directors.

At its regular January meeting each year, the Board may reorganize and elect officers from among its own members. A president shall be elected in odd numbered years, and shall serve for two years. A vice president shall be elected to serve for a period of one year. The Secretary shall be elected to serve for a period of one year. Vacancies in the above mentioned offices occurring during the year may be filled by the Board at its discretion.

The current President shall yield the chair to the Principal for the election of the President. The President shall preside over the election of the vice president unless decided otherwise by a majority of the Board members.

Election procedures are as follows:

Nominations may be made by any Board member;

Vote to be taken publicly by show of hands;
If no candidate receives a majority of the votes, there will be a run-off vote between the two candidates who receive the highest number of votes; and

In case of a tie for second place, the run-off includes all second-place candidates.

The President of the Board shall preside at Board meetings and shall perform all duties as may be prescribed by law or by action of the Board. The duties of the President include the following:

To decide questions of order at Board meetings;

To offer resolutions, make or second motions, discuss questions, and vote thereon to the same extent as other members;

To appoint or provide for the election of all committees of the Board unless otherwise directed by the Board and to serve as an ex-officio member of all such committees;

To call special meetings of the Board on the request of three or more Board members or the Principal;

To execute an affidavit in compliance with the Open Meetings Act following any closed meeting of the Board; and

To sign official documents that require the signature of the president's office.

The Vice President shall have the powers and duties of the President when the President is absent or disabled, and shall have such other powers and duties as the Board may from time to time determine.

In the absence of both the President and Vice President, the attending members shall elect one of their members to preside.

The duties and obligations of an individual Board member may be enumerated as follows:

To become familiar with the state school laws, regulations of the Florida Department of Education, School policies, rules and regulations;

To have a general knowledge of educational aims and objectives of the school;

To work harmoniously with other Board members without trying either to dominate the Board or neglect a share of the work;

To vote and act in the Board meetings impartially for the good of the school;

To accept the will of the majority vote in all cases and give wholehearted support to the resulting policy;

To represent the Board and the school in the public in such a way as to promote both interest and support; and

To refer complaints to the proper school authorities and to abstain from individual counsel and action.

The Board believes that the legislation of policies is the most important function of a school board and that the execution of the policies should be the function of the Principal.

Delegation by the Board of its executive powers to the Principal provides freedom for the Principal to manage the school within the Board's policies, and frees the Board to devote its time to policy making and appraisal functions.

The Board holds the Principal responsible for carrying out its policies within established guidelines and for keeping the Board informed about school operations.

In an effort to keep the Board informed, the Principal will notify Board members as promptly as possible of any happenings of an emergency nature which occur in schools.

Meeting Procedures: All meetings of the Board shall be open to the public, including the news media, except when permitted or required by law to be closed. Visual and sound recordings shall be permitted during open meetings.

Three members of the Board shall constitute a quorum for the transaction of business. The votes of a majority of the members present shall be necessary for the transaction of any business or the discharge of any duties of the Board.

The President of the Board shall preside at Board meetings and shall rule on questions of order. In the absence of the President, the Vice President shall preside. In the absence of both the President and Vice President, the attending members shall elect one of their numbers to preside.

Meetings of the Board shall be formal enough to allow for the orderly conduct of business but informal enough to encourage free discussion among Board members and to promote group thinking and action.

Meeting Schedule: The Board annually shall adopt a schedule for the upcoming year stating the date, time and place of its regular meetings.

The meeting schedule shall be posted in a prominent place at the School's administration building and at any other locations where such scheduled meetings will be held. Electronic and other means of informing the public about the Board meetings shall be used where feasible. Any scheduled meeting may be canceled, postponed or adjourned.

Regular Meetings: Unless otherwise specified in the annual meeting schedule which will be adopted in August meeting each year, The regular meetings will be held monthly during the first six months of the school's operation, after that the board will meet in every two months. Dates and time of the regular meetings will be set for each school year in August or September board meetings. The schedule shall call for the meetings to be held at the School's administration building. The Board's regular meetings are legislative in nature. This is where most of the Board's formal actions are taken.

Executive Sessions: The Board may meet in executive session to consider student hearings, collective bargaining strategy session, meeting with attorney when the school is a party to an action, risk management exemption (portions of meetings and proceedings relating solely to the evaluation of claims or to offers of compromise of claims filed with a risk management program of the state, its agencies and subdivisions, are exempt).

A majority vote of a quorum present at an open meeting shall be required in order to close a meeting to the public. The specific reason for closure must be stated in the motion. Executive sessions will generally be held before or after the Board work sessions or regular meetings. The Board shall vote in public on any executive session item requiring official Board action. The minutes of the meeting shall reflect the names of the members present and the names of each Board member voting for closure. These portions of the minutes shall be made available to the public to the same extent as any other minutes.

When a meeting has been closed to the public, the Board President or other Board member presiding over the meeting shall execute a notarized affidavit stating under oath that the closed meeting was devoted to matters within the exceptions allowed by law and identifying the specific relevant exceptions. The affidavit shall be filed with the official minutes of the meeting.

Board Workshops: The Board in consultation with the Principal may schedule workshops to study topics of importance to the school and/or to plan for the future needs of the school. Workshops may be called by the President or by three members of the Board. Board workshops shall open to the public unless an exception to the Open Meetings Act applies.

Special or Called Meetings: Special meetings may be called by the Board President on the request of three or more Board members, or the Principal. Due notice of such meetings shall be given to the public and shall include at a minimum the posting of a written notice for at least 24 hours at the place of regular meetings and by the giving of written or oral notice at least 24 hours in advance at the front door and Parent Information Center. Board members will be given at least 24 hours' notice of the meeting and the topics to be addressed. Notice to Board members may be by telephone, e-mail, fax or some other means calculated to achieve notification.

Emergency Meetings: When special circumstances occur and are so declared by the Board, the Board may meet on less than 24 hours notice. Board members and the public shall be given as much notice of the meeting and subjects expected to be considered as is reasonable under the circumstances, including the posting of a written notice at the place of regular meetings. The minutes of the meeting shall reflect the reason for holding the meeting on the less than 24 hours notice and the nature of the notice given.
Telephone Conference Meetings: If a quorum is present in an announced place, the rest of the Board members may participate any special meeting or executive session of the Board by speaker telephone

conference. All Board members participating in the meeting must hear and speak to each other simultaneously during the meeting. A Board member participating in a meeting by this means is deemed to be present in person at the meeting.

Prior to any meeting of the Board, the Principal, in consultation with the Board President and Vice President, shall review a proposed agenda of the matters expected to be addressed at the meeting. Any member of the Board may suggest agenda items for regular meetings by submitting them to the Principal and/or Board President up to eight business days prior to the Board meeting. The agenda shall be posted at the meeting site and shall be made available to the public upon request.

The agenda, together with the Principal's comments, backup materials, and other relevant information, shall be sent to Board members prior to the Board work sessions or other meeting.

The agenda shall be approved by the Board at the beginning of each meeting. Failure to include an item on the agenda shall not preclude the Board from considering and acting on such an item when it becomes necessary to do so during the course of a meeting. Items not included on the agenda may be brought up for discussion or action at the discretion of the President or the vote of a majority of the members present. Unless a Board member objects, the Board may take action in the form of a composite motion.

Within two business days after the adjournment of a meeting, the Principal shall make available to the public a summary of the subjects acted upon at the meeting and the names of the Board members present at the meeting.

The Secretary shall be responsible for preparing the minutes of each Board meeting.

The minutes shall, at a minimum, include the names of the Board members present at the meeting, a description of each motion or other proposal made, and a record of all votes. For roll-call votes or votes to close a meeting to the public, the name of each person voting for or against the proposal shall be recorded. For all other votes, it shall be presumed that the action taken was approved by each member in attendance unless the minutes reflect the names of any members voting against the proposal or abstaining.

The minutes shall be submitted to the Board for approval at its next regular meeting. Once approved and signed by the Principal and Board President, Board minutes shall be available for public inspection upon request.

Board meetings are held to conduct the affairs and business of the Board in the presence of the public. The Board welcomes and encourages citizens to attend its meetings so that the public may become better acquainted with the operation and programs of the School and the Board.

The Board allows up to 30 minutes (or more, at the Board's discretion, when pressing issues arise) at the beginning of its board meeting work sessions and regular board meetings to allow residents and employees of the school an opportunity to address the Board.

The following guidelines will govern speakers who address the Board:

- Individuals may sign up by contacting the Principal's office no more than two weeks in advance and no later than noon of the day of the meeting or by placing their name on the sign-up sheet before the start of the meeting. No more than five speakers will be allowed to sign up in advance for any given meeting. The remaining slots will be reserved for speakers signing up at the meeting.

- Each speaker will have a maximum of four minutes to speak.

- When appearing before the Board, speakers must provide their names, home address, the group represented, if applicable, and whether they are an employee, a parent or have some other connection with the School.

- Before addressing the Board, individuals are urged to seek a solution to their concerns through the proper staff and administrative channels.

- Speakers may comment on issues scheduled for consideration at the Board meeting or other appropriate concerns pertinent to the operation of a school.
- Speakers may provide the Board with written comments or other documentation relating to their topic.

- Individuals and/or organizations who addressed the Board the previous meeting may be denied the opportunity to address the Board on the same topic the following meeting.

- Speakers are expected to present their comments in a respectful and professional manner.

- Profane, vulgar or defamatory comments will not be permitted.

- Confidential student and personnel matters may not be discussed during audience to visitors, but may be submitted to the Board in writing.

- Speakers will be scheduled on a first come, first served basis. Individuals will not be denied the opportunity to address the Board on the basis of their viewpoint.

- The Board vests in its President, or presiding officer, the authority to terminate the remarks of any speaker who does not adhere to the above guidelines.

All official records of the Board shall be kept and safeguarded by the Principal as ex-officio Board Secretary. The Principal shall also be responsible for the safekeeping of all official papers, including, the official minutes of the Board, its written policies, financial records, titles, contracts, obligations and other documents that belong to the Board or pertain to its business.

Records deemed "public records" and made subject to public inspection by law shall be open for the inspection of any citizen desiring to examine them during hours when the office of the Principal is open.

As a public official, a school board member must not only do what is required by law, but because of the special trust with which he/she is charged by the community, must observe the ethics of that public office. The Board desiring to operate in the most ethical and conscientious manner possible adopts the following code of ethics to be followed by each member. Each school Board member will:

1. Give his/her first and greatest concern to the students of the school, without any distinction as to who they are or what their background may be.
2. Recognize that authority rests with the Board as a whole and make no personal promises or take any private action that might compromise the Board.

3. Work with fellow Board members in a spirit of harmony and cooperation in spite of differences of opinion.

4. Base his/her decisions upon all available facts, voting his/her convictions in every case unswayed by bias of any kind and upholding the majority decision of the Board.

5. Maintain confidentiality of privileged information.

6. Avoid being placed in a position of conflict of interest and refrain from using the Board member position for personal or partisan gain.

7. Confine board actions to policy making and evaluation and recognize that the Principal, not the Board, is responsible for the day-to-day administration of the schools.

8. Refer all complaints, comments and criticisms through the proper chain of command.

9. Support and protect school personnel in proper performance of their duties.

10. Vote on the interest of the system as a whole and not a particular segment thereof.

11. Communicate to other Board members and the Principal expressions of public reaction to Board policies and school programs.

In order to avoid conflict of interest, the Board and its members shall observe the following guidelines:

1. Members of the Board will not provide recommendations for employment of any individual who is candidate for employment in the School.

2. Any Board vote on the employment or promotion of a member of a Board member's immediate family shall be conducted in public and separate from any other personnel matter. The vote on such action shall be recorded, and the Board member whose family member is the subject of the vote shall not participate in the vote. As used in this policy, "immediate family" means a Board member's spouse, child, stepchild, sibling, parent, grandparent, grandchild, aunt, uncle, niece, nephew or first cousin, or the spouse of the Board member's parent, child, or sibling, or any relative living in the household of a Board member.

3. Board members will abstain from deliberating or voting on any student discipline matter involving his/her child.

4. The Board shall not transact business with any bank or financial institution in which a Board member owns 30 percent or more of the stock or other ownership interest.

5. The Board shall not do business with any business in which a Board member and/or a member of his/her immediate family holds an ownership interest. This shall not apply to publicly traded corporations unless the Board member and/or the members of the board member's immediate family own ten percent or more of the stock of the corporation.

6. No Board member shall be employed in any position in the school system.

7. No Board member shall accept a monetary fee or honorarium in excess of $101 for a speaking engagement, participation in a seminar, discussion panel or other activity that directly relates to the official duties of the Board member or the Board member's office.

In the budget development process, the Board conducts pre-budgeting discussions with the Principal to establish informal understandings about perceived budget opportunities, challenges and/or restrictions, and provides guidance for budget development. The Principal prepares a draft budget for review by the Board. The Board gives careful study to the budget and holds public hearings to allow for public review and reaction prior to formal approval of the budget.

<div align="center">

PARLIAMENTARY PROCEDURE
FOR BOARD

</div>

School boards are similar to other small boards because they work best when discussions are informal and not constrained by the need to adhere rigidly to formal procedures. Most school boards will work in a casual, unceremonious manner. However, several sections of the law refer to quorums and votes. When taking action on items on the agenda, the school board should have agreed upon procedures for handling motions and taking votes. These procedures should conform to the requirements specified in law and should conform to standards that are incorporated into a parliamentary guide such as *Robert's Rules of Order, Newly Revised.* This summary will focus on legal requirements mandated for school boards and suggested parliamentary procedure that school boards may follow in taking official action during meetings.

Definitions

1. Quorum - three or more members of the school board. Quorum is defined for the school council as a majority. A quorum must be present in order for the school board to conduct business.

2. Majority - More than half of the school board members present representing a quorum. Except as noted below, every motion is to be determined by a majority vote of members present, representing a quorum. For example, if three members are present, a quorum exists. If two members vote "yes" on a motion, no members vote "no," and two members abstain, the motion fails. The majority of members present (more than half) did not vote "yes" for the motion. Abstentions often can have the same effect as a vote against the motion. The adoption of bylaws or changes in the bylaws requires five affirmative votes. A vote of five members of the school council is necessary withdraw a school board member's membership status due to inactivity as specified in bylaws.

3. Questions - Motion.

4. Proxy - The authority to vote for another school board member. Proxy votes are not permitted.

5. Unanimous consent - Rather than voting on every issue, the chairperson can ask for "unanimous consent" on items that do not seem to be controversial. This can be done by saying, "Is there any objection to…..?" If there is no objection, the action can be taken.

Parliamentary Procedure:

The board should keep meetings as informal as possible; however, when considering official action, school board members may follow these procedures:

1. Making a motion
        A. Any school board member may make a motion, including the president.
        B. A long motion should be written and given to the president, and
        C. The school board member who makes a motion is not required to vote in favor of it.

2. Seconding a motion
        A. Any school board member may second a motion, except the individual who made the motion.
        B. A second merely implies that the motion should come before the school board for vote.
        C. The school board member who seconded a motion is not required to vote in favor of it, and
        D. If a motion does not receive a second, it fails. No vote is taken.
        E. A second is not required for the motion to adjourn.

3. Debating a motion
        A. The president states the motion to be debated.
        B. Customarily, the person who makes the motion speaks first,
        C. School board members should confine their remarks to pending question,
        D. The president may participate in the debate, and
        E. When the president determines that debate is ending he/she can ask, "Is there any objection to calling the question?" If there is no objection, proceed to a vote on the motion. If there is objection, the chairperson should take a vote on whether or not to end debate.

4. Voting on the motion
        A. Before taking a vote, the president should repeat the motion,
        B. School board members should vote with either a "yes," or "no," or "abstain,"
        C. If a voice vote is inconclusive, the president should call for show of hands.
        D. The president may participate in the vote,
        E. If the school board is voting to go into executive session, the secretary must record the names of those school board members voting to go into executive session and the motion stating the reason that the school board is going into executive session,
        F. Proxy voting may not be allowed,
        G. Secret ballots may not be allowed, and,
        H. The president states the results of the vote.

The purpose of this Policy of Discovery Education Services, Inc. Bylaws, is to give the Governing Board of said school procedures by which to govern themselves which are known by all board members and to conform the previous by-laws of Discovery Education Services, Inc. to the policies of the Broward Science Charter School so as to provide for a harmonious existence between the two.

CERTIFICATE

Florida, Broward County

       I hereby certify that the within and foregoing nine pages constitute the Bylaws of Discovery

Education Services, Inc. in effect this 01 day of February, 2010.

Appendix F – Sample Standards

In this Appendix, some examples of Standards have been presented. These are just snapshots and not complete list. Complete list and details are presented in the following website:

http://www.cpalms.org/homepage/index.aspx

Mathematics Standards

Below are some examples of Math CCSS. Complete list and details are presented in the following website:
http://www.cpalms.org/homepage/index.aspx

GRADE: K

Domain: COUNTING AND CARDINALITY	
Cluster 1: Know number names and the count sequence.	
STANDARD CODE	**STANDARD**
MACC.K.CC.1.1	Count to 100 by ones and by tens. *Cognitive Complexity:* Level 1: Recall
	CORE CONTENT CONNECTOR
	MACC.K.CC.1.CCC.1a — Rote count up to 10.

	MACC.K.CC.1.CCC.1b — Rote count up to 31.
	
	• **Concrete:**
	   o Students understand that counting has cardinality in the numbers.
	• **Representation:**
	   o Begin with counting 1 to 5 (or the highest number a student can count to) and increase by adding 2 - 3 numbers at a time.
	   o Once student has mastered rote counting to 30, teach counting by 10s to 100.

	MACC.K.CC.1.CCC.1c — Rote count up to 100.
	MACC.K.CC.1.CCC.3a — Identify numerals 1 – 10.
	MACC.K.CC.1.CCC.3b — Identify the numerals 1–10 when presented with the name of the number.
	MACC.K.CC.1.CCC.3c — Write or select the numerals 1–10.
MACC.K.CC.1.2	Count forward beginning from a given number within the known sequence (instead of having to begin at 1). *Cognitive Complexity:* Level 1: Recall
	CORE CONTENT CONNECTOR
	MACC.K.CC.1.CCC.1a — Rote count up to 10.
	MACC.K.CC.1.CCC.1b — Rote count up to 31.

		• **Concrete:** ○ Students understand that counting has cardinality in the numbers. • **Representation:** ○ Begin with counting 1 to 5 (or the highest number a student can count to) and increase by adding 2 - 3 numbers at a time. ○ Once student has mastered rote counting to 30, teach counting by 10s to 100.
		MACC.K.CC.1.CCC.1c — Rote count up to 100.
		MACC.K.CC.1.CCC.3a — Identify numerals 1 – 10.
		MACC.K.CC.1.CCC.3b — Identify the numerals 1–10 when presented with the name of the number.
		MACC.K.CC.1.CCC.3c — Write or select the numerals 1–10.
MACC.K.CC.1.3	Write numbers from 0 to 20. Represent a number of objects with a written numeral 0-20 (with 0 representing a count of no objects). *Cognitive Complexity:* Level 1: Recall	

CORE CONTENT CONNECTOR	
MACC.K.CC.1.CCC.1a	Rote count up to 10.
MACC.K.CC.1.CCC.1b	Rote count up to 31.

• **Concrete:** ○ Students understand that counting has cardinality in the numbers. • **Representation:** ○ Begin with counting 1 to 5 (or the highest number a student can count to) and increase by adding 2 - 3 numbers at a time. ○ Once student has mastered rote counting to 30, teach counting by 10s to 100.	
MACC.K.CC.1.CCC.1c	Rote count up to 100.
MACC.K.CC.1.CCC.3a	Identify numerals 1 – 10.
MACC.K.CC.1.CCC.3b	Identify the numerals 1–10 when presented with the name of the number.
MACC.K.CC.1.CCC.3c	Write or select the numerals 1–10.

Cluster 2: Count to tell the number of objects.	
STANDARD CODE	**STANDARD**
MACC.K.CC.2.4	Understand the relationship between numbers and quantities; connect counting to cardinality.

	a. When counting objects, say the number names in the standard order, pairing each object with one and only one number name and each number name with one and only one object. b. Understand that the last number name said tells the number of objects counted. The number of objects is the same regardless of their arrangement or the order in which they were counted. c. Understand that each successive number name refers to a quantity that is one larger. *Cognitive Complexity:* Level 1: Recall
	CORE CONTENT CONNECTOR

	MACC.K.CC.2.CCC.4a Identify the set that has more.
	
	 • **Concrete:**
	    o Understanding the meaning of more, less, or equal (the same).
	    o Understand that as counting increases, the number represented increases.
	 • **Representation:**
	    o Students can distinguish which numbers represent more than others.

	MACC.K.CC.2.CCC.4b Count up to 10 objects in a line, rectangle, or array.
	MACC.K.CC.2.CCC.4c Match the numeral to the number of objects in a set.
	MACC.K.CC.2.CCC.5a Select a question that collected data answers.
	MACC.K.CC.2.CCC.5b Count up to 10 objects in a line, rectangle, or array.
	MACC.K.CC.2.CCC.5c Match the numeral to the number of objects in a set.
MACC.K.CC.2.5	Count to answer "how many?" questions about as many as 20 things arranged in a line, a rectangular array, or a circle, or as many as 10 things in a scattered configuration; given a number from 1–20, count out that many objects. *Cognitive Complexity:* Level 1: Recall
	CORE CONTENT CONNECTOR

	MACC.K.CC.2.CCC.4a Identify the set that has more.
	
	 • **Concrete:**

	MACC.K.CC.2.CCC.5a Select a question that collected data answers.
	MACC.K.CC.2.CCC.5b Count up to 10 objects in a line, rectangle, or array.
	MACC.K.CC.2.CCC.5c Match the numeral to the number of objects in a set.

Cluster 3: Compare numbers.

STANDARD CODE	STANDARD
MACC.K.CC.3.6	Identify whether the number of objects in one group is greater than, less than, or equal to the number of objects in another group, e.g., by using matching and counting strategies.
	Cognitive Complexity: Level 2: Basic Application of Skills & Concepts
	CORE CONTENT CONNECTOR
	MACC.K.CC.3.CCC.7a Identify the smaller or larger number given two numbers between 0 and 10.
MACC.K.CC.3.7	Compare two numbers between 1 and 10 presented as written numerals.
	Cognitive Complexity: Level 2: Basic Application of Skills & Concepts
	CORE CONTENT CONNECTOR
	MACC.K.CC.3.CCC.7a Identify the smaller or larger number given two numbers between 0 and 10.

Domain: OPERATIONS AND ALGEBRAIC THINKING

Cluster 1: Understand addition as putting together and adding to, and understand subtraction as taking apart and taking from.

STANDARD CODE	STANDARD
MACC.K.OA.1.1	Represent addition and subtraction with objects, fingers, mental images, drawings, sounds (e.g., claps), acting out situations, verbal explanations, expressions, or equations.
	Cognitive Complexity: Level 2: Basic Application of Skills & Concepts
	CORE CONTENT CONNECTOR
	MACC.K.OA.1.CCC.1a Use objects or pictures

	to respond appropriately to "add __" and "take away__."	
	MACC.K.OA.1.CCC.1b Communicate answer after adding or taking away.	

	MACC.K.OA.1.CCC.2a Solve one-step addition and subtraction word problems, and add and subtract within 10 using objects, drawings, or pictures.
	
	• **Concrete:**
	    o Create an array (e.g., show me one group/row of three).
	• **Representation:**
	    o Select a numeral to place under each representation in a modeled equation.
	    o Select a pictorial representation of an array that matches the addition or subtraction problem.
	    o Vocabulary: add, subtract.	

	MACC.K.OA.1.CCC.2b Count two sets to find sums up to 10.	
	MACC.K.OA.1.CCC.2c Solve word problems within 10.	
	MACC.K.OA.1.CCC.3a Decompose a set of up to 10 objects into a group; count the quantity in each group.	
MACC.K.OA.1.2	Solve addition and subtraction word problems, and add and subtract within 10, e.g., by using objects or drawings to represent the problem. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts	
	CORE CONTENT CONNECTOR

Domain: NUMBER AND OPERATIONS IN BASE TEN

Cluster 1: Work with numbers 11–19 to gain foundations for place value.

STANDARD CODE	STANDARD
MACC.K.NBT.1.1	Compose and decompose numbers from 11 to 19 into ten ones and some further ones, e.g., by using objects or drawings, and record each composition or decomposition by a drawing or equation (e.g., 18 = 10 + 8); understand that these numbers are composed of ten ones and one, two, three, four, five, six, seven, eight, or nine ones. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts

Domain: MEASUREMENT AND DATA

Cluster 1: Describe and compare measurable attributes.

STANDARD CODE	STANDARD
MACC.K.MD.1.1	Describe measurable attributes of objects, such as length or weight. Describe several measurable attributes of a single object. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts

CORE CONTENT CONNECTOR

MACC.K.MD.1.CCC.1a   Describe objects in terms of measurable attributes (longer, shorted, heavier, lighter, etc.).

MACC.K.MD.1.CCC.2a   Compare two objects with a measurable attribute in common to see which object has more/less of the attribute. (length, height, weight).

- **Concrete:**
  - Recognize that one set of items has more than another set of items without counting.
  - Understand attributes of length, height, weight.
- **Representation:**
  - Select representation of more and less.
  - Select representation of shorter and longer.
  - Select representation of heavy and light.
  - Select representation of tall and short.

MACC.K.MD.1.2	Directly compare two objects with a measurable attribute in common, to see which object has "more of"/"less of" the attribute, and describe the difference. *For example, directly compare the heights of two children and describe one child as taller/shorter.*
	Cognitive Complexity: Level 2: Basic Application of Skills & Concepts

Cluster 2: Classify objects and count the number of objects in each category.

STANDARD CODE	STANDARD
MACC.K.MD.2.3	Classify objects into given categories; count the numbers of objects in each category and sort the categories by count.
	Cognitive Complexity: Level 2: Basic Application of Skills & Concepts

CORE CONTENT CONNECTOR	
MACC.K.MD.2.CCC.3a	Sort objects by characteristics (e.g., big/little, colors, shapes).

Domain: GEOMETRY

Cluster 1: Identify and describe shapes (squares, circles, triangles, rectangles, hexagons, cubes, cones, cylinders, and spheres).

STANDARD CODE	STANDARD
MACC.K.G.1.1	Describe objects in the environment using names of shapes, and describe the relative positions of these objects using terms such as *above, below, beside, in front of, behind, and next to.*
	Cognitive Complexity: Level 2: Basic Application of Skills & Concepts

CORE CONTENT CONNECTOR

	MACC.K.G.1.CCC.1a Recognize two-dimensional shapes in environment, regardless of orientation or size.
	MACC.K.G.1.CCC.1b Use spatial language (e.g., above, below) to describe two-dimensional shapes.

	MACC.K.G.1.CCC.2a Recognize two-dimensional shapes (e.g., circle, square, triangle, rectangle), regardless of orientation or size.
	
	• **Concrete:**
	    ○ Match shapes that are the same in shape and size.
	    ○ Demonstrate the understanding of classes of shapes by matching or categorizing shapes that are the same shape but are different sizes (e.g., match circles even though they are different sizes).
	• **Representation:**
	    ○ Understand that things have names and can be labeled.

MACC.K.G.1.2	Correctly name shapes regardless of their orientations or overall size. *Cognitive Complexity:* Level 1: Recall
	CORE CONTENT CONNECTOR
	MACC.K.G.1.CCC.1a Recognize two-dimensional shapes in environment, regardless of orientation or size.
	MACC.K.G.1.CCC.1b Use spatial language (e.g., above, below) to describe two-dimensional shapes.

	MACC.K.G.1.CCC.2a Recognize two-dimensional shapes (e.g., circle, square, triangle, rectangle), regardless of orientation or size.

Cluster 2: Analyze, compare, create, and compose shapes.	
STANDARD CODE	**STANDARD**
MACC.K.G.2.4	Analyze and compare two- and three-dimensional shapes, in different sizes and orientations, using informal language to describe their similarities, differences, parts (e.g., number of sides and vertices/"corners") and other attributes (e.g., having sides of equal length). *Cognitive Complexity:* Level 3: Strategic Thinking & Complex Reasoning
	CORE CONTENT CONNECTOR
	MACC.K.G.2.CCC.6a Compose a larger shape from smaller shapes.
MACC.K.G.2.5	Model shapes in the world by building shapes from components (e.g., sticks and clay balls) and drawing shapes. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
	CORE CONTENT CONNECTOR
	MACC.K.G.2.CCC.6a Compose a larger shape from smaller shapes.
MACC.K.G.2.6	Compose simple shapes to form larger shapes. *For example, "Can you join these two triangles with full sides touching to make a rectangle?"* *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
	CORE CONTENT CONNECTOR
	MACC.K.G.2.CCC.6a Compose a larger shape from smaller shapes.

GRADE: 4

Domain: OPERATIONS AND ALGEBRAIC THINKING

Cluster 1: Use the four operations with whole numbers to solve problems.

Major Cluster

Don't … Sort clusters from Major to Supporting, and then teach them in that order. To do so would strip the coherence of the mathematical ideas and miss the opportunity to enhance the major work of the grade with the supporting clusters.

STANDARD CODE	STANDARD
MACC.4.OA.1.1	Interpret a multiplication equation as a comparison, e.g., interpret 35 = 5 × 7 as a statement that 35 is 5 times as many as 7 and 7 times as many as 5. Represent verbal statements of multiplicative comparisons as multiplication equations. *Cognitive Complexity:* Level 1: Recall
	CORE CONTENT CONNECTOR
	MACC.4.OA.1.CCC.2a Solve multiplicative comparisons with an unknown using up to two-digit numbers with information presented in a graph or word problem (e.g., an orange hat costs $3. A purple hat costs two times as much. How much does the purple hat cost? [3 x 2 = p]).
	MACC.4.OA.1.CCC.3a Solve or solve and check one- or two-step word problems requiring addition, subtraction, or multiplication with answers up to 100.
MACC.4.OA.1.2	Multiply or divide to solve word problems involving multiplicative comparison, e.g., by using drawings and equations with a symbol for the unknown number to represent the problem, distinguishing multiplicative comparison from additive comparison. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
	CORE CONTENT CONNECTOR
	MACC.4.OA.1.CCC.2a Solve multiplicative comparisons with an unknown using up to two-digit numbers with information presented in a graph or word problem (e.g., an orange hat costs $3. A purple hat costs two times as much. How much does the purple hat cost? [3 x 2 = p]).
	MACC.4.OA.1.CCC.3a Solve or solve and check one- or two-step word problems requiring addition, subtraction, or multiplication with answers up to 100.
MACC.4.OA.1.3	Solve multistep word problems posed with whole numbers and having whole-number answers using the four operations, including problems in which remainders must be interpreted. Represent these problems using equations with a letter standing for the unknown quantity. Assess the reasonableness of answers using mental computation and estimation strategies including rounding. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
	CORE CONTENT CONNECTOR
	MACC.4.OA.1.CCC.2a Solve multiplicative comparisons with an unknown using up to two-digit numbers with

	information presented in a graph or word problem (e.g., an orange hat costs $3. A purple hat costs two times as much. How much does the purple hat cost? [3 x 2 = p]).
	MACC.4.OA.1.CCC.3a Solve or solve and check one- or two-step word problems requiring addition, subtraction, or multiplication with answers up to 100.

Cluster 2: Gain familiarity with factors and multiples.

Supporting Cluster

Don't … Sort clusters from Major to Supporting, and then teach them in that order. To do so would strip the coherence of the mathematical ideas and miss the opportunity to enhance the major work of the grade with the supporting clusters.

STANDARD CODE	STANDARD
MACC.4.OA.2.4	Find all factor pairs for a whole number in the range 1–100. Recognize that a whole number is a multiple of each of its factors. Determine whether a given whole number in the range 1–100 is a multiple of a given one-digit number. Determine whether a given whole number in the range 1–100 is prime or composite. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
	CORE CONTENT CONNECTOR
	MACC.4.OA.2.CCC.4a Identify multiples for a whole number (e.g., 2 = 2, 4, 6, 8, 10).

Cluster 3: Generate and analyze patterns.

Additional Cluster

Don't … Sort clusters from Major to Supporting, and then teach them in that order. To do so would strip the coherence of the mathematical ideas and miss the opportunity to enhance the major work of the grade with the supporting clusters.

STANDARD CODE	STANDARD
MACC.4.OA.3.5	Generate a number or shape pattern that follows a given rule. Identify apparent features of the pattern that were not explicit in the rule itself. *For example, given the rule "Add 3" and the starting number 1, generate terms in the resulting sequence and observe that the terms appear to alternate between odd and even numbers. Explain informally why the numbers will continue to alternate in this way.* *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
	CORE CONTENT CONNECTOR
	MACC.4.OA.3.CCC.5a Identify multiples for a whole number (e.g., 2 = 2, 4, 6, 8, 10).
	MACC.4.OA.3.CCC.5b Generate a pattern when given a rule and word problem (I run three miles every day, how many miles have I run in three days).
	MACC.4.OA.3.CCC.5c Extend a numerical pattern when the rule is provided.

Domain: NUMBER AND OPERATIONS IN BASE TEN

Cluster 1: Generalize place value understanding for multi-digit whole numbers.

Major Cluster

Don't … Sort clusters from Major to Supporting, and then teach them in that order. To do so would strip the coherence of the mathematical ideas and miss the opportunity to enhance the major work of the grade with the supporting clusters.

STANDARD CODE	STANDARD
MACC.4.NBT.1.1	Recognize that in a multi-digit whole number, a digit in one place represents ten times what it represents in the place to its right. *For example, recognize that 700 ÷ 70 = 10 by applying concepts of place value and division.* *Cognitive Complexity:* Level 1: Recall
	CORE CONTENT CONNECTOR
	MACC.4.NBT.1.CCC.1a Compare the value of a number when it is represented in different place values of two three digit numbers.
	MACC.4.NBT.1.CCC.2a Compare multi-digit numbers using representations and numbers.
	MACC.4.NBT.1.CCC.2b Write or select the expanded form for a multi-digit number.
	MACC.4.NBT.1.CCC.3a Use place value to round to any place (i.e., 1s, 10s, 100s, 1000s). • **Concrete:** o Identify 1s, 10s, 100s in bundled sets. o Make comparisons between similar/different with concrete representations (i.e., is this set of manipulatives [8 ones] closer to this set [a ten] or this set [a one]? • **Representation:** o Identify pictorial representation of numbers in 1s, 10s, 100s blocks. o Match vocabulary of 1s, 10s, 100s, 1000s to digits in a number. o Understand that a comma indicates thousands place. o Understand the concept of rounding.
MACC.4.NBT.1.2	Read and write multi-digit whole numbers using base-ten numerals, number names, and expanded form. Compare two multi-digit numbers based on meanings of the digits in each place, using >, =, and < symbols to record the results of comparisons. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
	CORE CONTENT CONNECTOR

Domain: NUMBER AND OPERATIONS - FRACTIONS

Cluster 1: Extend understanding of fraction equivalence and ordering.

Major Cluster

Don't … Sort clusters from Major to Supporting, and then teach them in that order. To do so would strip the coherence of the mathematical ideas and miss the opportunity to enhance the major work of the grade with the supporting clusters.

STANDARD CODE	STANDARD
MACC.4.NF.1.1	Explain why a fraction a/b is equivalent to a fraction (n × a)/(n × b) by using visual fraction models, with attention to how the number and size of the parts differ even though the two fractions themselves are the same size. Use this principle to recognize and generate equivalent fractions. *Cognitive Complexity:* Level 3: Strategic Thinking & Complex Reasoning

<div align="center">

CORE CONTENT CONNECTOR

</div>

MACC.4.NF.1.CCC.1a   Determine equivalent fractions.

- **Concrete:**
  - Equivalency (what is and what is not equivalent; this may begin with numbers/sets of objects: e.g., 3 = 3).
  - Concept of fraction and decimal(part to whole). - Ability to identify two equivalent fractions, both represented either symbolically (i.e., in numbers) (e.g. — $1/2 = 2/4$) or as a model (i.e., picture) (e.g. — pizza cut in halves and in fourths with 1/2 and 2/4 shaded in). If using symbolic representations, limit denominators to 2, 4, and 8 and numerators to 1–7. Use a real-world context (e.g., pizza).
- **Representation:**
  - Understand and identify congruent units.
  - Understand how to determine equivalent fractions.
  - Represent fractions using shaded grids.
  - Understand concepts, symbols, and vocabulary: fraction and equivalent fractions.

MACC.4.NF.1.CCC.2a   Use =, <, or > to compare two fractions (fractions with a denominator or 10 or less).

- **Concrete:**
  - Understand the concept of a fraction (a fraction is less than a whole).
  - Understand the concept of comparison (greater than, less than, equal).
  - Identify concrete representation of a fractional part of a whole as greater than, less than, equal to another (divide a rectangle into fourths and compare ¼ to ¾). Can do by showing with parts of the whole (so relates to fractions; e.g., break into four equal parts…which is more the three parts or the one part?).
- **Representation:**
  - Understand the symbols of <, >, and =.
  - Label pictorial representations of fractions.

	MACC.4.NF.1.CCC.2b Compare up to two given fractions that have different denominators.
MACC.4.NF.1.2	Compare two fractions with different numerators and different denominators, e.g., by creating common denominators or numerators, or by comparing to a benchmark fraction such as 1/2. Recognize that comparisons are valid only when the two fractions refer to the same whole. Record the results of comparisons with symbols >, =, or <, and justify the conclusions, e.g., by using a visual fraction model. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts

CORE CONTENT CONNECTOR

MACC.4.NF.1.CCC.1a   Determine equivalent fractions.
 	
• **Concrete:**
    o Equivalency (what is and what is not equivalent; this may begin with numbers/sets of objects: e.g., 3 = 3).
    o Concept of fraction and decimal(part to whole). - Ability to identify two equivalent fractions, both represented either symbolically (i.e., in numbers) (e.g. — 1/2 = 2/4) or as a model (i.e., picture) (e.g. — pizza cut in halves and in fourths with 1/2 and 2/4 shaded in). If using symbolic representations, limit denominators to 2, 4, and 8 and numerators to1–7. Use a real-world context (e.g., pizza).
• **Representation:**
    o Understand and identify congruent units.
    o Understand how to determine equivalent fractions.
    o Represent fractions using shaded grids.
    o Understand concepts, symbols, and vocabulary: fraction and equivalent fractions.

MACC.4.NF.1.CCC.2a   Use =, <, or > to compare two fractions (fractions with a denominator or 10 or less).
 	
• **Concrete:**
    o Understand the concept of a fraction (a fraction is less than a whole).
    o Understand the concept of comparison (greater than, less than, equal).
    o Identify concrete representation of a fractional part of a whole as greater than, less than, equal to another (divide a rectangle into fourths and compare ¼ to ¾). Can do by showing with parts of the whole (so relates to fractions; e.g., break into four equal parts…which is more the three parts or the one part?).
• **Representation:**
    o Understand the symbols of <, >, and =.

	o Label pictorial representations of fractions.
	MACC.4.NF.1.CCC.2b Compare up to two given fractions that have different denominators.

Cluster 2: Build fractions from unit fractions by applying and extending previous understandings of operations on whole numbers.

Major Cluster

Don't … Sort clusters from Major to Supporting, and then teach them in that order. To do so would strip the coherence of the mathematical ideas and miss the opportunity to enhance the major work of the grade with the supporting clusters.

STANDARD CODE	STANDARD
MACC.4.NF.2.3	Understand a fraction a/b with a > 1 as a sum of fractions 1/b. a. Understand addition and subtraction of fractions as joining and separating parts referring to the same whole. b. Decompose a fraction into a sum of fractions with the same denominator in more than one way, recording each decomposition by an equation. Justify decompositions, e.g., by using a visual fraction model. *Examples: 3/8 = 1/8 + 1/8 + 1/8 ; 3/8 = 1/8 + 2/8 ; 2 1/8 = 1 + 1 + 1/8 = 8/8 + 8/8 + 1/8.* c. Add and subtract mixed numbers with like denominators, e.g., by replacing each mixed number with an equivalent fraction, and/or by using properties of operations and the relationship between addition and subtraction. d. Solve word problems involving addition and subtraction of fractions referring to the same whole and having like denominators, e.g., by using visual fraction models and equations to represent the problem. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
	CORE CONTENT CONNECTOR
	MACC.4.NF.2.CCC.3a Using a representation, decompose a fraction into multiple copies of a unit fraction (e.g., ¾ = ¼ + ¼ + ¼).
	MACC.4.NF.2.CCC.3b Add and subtract fractions with like denominators of (2, 3, 4, or 8.)
	MACC.4.NF.2.CCC.3c Add and subtract fractions with like denominators (2, 3, 4, or 8) using representations.
	MACC.4.NF.2.CCC.3d Solve word problems involving addition and subtraction of fractions with like denominators (2 ,3, 4, or 8).
MACC.4.NF.2.4	Apply and extend previous understandings of multiplication to multiply a fraction by a whole number. a. Understand a fraction a/b as a multiple of 1/b. *For example, use a visual fraction model to represent 5/4 as the product 5 × (1/4), recording the conclusion by the equation 5/4 = 5 × (1/4).* b. Understand a multiple of a/b as a multiple of 1/b, and use this understanding to multiply a fraction by a whole number. *For example, use a visual fraction model to express 3 × (2/5) as 6 × (1/5), recognizing this product as 6/5. (In*

	general, n × (a/b) = (n × a)/b.)
	c. Solve word problems involving multiplication of a fraction by a whole number, e.g., by using visual fraction models and equations to represent the problem. *For example, if each person at a party will eat 3/8 of a pound of roast beef, and there will be 5 people at the party, how many pounds of roast beef will be needed? Between what two whole numbers does your answer lie?*
	Cognitive Complexity: Level 2: Basic Application of Skills & Concepts

Cluster 2: Represent and interpret data.

Supporting Cluster

Don't … Sort clusters from Major to Supporting, and then teach them in that order. To do so would strip the coherence of the mathematical ideas and miss the opportunity to enhance the major work of the grade with the supporting clusters.

STANDARD CODE	STANDARD
MACC.4.MD.2.4	Make a line plot to display a data set of measurements in fractions of a unit (1/2, 1/4, 1/8). Solve problems involving addition and subtraction of fractions by using information presented in line plots. *For example, from a line plot find and interpret the difference in length between the longest and shortest specimens in an insect collection.* *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts

CORE CONTENT CONNECTOR

MACC.4.MD.2.CCC.4a   Collect and organize data in a graph (e.g. picture, graph, line plot, bar graph).

Essential Understandings

Concrete:	**Representation:**
• Identify data set based on a single attribute (e.g., pencils vs. markers).	• Identify data set with some number (e.g., bar graph with five pencils).
• Identify data set with more of less (e.g., this bar represents a set with more).	• Organize the data into a pictorial graph.
• Organize the data into a graph using objects (may have number symbols).	
• Properly label graph (e.g., axes on bar graph).	

Cluster 3: Geometric measurement: understand concepts of angle and measure angles.

Additional Cluster

292

STANDARD CODE	STANDARD
MACC.4.MD.3.5	Recognize angles as geometric shapes that are formed wherever two rays share a common endpoint, and understand concepts of angle measurement: a. An angle is measured with reference to a circle with its center at the common endpoint of the rays, by considering the fraction of the circular arc between the points where the two rays intersect the circle. An angle that turns through 1/360 of a circle is called a "one-degree angle," and can be used to measure angles. b. An angle that turns through *n* one-degree angles is said to have an angle measure of *n* degrees. *Cognitive Complexity:* Level 1: Recall
	CORE CONTENT CONNECTOR
	MACC.4.MD.3.CCC.6a Select appropriate tool for measurement: mass, length, angles.
	MACC.4.MD.3.CCC.6b Construct a given angle.
	MACC.4.MD.3.CCC.6c Measure right angles using a tool (e.g., angle ruler, protractor).
MACC.4.MD.3.6	Measure angles in whole-number degrees using a protractor. Sketch angles of specified measure. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
	CORE CONTENT CONNECTOR
	MACC.4.MD.3.CCC.6a Select appropriate tool for measurement: mass, length, angles.
	MACC.4.MD.3.CCC.6b Construct a given angle.
	MACC.4.MD.3.CCC.6c Measure right angles using a tool (e.g., angle ruler, protractor).
MACC.4.MD.3.7	Recognize angle measure as additive. When an angle is decomposed into non-overlapping parts, the angle measure of the whole is the sum of the angle measures of the parts. Solve addition and subtraction problems to find unknown angles on a diagram in real world and mathematical problems, e.g., by using an equation with a symbol for the unknown angle measure. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
	CORE CONTENT CONNECTOR
	MACC.4.MD.3.CCC.6a Select appropriate tool for measurement: mass, length, angles.
	MACC.4.MD.3.CCC.6b Construct a given angle.
	MACC.4.MD.3.CCC.6c Measure right angles using a tool (e.g., angle ruler, protractor).

Domain: GEOMETRY

Cluster 1: Draw and identify lines and angles, and classify shapes by properties of their lines and angles.

GRADE: 7

Domain: RATIOS & PROPORTIONAL RELATIONSHIPS	
Cluster 1: Analyze proportional relationships and use them to solve real-world and mathematical problems. Major Cluster Don't … Sort clusters from Major to Supporting, and then teach them in that order. To do so would strip the coherence of the mathematical ideas and miss the opportunity to enhance the major work of the grade with the supporting clusters.	
STANDARD CODE	STANDARD
MACC.7.RP.1.1	Compute unit rates associated with ratios of fractions, including ratios of lengths, areas and other quantities measured in like or different units. *For example, if a person walks 1/2 mile in each 1/4 hour, compute the unit rate as the complex fraction 1/2/1/4 miles per hour, equivalently 2 miles per hour.* *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
	CORE CONTENT CONNECTOR
	MACC.7.RP.1.CCC.1a Find unit rates given a ratio.
	MACC.7.RP.1.CCC.1b Determine unit rates associated with ratios of lengths, areas, and other quantities measured in like units.
	MACC.7.RP.1.CCC.1c Solve one-step problems involving unit rates associated with ratios of fractions.

	MACC.7.RP.1.CCC.2a Identify the proportional relationship between two quantities.
	
	• **Concrete:**
	  o Recognize the constancy of one object to its parts (i.e. one face: two eyes).
	• **Representation:**
	  o Recognize the meaning of the placement of numbers in a proportion for a given situation.
	  o Show a proportion/ratio in three ways: number to number (2 to 6) expressed as a fraction (2/6) or using a colon (2:6).
	  o Represent the proportion of objects (e.g., female students) to the total number of objects (students in class); part-to-whole.
	  o Represent the proportion of the number of one object (female students) to the number of other objects (male students) from a set of objects (male and female students); part-to- part.
	  o Understand concept, symbols. and vocabulary:

	proportion, ratio, rate, prices, portions per person.
	MACC.7.RP.1.CCC.2b Determine if two quantities are in a proportional relationship using a table of equivalent ratios or points graphed on a coordinate plane.
	MACC.7.RP.1.CCC.2c Represent proportional relationships on a line graph.
	MACC.7.RP.1.CCC.2d Use a rate of change or proportional relationship to determine the points on a coordinate plane.
	MACC.7.RP.1.CCC.3a Use proportions to solve ratio problems.

	MACC.7.RP.1.CCC.3b Solve word problems involving ratios.
	
	 • **Concrete:**
	     o Show rate when asked.
	     o Show proportion when asked.
	     o Select a set for the ratio given.
	 • **Representation:**
	     o Locate information within a word problem.
	     o Make meaning of a word problem.
	     o Understand concept and vocabulary: ratio.

	MACC.7.RP.1.CCC.3c Find percents in real-world contexts.
	MACC.7.RP.1.CCC.3d Solve one step percentage increase and decrease problems.

	MACC.7.RP.1.CCC.3e Use proportional relationships to solve multi-step percent problems.
	
	 • **Concrete:**
	     o Identify how one variable changes in relation to another variable in a directly proportional relationship (- a/b = c/d; if a increases, what will happen to c?)
	 • **Representation:**
	     o Use a proportion method to solve (part/whole = number/100).
	     o Set up a proportion to solve for an unknown value.
	     o Follow a sequence of steps to solve a problem.
	     o Understand vocabulary and symbols: % (percent), proportion.

MACC.7.RP.1.2	Recognize and represent proportional relationships between quantities. a. Decide whether two quantities are in a proportional relationship, e.g., by testing for equivalent ratios in a table or graphing on a coordinate plane and observing

whether the graph is a straight line through the origin.

    b. Identify the constant of proportionality (unit rate) in tables, graphs, equations, diagrams, and verbal descriptions of proportional relationships.

    c. Represent proportional relationships by equations. *For example, if total cost t is proportional to the number n of items purchased at a constant price p, the relationship between the total cost and the number of items can be expressed as $t = pn$.*

    d. Explain what a point (x, y) on the graph of a proportional relationship means in terms of the situation, with special attention to the points (0, 0) and (1, r) where r is the unit rate.

Cognitive Complexity: Level 2: Basic Application of Skills & Concepts

      o Show a proportion/ratio in three ways: number to number (2 to 6) expressed as a fraction (2/6) or using a colon (2:6).
      o Represent the proportion of objects (e.g., female students) to the total number of objects (students in class); part-to-whole.
      o Represent the proportion of the number of one object (female students) to the number of other objects (male students) from a set of objects (male and female students); part-to- part.
      o Understand concept, symbols. and vocabulary: proportion, ratio, rate, prices, portions per person.

MACC.7.RP.1.CCC.2b   Determine if two quantities are in a proportional relationship using a table of equivalent ratios or points graphed on a coordinate plane.

	MACC.7.RP.1.CCC.2c Represent proportional relationships on a line graph.
	MACC.7.RP.1.CCC.2d Use a rate of change or proportional relationship to determine the points on a coordinate plane.
	MACC.7.RP.1.CCC.3a Use proportions to solve ratio problems.

	MACC.7.RP.1.CCC.3b Solve word problems involving ratios.
	
	• **Concrete:**
	    o Show rate when asked.
	    o Show proportion when asked.
	    o Select a set for the ratio given.
	• **Representation:**
	    o Locate information within a word problem.
	    o Make meaning of a word problem.
	    o Understand concept and vocabulary: ratio.

	MACC.7.RP.1.CCC.3c Find percents in real-world contexts.
	MACC.7.RP.1.CCC.3d Solve one step percentage increase and decrease problems.

	MACC.7.RP.1.CCC.3e Use proportional relationships to solve multi-step percent problems.
	
	• **Concrete:**
	    o Identify how one variable changes in relation to another variable in a directly proportional relationship (- $a/b = c/d$; if a increases, what will happen to c?)
	• **Representation:**
	    o Use a proportion method to solve (part/whole = number/100).
	    o Set up a proportion to solve for an unknown value.
	    o Follow a sequence of steps to solve a problem.
	    o Understand vocabulary and symbols: % (percent), proportion.

MACC.7.RP.1.3	Use proportional relationships to solve multistep ratio and percent problems. *Examples: simple interest, tax, markups and markdowns, gratuities and commissions, fees, percent increase and decrease, percent error.* *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
	CORE CONTENT CONNECTOR
	MACC.7.RP.1.CCC.1a Find unit rates given a ratio.
	MACC.7.RP.1.CCC.1b Determine unit rates

associated with ratios of lengths, areas, and other quantities measured in like units.

MACC.7.RP.1.CCC.1c	Solve one-step problems involving unit rates associated with ratios of fractions.

MACC.7.RP.1.CCC.2a   Identify the proportional relationship between two quantities.

- **Concrete:**
  - o Recognize the constancy of one object to its parts (i.e. one face: two eyes).
- **Representation:**
  - o Recognize the meaning of the placement of numbers in a proportion for a given situation.
  - o Show a proportion/ratio in three ways: number to number (2 to 6) expressed as a fraction (2/6) or using a colon (2:6).

Domain: THE NUMBER SYSTEM

Cluster 1: Apply and extend previous understandings of operations with fractions to add, subtract, multiply, and divide rational numbers.

Major Cluster

Don't … Sort clusters from Major to Supporting, and then teach them in that order. To do so would strip the coherence of the mathematical ideas and miss the opportunity to enhance the major work of the grade with the supporting clusters.

STANDARD CODE	STANDARD

MACC.7.NS.1.1	Apply and extend previous understandings of addition and subtraction to add and subtract rational numbers; represent addition and subtraction on a horizontal or vertical number line diagram.
	
	    a. Describe situations in which opposite quantities combine to make 0. *For example, a hydrogen atom has 0 charge because its two constituents are oppositely charged.*
	    b. Understand p + q as the number located a distance |q| from p, in the positive or negative direction depending on whether q is positive or negative. Show that a number and its opposite have a sum of 0 (are additive inverses). Interpret sums of rational numbers by describing real-world contexts.
	    c. Understand subtraction of rational numbers as adding the additive inverse, p – q = p + (–q). Show that the distance between two rational numbers on the number line is the absolute value of their difference, and apply this principle in real-world contexts.
	    d. Apply properties of operations as strategies to add and subtract rational numbers.

Cognitive Complexity: Level 2: Basic Application of Skills & Concepts

CORE CONTENT CONNECTOR
MACC.7.NS.1.CCC.1a   Identify the additive inverse of a number (e.g., -3 and +3).
MACC.7.NS.1.CCC.1b   Identify the difference between two given numbers on a number line using absolute value.

MACC.7.NS.1.CCC.2a   Solve multiplication problems with positive/negative numbers.
 	
• **Concrete:**
  o Create an array of objects into groups to model the role of equal groups in a multiplication situation.
  o Create an array of objects for the mathematical equation and match answer symbol (+ or -) following multiplication rules for an equation.
• **Representation:**
  o Create pictorial array for the mathematical equation and match answer symbol (+ or -) following multiplication rules for an equation.

MACC.7.NS.1.CCC.2b   Solve division problems with positive/negative numbers.
 	
• **Concrete:**
  o Create an array of objects for the mathematical equation and match answer symbol (+ or -) following division rules for an equation.
• **Representation:**
  o Create pictorial array for the mathematical equation and match answer symbol (+ or -) following division rules for an equation.

| MACC.7.NS.1.2 | Apply and extend previous understandings of multiplication and division and of fractions to multiply and divide rational numbers.

  a. Understand that multiplication is extended from fractions to rational numbers by requiring that operations continue to satisfy the properties of operations, particularly the distributive property, leading to products such as $(-1)(-1) = 1$ and the rules for multiplying signed numbers. Interpret products of rational numbers by describing real-world contexts.
  b. Understand that integers can be divided, provided that the divisor is not zero, and every quotient of integers (with non-zero divisor) is a rational number. If p and q are integers, then $-(p/q) = (-p)/q = p/(-q)$. Interpret quotients of rational numbers by describing real-world contexts.
  c. Apply properties of operations as strategies to multiply and divide rational numbers.
  d. Convert a rational number to a decimal using long division; know that the |

	decimal form of a rational number terminates in 0s or eventually repeats.

Domain: EXPRESSIONS & EQUATIONS

Cluster 1: Use properties of operations to generate equivalent expressions.

Major Cluster

Don't … Sort clusters from Major to Supporting, and then teach them in that order. To do so would strip the coherence of the mathematical ideas and miss the opportunity to enhance the major work of the grade with the supporting clusters.

STANDARD CODE	STANDARD
MACC.7.EE.1.1	Apply properties of operations as strategies to add, subtract, factor, and expand linear expressions with rational coefficients. *Cognitive Complexity:* Level 1: Recall
MACC.7.EE.1.2	Understand that rewriting an expression in different forms in a problem context can shed light on the problem and how the quantities in it are related. *For example, a + 0.05a = 1.05a means that "increase by 5%" is the same as "multiply by 1.05."* *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts

Cluster 2: Solve real-life and mathematical problems using numerical and algebraic expressions and equations.

Major Cluster Don't … Sort clusters from Major to Supporting, and then teach them in that order. To do so would strip the coherence of the mathematical ideas and miss the opportunity to enhance the major work of the grade with the supporting clusters.	
STANDARD CODE	**STANDARD**
MACC.7.EE.2.3	Solve multi-step real-life and mathematical problems posed with positive and negative rational numbers in any form (whole numbers, fractions, and decimals), using tools strategically. Apply properties of operations to calculate with numbers in any form; convert between forms as appropriate; and assess the reasonableness of answers using mental computation and estimation strategies. *For example: If a woman making $25 an hour gets a 10% raise, she will make an additional 1/10 of her salary an hour, or $2.50, for a new salary of $27.50. If you want to place a towel bar 9 3/4 inches long in the center of a door that is 27 1/2 inches wide, you will need to place the bar about 9 inches from each edge; this estimate can be used as a check on the exact computation.* *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
CORE CONTENT CONNECTOR	
MACC.7.EE.2.CCC.3a Solve real-world, multi-step problems using whole numbers.	
MACC.7.EE.2.CCC.4a Set up equations with one variable based on real-world problems.	
MACC.7.EE.2.CCC.4b Solve equations with one variable based on real-world problems.	

MACC.7.EE.2.CCC.4c   Use variables to represent quantities in a real-world or mathematical problem, and construct simple equations and inequalities to solve problems by reasoning about the quantities.
 	
• **Concrete:**
  o Record/replace a variable in an equation with a fact from a story on a graphic organizer.
• **Representation:**
  o Create a pictorial array of a simple equation to translate wording.
  o Understand concepts, vocabulary, and symbols +, -, X, ÷, =, ≠, <, >, equation, equal, inequality.	

MACC.7.EE.2.CCC.4d Use a calculator to solve word problems leading to inequalities of the form $px + q > r$ or $px + q < r$, where p, q, and r are specific rational numbers.	
MACC.7.EE.2.4	Use variables to represent quantities in a real-world or mathematical problem, and construct simple equations and inequalities to solve problems by reasoning about the quantities. a. Solve word problems leading to equations of the form $px + q = r$ and $p(x + q) = r$, where p, q, and r are specific rational numbers. Solve equations of these forms fluently. Compare an algebraic solution to an arithmetic solution, identifying the sequence of the operations used in each approach. *For*

example, the perimeter of a rectangle is 54 cm. Its length is 6 cm. What is its width?

    b. Solve word problems leading to inequalities of the form px + q > r or px + q < r, where p, q, and r are specific rational numbers. Graph the solution set of the inequality and interpret it in the context of the problem. *For example: As a salesperson, you are paid $50 per week plus $3 per sale. This week you want your pay to be at least $100. Write an inequality for the number of sales you need to make, and describe the solutions.*

MACC.7.SP.3.CCC.8a Determine the theoretical probability of multistage probability experiments (two coins, two dice).	
MACC.7.SP.3.CCC.8b Collect data from multi-	

		stage probability experiments (two coins, two dice).
		MACC.7.SP.3.CCC.8c Compare actual results of multi-stage experiment with theoretical probabilities.

MACC.7.SP.3.7		Develop a probability model and use it to find probabilities of events. Compare probabilities from a model to observed frequencies; if the agreement is not good, explain possible sources of the discrepancy.
		
		    a. Develop a uniform probability model by assigning equal probability to all outcomes, and use the model to determine probabilities of events. *For example, if a student is selected at random from a class, find the probability that Jane will be selected and the probability that a girl will be selected.*
		    b. Develop a probability model (which may not be uniform) by observing frequencies in data generated from a chance process. *For example, find the approximate probability that a spinning penny will land heads up or that a tossed paper cup will land open-end down. Do the outcomes for the spinning penny appear to be equally likely based on the observed frequencies?*
		
		Cognitive Complexity: Level 3: Strategic Thinking & Complex Reasoning

CORE CONTENT CONNECTOR
MACC.7.SP.3.CCC.5a   Describe the probability of events as being certain or impossible, likely, less likely, or equally likely.
MACC.7.SP.3.CCC.5b   State the theoretical probability of events occurring in terms of ratios (words, percentages, decimals).
MACC.7.SP.3.CCC.6a   Using a tree diagram, represent all possible outcomes of a situation, with up to three compound events with two or three possibilities per category (selecting the color of shirt or pants, type of shoes).
MACC.7.SP.3.CCC.7a   Compare actual results of simple experiment with theoretical probabilities.
MACC.7.SP.3.CCC.8a   Determine the theoretical probability of multistage probability experiments (two coins, two dice).
MACC.7.SP.3.CCC.8b   Collect data from multi-stage probability experiments (two coins, two dice).
MACC.7.SP.3.CCC.8c   Compare actual results of multi-stage experiment with theoretical probabilities.

MACC.7.SP.3.8		Find probabilities of compound events using organized lists, tables, tree diagrams, and simulation.
		
		    a. Understand that, just as with simple events, the probability of a compound event is the fraction of outcomes in the sample space for which the compound event occurs.
		    b. Represent sample spaces for compound events using methods such as organized lists, tables and tree diagrams. For an event described in everyday language (e.g., "rolling double sixes"), identify the outcomes in the sample space which compose the event.
		    c. Design and use a simulation to generate frequencies for compound events. *For example, use random digits as a simulation tool to approximate the answer to the question: If 40% of donors have type A blood, what is the probability that*

	it will take at least 4 donors to find one with type A blood?
	Cognitive Complexity: Level 3: Strategic Thinking & Complex Reasoning

English Language Arts Standards

Below are some examples of English/Language Arts Standards. Complete list and details are presented in the following website: http://www.cpalms.org/Homepage/index.aspx

GRADE: K

Strand: READING STANDARDS FOR LITERATURE

Cluster 1: Key Ideas and Details

STANDARD CODE	STANDARD
LACC.K.RL.1.1	With prompting and support, ask and answer questions about key details in a text. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts

STANDARD CODE	STANDARD
LACC.K.RL.1.2	With prompting and support, retell familiar stories, including key details. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
LACC.K.RL.1.3	With prompting and support, identify characters, settings, and major events in a story. *Cognitive Complexity:* Level 1: Recall

Cluster 2: Craft and Structure

STANDARD CODE	STANDARD
LACC.K.RL.2.4	Ask and answer questions about unknown words in a text. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
LACC.K.RL.2.5	Recognize common types of texts (e.g., storybooks, poems). *Cognitive Complexity:* Level 1: Recall
LACC.K.RL.2.6	With prompting and support, name the author and illustrator of a story and define the role of each in telling the story. *Cognitive Complexity:* Level 1: Recall

Cluster 3: Integration of Knowledge and Ideas

STANDARD CODE	STANDARD
LACC.K.RL.3.7	With prompting and support, describe the relationship between illustrations and the story in which they appear (e.g., what moment in a story an illustration depicts). *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
LACC.K.RL.3.9	With prompting and support, compare and contrast the adventures and experiences of characters in familiar stories. *Cognitive Complexity:* Level 3: Strategic Thinking & Complex Reasoning

Cluster 4: Range of Reading and Level of Text Complexity

STANDARD CODE	STANDARD
LACC.K.RL.4.10	Actively engage in group reading activities with purpose and understanding. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts

Strand: READING STANDARDS: FOUNDATIONAL SKILLS (K-5)

Cluster 1: Print Concepts

STANDARD CODE	STANDARD
LACC.K.RF.1.1	Demonstrate understanding of the organization and basic features of print. a. Follow words from left to right, top to bottom, and page by page. b. Recognize that spoken words are represented in written language by specific sequences of letters. c. Understand that words are separated by spaces in print. d. Recognize and name all upper- and lowercase letters of the alphabet.

Cognitive Complexity: Level 1: Recall

Cluster 2: Phonological Awareness

STANDARD CODE	STANDARD

LACC.K.RF.2.2	Demonstrate understanding of spoken words, syllables, and sounds (phonemes).
	
	    a. Recognize and produce rhyming words.
	    b. Count, pronounce, blend, and segment syllables in spoken words.
	    c. Blend and segment onsets and rimes of single-syllable spoken words.
	    d. Isolate and pronounce the initial, medial vowel, and final sounds (phonemes) in three-phoneme (consonant-vowel-consonant, or CVC) words.1 (This does not include CVCs ending with /l/, /r/, or /x/.)
	    e. Add or substitute individual sounds (phonemes) in simple, one-syllable words to make new words.
	
	Cognitive Complexity: Level 1: Recall

Cluster 3: Phonics and Word Recognition

STANDARD CODE	STANDARD

LACC.K.RF.3.3	Know and apply grade-level phonics and word analysis skills in decoding words.
	
	    a. Demonstrate basic knowledge of letter-sound correspondences by producing the primary or most frequent sound for each consonant.
	    b. Associate the long and short sounds with the common spellings (graphemes) for the five major vowels.
	    c. Read common high-frequency words by sight (e.g., the, of, to, you, she, my, is, are, do, does).
	    d. Distinguish between similarly spelled words by identifying the sounds of the letters that differ.
	
	Cognitive Complexity: Level 1: Recall

Cluster 4: Fluency

STANDARD CODE	STANDARD
LACC.K.RF.4.4	Read emergent-reader texts with purpose and understanding. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts

Strand: READING STANDARDS FOR INFORMATIONAL TEXT

Cluster 1: Key Ideas and Details

STANDARD CODE	STANDARD
LACC.K.RI.1.1	With prompting and support, ask and answer questions about key details in a text. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts

LACC.K.RI.1.2	With prompting and support, identify the main topic and retell key details of a text.
	Cognitive Complexity: Level 2: Basic Application of Skills & Concepts
LACC.K.RI.1.3	With prompting and support, describe the connection between two individuals, events, ideas, or pieces of information in a text.
	Cognitive Complexity: Level 3: Strategic Thinking & Complex Reasoning

Cluster 2: Craft and Structure

STANDARD CODE	STANDARD
LACC.K.RI.2.4	With prompting and support, ask and answer questions about unknown words in a text.
	Cognitive Complexity: Level 2: Basic Application of Skills & Concepts
LACC.K.RI.2.5	Identify the front cover, back cover, and title page of a book.
	Cognitive Complexity: Level 1: Recall
LACC.K.RI.2.6	Name the author and illustrator of a text and define the role of each in presenting the ideas or information in a text.
	Cognitive Complexity: Level 1: Recall

Cluster 3: Integration of Knowledge and Ideas

STANDARD CODE	STANDARD
LACC.K.RI.3.7	With prompting and support, describe the relationship between illustrations and the text in which they appear (e.g., what person, place, thing, or idea in the text an illustration depicts).
	Cognitive Complexity: Level 2: Basic Application of Skills & Concepts
LACC.K.RI.3.8	With prompting and support, identify the reasons an author gives to support points in a text.
	Cognitive Complexity: Level 2: Basic Application of Skills & Concepts
LACC.K.RI.3.9	With prompting and support, identify basic similarities in and differences between two texts on the same topic (e.g., in illustrations, descriptions, or procedures).
	Cognitive Complexity: Level 3: Strategic Thinking & Complex Reasoning

Cluster 4: Range of Reading and Level of Text Complexity

STANDARD CODE	STANDARD
LACC.K.RI.4.10	Actively engage in group reading activities with purpose and understanding.
	Cognitive Complexity: Level 2: Basic Application of Skills & Concepts

Strand: WRITING STANDARDS

Cluster 1: Text Types and Purposes

STANDARD CODE	STANDARD
LACC.K.W.1.1	Use a combination of drawing, dictating, and writing to compose opinion pieces in which they tell a reader the topic or the name of the book they are writing about and state an opinion or preference about the topic or book (e.g., My favorite book is...).

	Cognitive Complexity: Level 2: Basic Application of Skills & Concepts
LACC.K.W.1.2	Use a combination of drawing, dictating, and writing to compose informative/explanatory texts in which they name what they are writing about and supply some information about the topic.

Cognitive Complexity: Level 2: Basic Application of Skills & Concepts |
| LACC.K.W.1.3 | Use a combination of drawing, dictating, and writing to narrate a single event or several loosely linked events, tell about the events in the order in which they occurred, and provide a reaction to what happened.

Cognitive Complexity: Level 2: Basic Application of Skills & Concepts |

Cluster 2: Production and Distribution of Writing

STANDARD CODE	STANDARD
LACC.K.W.2.5	With guidance and support from adults, respond to questions and suggestions from peers and add details to strengthen writing as needed.

Cognitive Complexity: Level 3: Strategic Thinking & Complex Reasoning |
| LACC.K.W.2.6 | With guidance and support from adults, explore a variety of digital tools to produce and publish writing, including in collaboration with peers.

Cognitive Complexity: Level 2: Basic Application of Skills & Concepts |

Cluster 3: Research to Build and Present Knowledge

STANDARD CODE	STANDARD
LACC.K.W.3.7	Participate in shared research and writing projects (e.g., explore a number of books by a favorite author and express opinions about them).

Cognitive Complexity: Level 4: Extended Thinking &Complex Reasoning |
| LACC.K.W.3.8 | With guidance and support from adults, recall information from experiences or gather information from provided sources to answer a question.

Cognitive Complexity: Level 2: Basic Application of Skills & Concepts |

Strand: STANDARDS FOR SPEAKING AND LISTENING

Cluster 1: Comprehension and Collaboration

STANDARD CODE	STANDARD
LACC.K.SL.1.1	Participate in collaborative conversations with diverse partners about *kindergarten topics* and texts with peers and adults in small and larger groups.

    a.   Follow agreed-upon rules for discussions (e.g., listening to others and taking turns speaking about the topics and texts under discussion).
    b.   Continue a conversation through multiple exchanges.

Cognitive Complexity: Level 2: Basic Application of Skills & Concepts |
| LACC.K.SL.1.2 | Confirm understanding of a text read aloud or information presented orally or through other media by asking and answering questions about key details and requesting clarification if something is not understood. |

STANDARD CODE	STANDARD
	Cognitive Complexity: Level 2: Basic Application of Skills & Concepts
LACC.K.SL.1.3	Ask and answer questions in order to seek help, get information, or clarify something that is not understood. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts

Cluster 2: Presentation of Knowledge and Ideas

STANDARD CODE	STANDARD
LACC.K.SL.2.4	Describe familiar people, places, things, and events and, with prompting and support, provide additional detail. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
LACC.K.SL.2.5	Add drawings or other visual displays to descriptions as desired to provide additional detail. *Cognitive Complexity:* Level 3: Strategic Thinking & Complex Reasoning
LACC.K.SL.2.6	Speak audibly and express thoughts, feelings, and ideas clearly. *Cognitive Complexity:* Level 1: Recall

Strand: LANGUAGE STANDARDS

Cluster 1: Conventions of Standard English

STANDARD CODE	STANDARD
LACC.K.L.1.1	Demonstrate command of the conventions of standard English grammar and usage when writing or speaking. a. Print many upper- and lowercase letters. b. Use frequently occurring nouns and verbs. c. Form regular plural nouns orally by adding /s/ or /es/ (e.g., dog, dogs; wish, wishes). d. Understand and use question words (interrogatives) (e.g., who, what, where, when, why, how). e. Use the most frequently occurring prepositions (e.g., to, from, in, out, on, off, for, of, by, with). f. Produce and expand complete sentences in shared language activities. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
LACC.K.L.1.2	Demonstrate command of the conventions of standard English capitalization, punctuation, and spelling when writing. a. Capitalize the first word in a sentence and the pronoun I. b. Recognize and name end punctuation. c. Write a letter or letters for most consonant and short-vowel sounds (phonemes). d. Spell simple words phonetically, drawing on knowledge of sound-letter relationships. *Cognitive Complexity:* Level 1: Recall

319

Cluster 3: Vocabulary Acquisition and Use	
STANDARD CODE	**STANDARD**
LACC.K.L.3.4	Determine or clarify the meaning of unknown and multiple-meaning words and phrases based on kindergarten reading and content. a. Identify new meanings for familiar words and apply them accurately (e.g., knowing duck is a bird and learning the verb to duck). b. Use the most frequently occurring inflections and affixes (e.g., *-ed, -s, re-, un-, pre-, -ful, -less*) as a clue to the meaning of an unknown word. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
LACC.K.L.3.5	With guidance and support from adults, explore word relationships and nuances in word meanings. a. Sort common objects into categories (e.g., shapes, foods) to gain a sense of the concepts the categories represent. b. Demonstrate understanding of frequently occurring verbs and adjectives by relating them to their opposites (antonyms). c. Identify real-life connections between words and their use (e.g., note places at school that are colorful). d. Distinguish shades of meaning among verbs describing the same general action (e.g., *walk, march, strut, prance*) by acting out the meanings. *Cognitive Complexity:* Level 3: Strategic Thinking & Complex Reasoning
LACC.K.L.3.6	Use words and phrases acquired through conversations, reading and being read to, and responding to texts. *Cognitive Complexity:* Level 1: Recall

GRADE: 4

Strand: READING STANDARDS FOR LITERATURE

Cluster 1: Key Ideas and Details	
STANDARD CODE	**STANDARD**
LACC.4.RL.1.1	Refer to details and examples in a text when explaining what the text says explicitly and when drawing inferences from the text. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
LACC.4.RL.1.2	Determine a theme of a story, drama, or poem from details in the text; summarize the text. *Cognitive Complexity:* Level 3: Strategic Thinking & Complex Reasoning
LACC.4.RL.1.3	Describe in depth a character, setting, or event in a story or drama, drawing on specific details in the text (e.g., a character's thoughts, words, or actions). *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts

Cluster 2: Craft and Structure

STANDARD CODE	STANDARD
LACC.4.RL.2.4	Determine the meaning of words and phrases as they are used in a text, including those that allude to significant characters found in mythology (e.g., Herculean). *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
LACC.4.RL.2.5	Explain major differences between poems, drama, and prose, and refer to the structural elements of poems (e.g., verse, rhythm, meter) and drama (e.g., casts of characters, settings, descriptions, dialogue, stage directions) when writing or speaking about a text. *Cognitive Complexity:* Level 3: Strategic Thinking & Complex Reasoning
LACC.4.RL.2.6	Compare and contrast the point of view from which different stories are narrated, including the difference between first- and third-person narrations. *Cognitive Complexity:* Level 3: Strategic Thinking & Complex Reasoning

Cluster 3: Integration of Knowledge and Ideas

STANDARD CODE	STANDARD
LACC.4.RL.3.7	Make connections between the text of a story or drama and a visual or oral presentation of the text, identifying where each version reflects specific descriptions and directions in the text. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
LACC.4.RL.3.9	Compare and contrast the treatment of similar themes and topics (e.g., opposition of good and evil) and patterns of events (e.g., the quest) in stories, myths, and traditional literature from different cultures. *Cognitive Complexity:* Level 3: Strategic Thinking & Complex Reasoning

Cluster 4: Range of Reading and Level of Text Complexity

STANDARD CODE	STANDARD
LACC.4.RL.4.10	By the end of the year, read and comprehend literature, including stories, dramas, and poetry, in the grades 4–5 text complexity band proficiently, with scaffolding as needed at the high end of the range. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts

Strand: READING STANDARDS: FOUNDATIONAL SKILLS (K-5)

Cluster 3: Phonics and Word Recognition

STANDARD CODE	STANDARD
LACC.4.RF.3.3	Know and apply grade-level phonics and word analysis skills in decoding words. a. Use combined knowledge of all letter-sound correspondences, syllabication patterns, and morphology (e.g., roots and affixes) to read accurately unfamiliar multisyllabic words in context and out of context.

	Cognitive Complexity: Level 1: Recall

Cluster 4: Fluency

STANDARD CODE	STANDARD

LACC.4.RF.4.4	Read with sufficient accuracy and fluency to support comprehension.
	
	   a. Read grade-level text with purpose and understanding.
	   b. Read grade-level prose and poetry orally with accuracy, appropriate rate, and expression.
	   c. Use context to confirm or self-correct word recognition and understanding, rereading as necessary.
	
	Cognitive Complexity: Level 2: Basic Application of Skills & Concepts

Strand: READING STANDARDS FOR INFORMATIONAL TEXT

Cluster 1: Key Ideas and Details

STANDARD CODE	STANDARD
LACC.4.RI.1.1	Refer to details and examples in a text when explaining what the text says explicitly and when drawing inferences from the text. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
LACC.4.RI.1.2	Determine the main idea of a text and explain how it is supported by key details; summarize the text. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
LACC.4.RI.1.3	Explain events, procedures, ideas, or concepts in a historical, scientific, or technical text, including what happened and why, based on specific information in the text. *Cognitive Complexity:* Level 3: Strategic Thinking & Complex Reasoning

Cluster 2: Craft and Structure

STANDARD CODE	STANDARD
LACC.4.RI.2.4	Determine the meaning of general academic and domain-specific words or phrases in a text relevant to a *grade 4 topic or subject area*. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
LACC.4.RI.2.5	Describe the overall structure (e.g., chronology, comparison, cause/effect, problem/solution) of events, ideas, concepts, or information in a text or part of a text. *Cognitive Complexity:* Level 3: Strategic Thinking & Complex Reasoning
LACC.4.RI.2.6	Compare and contrast a firsthand and secondhand account of the same event or topic; describe the differences in focus and the information provided. *Cognitive Complexity:* Level 3: Strategic Thinking & Complex Reasoning

Cluster 3: Integration of Knowledge and Ideas

STANDARD CODE	STANDARD

STANDARD CODE	STANDARD
LACC.4.RI.3.7	Interpret information presented visually, orally, or quantitatively (e.g., in charts, graphs, diagrams, time lines, animations, or interactive elements on Web pages) and explain how the information contributes to an understanding of the text in which it appears. *Cognitive Complexity:* Level 3: Strategic Thinking & Complex Reasoning
LACC.4.RI.3.8	Explain how an author uses reasons and evidence to support particular points in a text. *Cognitive Complexity:* Level 3: Strategic Thinking & Complex Reasoning
LACC.4.RI.3.9	Integrate information from two texts on the same topic in order to write or speak about the subject knowledgeably. *Cognitive Complexity:* Level 3: Strategic Thinking & Complex Reasoning

Cluster 4: Range of Reading and Level of Text Complexity

STANDARD CODE	STANDARD
LACC.4.RI.4.10	By the end of year, read and comprehend informational texts, including history/social studies, science, and technical texts, in the grades 4–5 text complexity band proficiently, with scaffolding as needed at the high end of the range. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts

Strand: WRITING STANDARDS

Cluster 1: Text Types and Purposes

STANDARD CODE	STANDARD
LACC.4.W.1.1	Write opinion pieces on topics or texts, supporting a point of view with reasons and information. a. Introduce a topic or text clearly, state an opinion, and create an organizational structure in which related ideas are grouped to support the writer's purpose. b. Provide reasons that are supported by facts and details. c. Link opinion and reasons using words and phrases (e.g., *for instance, in order to, in addition*). d. Provide a concluding statement or section related to the opinion presented. *Cognitive Complexity:* Level 3: Strategic Thinking & Complex Reasoning
LACC.4.W.1.2	Write informative/explanatory texts to examine a topic and convey ideas and information clearly. a. Introduce a topic clearly and group related information in paragraphs and sections; include formatting (e.g., headings), illustrations, and multimedia when useful to aiding comprehension. b. Develop the topic with facts, definitions, concrete details, quotations, or other information and examples related to the topic. c. Link ideas within categories of information using words and phrases (e.g., *another, for example, also, because*). d. Use precise language and domain-specific vocabulary to inform about or explain the topic. e. Provide a concluding statement or section related to the information or

	explanation presented.
	Cognitive Complexity: Level 2: Basic Application of Skills & Concepts

LACC.4.W.1.3	Write narratives to develop real or imagined experiences or events using effective technique, descriptive details, and clear event sequences.
	
	  a. Orient the reader by establishing a situation and introducing a narrator and/or characters; organize an event sequence that unfolds naturally.
	  b. Use dialogue and description to develop experiences and events or show the responses of characters to situations.
	  c. Use a variety of transitional words and phrases to manage the sequence of events.
	  d. Use concrete words and phrases and sensory details to convey experiences and events precisely.
	  e. Provide a conclusion that follows from the narrated experiences or events.
	
	Cognitive Complexity: Level 3: Strategic Thinking & Complex Reasoning

Cluster 2: Production and Distribution of Writing

STANDARD CODE	STANDARD
LACC.4.W.2.4	Produce clear and coherent writing in which the development and organization are appropriate to task, purpose, and audience. (Grade-specific expectations for writing types are defined in standards 1–3 above.) *Cognitive Complexity:* Level 3: Strategic Thinking & Complex Reasoning
LACC.4.W.2.5	With guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, and editing. *Cognitive Complexity:* Level 3: Strategic Thinking & Complex Reasoning
LACC.4.W.2.6	With some guidance and support from adults, use technology, including the Internet, to produce and publish writing as well as to interact and collaborate with others; demonstrate sufficient command of keyboarding skills to type a minimum of one page in a single sitting. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts

Cluster 3: Research to Build and Present Knowledge

STANDARD CODE	STANDARD
LACC.4.W.3.7	Conduct short research projects that build knowledge through investigation of different aspects of a topic. *Cognitive Complexity:* Level 4: Extended Thinking &Complex Reasoning
LACC.4.W.3.8	Recall relevant information from experiences or gather relevant information from print and digital sources; take notes and categorize information, and provide a list of sources. *Cognitive Complexity:* Level 3: Strategic Thinking & Complex Reasoning
LACC.4.W.3.9	Draw evidence from literary or informational texts to support analysis, reflection, and research.

	a. Apply grade 4 Reading standards to literature (e.g., "Describe in depth a character, setting, or event in a story or drama, drawing on specific details in the text [e.g., a character's thoughts, words, or actions].").
	b. Apply grade 4 Reading standards to informational texts (e.g., "Explain how an author uses reasons and evidence to support particular points in a text").
	Cognitive Complexity: Level 3: Strategic Thinking & Complex Reasoning

Cluster 4: Range of Writing

STANDARD CODE	STANDARD
LACC.4.W.4.10	Write routinely over extended time frames (time for research, reflection, and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences. *Cognitive Complexity:* Level 3: Strategic Thinking & Complex Reasoning

Strand: STANDARDS FOR SPEAKING AND LISTENING

Cluster 1: Comprehension and Collaboration

STANDARD CODE	STANDARD
LACC.4.SL.1.1	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade *4 topics and texts*, building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation and other information known about the topic to explore ideas under discussion. b. Follow agreed-upon rules for discussions and carry out assigned roles. c. Pose and respond to specific questions to clarify or follow up on information, and make comments that contribute to the discussion and link to the remarks of others. d. Review the key ideas expressed and explain their own ideas and understanding in light of the discussion. *Cognitive Complexity:* Level 3: Strategic Thinking & Complex Reasoning
LACC.4.SL.1.2	Paraphrase portions of a text read aloud or information presented in diverse media and formats, including visually, quantitatively, and orally. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
LACC.4.SL.1.3	Identify the reasons and evidence a speaker provides to support particular points. *Cognitive Complexity:* Level 3: Strategic Thinking & Complex Reasoning

Cluster 2: Presentation of Knowledge and Ideas

STANDARD CODE	STANDARD
LACC.4.SL.2.4	Report on a topic or text, tell a story, or recount an experience in an organized manner, using appropriate facts and relevant, descriptive details to support main ideas

STANDARD CODE	STANDARD
	or themes; speak clearly at an understandable pace. *Cognitive Complexity:* Level 3: Strategic Thinking & Complex Reasoning
LACC.4.SL.2.5	Add audio recordings and visual displays to presentations when appropriate to enhance the development of main ideas or themes. *Cognitive Complexity:* Level 3: Strategic Thinking & Complex Reasoning
LACC.4.SL.2.6	Differentiate between contexts that call for formal English (e.g., presenting ideas) and situations where informal discourse is appropriate (e.g., small-group discussion); use formal English when appropriate to task and situation. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts

Strand: LANGUAGE STANDARDS

Cluster 1: Conventions of Standard English

STANDARD CODE	STANDARD
LACC.4.L.1.1	Demonstrate command of the conventions of standard English grammar and usage when writing or speaking. a. Use relative pronouns (*who, whose, whom, which, that*) and relative adverbs (*where, when, why*). b. Form and use the progressive (e.g., *I was walking; I am walking; I will be walking*) verb tenses. c. Use modal auxiliaries (e.g., *can, may, must*) to convey various conditions. d. Order adjectives within sentences according to conventional patterns (e.g., *a small red bag rather than a red small bag*). e. Form and use prepositional phrases. f. Produce complete sentences, recognizing and correcting inappropriate fragments and run-ons. g. Correctly use frequently confused words (e.g., *to, too, two; there, their*). *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
LACC.4.L.1.2	Demonstrate command of the conventions of standard English capitalization, punctuation, and spelling when writing. a. Use correct capitalization. b. Use commas and quotation marks to mark direct speech and quotations from a text. c. Use a comma before a coordinating conjunction in a compound sentence. d. Spell grade-appropriate words correctly, consulting references as needed. *Cognitive Complexity:* Level 1: Recall

Cluster 2: Knowledge of Language

STANDARD CODE	STANDARD
LACC.4.L.2.3	Use knowledge of language and its conventions when writing, speaking, reading, or listening.

	a. Choose words and phrases to convey ideas precisely. b. Choose punctuation for effect. c. Differentiate between contexts that call for formal English (e.g., presenting ideas) and situations where informal discourse is appropriate (e.g., small-group discussion). *Cognitive Complexity:* Level 3: Strategic Thinking & Complex Reasoning

Cluster 3: Vocabulary Acquisition and Use

STANDARD CODE	STANDARD
LACC.4.L.3.4	Determine or clarify the meaning of unknown and multiple-meaning words and phrases based on grade 4 reading and content, choosing flexibly from a range of strategies. a. Use context (e.g., definitions, examples, or restatements in text) as a clue to the meaning of a word or phrase. b. Use common, grade-appropriate Greek and Latin affixes and roots as clues to the meaning of a word (e.g., telegraph, photograph, autograph). c. Consult reference materials (e.g., dictionaries, glossaries, thesauruses), both print and digital, to find the pronunciation and determine or clarify the precise meaning of key words and phrases. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
LACC.4.L.3.5	Demonstrate understanding of figurative language, word relationships, and nuances in word meanings. a. Explain the meaning of simple similes and metaphors (e.g., as pretty as a picture) in context. b. Recognize and explain the meaning of common idioms, adages, and proverbs. c. Demonstrate understanding of words by relating them to their opposites (antonyms) and to words with similar but not identical meanings (synonyms). *Cognitive Complexity:* Level 3: Strategic Thinking & Complex Reasoning
LACC.4.L.3.6	Acquire and use accurately grade-appropriate general academic and domain-specific words and phrases, including those that signal precise actions, emotions, or states of being (e.g., quizzed, whined, stammered) and that are basic to a particular topic (e.g., *wildlife, conservation,* and *endangered* when discussing animal preservation). *Cognitive Complexity:* Level 1: Recall

GRADE: 7

Strand: READING STANDARDS FOR LITERATURE

Cluster 1: Key Ideas and Details

STANDARD CODE	STANDARD
LACC.7.RL.1.1	Cite several pieces of textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
LACC.7.RL.1.2	Determine a theme or central idea of a text and analyze its development over the course of the text; provide an objective summary of the text. *Cognitive Complexity:* Level 3: Strategic Thinking & Complex Reasoning
LACC.7.RL.1.3	Analyze how particular elements of a story or drama interact (e.g., how setting shapes the characters or plot). *Cognitive Complexity:* Level 3: Strategic Thinking & Complex Reasoning

Cluster 2: Craft and Structure

STANDARD CODE	STANDARD
LACC.7.RL.2.4	Determine the meaning of words and phrases as they are used in a text, including figurative and connotative meanings; analyze the impact of rhymes and other repetitions of sounds (e.g., alliteration) on a specific verse or stanza of a poem or section of a story or drama. *Cognitive Complexity:* Level 3: Strategic Thinking & Complex Reasoning
LACC.7.RL.2.5	Analyze how a drama's or poem's form or structure (e.g., soliloquy, sonnet) contributes to its meaning. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
LACC.7.RL.2.6	Analyze how an author develops and contrasts the points of view of different characters or narrators in a text. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts

Cluster 3: Integration of Knowledge and Ideas

STANDARD CODE	STANDARD
LACC.7.RL.3.7	Compare and contrast a written story, drama, or poem to its audio, filmed, staged, or multimedia version, analyzing the effects of techniques unique to each medium (e.g., lighting, sound, color, or camera focus and angles in a film). *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
LACC.7.RL.3.9	Compare and contrast a fictional portrayal of a time, place, or character and a historical account of the same period as a means of understanding how authors of fiction use or alter history. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts

Cluster 4: Range of Reading and Level of Text Complexity

STANDARD CODE	STANDARD
LACC.7.RL.4.10	By the end of the year, read and comprehend literature, including stories, dramas, and poems, in the grades 6–8 text complexity band proficiently, with scaffolding as needed at the high end of the range. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts

Strand: READING STANDARDS FOR INFORMATIONAL TEXT

Cluster 1: Key Ideas and Details

STANDARD CODE	STANDARD
LACC.7.RI.1.1	Cite several pieces of textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
LACC.7.RI.1.2	Determine two or more central ideas in a text and analyze their development over the course of the text; provide an objective summary of the text. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
LACC.7.RI.1.3	Analyze the interactions between individuals, events, and ideas in a text (e.g., how ideas influence individuals or events, or how individuals influence ideas or events). *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts

Cluster 2: Craft and Structure

STANDARD CODE	STANDARD
LACC.7.RI.2.4	Determine the meaning of words and phrases as they are used in a text, including figurative, connotative, and technical meanings; analyze the impact of a specific word choice on meaning and tone. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
LACC.7.RI.2.5	Analyze the structure an author uses to organize a text, including how the major sections contribute to the whole and to the development of the ideas. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
LACC.7.RI.2.6	Determine an author's point of view or purpose in a text and analyze how the author distinguishes his or her position from that of others. *Cognitive Complexity:* Level 3: Strategic Thinking & Complex Reasoning

Cluster 3: Integration of Knowledge and Ideas

STANDARD CODE	STANDARD
LACC.7.RI.3.7	Compare and contrast a text to an audio, video, or multimedia version of the text, analyzing each medium's portrayal of the subject (e.g., how the delivery of a speech affects the impact of the words). *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
LACC.7.RI.3.8	Trace and evaluate the argument and specific claims in a text, assessing whether the reasoning is sound and the evidence is relevant and sufficient to support the claims. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
LACC.7.RI.3.9	Analyze how two or more authors writing about the same topic shape their presentations of key information by emphasizing different evidence or advancing different interpretations of facts. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts

Cluster 4: Range of Reading and Level of Text Complexity

STANDARD CODE	STANDARD
LACC.7.RI.4.10	By the end of the year, read and comprehend literary nonfiction in the grades 6–8 text complexity band proficiently, with scaffolding as needed at the high end of the range. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts

Strand: WRITING STANDARDS

Cluster 1: Text Types and Purposes

STANDARD CODE	STANDARD
LACC.7.W.1.1	Write arguments to support claims with clear reasons and relevant evidence. a. Introduce claim(s), acknowledge alternate or opposing claims, and organize the reasons and evidence logically. b. Support claim(s) with logical reasoning and relevant evidence, using accurate, credible sources and demonstrating an understanding of the topic or text. c. Use words, phrases, and clauses to create cohesion and clarify the relationships among claim(s), reasons, and evidence. d. Establish and maintain a formal style. e. Provide a concluding statement or section that follows from and supports the argument presented. *Cognitive Complexity:* Level 3: Strategic Thinking & Complex Reasoning
LACC.7.W.1.2	Write informative/explanatory texts to examine a topic and convey ideas, concepts, and information through the selection, organization, and analysis of relevant content. a. Introduce a topic clearly, previewing what is to follow; organize ideas, concepts, and information, using strategies such as definition, classification, comparison/contrast, and cause/effect; include formatting (e.g., headings), graphics (e.g., charts, tables), and multimedia when useful to aiding comprehension. b. Develop the topic with relevant facts, definitions, concrete details, quotations, or other information and examples. c. Use appropriate transitions to create cohesion and clarify the relationships among ideas and concepts. d. Use precise language and domain-specific vocabulary to inform about or explain the topic. e. Establish and maintain a formal style. f. Provide a concluding statement or section that follows from and supports the information or explanation presented. *Cognitive Complexity:* Level 4: Extended Thinking &Complex Reasoning
LACC.7.W.1.3	Write narratives to develop real or imagined experiences or events using effective technique, relevant descriptive details, and well-structured event sequences. a. Engage and orient the reader by establishing a context and point of view and introducing a narrator and/or characters; organize an event sequence that unfolds naturally and logically. b. Use narrative techniques, such as dialogue, pacing, and description, to develop experiences, events, and/or characters. c. Use a variety of transition words, phrases, and clauses to convey sequence and signal shifts from one time frame or setting to another.

	d. Use precise words and phrases, relevant descriptive details, and sensory language to capture the action and convey experiences and events. e. Provide a conclusion that follows from and reflects on the narrated experiences or events. *Cognitive Complexity:* Level 3: Strategic Thinking & Complex Reasoning

Cluster 2: Production and Distribution of Writing

STANDARD CODE	STANDARD
LACC.7.W.2.4	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience. (Grade-specific expectations for writing types are defined in standards 1–3 above.) *Cognitive Complexity:* Level 3: Strategic Thinking & Complex Reasoning
LACC.7.W.2.5	With some guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on how well purpose and audience have been addressed. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
LACC.7.W.2.6	Use technology, including the Internet, to produce and publish writing and link to and cite sources as well as to interact and collaborate with others, including linking to and citing sources. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts

Cluster 3: Research to Build and Present Knowledge

STANDARD CODE	STANDARD
LACC.7.W.3.7	Conduct short research projects to answer a question, drawing on several sources and generating additional related, focused questions for further research and investigation. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
LACC.7.W.3.8	Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
LACC.7.W.3.9	Draw evidence from literary or informational texts to support analysis, reflection, and research. a. Apply grade 7 Reading standards to literature (e.g., "Compare and contrast a fictional portrayal of a time, place, or character and a historical account of the same period as a means of understanding how authors of fiction use or alter history"). b. Apply grade 7 Reading standards to literary nonfiction (e.g. "Trace and evaluate the argument and specific claims in a text, assessing whether the reasoning is sound and the evidence is relevant and sufficient to support the claims"). *Cognitive Complexity:* Level 3: Strategic Thinking & Complex Reasoning

Cluster 4: Range of Writing

STANDARD CODE	STANDARD
LACC.7.W.4.10	Write routinely over extended time frames (time for research, reflection, and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences. *Cognitive Complexity:* Level 3: Strategic Thinking & Complex Reasoning

Strand: STANDARDS FOR SPEAKING AND LISTENING

Cluster 1: Comprehension and Collaboration

STANDARD CODE	STANDARD

LACC.7.SL.1.1	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 7 topics, texts, and issues, building on others' ideas and expressing their own clearly.
	
	    a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion.
	    b. Follow rules for collegial discussions, track progress toward specific goals and deadlines, and define individual roles as needed.
	    c. Pose questions that elicit elaboration and respond to others' questions and comments with relevant observations and ideas that bring the discussion back on topic as needed.
	    d. Acknowledge new information expressed by others and, when warranted, modify their own views.
	
	Cognitive Complexity: Level 3: Strategic Thinking & Complex Reasoning

LACC.7.SL.1.2	Analyze the main ideas and supporting details presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how the ideas clarify a topic, text, or issue under study. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
LACC.7.SL.1.3	Delineate a speaker's argument and specific claims, evaluating the soundness of the reasoning and the relevance and sufficiency of the evidence. *Cognitive Complexity:* Level 3: Strategic Thinking & Complex Reasoning

Cluster 2: Presentation of Knowledge and Ideas

STANDARD CODE	STANDARD
LACC.7.SL.2.4	Present claims and findings, emphasizing salient points in a focused, coherent manner with pertinent descriptions, facts, details, and examples; use appropriate eye contact, adequate volume, and clear pronunciation. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
LACC.7.SL.2.5	Include multimedia components and visual displays in presentations to clarify claims and findings and emphasize salient points. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
LACC.7.SL.2.6	Adapt speech to a variety of contexts and tasks, demonstrating command of formal English when indicated or appropriate.

	Cognitive Complexity: Level 2: Basic Application of Skills & Concepts

Strand: LANGUAGE STANDARDS

Cluster 1: Conventions of Standard English

STANDARD CODE	STANDARD
LACC.7.L.1.1	Demonstrate command of the conventions of standard English grammar and usage when writing or speaking. a. Explain the function of phrases and clauses in general and their function in specific sentences. b. Choose among simple, compound, complex, and compound-complex sentences to signal differing relationships among ideas. c. Place phrases and clauses within a sentence, recognizing and correcting misplaced and dangling modifiers. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
LACC.7.L.1.2	Demonstrate command of the conventions of standard English capitalization, punctuation, and spelling when writing. a. Use a comma to separate coordinate adjectives (e.g., *It was a fascinating, enjoyable movie but not He wore an old[,] green shirt).* b. Spell correctly. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts

Cluster 2: Knowledge of Language

STANDARD CODE	STANDARD
LACC.7.L.2.3	Use knowledge of language and its conventions when writing, speaking, reading, or listening. a. Choose language that expresses ideas precisely and concisely, recognizing and eliminating wordiness and redundancy. *Cognitive Complexity:* Level 3: Strategic Thinking & Complex Reasoning

Cluster 3: Vocabulary Acquisition and Use

STANDARD CODE	STANDARD
LACC.7.L.3.4	Determine or clarify the meaning of unknown and multiple-meaning words and phrases based on *grade 7 reading and content*, choosing flexibly from a range of strategies. a. Use context (e.g., the overall meaning of a sentence or paragraph; a word's position or function in a sentence) as a clue to the meaning of a word or phrase. b. Use common, grade-appropriate Greek or Latin affixes and roots as clues to

	the meaning of a word (e.g., *belligerent, bellicose, rebel*).
	c. Consult general and specialized reference materials (e.g., dictionaries, glossaries, thesauruses), both print and digital, to find the pronunciation of a word or determine or clarify its precise meaning or its part of speech.
	d. Verify the preliminary determination of the meaning of a word or phrase (e.g., by checking the inferred meaning in context or in a dictionary).
	Cognitive Complexity: Level 2: Basic Application of Skills & Concepts
LACC.7.L.3.5	Demonstrate understanding of figurative language, word relationships, and nuances in word meanings.
	a. Interpret figures of speech (e.g., literary, biblical, and mythological allusions) in context.
	b. Use the relationship between particular words (e.g., synonym/antonym, analogy) to better understand each of the words.
	c. Distinguish among the connotations (associations) of words with similar denotations (definitions) (e.g., *refined, respectful, polite, diplomatic, condescending*).
	Cognitive Complexity: Level 3: Strategic Thinking & Complex Reasoning
LACC.7.L.3.6	Acquire and use accurately grade-appropriate general academic and domain-specific words and phrases; gather vocabulary knowledge when considering a word or phrase important to comprehension or expression.
	Cognitive Complexity: Level 1: Recall

Science Standards

Below are some examples of Science Standards. Complete list and details are presented in the following website:
http://www.cpalms.org/Homepage/index.aspx

GRADE: K

Big Idea 1: The Practice of Science

A: Scientific inquiry is a multifaceted activity; The processes of science include the formulation of scientifically investigable questions, construction of investigations into those questions, the collection of appropriate data, the evaluation of the meaning of those data, and the communication of this evaluation.

B: The processes of science frequently do not correspond to the traditional portrayal of

"the scientific method."

C: Scientific argumentation is a necessary part of scientific inquiry and plays an important role in the generation and validation of scientific knowledge.

D: Scientific knowledge is based on observation and inference; it is important to recognize that these are very different things. Not only does science require creativity in its methods and processes, but also in its questions and explanations.

BENCHMARK CODE	BENCHMARK
SC.K.N.1.1	Collaborate with a partner to collect information. *Cognitive Complexity/Depth of Knowledge Rating:* Low
SC.K.N.1.2	Make observations of the natural world and know that they are descriptors collected using the five senses. *Cognitive Complexity/Depth of Knowledge Rating:* Moderate
SC.K.N.1.3	Keep records as appropriate -- such as pictorial records -- of investigations conducted. *Cognitive Complexity/Depth of Knowledge Rating:* Moderate
SC.K.N.1.4	Observe and create a visual representation of an object which includes its major features. *Cognitive Complexity/Depth of Knowledge Rating:* High
SC.K.N.1.5	Recognize that learning can come from careful observation. *Cognitive Complexity/Depth of Knowledge Rating:* Moderate

Big Idea 5: Earth in Space and Time

Humans continue to explore Earth's place in space. Gravity and energy influence the formation of galaxies, including our own Milky Way Galaxy, stars, the Solar System, and Earth. Humankind's need to explore continues to lead to the development of knowledge and understanding of our Solar System.

BENCHMARK CODE	BENCHMARK
SC.K.E.5.1	Explore the Law of Gravity by investigating how objects are pulled toward the ground unless something holds them up. *Cognitive Complexity/Depth of Knowledge Rating:* Moderate
SC.K.E.5.2	Recognize the repeating pattern of day and night. *Cognitive Complexity/Depth of Knowledge Rating:* Low
SC.K.E.5.3	Recognize that the Sun can only be seen in the daytime. *Cognitive Complexity/Depth of Knowledge Rating:* Low
SC.K.E.5.4	Observe that sometimes the Moon can be seen at night and sometimes during the day. *Cognitive Complexity/Depth of Knowledge Rating:* Moderate
SC.K.E.5.5	Observe that things can be big and things can be small as seen from Earth. *Cognitive Complexity/Depth of Knowledge Rating:* High
SC.K.E.5.6	Observe that some objects are far away and some are nearby as seen from Earth. *Cognitive Complexity/Depth of Knowledge Rating:* High

GRADE: 1

Big Idea 1: The Practice of Science

A: Scientific inquiry is a multifaceted activity; The processes of science include the formulation of scientifically investigable questions, construction of investigations into those questions, the collection of appropriate data, the evaluation of the meaning of those data, and the communication of this evaluation.

B: The processes of science frequently do not correspond to the traditional portrayal of "the scientific method."

C: Scientific argumentation is a necessary part of scientific inquiry and plays an important role in the generation and validation of scientific knowledge.

D: Scientific knowledge is based on observation and inference; it is important to recognize that these are very different things. Not only does science require creativity in its methods and processes, but also in its questions and explanations.

BENCHMARK CODE	BENCHMARK
SC.1.N.1.1	Raise questions about the natural world, investigate them in teams through free exploration, and generate appropriate explanations based on those explorations. *Cognitive Complexity/Depth of Knowledge Rating:* High
SC.1.N.1.2	Using the five senses as tools, make careful observations, describe objects in terms of number, shape, texture, size, weight, color, and motion, and compare their observations with others. *Cognitive Complexity/Depth of Knowledge Rating:* Moderate
SC.1.N.1.3	Keep records as appropriate - such as pictorial and written records - of investigations conducted. *Cognitive Complexity/Depth of Knowledge Rating:* Moderate
SC.1.N.1.4	Ask "how do you know?" in appropriate situations. *Cognitive Complexity/Depth of Knowledge Rating:* Moderate

GRADE: 5

Big Idea 1: The Practice of Science

A: Scientific inquiry is a multifaceted activity; The processes of science include the formulation of scientifically investigable questions, construction of investigations into those questions, the collection of appropriate data, the evaluation of the meaning of those data, and the communication of this evaluation.

B: The processes of science frequently do not correspond to the traditional portrayal of "the scientific method."

C: Scientific argumentation is a necessary part of scientific inquiry and plays an

important role in the generation and validation of scientific knowledge.

D: Scientific knowledge is based on observation and inference; it is important to recognize that these are very different things. Not only does science require creativity in its methods and processes, but also in its questions and explanations.

BENCHMARK CODE	BENCHMARK
SC.5.N.1.1	Define a problem, use appropriate reference materials to support scientific understanding, plan and carry out scientific investigations of various types such as: systematic observations, experiments requiring the identification of variables, collecting and organizing data, interpreting data in charts, tables, and graphics, analyze information, make predictions, and defend conclusions. *Cognitive Complexity/Depth of Knowledge Rating:* High
SC.5.N.1.2	Explain the difference between an experiment and other types of scientific investigation. *Cognitive Complexity/Depth of Knowledge Rating:* Moderate
SC.5.N.1.3	Recognize and explain the need for repeated experimental trials. *Cognitive Complexity/Depth of Knowledge Rating:* Moderate
SC.5.N.1.4	Identify a control group and explain its importance in an experiment. *Cognitive Complexity/Depth of Knowledge Rating:* Moderate
SC.5.N.1.5	Recognize and explain that authentic scientific investigation frequently does not parallel the steps of "the scientific method." *Cognitive Complexity/Depth of Knowledge Rating:* Moderate
SC.5.N.1.6	Recognize and explain the difference between personal opinion/interpretation and verified observation. *Cognitive Complexity/Depth of Knowledge Rating:* Moderate

Big Idea 2: The Characteristics of Scientific Knowledge

A: Scientific knowledge is based on empirical evidence, and is appropriate for understanding the natural world, but it provides only a limited understanding of the supernatural, aesthetic, or other ways of knowing, such as art, philosophy, or religion.

B: Scientific knowledge is durable and robust, but open to change.

C: Because science is based on empirical evidence it strives for objectivity, but as it is a human endeavor the processes, methods, and knowledge of science include subjectivity, as well as creativity and discovery.

BENCHMARK CODE	BENCHMARK
SC.5.N.2.1	Recognize and explain that science is grounded in empirical observations that are testable; explanation must always be linked with evidence. *Cognitive Complexity/Depth of Knowledge Rating:* Moderate
SC.5.N.2.2	Recognize and explain that when scientific investigations are carried out, the evidence produced by those investigations should be replicable by others. *Cognitive Complexity/Depth of Knowledge Rating:* Moderate

Big Idea 5: Earth in Space and Time

337

Humans continue to explore Earth's place in space. Gravity and energy influence the formation of galaxies, including our own Milky Way Galaxy, stars, the Solar System, and Earth. Humankind's need to explore continues to lead to the development of knowledge and understanding of our Solar System.

BENCHMARK CODE	BENCHMARK
SC.5.E.5.1	Recognize that a galaxy consists of gas, dust, and many stars, including any objects orbiting the stars. Identify our home galaxy as the Milky Way. *Cognitive Complexity/Depth of Knowledge Rating:* Low
SC.5.E.5.2	Recognize the major common characteristics of all planets and compare/contrast the properties of inner and outer planets. *Cognitive Complexity/Depth of Knowledge Rating:* Moderate
SC.5.E.5.3	Distinguish among the following objects of the Solar System -- Sun, planets, moons, asteroids, comets -- and identify Earth's position in it. *Cognitive Complexity/Depth of Knowledge Rating:* High

Big Idea 7: Earth Systems and Patterns

Humans continue to explore the interactions among water, air, and land. Air and water are in constant motion that results in changing conditions that can be observed over time.

BENCHMARK CODE	BENCHMARK
SC.5.E.7.1	Create a model to explain the parts of the water cycle. Water can be a gas, a liquid, or a solid and can go back and forth from one state to another. *Cognitive Complexity/Depth of Knowledge Rating:* High
SC.5.E.7.2	Recognize that the ocean is an integral part of the water cycle and is connected to all of Earth's water reservoirs via evaporation and precipitation processes. *Cognitive Complexity/Depth of Knowledge Rating:* Moderate
SC.5.E.7.3	Recognize how air temperature, barometric pressure, humidity, wind speed and direction, and precipitation determine the weather in a particular place and time. *Cognitive Complexity/Depth of Knowledge Rating:* Moderate
SC.5.E.7.4	Distinguish among the various forms of precipitation (rain, snow, sleet, and hail), making connections to the weather in a particular place and time. *Cognitive Complexity/Depth of Knowledge Rating:* High
SC.5.E.7.5	Recognize that some of the weather-related differences, such as temperature and humidity, are found among different environments, such as swamps, deserts, and mountains. *Cognitive Complexity/Depth of Knowledge Rating:* Moderate
SC.5.E.7.6	Describe characteristics (temperature and precipitation) of different climate zones as they relate to latitude, elevation, and proximity to bodies of water. *Cognitive Complexity/Depth of Knowledge Rating:* High
SC.5.E.7.7	Design a family preparedness plan for natural disasters and identify the reasons for having such a plan. *Cognitive Complexity/Depth of Knowledge Rating:* Moderate

GRADE: 7

Big Idea 1: The Practice of Science

A: Scientific inquiry is a multifaceted activity; The processes of science include the formulation of scientifically investigable questions, construction of investigations into those questions, the collection of appropriate data, the evaluation of the meaning of those data, and the communication of this evaluation.

B: The processes of science frequently do not correspond to the traditional portrayal of "the scientific method."

C: Scientific argumentation is a necessary part of scientific inquiry and plays an important role in the generation and validation of scientific knowledge.

D: Scientific knowledge is based on observation and inference; it is important to recognize that these are very different things. Not only does science require creativity in its methods and processes, but also in its questions and explanations.

BENCHMARK CODE	BENCHMARK
SC.7.N.1.1	Define a problem from the seventh grade curriculum, use appropriate reference materials to support scientific understanding, plan and carry out scientific investigation of various types, such as systematic observations or experiments, identify variables, collect and organize data, interpret data in charts, tables, and graphics, analyze information, make predictions, and defend conclusions. *Cognitive Complexity:* Level 3: Strategic Thinking & Complex Reasoning
SC.7.N.1.2	Differentiate replication (by others) from repetition (multiple trials). *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
SC.7.N.1.3	Distinguish between an experiment (which must involve the identification and control of variables) and other forms of scientific investigation and explain that not all scientific knowledge is derived from experimentation. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
SC.7.N.1.4	Identify test variables (independent variables) and outcome variables (dependent variables) in an experiment. *Cognitive Complexity:* Level 1: Recall
SC.7.N.1.5	Describe the methods used in the pursuit of a scientific explanation as seen in different fields of science such as biology, geology, and physics. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
SC.7.N.1.6	Explain that empirical evidence is the cumulative body of observations of a natural phenomenon on which scientific explanations are based. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
SC.7.N.1.7	Explain that scientific knowledge is the result of a great deal of debate and confirmation within the science community. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts

Big Idea 10: Forms of Energy

A. Energy is involved in all physical processes and is a unifying concept in many areas

of science.

B. Energy exists in many forms and has the ability to do work or cause a change.

BENCHMARK CODE	BENCHMARK
SC.7.P.10.1	Illustrate that the sun's energy arrives as radiation with a wide range of wavelengths, including infrared, visible, and ultraviolet, and that white light is made up of a spectrum of many different colors. *Cognitive Complexity:* Level 1: Recall
SC.7.P.10.2	Observe and explain that light can be reflected, refracted, and/or absorbed. *Cognitive Complexity:* Level 3: Strategic Thinking & Complex Reasoning
SC.7.P.10.3	Recognize that light waves, sound waves, and other waves move at different speeds in different materials. *Cognitive Complexity:* Level 1: Recall

Big Idea 11: Energy Transfer and Transformations

A. Waves involve a transfer of energy without a transfer of matter.

B. Water and sound waves transfer energy through a material.

C. Light waves can travel through a vacuum and through matter.

D. The Law of Conservation of Energy: Energy is conserved as it transfers from one object to another and from one form to another.

BENCHMARK CODE	BENCHMARK
SC.7.P.11.1	Recognize that adding heat to or removing heat from a system may result in a temperature change and possibly a change of state. *Cognitive Complexity:* Level 1: Recall
SC.7.P.11.2	Investigate and describe the transformation of energy from one form to another. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
SC.7.P.11.3	Cite evidence to explain that energy cannot be created nor destroyed, only changed from one form to another. *Cognitive Complexity:* Level 3: Strategic Thinking & Complex Reasoning
SC.7.P.11.4	Observe and describe that heat flows in predictable ways, moving from warmer objects to cooler ones until they reach the same temperature. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts

Big Idea 15: Diversity and Evolution of Living Organisms

A. The scientific theory of evolution is the organizing principle of life science.

B. The scientific theory of evolution is supported by multiple forms of evidence.

C. Natural Selection is a primary mechanism leading to change over time in organisms.

BENCHMARK CODE	BENCHMARK
SC.7.L.15.1	Recognize that fossil evidence is consistent with the scientific theory of evolution that

	living things evolved from earlier species.
	Cognitive Complexity: Level 2: Basic Application of Skills & Concepts
SC.7.L.15.2	Explore the scientific theory of evolution by recognizing and explaining ways in which genetic variation and environmental factors contribute to evolution by natural selection and diversity of organisms.
	Cognitive Complexity: Level 3: Strategic Thinking & Complex Reasoning
SC.7.L.15.3	Explore the scientific theory of evolution by relating how the inability of a species to adapt within a changing environment may contribute to the extinction of that species.
	Cognitive Complexity: Level 3: Strategic Thinking & Complex Reasoning

Big Idea 16: Heredity and Reproduction

A. Reproduction is characteristic of living things and is essential for the survival of species.

B. Genetic information is passed from generation to generation by DNA; DNA controls the traits of an organism.

C. Changes in the DNA of an organism can cause changes in traits, and manipulation of DNA in organisms has led to genetically modified organisms.

BENCHMARK CODE	BENCHMARK
SC.7.L.16.1	Understand and explain that every organism requires a set of instructions that specifies its traits, that this hereditary information (DNA) contains genes located in the chromosomes of each cell, and that heredity is the passage of these instructions from one generation to another.
	Cognitive Complexity: Level 3: Strategic Thinking & Complex Reasoning
SC.7.L.16.2	Determine the probabilities for genotype and phenotype combinations using Punnett Squares and pedigrees.
	Cognitive Complexity: Level 2: Basic Application of Skills & Concepts
SC.7.L.16.3	Compare and contrast the general processes of sexual reproduction requiring meiosis and asexual reproduction requiring mitosis.
	Cognitive Complexity: Level 2: Basic Application of Skills & Concepts
SC.7.L.16.4	Recognize and explore the impact of biotechnology (cloning, genetic engineering, artificial selection) on the individual, society and the environment.
	Cognitive Complexity: Level 3: Strategic Thinking & Complex Reasoning

Big Idea 17: Interdependence

A. Plants and animals, including humans, interact with and depend upon each other and their environment to satisfy their basic needs.

B. Both human activities and natural events can have major impacts on the environment.

C. Energy flows from the sun through producers to consumers.

BENCHMARK CODE	BENCHMARK
SC.7.L.17.1	Explain and illustrate the roles of and relationships among producers, consumers, and decomposers in the process of energy transfer in a food web.

	Cognitive Complexity: Level 3: Strategic Thinking & Complex Reasoning
SC.7.L.17.2	Compare and contrast the relationships among organisms such as mutualism, predation, parasitism, competition, and commensalism. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
SC.7.L.17.3	Describe and investigate various limiting factors in the local ecosystem and their impact on native populations, including food, shelter, water, space, disease, parasitism, predation, and nesting sites. *Cognitive Complexity:* Level 3: Strategic Thinking & Complex Reasoning

Big Idea 2: The Characteristics of Scientific Knowledge

A: Scientific knowledge is based on empirical evidence, and is appropriate for understanding the natural world, but it provides only a limited understanding of the supernatural, aesthetic, or other ways of knowing, such as art, philosophy, or religion.

B: Scientific knowledge is durable and robust, but open to change.

C: Because science is based on empirical evidence it strives for objectivity, but as it is a human endeavor the processes, methods, and knowledge of science include subjectivity, as well as creativity and discovery.

BENCHMARK CODE	BENCHMARK
SC.7.N.2.1	Identify an instance from the history of science in which scientific knowledge has changed when new evidence or new interpretations are encountered. *Cognitive Complexity:* Level 1: Recall

Big Idea 3: The Role of Theories, Laws, Hypotheses, and Models

The terms that describe examples of scientific knowledge, for example; "theory," "law," "hypothesis," and "model" have very specific meanings and functions within science.

BENCHMARK CODE	BENCHMARK
SC.7.N.3.1	Recognize and explain the difference between theories and laws and give several examples of scientific theories and the evidence that supports them. *Cognitive Complexity:* Level 3: Strategic Thinking & Complex Reasoning
SC.7.N.3.2	Identify the benefits and limitations of the use of scientific models. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts

Big Idea 6: Earth Structures

Over geologic time, internal and external sources of energy have continuously altered the features of Earth by means of both constructive and destructive forces. All life, including human civilization, is dependent on Earth's internal and external energy and material resources.

BENCHMARK CODE	BENCHMARK
SC.7.E.6.1	Describe the layers of the solid Earth, including the lithosphere, the hot convecting mantle, and the dense metallic liquid and solid cores. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts

SC.7.E.6.2	Identify the patterns within the rock cycle and relate them to surface events (weathering and erosion) and sub-surface events (plate tectonics and mountain building). *Cognitive Complexity:* Level 3: Strategic Thinking & Complex Reasoning
SC.7.E.6.3	Identify current methods for measuring the age of Earth and its parts, including the law of superposition and radioactive dating. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
SC.7.E.6.4	Explain and give examples of how physical evidence supports scientific theories that Earth has evolved over geologic time due to natural processes. *Cognitive Complexity:* Level 3: Strategic Thinking & Complex Reasoning
SC.7.E.6.5	Explore the scientific theory of plate tectonics by describing how the movement of Earth's crustal plates causes both slow and rapid changes in Earth's surface, including volcanic eruptions, earthquakes, and mountain building. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
SC.7.E.6.6	Identify the impact that humans have had on Earth, such as deforestation, urbanization, desertification, erosion, air and water quality, changing the flow of water. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts
SC.7.E.6.7	Recognize that heat flow and movement of material within Earth causes earthquakes and volcanic eruptions, and creates mountains and ocean basins. *Cognitive Complexity:* Level 2: Basic Application of Skills & Concepts

Social Studies Standards

Below are some examples of Social Studies Standards. Complete list and details are presented in the following website:
http://www.cpalms.org/Homepage/index.aspx

GRADE: K

Strand: AMERICAN HISTORY

Standard 1: Historical Inquiry and Analysis

BENCHMARK CODE	BENCHMARK
SS.K.A.1.1	Develop an understanding of how to use and create a timeline.
SS.K.A.1.2	Develop an awareness of a primary source.

Standard 2: Historical Knowledge

BENCHMARK CODE	BENCHMARK
SS.K.A.2.1	Compare children and families of today with those in the past.

SS.K.A.2.2	Recognize the importance of celebrations and national holidays as a way of remembering and honoring people, events, and our nation's ethnic heritage.
SS.K.A.2.3	Compare our nation's holidays with holidays of other cultures.
SS.K.A.2.4	Listen to and retell stories about people in the past who have shown character ideals and principles including honesty, courage, and responsibility.
SS.K.A.2.5	Recognize the importance of U.S. symbols.

Standard 3: Chronological Thinking

BENCHMARK CODE	BENCHMARK
SS.K.A.3.1	Use words and phrases related to chronology and time to explain how things change and to sequentially order events that have occurred in school.
SS.K.A.3.2	Explain that calendars represent days of the week and months of the year.

Strand: GEOGRAPHY

Standard 1: The World in Spatial Terms

BENCHMARK CODE	BENCHMARK
SS.K.G.1.1	Describe the relative location of people, places, and things by using positional words.
SS.K.G.1.2	Explain that maps and globes help to locate different places and that globes are a model of the Earth.
SS.K.G.1.3	Identify cardinal directions (north, south, east, west).
SS.K.G.1.4	Differentiate land and water features on simple maps and globes.

Standard 2: Places and Regions

BENCHMARK CODE	BENCHMARK
SS.K.G.2.1	Locate and describe places in the school and community.
SS.K.G.2.2	Know one's own phone number, street address, city or town and that Florida is the state in which the student lives.

Standard 3: Physical System

BENCHMARK CODE	BENCHMARK
SS.K.G.3.1	Identify basic landforms.
SS.K.G.3.2	Identify basic bodies of water.
SS.K.G.3.3	Describe and give examples of seasonal weather changes, and illustrate how weather affects people and the environment.

Strand: ECONOMICS

Standard 1: Beginning Economics

BENCHMARK CODE	BENCHMARK
SS.K.E.1.1	Describe different kinds of jobs that people do and the tools or equipment used.
SS.K.E.1.2	Recognize that United States currency comes in different forms.
SS.K.E.1.3	Recognize that people work to earn money to buy things they need or want.
SS.K.E.1.4	Identify the difference between basic needs and wants.

Strand: CIVICS AND GOVERNMENT

Standard 1: Foundations of Government, Law, and the American Political System	
BENCHMARK CODE	**BENCHMARK**
SS.K.C.1.1	Define and give examples of rules and laws, and why they are important.
SS.K.C.1.2	Explain the purpose and necessity of rules and laws at home, school, and community.

Standard 2: Civic and Political Participation	
BENCHMARK CODE	**BENCHMARK**
SS.K.C.2.1	Demonstrate the characteristics of being a good citizen.
SS.K.C.2.2	Demonstrate that conflicts among friends can be resolved in ways that are consistent with being a good citizen.
SS.K.C.2.3	Describe fair ways for groups to make decisions.

GRADE: 1

Strand: AMERICAN HISTORY

Standard 1: Historical Inquiry and Analysis	
BENCHMARK CODE	**BENCHMARK**
SS.1.A.1.1	Develop an understanding of a primary source.
SS.1.A.1.2	Understand how to use the media center/other sources to find answers to questions about a historical topic.

Standard 2: Historical Knowledge	
BENCHMARK CODE	**BENCHMARK**
SS.1.A.2.1	Understand history tells the story of people and events of other times and places.
SS.1.A.2.2	Compare life now with life in the past.
SS.1.A.2.3	Identify celebrations and national holidays as a way of remembering and honoring the heroism and achievements of the people, events, and our nation's ethnic heritage.
SS.1.A.2.4	Identify people from the past who have shown character ideals and principles including honesty, courage, and responsibility.
SS.1.A.2.5	Distinguish between historical fact and fiction using various materials.

Standard 3: Chronological Thinking	
BENCHMARK CODE	**BENCHMARK**
SS.1.A.3.1	Use terms related to time to sequentially order events that have occurred in school, home, or community.
SS.1.A.3.2	Create a timeline based on the student's life or school events, using primary sources.

Strand: GEOGRAPHY

Standard 1: The World in Spatial Terms	
BENCHMARK CODE	**BENCHMARK**
SS.1.G.1.1	Use physical and political/cultural maps to locate places in Florida.
SS.1.G.1.2	Identify key elements (compass rose, cardinal directions, title, key/legend with symbols) of maps and globes .

SS.1.G.1.3	Construct a basic map using key elements including cardinal directions and map symbols.
SS.1.G.1.4	Identify a variety of physical features using a map and globe.
SS.1.G.1.5	Locate on maps and globes the student's local community, Florida, the Atlantic Ocean, and the Gulf of Mexico.
SS.1.G.1.6	Describe how location, weather, and physical environment affect the way people live in our community.

GRADE: 4

Strand: AMERICAN HISTORY

Standard 1: Historical Inquiry and Analysis

BENCHMARK CODE	BENCHMARK
SS.4.A.1.1	Analyze primary and secondary resources to identify significant individuals and events throughout Florida history.
SS.4.A.1.2	Synthesize information related to Florida history through print and electronic media.

Standard 2: Pre-Columbian Florida

BENCHMARK CODE	BENCHMARK
SS.4.A.2.1	Compare Native American tribes in Florida.

Standard 3: Exploration and Settlement of Florida

BENCHMARK CODE	BENCHMARK
SS.4.A.3.1	Identify explorers who came to Florida and the motivations for their expeditions.
SS.4.A.3.2	Describe causes and effects of European colonization on the Native American tribes of Florida.
SS.4.A.3.3	Identify the significance of St. Augustine as the oldest permanent European settlement in the United States.
SS.4.A.3.4	Explain the purpose of and daily life on missions (San Luis de Talimali in present-day Tallahassee).
SS.4.A.3.5	Identify the significance of Fort Mose as the first free African community in the United States.
SS.4.A.3.6	Identify the effects of Spanish rule in Florida.
SS.4.A.3.7	Identify nations (Spain, France, England) that controlled Florida before it became a United States territory.
SS.4.A.3.8	Explain how the Seminole tribe formed and the purpose for their migration.
SS.4.A.3.9	Explain how Florida (Adams-Onis Treaty) became a U.S. territory.
SS.4.A.3.10	Identify the causes and effects of the Seminole Wars.

Standard 4: Growth of Florida

BENCHMARK CODE	BENCHMARK
SS.4.A.4.1	Explain the effects of technological advances on Florida.
SS.4.A.4.2	Describe pioneer life in Florida.

Standard 5: Crisis of the Union: Civil War and Reconstruction in Florida

BENCHMARK CODE	BENCHMARK

BENCHMARK CODE	BENCHMARK
SS.4.A.5.1	Describe Florida's involvement (secession, blockades of ports, the battles of Ft. Pickens, Olustee, Ft. Brooke, Natural Bridge, food supply) in the Civil War.
SS.4.A.5.2	Summarize challenges Floridians faced during Reconstruction.

Standard 6: Industrialization and Emergence of Modern Florida

BENCHMARK CODE	BENCHMARK
SS.4.A.6.1	Describe the economic development of Florida's major industries.
SS.4.A.6.2	Summarize contributions immigrant groups made to Florida.
SS.4.A.6.3	Describe the contributions of significant individuals to Florida.
SS.4.A.6.4	Describe effects of the Spanish American War on Florida.

Standard 7: Roaring 20's, the Great Depression, and WWII in Florida

BENCHMARK CODE	BENCHMARK
SS.4.A.7.1	Describe the causes and effects of the 1920's Florida land boom and bust.
SS.4.A.7.2	Summarize challenges Floridians faced during the Great Depression.
SS.4.A.7.3	Identify Florida's role in World War II.

Standard 8: Contemporary Florida into the 21st Century

BENCHMARK CODE	BENCHMARK
SS.4.A.8.1	Identify Florida's role in the Civil Rights Movement.
SS.4.A.8.2	Describe how and why immigration impacts Florida today.
SS.4.A.8.3	Describe the effect of the United States space program on Florida's economy and growth.
SS.4.A.8.4	Explain how tourism affects Florida's economy and growth.

Standard 9: Chronological Thinking

BENCHMARK CODE	BENCHMARK
SS.4.A.9.1	Utilize timelines to sequence key events in Florida history.

GRADE: 7

Strand: GEOGRAPHY

Standard 1: Understand how to use maps and other geographic representations, tools, and technology to report information.

BENCHMARK CODE	BENCHMARK
SS.7.G.1.1	Locate the fifty states and their capital cities in addition to the nation's capital on a map.
SS.7.G.1.2	Locate on a world map the territories and protectorates of the United States of America.
SS.7.G.1.3	Interpret maps to identify geopolitical divisions and boundaries of places in North America.

Standard 2: Understand physical and cultural characteristics of places.

BENCHMARK CODE	BENCHMARK

SS.7.G.2.1	Locate major cultural landmarks that are emblematic of the United States.
SS.7.G.2.2	Locate major physical landmarks that are emblematic of the United States.
SS.7.G.2.3	Explain how major physical characteristics, natural resources, climate, and absolute and relative location have influenced settlement, economies, and inter-governmental relations in North America.
SS.7.G.2.4	Describe current major cultural regions of North America.

Standard 3: Understand the relationships between the Earth's ecosystems and the populations that dwell within them.

BENCHMARK CODE	BENCHMARK
SS.7.G.3.1	Use maps to describe the location, abundance, and variety of natural resources in North America.

Standard 4: Understand the characteristics, distribution, and migration of human populations.

BENCHMARK CODE	BENCHMARK
SS.7.G.4.1	Use geographic terms and tools to explain cultural diffusion throughout North America.
SS.7.G.4.2	Use maps and other geographic tools to examine the importance of demographics within political divisions of the United States.

Standard 5: Understand how human actions can impact the environment.

BENCHMARK CODE	BENCHMARK
SS.7.G.5.1	Use a choropleth or other map to geographically represent current information about issues of conservation or ecology in the local community.

Standard 6: Understand how to apply geography to interpret the past and present and plan for the future.

BENCHMARK CODE	BENCHMARK
SS.7.G.6.1	Use Geographic Information Systems (GIS) or other technology to view maps of current information about the United States.

Strand: ECONOMICS

Standard 1: Understand the fundamental concepts relevant to the development of a market economy.

BENCHMARK CODE	BENCHMARK
SS.7.E.1.1	Explain how the principles of a market and mixed economy helped to develop the United States into a democratic nation.
SS.7.E.1.2	Discuss the importance of borrowing and lending in the United States, the government's role in controlling financial institutions, and list the advantages and disadvantages of using credit.
SS.7.E.1.3	Review the concepts of supply and demand, choice, scarcity, and opportunity cost as they relate to the development of the mixed market economy in the United States.
SS.7.E.1.4	Discuss the function of financial institutions in the development of a market economy.
SS.7.E.1.5	Assess how profits, incentives, and competition motivate individuals, households, and businesses in a free market economy.
SS.7.E.1.6	Compare the national budget process to the personal budget process.

Standard 2: Understand the fundamental concepts relevant to the institutions, structure, and functions of a national economy.

BENCHMARK CODE	BENCHMARK
SS.7.E.2.1	Explain how federal, state, and local taxes support the economy as a function of the United States government.
SS.7.E.2.2	Describe the banking system in the United States and its impact on the money supply.
SS.7.E.2.3	Identify and describe United States laws and regulations adopted to promote economic competition.
SS.7.E.2.4	Identify entrepreneurs from various gender, social, and ethnic backgrounds who started a business seeking to make a profit.
SS.7.E.2.5	Explain how economic institutions impact the national economy.

Standard 3: Understand the fundamental concepts and interrelationships of the United States economy in the international marketplace.

BENCHMARK CODE	BENCHMARK
SS.7.E.3.1	Explain how international trade requires a system for exchanging currency between and among nations.
SS.7.E.3.2	Assess how the changing value of currency affects trade of goods and services between nations.
SS.7.E.3.3	Compare and contrast a single resource economy with a diversified economy.
SS.7.E.3.4	Compare and contrast the standard of living in various countries today to that of the United States using gross domestic product (GDP) per capita as an indicator.

Strand: CIVICS AND GOVERNMENT

Standard 1: Demonstrate an understanding of the origins and purposes of government, law, and the American political system.

BENCHMARK CODE	BENCHMARK
SS.7.C.1.1	Recognize how Enlightenment ideas including Montesquieu's view of separation of power and John Locke's theories related to natural law and how Locke's social contract influenced the Founding Fathers.
SS.7.C.1.2	Trace the impact that the Magna Carta, English Bill of Rights, Mayflower Compact, and Thomas Paine's "Common Sense" had on colonists' views of government.
SS.7.C.1.3	Describe how English policies and responses to colonial concerns led to the writing of the Declaration of Independence.
SS.7.C.1.4	Analyze the ideas (natural rights, role of the government) and complaints set forth in the Declaration of Independence.
SS.7.C.1.5	Identify how the weaknesses of the Articles of Confederation led to the writing of the Constitution.
SS.7.C.1.6	Interpret the intentions of the Preamble of the Constitution.
SS.7.C.1.7	Describe how the Constitution limits the powers of government through separation of powers and checks and balances.
SS.7.C.1.8	Explain the viewpoints of the Federalists and the Anti-Federalists regarding the ratification of the Constitution and inclusion of a bill of rights.
SS.7.C.1.9	Define the rule of law and recognize its influence on the development of the American legal, political, and governmental systems.

Standard 2: Evaluate the roles, rights, and responsibilities of United States citizens, and determine methods of active participation in society, government, and the political system.

BENCHMARK CODE	BENCHMARK

349

SS.7.C.2.1	Define the term "citizen," and identify legal means of becoming a United States citizen.
SS.7.C.2.10	Examine the impact of media, individuals, and interest groups on monitoring and influencing government.
SS.7.C.2.11	Analyze media and political communications (bias, symbolism, propaganda).
SS.7.C.2.12	Develop a plan to resolve a state or local problem by researching public policy alternatives, identifying appropriate government agencies to address the issue, and determining a course of action.
SS.7.C.2.13	Examine multiple perspectives on public and current issues.
SS.7.C.2.14	Conduct a service project to further the public good.
SS.7.C.2.2	Evaluate the obligations citizens have to obey laws, pay taxes, defend the nation, and serve on juries.
SS.7.C.2.3	Experience the responsibilities of citizens at the local, state, or federal levels.
SS.7.C.2.4	Evaluate rights contained in the Bill of Rights and other amendments to the Constitution.
SS.7.C.2.5	Distinguish how the Constitution safeguards and limits individual rights.
SS.7.C.2.6	Simulate the trial process and the role of juries in the administration of justice.
SS.7.C.2.7	Conduct a mock election to demonstrate the voting process and its impact on a school, community, or local level.
SS.7.C.2.8	Identify America's current political parties, and illustrate their ideas about government.
SS.7.C.2.9	Evaluate candidates for political office by analyzing their qualifications, experience, issue-based platforms, debates, and political ads.

Standard 3: Demonstrate an understanding of the principles, functions, and organization of government.

BENCHMARK CODE	BENCHMARK
SS.7.C.3.1	Compare different forms of government (direct democracy, representative democracy, socialism, communism, monarchy, oligarchy, autocracy).
SS.7.C.3.10	Identify sources and types (civil, criminal, constitutional, military) of law.
SS.7.C.3.11	Diagram the levels, functions, and powers of courts at the state and federal levels.
SS.7.C.3.12	Analyze the significance and outcomes of landmark Supreme Court cases including, but not limited to, Marbury v. Madison, Plessy v. Ferguson, Brown v. Board of Education, Gideon v. Wainwright, Miranda v. Arizona, in re Gault, Tinker v. Des Moines, Hazelwood v. Kuhlmeier, United States v. Nixon, and Bush v. Gore.
SS.7.C.3.13	Compare the constitutions of the United States and Florida.
SS.7.C.3.14	Differentiate between local, state, and federal governments' obligations and services.
SS.7.C.3.2	Compare parliamentary, federal, confederal, and unitary systems of government.
SS.7.C.3.3	Illustrate the structure and function (three branches of government established in Articles I, II, and III with corresponding powers) of government in the United States as established in the Constitution.
SS.7.C.3.4	Identify the relationship and division of powers between the federal government and state governments.
SS.7.C.3.5	Explain the Constitutional amendment process.
SS.7.C.3.6	Evaluate Constitutional rights and their impact on individuals and society.
SS.7.C.3.7	Analyze the impact of the 13th, 14th, 15th, 19th, 24th, and 26th amendments on participation of minority groups in the American political process.
SS.7.C.3.8	Analyze the structure, functions, and processes of the legislative, executive, and judicial branches.
SS.7.C.3.9	Illustrate the law making process at the local, state, and federal levels.

Standard 4: Demonstrate an understanding of contemporary issues in world affairs, and evaluate the role and impact of United States foreign policy.

BENCHMARK CODE	BENCHMARK

SS.7.C.4.1	Differentiate concepts related to United States domestic and foreign policy.
SS.7.C.4.2	Recognize government and citizen participation in international organizations.
SS.7.C.4.3	Describe examples of how the United States has dealt with international conflicts.

Health Education Standards

Below are some examples of Health Education Standards. Complete list and details are presented in the following website:
http://www.cpalms.org/Homepage/index.aspx

GRADE: K

Strand: HEALTH LITERACY: CONCEPTS

Standard 1: Comprehend concepts related to health promotion and disease prevention to enhance health.

BENCHMARK CODE	BENCHMARK
HE.K.C.1.1	Recognize healthy behaviors.
HE.K.C.1.2	Recognize the physical dimension of health.
HE.K.C.1.3	Recognize ways to prevent common communicable diseases.
HE.K.C.1.4	Recognize childhood injuries.
HE.K.C.1.5	Recognize there are body parts inside and outside of the body.

Standard 2: Analyze the influence of family, peers, culture, media, technology, and other factors on health behaviors.

BENCHMARK CODE	BENCHMARK
HE.K.C.2.1	Name healthy behaviors that family members should practice.
HE.K.C.2.2	Identify members of the school and community that support personal health practices and behaviors.
HE.K.C.2.3	Explain the importance of rules to maintain health.
HE.K.C.2.4	Name various types of media and technology that influence health.

Strand: HEALTH LITERACY: RESPONSIBLE BEHAVIOR

Standard 1: Demonstrate the ability to access valid health information, products, and services to enhance health.

BENCHMARK CODE	BENCHMARK
HE.K.B.1.1	Recognize school and community health helpers.
HE.K.B.1.2	Recognize warning labels and signs on hazardous products and places.
HE.K.B.1.3	Recognize advertisements for health products.

Standard 2: Demonstrate the ability to use interpersonal communication skills to enhance health and avoid or reduce health risks.

BENCHMARK CODE	BENCHMARK
HE.K.B.2.1	Recognize healthy ways to express needs, wants, and feelings.
HE.K.B.2.2	Demonstrate listening skills to enhance health.
HE.K.B.2.3	Identify the appropriate responses to unwanted and threatening situations.
HE.K.B.2.4	State ways to tell a trusted adult if threatened or harmed.

Standard 3: Demonstrate the ability to use decision-making skills to enhance health.

BENCHMARK CODE	BENCHMARK
HE.K.B.3.1	Name situations when a health-related decision can be made individually or when assistance is needed.
HE.K.B.3.2	Recognize healthy options to health-related issues or problems.
HE.K.B.3.3	Recognize the consequences of not following rules/practices when making healthy and safe decisions.

GRADE: 1

Strand: HEALTH LITERACY: CONCEPTS

Standard 1: Comprehend concepts related to health promotion and disease prevention to enhance health.

BENCHMARK CODE	BENCHMARK
HE.1.C.1.1	Identify healthy behaviors.
HE.1.C.1.2	Recognize the physical and mental/emotional dimensions of health.
HE.1.C.1.3	Describe ways to prevent common communicable diseases.
HE.1.C.1.4	Identify ways to prevent childhood injuries.
HE.1.C.1.5	Identify health-care providers.
HE.1.C.1.6	Emphasize the correct names of human body parts.

Standard 2: Analyze the influence of family, peers, culture, media, technology, and other factors on health behaviors.

BENCHMARK CODE	BENCHMARK
HE.1.C.2.1	Identify how children learn health behaviors from family and friends.
HE.1.C.2.2	Identify what the school and community does to support personal health practices and behaviors.
HE.1.C.2.3	Recognize health consequences for not following rules.
HE.1.C.2.4	Name examples of media messages that relate to health behaviors.

GRADE: 3

Strand: HEALTH LITERACY: CONCEPTS

Standard 1: Comprehend concepts related to health promotion and disease prevention to enhance health.

BENCHMARK CODE	BENCHMARK
HE.3.C.1.1	Describe healthy behaviors that affect personal health.
HE.3.C.1.2	Identify that there are multiple dimensions of health.
HE.3.C.1.3	Describe ways a safe, healthy classroom can promote personal health.
HE.3.C.1.4	Describe common childhood health conditions.
HE.3.C.1.5	Describe why it is important to seek health care.
HE.3.C.1.6	Recognize that body parts and organs work together to form human body systems.

Standard 2: Analyze the influence of family, peers, culture, media, technology, and other factors on health behaviors.

BENCHMARK CODE	BENCHMARK
HE.3.C.2.1	Explore how different family traditions and customs may influence health behaviors.
HE.3.C.2.2	Explore how friends' various traditions and customs may influence health behavior.
HE.3.C.2.3	Explore how the traditions and customs of the school and community influence health behavior of children.
HE.3.C.2.4	Identify classroom and school rules that promote health and disease prevention.
HE.3.C.2.5	Discuss the positive and negative impacts media may have on health.
HE.3.C.2.6	Discuss the positive and negative impacts technology may have on health.
HE.3.C.2.7	Discuss how the community can influence healthy and unhealthy behaviors.

Strand: HEALTH LITERACY: RESPONSIBLE BEHAVIOR

Standard 1: Demonstrate the ability to access valid health information, products, and services to enhance health.

BENCHMARK CODE	BENCHMARK
HE.3.B.1.1	Locate resources from home, school, and community that provide valid health information.
HE.3.B.1.2	Describe how the media influences the selection of health information, products, and services.
HE.3.B.1.3	Describe criteria for selecting health information, resources, products, and services.
HE.3.B.1.4	Identify a variety of technologies to gather health information.

Standard 2: Demonstrate the ability to use interpersonal communication skills to enhance health and avoid or reduce health risks.

BENCHMARK CODE	BENCHMARK
HE.3.B.2.1	Identify effective verbal and nonverbal communication skills to enhance health.
HE.3.B.2.2	Demonstrate refusal skills that avoid or reduce health risks.
HE.3.B.2.3	Demonstrate nonviolent strategies to manage or resolve conflict.
HE.3.B.2.4	Explain ways to ask for assistance to enhance personal health.

GRADE: 5

Strand: HEALTH LITERACY: CONCEPTS

Standard 1: Comprehend concepts related to health promotion and disease prevention to enhance health.

BENCHMARK CODE	BENCHMARK

HE.5.C.1.1	Describe the relationship between healthy behaviors and personal health.
HE.5.C.1.2	Explain the physical, mental/emotional, social, and intellectual dimensions of health.
HE.5.C.1.3	Explain ways a safe, healthy home environment and school environment promote personal health.
HE.5.C.1.4	Compare ways to prevent common childhood injuries and health problems.
HE.5.C.1.5	Recognize how appropriate health care can promote personal health.
HE.5.C.1.6	Explain how human body parts and organs work together in healthy body systems, including the endocrine and reproductive systems.

Standard 2: Analyze the influence of family, peers, culture, media, technology, and other factors on health behaviors.

BENCHMARK CODE	BENCHMARK
HE.5.C.2.1	Predict how families may influence various health practices of children.
HE.5.C.2.2	Predict how friends/peers may influence various health practices of children.
HE.5.C.2.3	Predict how the school and community influence various health practices of children.
HE.5.C.2.4	Give examples of school and public health policies that influence health promotion and disease prevention.
HE.5.C.2.5	Determine how media influences family health behaviors and the selection of health information, products, and services.
HE.5.C.2.6	Describe ways that technology can influence family health behaviors.
HE.5.C.2.7	Discuss how various cultures can influence personal health beliefs.
HE.5.C.2.8	Investigate influences that change health beliefs and behaviors.

Strand: HEALTH LITERACY: RESPONSIBLE BEHAVIOR

Standard 1: Demonstrate the ability to access valid health information, products, and services to enhance health.

BENCHMARK CODE	BENCHMARK
HE.5.B.1.1	Discuss characteristics of valid health information, products, and services.
HE.5.B.1.2	Compile resources from home, school, and community that provide valid health information.
HE.5.B.1.3	Evaluate criteria for selecting health resources, products, and services.
HE.5.B.1.4	Demonstrate the use of a variety of technologies to gather health information.

GRADE: 7

Strand: HEALTH LITERACY: CONCEPTS

Standard 1: Comprehend concepts related to health promotion and disease prevention to enhance health.

BENCHMARK CODE	BENCHMARK
HE.7.C.1.1	Compare and contrast the effects of healthy and unhealthy behaviors on personal health, including reproductive health.
HE.7.C.1.2	Explain how physical, mental/emotional, social, and intellectual dimensions of health are interrelated.
HE.7.C.1.3	Analyze how environmental factors affect personal health.
HE.7.C.1.4	Describe how heredity can affect personal health.
HE.7.C.1.5	Describe ways to reduce or prevent injuries and adolescent health problems.

HE.7.C.1.6	Explain how appropriate health care can promote personal health.
HE.7.C.1.7	Explain the likelihood of injury or illness if engaging in unhealthy/risky behaviors.
HE.7.C.1.8	Classify infectious agents and their modes of transmission to the human body.

Standard 2: Analyze the influence of family, peers, culture, media, technology, and other factors on health behaviors.

BENCHMARK CODE	BENCHMARK
HE.7.C.2.1	Examine how family health behaviors influence health of adolescents.
HE.7.C.2.2	Examine how peers may influence the health behaviors of adolescents.
HE.7.C.2.3	Examine how the school and community may influence the health behaviors of adolescents.
HE.7.C.2.4	Explain how school and public health policies can influence health promotion and disease prevention.
HE.7.C.2.5	Analyze how messages from media influence health behaviors.
HE.7.C.2.6	Evaluate the influence of technology in locating valid health information.
HE.7.C.2.7	Evaluate how changes in social norms impact healthy and unhealthy behavior.
HE.7.C.2.8	Determine how cultural changes related to health beliefs and behaviors impact personal health.

Strand: HEALTH LITERACY: RESPONSIBLE BEHAVIOR

Standard 1: Demonstrate the ability to access valid health information, products, and services to enhance health.

BENCHMARK CODE	BENCHMARK
HE.7.B.1.1	Analyze the validity of health information, products, and services.
HE.7.B.1.2	Access valid health information from home, school, and community.
HE.7.B.1.3	Determine the accessibility of products and services that enhance health.
HE.7.B.1.4	Differentiate professional health services that may be required.
HE.7.B.1.5	Access valid and reliable health products and services.
HE.7.B.1.6	Compute the cost of health products and services in order to assess value.
HE.7.B.1.7	Access a variety of technologies to gather health information.

Standard 2: Demonstrate the ability to use interpersonal communication skills to enhance health and avoid or reduce health risks.

BENCHMARK CODE	BENCHMARK
HE.7.B.2.1	Use skills for communicating effectively with family, peers, and others to enhance health.
HE.7.B.2.2	Demonstrate refusal, negotiation, and collaboration skills to enhance health and reduce health risks.
HE.7.B.2.3	Articulate the possible causes of conflict among youth in schools and communities.
HE.7.B.2.4	Demonstrate how to ask for assistance to enhance the health of self and others.

Standard 3: Demonstrate the ability to use decision-making skills to enhance health.

BENCHMARK CODE	BENCHMARK
HE.7.B.3.1	Predict when health-related situations require the application of a thoughtful decision-making process.
HE.7.B.3.2	Compare circumstances that can help or hinder healthy decision-making.
HE.7.B.3.3	Determine when individual or collaborative decision-making is appropriate.

HE.7.B.3.4	Distinguish between healthy and unhealthy alternatives to health-related issues or problems.
HE.7.B.3.5	Propose the potential outcome of each option when making a health-related decision.
HE.7.B.3.6	Select healthy alternatives over unhealthy alternatives when making a decision.
HE.7.B.3.7	Critique the potential outcomes of a health-related decision.

Standard 4: Demonstrate the ability to use goal-setting skills to enhance health.

BENCHMARK CODE	BENCHMARK
HE.7.B.4.1	Analyze personal beliefs as they relate to health practices.
HE.7.B.4.2	Devise an individual goal to adopt, maintain, or improve a personal health practice.
HE.7.B.4.3	Explain strategies and skills needed to attain/maintain a personal health goal.
HE.7.B.4.4	Assess progress toward attaining a personal health goal.

Strand: HEALTH LITERACY: PROMOTION

Standard 1: Demonstrate the ability to practice advocacy, health-enhancing behaviors, and avoidance or reduction of health risks for oneself.

BENCHMARK CODE	BENCHMARK
HE.7.P.1.1	Examine the importance of assuming responsibility for personal health behaviors.
HE.7.P.1.2	Analyze healthy practices and behaviors that will maintain or improve personal health.
HE.7.P.1.3	Differentiate a variety of behaviors that avoid or reduce health risks.

Standard 2: Demonstrate the ability to advocate for individual, peer, school, family, and community health.

BENCHMARK CODE	BENCHMARK
HE.7.P.2.1	Articulate a position on a topic and support it with accurate health information.
HE.7.P.2.2	Utilize others' influence and support to promote positive health choices.
HE.7.P.2.3	Work cooperatively to advocate for healthy individuals, peers, and families.
HE.7.P.2.4	Analyze ways health messages and communication techniques can be targeted for different audiences.

Physical Education Standards

Below are some examples of Physical Education Standards. Complete list and details are presented in the following website:
http://www.cpalms.org/Homepage/index.aspx

GRADE: K

Strand: MOVEMENT COMPETENCY

Standard 1: Demonstrate competency in many and proficiency in a few movement forms from a variety of categories (locomotor, non-locomotor, manipulative, non-manipulative, educational

gymnastics and dance, aquatics).

BENCHMARK CODE	BENCHMARK
PE.K.M.1.1	Use a variety of locomotor skills to travel in personal and general space.
PE.K.M.1.2	Strike objects using body parts forcefully.
PE.K.M.1.3	Balance a lightweight object on a paddle while moving.
PE.K.M.1.4	Strike an object forcefully using a modified, long-handled implement of various sizes, weights, and compositions.
PE.K.M.1.5	Use two hands to bounce and catch a large playground ball.
PE.K.M.1.6	Participate in a variety of introductory water skills.
PE.K.M.1.7	Catch a variety of self-tossed objects.
PE.K.M.1.8	Roll and throw a variety of objects using an underhand motion.
PE.K.M.1.9	Throw a variety of objects forcefully using an overhand motion.
PE.K.M.1.10	Perform a creative movement sequence with a clear beginning shape, at least one movement concept, and a clear ending shape.
PE.K.M.1.11	Balance on a variety of body parts.
PE.K.M.1.12	Perform a variety of rolling actions.
PE.K.M.1.13	Move in a variety of ways in relation to others.

Strand: COGNITIVE ABILITIES

Standard 1: Identify, analyze, and evaluate movement concepts, mechanical principles, safety considerations, and strategies/tactics regarding movement performance in a variety of physical activities.

BENCHMARK CODE	BENCHMARK
PE.K.C.1.1	Recognize locomotor skills.
PE.K.C.1.2	Recognize physical activities have safety rules and procedures.
PE.K.C.1.3	Recognize technology can be utilized during physical activity.
PE.K.C.1.4	Recognize there are deep and shallow areas of a pool and understand the dangers of entering a body of water without supervision.
PE.K.C.1.5	Recognize the concept of a dominant hand/foot for throwing/striking patterns.
PE.K.C.1.6	Recite cues for a variety of movement patterns and skills.
PE.K.C.1.7	Identify personal and general space.
PE.K.C.1.8	Recognize movement concepts.
PE.K.C.1.9	Identify body parts.

Strand: LIFETIME FITNESS

Standard 1: Participate regularly in physical activity.

BENCHMARK CODE	BENCHMARK
PE.K.L.1.1	Participate in moderate to vigorous physical activity (MVPA) on a daily basis.
PE.K.L.1.2	Identify opportunities for involvement in physical activities both during and after the school day.
PE.K.L.1.3	Describe physical activity goal-setting.
PE.K.L.1.4	Invite others to participate in physical activities with them.
PE.K.L.1.5	Recognize that physical activity is good for you.
PE.K.L.1.6	Verbally state the search (look left, look right, look left again) used before crossing a roadway.

Standard 2: Develop and implement a personal fitness program to achieve and maintain a health-enhancing level of physical fitness.

BENCHMARK CODE	BENCHMARK
PE.K.L.2.1	Recognize that strong muscles help the body perform physical activities.
PE.K.L.2.2	Recognize the physiological signs of physical activity.
PE.K.L.2.3	Recognize the difference in the activity of the heart during rest and while physically active.
PE.K.L.2.4	Participate in a variety of games that increase breathing and heart rate.
PE.K.L.2.5	Recognize that flexibility is important.
PE.K.L.2.6	Differentiate between healthy and unhealthy food choices.

GRADE: 1

Strand: MOVEMENT COMPETENCY

Standard 1: Demonstrate competency in many and proficiency in a few movement forms from a variety of categories (locomotor, non-locomotor, manipulative, non-manipulative, educational gymnastics and dance, aquatics).

BENCHMARK CODE	BENCHMARK
PE.1.M.1.1	Travel using various locomotor skills while changing directions, pathways, and speeds.
PE.1.M.1.2	Strike an object upward using body parts.
PE.1.M.1.3	Strike a lightweight object upward continuously using a paddle.
PE.1.M.1.4	Strike a stationary object a short distance using a modified long-handled implement so that the object travels in the intended direction.
PE.1.M.1.5	Dribble an object with hands or feet while demonstrating control in general space.
PE.1.M.1.6	Demonstrate a variety of basic water skills.
PE.1.M.1.7	Move in different directions to catch a variety of self-tossed objects.
PE.1.M.1.8	Demonstrate an underhand throwing motion for accuracy using correct technique.
PE.1.M.1.9	Demonstrate an overhand throwing motion for distance using correct technique.
PE.1.M.1.10	Perform a self-designed creative movement/dance sequence with a clear beginning shape, use of one movement concept, and a different and clear ending shape.
PE.1.M.1.11	Demonstrate a sequence of a balance, a roll, and a different balance.
PE.1.M.1.12	Demonstrate the ability to take weight onto hands.
PE.1.M.1.13	Chase, flee, and dodge to avoid or catch others.
PE.1.M.1.14	Use a variety of takeoff and landing patterns to jump, hop, and leap safely in relation to various types of equipment.

GRADE: 4

Strand: MOVEMENT COMPETENCY

Standard 1: Demonstrate competency in many and proficiency in a few movement forms from a variety of categories (locomotor, non-locomotor, manipulative, non-manipulative, educational gymnastics and dance, aquatics).

BENCHMARK CODE	BENCHMARK
PE.4.M.1.1	Apply movement concepts to the performance of locomotor skills in a variety of movement settings.
PE.4.M.1.2	Strike a moving object using body parts from a stationary position so that the object travels in the intended direction at the desired height.
PE.4.M.1.3	Strike an object continuously using a paddle/racquet demonstrating correct technique of a forehand pattern.
PE.4.M.1.4	Strike moving and/or stationary objects with long-handled implements using correct

	technique so the objects travel in the intended direction.
PE.4.M.1.5	Dribble and pass to a moving partner.
PE.4.M.1.6	Perform a variety of swim strokes.
PE.4.M.1.7	Move in different directions to catch objects of different sizes and weights thrown by a stationary partner from varying distances.
PE.4.M.1.8	Throw balls of various sizes and weights to a stationary partner from varying distances using a correct overhand motion.
PE.4.M.1.9	Perform a teacher-designed sequence with or without manipulatives while demonstrating balance, coordination, clear shapes, purposeful movements, and smooth transitions.
PE.4.M.1.10	Perform two or more dances accurately and with good technique.
PE.4.M.1.11	Perform a self-designed gymnastics sequence consisting of clear beginning and ending balances and three different movement elements with correct technique and smooth transitions.
PE.4.M.1.12	Run and hurdle a succession of low to medium level obstacles.

GRADE: 7

Strand: MOVEMENT COMPETENCY

Standard 1: Demonstrate competency in many and proficiency in a few movement forms from a variety of categories. (Team Sports, Outdoor Pursuits/Aquatics).

BENCHMARK CODE	BENCHMARK
PE.7.M.1.1	Participate in modified versions of team sports demonstrating mature patterns while using a variety of manipulative skills.
PE.7.M.1.2	Use basic offensive and defensive strategies while playing modified versions of a variety of sports and activities.
PE.7.M.1.3	Demonstrate appropriate relationships between the body and an opponent in dynamic game situations.
PE.7.M.1.4	Demonstrate introductory outdoor pursuits skills.
PE.7.M.1.5	Perform aquatics activities to improve or maintain health-related fitness.
PE.7.M.1.6	Demonstrate the critical elements in specialized skills related to a variety of sports or outdoor pursuits activities.
PE.7.M.1.7	Utilize proper equipment and implement appropriate safety procedures for participation in a variety of sports or activities.
PE.7.M.1.8	Apply technology to evaluate, monitor, and improve individual skill performance.
PE.7.M.1.9	Demonstrate principles of biomechanics necessary for safe and successful performance.

Strand: COGNITIVE ABILITIES

Standard 1: Identify, analyze, and evaluate movement concepts, mechanical principles, safety considerations, and strategies/tactics regarding movement performance in a variety of physical activities.

BENCHMARK CODE	BENCHMARK
PE.7.C.1.1	Demonstrate an understanding of the basic rules for team sports.
PE.7.C.1.2	Provide feedback on skill patterns of self and partner by detecting and correcting mechanical errors.
PE.7.C.1.3	Identify the critical elements for successful performance of a variety of sport skills.
PE.7.C.1.4	List specific safety procedures and equipment necessary for a variety of sports and physical activities.

BENCHMARK CODE	BENCHMARK
PE.7.C.1.5	Explain basic offensive and defensive strategies in modified games or activities and team sports.
PE.7.C.1.6	Describe how movement skills learned in one physical activity can be transferred and used in other physical activities.
PE.7.C.1.7	Identify and explain different types of safety equipment and practices relating to water activities.

Strand: LIFETIME FITNESS

Standard 1: Participate regularly in physical activity.

BENCHMARK CODE	BENCHMARK
PE.7.L.1.1	Participate in moderate to vigorous physical activity (MVPA) on a daily basis.
PE.7.L.1.2	Participate in a variety of team sports, outdoor pursuits, and aquatics activities that promote cardiorespiratory endurance, muscular strength and endurance, flexibility, and body composition.
PE.7.L.1.3	Identify the in-school and community opportunities for participation in team sports, outdoor pursuits, and aquatics.
PE.7.L.1.4	Participate in a variety of team sports, outdoor pursuits, and aquatics activities that promote effective stress management.

Standard 2: Develop and implement a personal fitness program to achieve and maintain a health-enhancing level of physical fitness.

BENCHMARK CODE	BENCHMARK
PE.7.L.2.1	Demonstrate achievement and maintenance of a health-enhancing level of personal fitness by creating, implementing, and assessing a personal fitness program in collaboration with a teacher.
PE.7.L.2.2	Demonstrate program planning skills by setting goals and devising strategies for a personal physical fitness program.
PE.7.L.2.3	Use a variety of resources including available technology to assess, design, and evaluate their personal physical activity plan.
PE.7.L.2.4	Select a variety of physical activities when developing a personal fitness program.
PE.7.L.2.5	Recognize health-related problems associated with inadequate levels of cardiorespiratory endurance, muscular strength and endurance, flexibility, and body composition.

Strand: RESPONSIBLE BEHAVIORS AND VALUES

Standard 1: Exhibit responsible personal and social behavior that respects self and others in physical activity settings.

BENCHMARK CODE	BENCHMARK
PE.7.R.1.1	Identify situations in which peer pressure could negatively impact one's own behavior choices.
PE.7.R.1.2	Demonstrate acceptance and respect for persons of diverse backgrounds and abilities in physical activity settings.
PE.7.R.1.3	Demonstrate responsible behaviors during physical activities.
PE.7.R.1.4	Give examples of appropriate personal, social, and ethical behaviors that apply to specific physical activities.
PE.7.R.1.5	Demonstrate appropriate etiquette, care of equipment, respect for facilities, and safe behaviors while participating in a variety of physical activities.

Standard 2: Value physical activity for health, enjoyment, challenge, self-expression, and/or social interaction.	
BENCHMARK CODE	**BENCHMARK**
PE.7.R.2.1	Select an opportunity for participation in a physical activity outside of the school setting that contributes to personal enjoyment and the attainment or maintenance of a healthy lifestyle.
PE.7.R.2.2	Identify the potential benefits of participation in a variety of physical activities.
PE.7.R.2.3	Discuss games, sports, and/or physical activities from other cultures.

Science Standards

Below are some examples of Science Standards in some grades K-8. Complete list and details are presented in the following website: http://www.cpalms.org/homepage/index.aspx

GRADE: K

Big Idea 1: The Practice of Science	
A: Scientific inquiry is a multifaceted activity; The processes of science include the formulation of scientifically investigable questions, construction of investigations into those questions, the collection of appropriate data, the evaluation of the meaning of those data, and the communication of this evaluation. **B: The processes of science frequently do not correspond to the traditional portrayal of "the scientific method."** **C: Scientific argumentation is a necessary part of scientific inquiry and plays an important role in the generation and validation of scientific knowledge.** **D: Scientific knowledge is based on observation and inference; it is important to recognize that these are very different things. Not only does science require creativity in its methods and processes, but also in its questions and explanations.**	
BENCHMARK CODE	**BENCHMARK**
SC.K.N.1.1	Collaborate with a partner to collect information. *Cognitive Complexity/Depth of Knowledge Rating:* Low
SC.K.N.1.2	Make observations of the natural world and know that they are descriptors collected using the five senses. *Cognitive Complexity/Depth of Knowledge Rating:* Moderate
SC.K.N.1.3	Keep records as appropriate -- such as pictorial records -- of investigations conducted.

	Cognitive Complexity/Depth of Knowledge Rating: Moderate
SC.K.N.1.4	Observe and create a visual representation of an object which includes its major features. *Cognitive Complexity/Depth of Knowledge Rating:* High
SC.K.N.1.5	Recognize that learning can come from careful observation. *Cognitive Complexity/Depth of Knowledge Rating:* Moderate

Big Idea 5: Earth in Space and Time

Humans continue to explore Earth's place in space. Gravity and energy influence the formation of galaxies, including our own Milky Way Galaxy, stars, the Solar System, and Earth. Humankind's need to explore continues to lead to the development of knowledge and understanding of our Solar System.

BENCHMARK CODE	BENCHMARK
SC.K.E.5.1	Explore the Law of Gravity by investigating how objects are pulled toward the ground unless something holds them up. *Cognitive Complexity/Depth of Knowledge Rating:* Moderate
SC.K.E.5.2	Recognize the repeating pattern of day and night. *Cognitive Complexity/Depth of Knowledge Rating:* Low
SC.K.E.5.3	Recognize that the Sun can only be seen in the daytime. *Cognitive Complexity/Depth of Knowledge Rating:* Low
SC.K.E.5.4	Observe that sometimes the Moon can be seen at night and sometimes during the day. *Cognitive Complexity/Depth of Knowledge Rating:* Moderate
SC.K.E.5.5	Observe that things can be big and things can be small as seen from Earth. *Cognitive Complexity/Depth of Knowledge Rating:* High
SC.K.E.5.6	Observe that some objects are far away and some are nearby as seen from Earth. *Cognitive Complexity/Depth of Knowledge Rating:* High

GRADE: 1

Big Idea 1: The Practice of Science

A: Scientific inquiry is a multifaceted activity; The processes of science include the formulation of scientifically investigable questions, construction of investigations into those questions, the collection of appropriate data, the evaluation of the meaning of those data, and the communication of this evaluation.

B: The processes of science frequently do not correspond to the traditional portrayal of "the scientific method."

C: Scientific argumentation is a necessary part of scientific inquiry and plays an important role in the generation and validation of scientific knowledge.	
D: Scientific knowledge is based on observation and inference; it is important to recognize that these are very different things. Not only does science require creativity in its methods and processes, but also in its questions and explanations.	
BENCHMARK CODE	**BENCHMARK**
SC.1.N.1.1	Raise questions about the natural world, investigate them in teams through free exploration, and generate appropriate explanations based on those explorations. *Cognitive Complexity/Depth of Knowledge Rating:* High
SC.1.N.1.2	Using the five senses as tools, make careful observations, describe objects in terms of number, shape, texture, size, weight, color, and motion, and compare their observations with others. *Cognitive Complexity/Depth of Knowledge Rating:* Moderate
SC.1.N.1.3	Keep records as appropriate - such as pictorial and written records - of investigations conducted. *Cognitive Complexity/Depth of Knowledge Rating:* Moderate
SC.1.N.1.4	Ask "how do you know?" in appropriate situations. *Cognitive Complexity/Depth of Knowledge Rating:* Moderate

GRADE: 5

Big Idea 1: The Practice of Science **A: Scientific inquiry is a multifaceted activity; The processes of science include the formulation of scientifically investigable questions, construction of investigations into those questions, the collection of appropriate data, the evaluation of the meaning of those data, and the communication of this evaluation.** **B: The processes of science frequently do not correspond to the traditional portrayal of "the scientific method."** **C: Scientific argumentation is a necessary part of scientific inquiry and plays an important role in the generation and validation of scientific knowledge.** **D: Scientific knowledge is based on observation and inference; it is important to recognize that these are very different things. Not only does science require creativity in its methods and processes, but also in its questions and explanations.**	
BENCHMARK CODE	**BENCHMARK**
SC.5.N.1.1	Define a problem, use appropriate reference materials to support scientific understanding, plan and carry out scientific investigations of various types such as: systematic observations, experiments requiring the identification of variables, collecting and organizing data, interpreting data in charts, tables, and graphics, analyze information, make predictions, and defend conclusions. *Cognitive Complexity/Depth of Knowledge Rating:* High
SC.5.N.1.2	Explain the difference between an experiment and other types of scientific investigation. *Cognitive Complexity/Depth of Knowledge Rating:* Moderate

SC.5.N.1.3	Recognize and explain the need for repeated experimental trials. _Cognitive Complexity/Depth of Knowledge Rating:_ Moderate
SC.5.N.1.4	Identify a control group and explain its importance in an experiment. _Cognitive Complexity/Depth of Knowledge Rating:_ Moderate
SC.5.N.1.5	Recognize and explain that authentic scientific investigation frequently does not parallel the steps of "the scientific method." _Cognitive Complexity/Depth of Knowledge Rating:_ Moderate
SC.5.N.1.6	Recognize and explain the difference between personal opinion/interpretation and verified observation. _Cognitive Complexity/Depth of Knowledge Rating:_ Moderate

Big Idea 2: The Characteristics of Scientific Knowledge

A: Scientific knowledge is based on empirical evidence, and is appropriate for understanding the natural world, but it provides only a limited understanding of the supernatural, aesthetic, or other ways of knowing, such as art, philosophy, or religion.

B: Scientific knowledge is durable and robust, but open to change.

C: Because science is based on empirical evidence it strives for objectivity, but as it is a human endeavor the processes, methods, and knowledge of science include subjectivity, as well as creativity and discovery.

BENCHMARK CODE	BENCHMARK
SC.5.N.2.1	Recognize and explain that science is grounded in empirical observations that are testable; explanation must always be linked with evidence. _Cognitive Complexity/Depth of Knowledge Rating:_ Moderate
SC.5.N.2.2	Recognize and explain that when scientific investigations are carried out, the evidence produced by those investigations should be replicable by others. _Cognitive Complexity/Depth of Knowledge Rating:_ Moderate

Big Idea 5: Earth in Space and Time

Humans continue to explore Earth's place in space. Gravity and energy influence the formation of galaxies, including our own Milky Way Galaxy, stars, the Solar System, and Earth. Humankind's need to explore continues to lead to the development of knowledge and understanding of our Solar System.

BENCHMARK CODE	BENCHMARK
SC.5.E.5.1	Recognize that a galaxy consists of gas, dust, and many stars, including any objects orbiting the stars. Identify our home galaxy as the Milky Way. _Cognitive Complexity/Depth of Knowledge Rating:_ Low
SC.5.E.5.2	Recognize the major common characteristics of all planets and compare/contrast the properties of inner and outer planets. _Cognitive Complexity/Depth of Knowledge Rating:_ Moderate
SC.5.E.5.3	Distinguish among the following objects of the Solar System -- Sun, planets, moons, asteroids, comets -- and identify Earth's position in it. _Cognitive Complexity/Depth of Knowledge Rating:_ High

Big Idea 7: Earth Systems and Patterns

Humans continue to explore the interactions among water, air, and land. Air and water are in constant motion that results in changing conditions that can be observed over time.

BENCHMARK CODE	BENCHMARK
SC.5.E.7.1	Create a model to explain the parts of the water cycle. Water can be a gas, a liquid, or a solid and can go back and forth from one state to another. *Cognitive Complexity/Depth of Knowledge Rating:* High
SC.5.E.7.2	Recognize that the ocean is an integral part of the water cycle and is connected to all of Earth's water reservoirs via evaporation and precipitation processes. *Cognitive Complexity/Depth of Knowledge Rating:* Moderate
SC.5.E.7.3	Recognize how air temperature, barometric pressure, humidity, wind speed and direction, and precipitation determine the weather in a particular place and time. *Cognitive Complexity/Depth of Knowledge Rating:* Moderate
SC.5.E.7.4	Distinguish among the various forms of precipitation (rain, snow, sleet, and hail), making connections to the weather in a particular place and time. *Cognitive Complexity/Depth of Knowledge Rating:* High
SC.5.E.7.5	Recognize that some of the weather-related differences, such as temperature and humidity, are found among different environments, such as swamps, deserts, and mountains. *Cognitive Complexity/Depth of Knowledge Rating:* Moderate
SC.5.E.7.6	Describe characteristics (temperature and precipitation) of different climate zones as they relate to latitude, elevation, and proximity to bodies of water. *Cognitive Complexity/Depth of Knowledge Rating:* High
SC.5.E.7.7	Design a family preparedness plan for natural disasters and identify the reasons for having such a plan. *Cognitive Complexity/Depth of Knowledge Rating:* Moderate

GRADE: 6

Big Idea 1: The Practice of Science

A: Scientific inquiry is a multifaceted activity; The processes of science include the formulation of scientifically investigable questions, construction of investigations into those questions, the collection of appropriate data, the evaluation of the meaning of those data, and the communication of this evaluation.

B: The processes of science frequently do not correspond to the traditional portrayal of "the scientific method."

C: Scientific argumentation is a necessary part of scientific inquiry and plays an

important role in the generation and validation of scientific knowledge.

D: Scientific knowledge is based on observation and inference; it is important to recognize that these are very different things. Not only does science require creativity in its methods and processes, but also in its questions and explanations.

BENCHMARK CODE	BENCHMARK
SC.6.N.1.1	Define a problem from the sixth grade curriculum, use appropriate reference materials to support scientific understanding, plan and carry out scientific investigation of various types, such as systematic observations or experiments, identify variables, collect and organize data, interpret data in charts, tables, and graphics, analyze information, make predictions, and defend conclusions. *Cognitive Complexity/Depth of Knowledge Rating:* High
SC.6.N.1.2	Explain why scientific investigations should be replicable. *Cognitive Complexity/Depth of Knowledge Rating:* High
SC.6.N.1.3	Explain the difference between an experiment and other types of scientific investigation, and explain the relative benefits and limitations of each. *Cognitive Complexity/Depth of Knowledge Rating:* High
SC.6.N.1.4	Discuss, compare, and negotiate methods used, results obtained, and explanations among groups of students conducting the same investigation. *Cognitive Complexity/Depth of Knowledge Rating:* High
SC.6.N.1.5	Recognize that science involves creativity, not just in designing experiments, but also in creating explanations that fit evidence. *Cognitive Complexity/Depth of Knowledge Rating:* Moderate

Big Idea 2: The Characteristics of Scientific Knowledge

A: Scientific knowledge is based on empirical evidence, and is appropriate for understanding the natural world, but it provides only a limited understanding of the supernatural, aesthetic, or other ways of knowing, such as art, philosophy, or religion.

B: Scientific knowledge is durable and robust, but open to change.

C: Because science is based on empirical evidence it strives for objectivity, but as it is a human endeavor the processes, methods, and knowledge of science include subjectivity, as well as creativity and discovery.

BENCHMARK CODE	BENCHMARK
SC.6.N.2.1	Distinguish science from other activities involving thought. *Cognitive Complexity/Depth of Knowledge Rating:* Moderate
SC.6.N.2.2	Explain that scientific knowledge is durable because it is open to change as new evidence or interpretations are encountered. *Cognitive Complexity/Depth of Knowledge Rating:* Moderate
SC.6.N.2.3	Recognize that scientists who make contributions to scientific knowledge come from all kinds of backgrounds and possess varied talents, interests, and goals. *Cognitive Complexity/Depth of Knowledge Rating:* Low

Big Idea 3: The Role of Theories, Laws, Hypotheses, and Models

The terms that describe examples of scientific knowledge, for example; "theory," "law," "hypothesis," and "model" have very specific meanings and functions within science.	
BENCHMARK CODE	BENCHMARK
SC.6.N.3.1	Recognize and explain that a scientific theory is a well-supported and widely accepted explanation of nature and is not simply a claim posed by an individual. Thus, the use of the term theory in science is very different than how it is used in everyday life. *Cognitive Complexity/Depth of Knowledge Rating:* Moderate
SC.6.N.3.2	Recognize and explain that a scientific law is a description of a specific relationship under given conditions in the natural world. Thus, scientific laws are different from societal laws. *Cognitive Complexity/Depth of Knowledge Rating:* Moderate
SC.6.N.3.3	Give several examples of scientific laws. *Cognitive Complexity/Depth of Knowledge Rating:* Low
SC.6.N.3.4	Identify the role of models in the context of the sixth grade science benchmarks. *Cognitive Complexity/Depth of Knowledge Rating:* Moderate

GRADE: 8

Big Idea 1: The Practice of Science A: Scientific inquiry is a multifaceted activity; The processes of science include the formulation of scientifically investigable questions, construction of investigations into those questions, the collection of appropriate data, the evaluation of the meaning of those data, and the communication of this evaluation. B: The processes of science frequently do not correspond to the traditional portrayal of "the scientific method." C: Scientific argumentation is a necessary part of scientific inquiry and plays an important role in the generation and validation of scientific knowledge. D: Scientific knowledge is based on observation and inference; it is important to recognize that these are very different things. Not only does science require creativity in its methods and processes, but also in its questions and explanations.	
BENCHMARK CODE	BENCHMARK
SC.8.N.1.1	Define a problem from the eighth grade curriculum using appropriate reference materials to support scientific understanding, plan and carry out scientific investigations of various types, such as systematic observations or experiments, identify variables, collect and organize data, interpret data in charts, tables, and graphics, analyze information, make predictions, and defend conclusions. *Cognitive Complexity/Depth of Knowledge Rating:* High
SC.8.N.1.2	Design and conduct a study using repeated trials and replication. *Cognitive Complexity/Depth of Knowledge Rating:* High
SC.8.N.1.3	Use phrases such as "results support" or "fail to support" in science, understanding that science does not offer conclusive 'proof' of a knowledge claim. *Cognitive Complexity/Depth of Knowledge Rating:* Moderate
SC.8.N.1.4	Explain how hypotheses are valuable if they lead to further investigations, even if they

		turn out not to be supported by the data. *Cognitive Complexity/Depth of Knowledge Rating:* High
SC.8.N.1.5		Analyze the methods used to develop a scientific explanation as seen in different fields of science. *Cognitive Complexity/Depth of Knowledge Rating:* High
SC.8.N.1.6		Understand that scientific investigations involve the collection of relevant empirical evidence, the use of logical reasoning, and the application of imagination in devising hypotheses, predictions, explanations and models to make sense of the collected evidence. *Cognitive Complexity/Depth of Knowledge Rating:* Moderate

Appendix G - School Disaster Planning

Discovery Education Services Inc.
Business Disaster Plan

As residents of Florida, we may not be able to prevent disasters from occurring, but by planning ahead we can help save lives, property, and reduce the time it takes for our communities to recover.

Included in This Disaster Plan is important information about:

 • Disaster Supply Kit and Checklist

 • Property Protection Checklist

 • Business Recovery Checklist

 • Emergency Management contacts for Broward County and the State of Florida

15.1. School Information

        Discovery Education Services, Inc.
        ADDRESS OF The School
        Broward County

15.2. Disaster Supply Kit and Checklist

Each individual and business must take responsibility for their own safety and well-being in the aftermath of a major disaster. After a disaster, emergency workers may not be able to reach everyone right away. In some cases it may take three or more days for help to arrive. As a precaution, it is recommended that you have a Disaster Supply Kit prepared before a disaster

strikes. The Disaster Supplies Kit should include items that will be sufficient for you and your employees to survive without assistance for at least a three (3) day period following a disaster.

Please use Table 9 of recommended items, and plan to remain self-sufficient until assistance can be provided to your location.

Table 4 - Disaster supply kit and checklist

	Your Business Disaster Plan
	Important Records and Resources stored in a water proof container
	Battery operated radio or television
	Non-perishable three day food supply for you and your employees
	Three day water supply for you and your employees (One gallon of water per person, per day)
	Coolers and containers for water and washing
	Blankets, pillows, cots, and chairs
	First Aid Kit including medicines, prescriptions, and first aid manual
	Flashlights, batteries, light-sticks
	Extra batteries for flashlights, radios, and televisions
	Tool kit (basic tools, gloves, etc.)
	NOAA weather radios with batteries
	Camera and film for documenting damages
	Whistle/signal flare to signal for help
	Tarps, plastic bags, duct tape
	Cleaning supplies, including mops, towels and garbage cans
	Smoke alarms and fire extinguishers
	Electric generator
	Gas for vehicles, generators and other equipment
	Cash, ATM cards, credit cards proper identification

15.3. Property Protection Checklist

With planning ahead, buildings, equipment and other business property can be protected from damages during disaster. Steps must be taken prior to an event to repair and strengthen structures and to relocate or brace equipment and other property. Small proactive measures can result in sparing your business tremendous amounts of damage in case of a disaster.

Please use Table 10 - Property protection checklist as a guide to prepare and protect your property.

Table 5 - Property protection checklist

	Protect your windows and doors against wind-borne debris by installing a shutter system or attaching plywood.
	Evaluate your roof system to make sure it can weather a storm.

	Remove overhanging trees and branches which could fall and damage structures.
	Protect exposed areas from water damages with tarps, plastic sheeting and duct tape.
	Sandbag areas that might potentially flood.
	Anchor and brace tall bookcases, filing cabinets, shelves, and racks to the wall studs to keep them from falling.
	Relocate valuable equipment and fragile items to safer locations.
	Secure all appropriate items including water heaters, gas tanks, heaters and other utilities, and when appropriate, raise them to higher locations to avoid water damages.
	Secure computers and other office equipment to desks, tables or countertops with straps, velcro or similar materials.
	Shut off your utilities (electricity and/or water)
	Update all gas appliances with flexible connections and/or breakaway gas shut-off devices.

15.4. Business Recovery Checklist

Following a disaster, it is necessary to begin the hard work of rebuilding as soon as possible. Each business will be impacted differently and will have to respond appropriately to continue short-term business operations while working towards long-term recovery. Using the information and resources identified within your Business Disaster Plan, your business will be better prepared to start the recovery process and resume your regular business operation. After ensuring the safety of family, co-workers, and office facilities, certain steps can be taken that simplify and accelerate the recovery
process.

Please use Table 11 - Business recovery checklist as a guide to begin the process of repairing your business.

Table 6 - Business recovery checklist

	Assess any damages to your business or property and document the damages
	Report any losses to you insurance company as soon as possible
	Repair and clean buildings and reorganize offices
	Prioritize the critical business functions and allocate necessary resources
	Continue the long-term recovery and returning to normal business operations
	Update your Business Disaster Plan and take appropriate actions to mitigate future Losses

Appendix H - Resumes/CVs of the Governing Board Members

SIRIN COSKUN   10600 Bloomfield Drive Apt#1825   (407)350-8415
                                Orlando, FL 32825   sirincoskun@gmail.com

Education:
University Of Central Florida   Orlando, FL, Ph.D in Mathematics Education, 2010-August (expected time)   GPA: 3,9
Bogazici University , Istanbul, Turkey   Integrated BS&MS Program in Teaching   Mathematics, 2007-June GPA: 3.00

Experience:
Volunteer Teaching in Colonial High School (2008/October-Still Continuing)
Advisor of Social Science Education Majors at University of Central Florida (2007-2008)
Observation of pre-service teachers content knowledge courses at University of Central Florida 2007-2008
Internship in İstanbul Erol Altaca Private High School (2006)
Part time jobs: Interpreter in CNR-Expo Internatioanal Organisation for the SDC   instutition
Observation in 5 Different Ohio School Districts 2005
Internship in Istanbul Kadıköy High School, February-June, 2005

Presentations :
Haciomeroglu E., Coskun S. (2008, October). *Dynamic Linking of Multiple Representations with Geogebra*. Presented at FCTM in Jacksonville, FL
Andreasen J., Haciomeroglu E., Akyuz D., Coskun S., Cristwell P. and Schaefer P.(2008 September). *Teacher Training Multiple Environments: Microteach versus Virtual.* Presented at FATE-2008 Orlando, FL
Kahveci, M. , Coskun, S. and Taylan, D. (2008, July). *Students' Motivation to Use Technology for learning*. Presented at Ed-Media 2008 in Vienna, Austria

Attended conferences:
Florida Council of Teachers of Mathematics (2008, Jacksonville, FL)
Florida Association of Teacher Educators (2008,Orlando,FL)
ED-MEDIA 2008 (2008, Vienna, Austria)
National Council of Teachers of Mathematics (2008, Salt Lake City, UT)
Florida Council of Teachers of Mathematics (2007, Orlando, FL)
The Ohio Council of Teacher of Mathematics (2005, Dayton, OH)
Mathematical Activities (2004, Ankara, Turkey)

Certification and Skills:
Graduate Assistant Training Certification (2008, University of Central Florida)

Proficient in Windows, Microsoft Office, Dreamweaver, SPSS

Proficient in Turkish (Native Language)

References:
Available upon request.

              Orlando, FL 32804

EMPLOYMENT

August 08 - Present	**Executive Director: O**rlando Science Schools, Orlando, FL
August 06 – July 08	**Director:** Sweetwater Education, Inc. Miami, FL
Jan. 04 – July 06	**Postdoctoral Research Associate:** Florida State University, Department of Physics/Center for Nanomagnetics and Biotechnology, Tallahassee, FL 32310. Magnetic Nanoparticles, Bio nanomagnetic Materials
Sept. 00 – Dec. 03	**Graduate Research Assistant:** The University of Florida, Department of Materials Science & Eng., Gainesville, FL 32611. Electronic Materials, Epitaxial Growth of Multilayer Structures, Oxide Thin Films, Electrical Insulation Coatings by Sol-Gel Process
Jan. 97 – Aug. 00	**Graduate Research Assistant:** The University of Florida, Department of Materials Science & Eng., Gainesville, FL Electronic Materials, Pulsed Laser Ablation, Thin & Thick Oxide Films, Microbatteries, Sol-Gel Process,
June 95 – July 96	**Graduate Research Assistant:** Nigde University, Nigde, Turkey Surface Science and Chemistry, Mineral & Materials Engineering

EDUCATION

Jan. 99 – Dec. 03	**Ph.D.** in Materials Science & Eng., Electronic Materials Specialty, The University of Florida, Gainesville, FL 32611 **Development of Buffer Layers by Chemical Solution Deposition for YBCO Coated Conductors**
Jan. 97 - Dec. 98	**MS.** in Materials Science & Eng., Electronic Materials Specialty, The University of Florida, Gainesville, FL 32611 **Processing of Thin Film Microbatteries by Pulsed Laser Ablation**
Sept. 89 - July 93	**BS.** in Mineral & Materials Engineering, Dokuz Eylul University, Izmir, Turkey

ADMINISTRATIVE / TEACHING EXPERIENCE & INTEREST

- **Director**, Sweetwater Education Inc., Miami, FL
- **Thought science to K-12 teachers under the Research Experiences for Teachers (RET)** program funded by the National Science Foundation in the Center for Integrating Research and Learning (CIRL), National High Magnetic Field Laboratory (NHMFL), Tallahassee, FL.
- **Thought science 9-12 grade students under the Research Experience for High School Students** Program in the CIRL, National High Magnetic Field Laboratory (NHMFL), Tallahassee, FL
- Thought science to undergraduate students in Particle Engineering Research Center

at the University of Florida

- Participated National Science and Technology Week, Ask a Scientist or Engineer Program organized National Science Foundation. Ask a Scientist or Engineer Program, was organized especially for middle and high school students

RESEARCH EXPERIENCE & INTEREST

- Processing and Characterization of Magnetic Nanoparticles for Biological Applications
- Biocompatible Magnetic Nanoparticles
- Chemical Solution Synthesis of Nanoparticles and Thin Films
- Processing & Characterization of Oxide and Metallic Thin Films by UHV Sputtering and Laser Deposition
- Magnetic Thin Films
- Texture Analysis of Thin Films
- Processing of Thin Film Microbatteries by Pulsed Laser Deposition
- Electrical Insulation Coatings & Characterizations by Sol-Gel Process
- In-Situ Phase Transformation & Analysis by OIM & Hot stage ESEM

ANALYTICAL SKILLS

Nano Science & Thin Film Processing
- Chemical Solution Techniques for Processing of Nanoparticles & Thin Film
- Sol-Gel Processing
- UHV RF Sputtering
- Pulsed Laser Deposition (PLD)

Thin Film Characterization
- Scanning Electron Microscope, JSM 35CF, JSM 6400
- Environmental Scanning Electron Microscope, ESEM E-3
- Orientation Imaging Microscope, TSL OIM 2.6
- X-Ray Diffractometer with texture attachment X'Pert MRD 3040, Scintag Diffractometer
- Transmission Electron Microscope, JEOL 200CX,
- Energy Dispersive Spectroscopy, PGT
- Scanning Auger Electron Spectroscope, PHI 660
- X-Ray Photoelectron Spectroscope, PHI 5100
- Optical Microscope, REICHERT MEF4M

Handling of Oxygen & Moisture Sensitive Materials
- Clean Room & Glove Box Experience

Metallography & Sample Prep.
- RotoPol-21, PotoPol-2 Abrapol-2, Vibratory Polisher, Accutom-5 (Struers)
- Simplimet, Vibromet, (Buehler)
- Fischione 3000 Ion Milling
- Gatan Dimpling Grinding

COMPUTER SKILLS

- Windows Pro. & NT, MS DOS,
- MS Office (Word, Excel, Power Point, FrontPage), MS Visual Studio, Corel Suits, Origin 5.0 Pro., Photoshop, 6.0.
- IMIX, popLA, X'Pert Organizer, PC-Texture, WinFit, PowderCell, WinCell, WinPloter, OIM 2.6,

ATTENDED CONFERENCES

Applied Superconductivity Conference 2004, in Houston TX, Aug. 4-9, 2002.

Cryogenic Engineering and International Cryogenic Materials Conference in Anchorage, AK, September 22-26, 2003.

The 9th International Workshop on Oxide Electronics in St. Petersburg, FL, Oct. 20-23, 2002.

Applied Superconductivity Conference 2002, in Houston TX, Aug. 4-9, 2002.

Cryogenic Engineering and International Cryogenic Materials Conference in Madison WI, July 16-20, 2001.

Applied Superconductivity Conference 2000, in Virginia Beach, VA, Sept. 17-22, 2000.

Magnet Science and Technology Conference (MT 16) in Jacksonville, FL, Sept. 26 – Oct. 2, 1999.

EDITORIAL SERVICES

Technical Paper Reviewer for Medical Science Monitor

Technical Paper Reviewer for IEEE Transaction on Applied Superconductivity

Technical Paper Reviewer for IEEE Transactions on Electronics Packaging Manufacturing

Technical Paper Reviewer for Surface and Coatings Technology

ACADEMIC AWARDS & SCOLARSHIPS

Ranked 1st in the Nationwide Graduate Research Assistantship Exam in Materials Science and Minerals Processing Field by the Higher Education Council of Turkey, 1995.

Scholarship from Higher Education Council of Turkey for Master of Science in Materials Science & Engineering, 1995.

Scholarship from Izmir Metropolitan Municipality, Izmir, Turkey 1984 – 1987.

ACTIVITIES

Member of Materials Research Society (MRS)

Member of IEEE

Participated National Science Foundation (NSF) Global Science & Technology Week "Ask A Scientist & Engineer" April 28 – May 4 2002.

DAVID CANORA

1150 English Garden Ln Winter Garden, FL 34787

voice 407-385-0385   email dcanora@gmail.com

www.linkedin.com/in/dcanora

Profile

Innovator with a business mindset who excels at uncovering hidden opportunities and devising elegantly simple solutions to complex problems. Strategic thinker able to make valuable contributions across the business, technical and creative spectrum in ways that drive business results.

Accomplishments

Original member of the 8-person Next Generation Guest Experience Core Team that re-imagined the end-to- end theme park guest experience and launched one of the largest non-construction investments in Disney Parks history. This program will have a broad and profound impact on Disney Parks and the entire theme park industry. Contributions touch all aspects of the guest experience - before, during and after their vacation. See http://bit.ly/DisneyNextGen for early public comments from Disney.

Building upon the that foundational Core Team work, developed the base business, creative and technical vision for a still confidential next generation guest media experience. Responsible for leading teams to design, develop and deliver innovative new technologies to manage media capture, transport, storage and delivery.

As the leader of Disney's Strategic Business Initiatives for New Technology, managed and led a team responsible for developing innovative new concepts to improve guest service, increase revenue and drive cost savings for Disney Parks & Resorts worldwide. Examples include Disney Cruise Line's innovative 3D Theater and large-scale audience interactive Pirate's experience.

Instrumental in a broad range of Disney initiatives across multiple lines of business, including mobile computing, new media, social networking, applications of RFID, multi-touch

interfaces, 3D capture & display, and large-scale interactive experiences. Multiple patents pending. For currently published applications, see http://bit.ly/PatApps.

As a founding member of Disney's PhotoPass team reinvented the theme park photography business from the ground up, improving guest service and more than doubling revenue. Contributed to the business model, and drove consensus on how technology could drive business results. As chief technologist, developed the overall technology vision and architecture for Disney's PhotoPass core systems, Roving Photography system, on-site fulfillment system, DisneyPhotoPass.com website and digital production system.

Chief Architect on a project for IBM that combined a project management tool with Lotus Notes to standardize and automate IBM's product development methodology to increase productivity and better manage large projects. This workbench automatically drives project plans by notifying users of assigned tasks and tracking progress. It also provides a repository for project deliverables. Led a worldwide team of IBM architects, driving consensus and delivering results in a politically charged environment.

Managed the successful delivery of the first XML Toolkit for IBM's z/OS, opening the mainframe platform to this now-ubiquitous standard. Oversaw development & test of the product, and managed the release process.

As Competitive Analyst, was responsible for positioning IBM Series z among the competition, focusing on the rise of PC-based servers. Evaluated opportunities to partner with companies such as Microsoft. Speaker at education and industry conferences in US and Europe.

Launched new Emerging Technologies department at Woolworth corporate headquarters. Accomplishments include working with retail industry researchers to create a "new store modeler" which predicted financial performance to maximize the return on investment in new FootLocker stores.

Employment

Experience

(8/2013-Present) Principal (Orlando Science Elementary School, Orlando, FL)

Provided leadership and management to a team of professionals including instructors and support staff. Responsible for Day-to-day operation of Orlando Science Elementary School.

(8/2010-7/2013) Assistant Principal (Orlando Science Schools, Orlando, FL)

Provided leadership and management to a team of professionals including instructors and support staff. Oversaw a student body of approximately 750 learners of various socio-economical backgrounds and learning levels. Devised and coordinated scheduling structure for daily procedures and daily staff responsibilities. Coordinated and implemented the school's safety plans and procedures. Developed and implemented a school wide character development program based upon our students needs. Participated in establishing school wide goals for behavior and learning. Supervised and communicated with the staff for effectiveness and conducted trainings to improve performance. Coordinating school wide assemblies, performances, and extracurricular events.

(8/2008-7/2010) Social Studies Teacher (Orlando Science Schools, Orlando, FL)

Developed students' academic skills through challenging academic courses, while implementing district approved curriculum. Documented teaching and student progress/activities/outcomes. Addressed specific educational needs of students of individual students. Provided a safe and optimal learning environment. Provided feedback to students, parents and administration regarding student progress, expectations, and goals. Taught sixth and seventh grade geography, according to state standards; led geography, art, and drama clubs. Coordinated the National Geographic Spelling Bee and trained students at the state level.

(8/2004-5/2007) Social Studies Teacher (Escambia County, Pensacola, FL)

Taught sixth grade geography, reading, and research. Assigned to the Wellness Coordinator position for the school. Worked with history fair and selected as a history fair county judge by the department chair of the school and county department head. Persistently involved in various extracurricular activities.

(1/2001-10/2003) Supervisor (Metro Districts, Highlands Ranch, CO)

Supervised various sports fields, coaches, players, spectators, and recreational employees. Worked as a liaison to the Recreation Coordinator, for team managers, players, and recreational staff. Provided guidance and support for recreational rules and procedures.

(1/2001-12/2003) Research Assistant (University of Colorado, Denver, CO)

Created and managed spreadsheets that contained data to be inserted in GIS software. Wrote reports for the faculty that summarized my research.

(1/1998-12/2000) Counselor (City of Pensacola Parks and Recreation, Pensacola, FL)

Education

University of West Florida, Interdisciplinary Humanities (History and Philosophy), M.A. 2008

University of Colorado, Geography/Sociology, B.A. 2004

Certification

Florida Educators Certificate, Pre-K Primary Education, Social Science 6-12

Mr. Ersan Songur:

Mr. Songur is the board member. He ensures financial responsibility of the Board and oversees financial health of the school. Mr. Songur assists the principal to compile and present financial reports at the Board meetings along with his recommendations on a monthly basis. Mr. Songur is the President & CEO of Songur International Inc. He earned his second degree in Business and Hotel Administration from the University of Nevada, Las Vegas. After graduation, he was recruited by internationally renowned hotel companies, working in different cities around the world. He moved to Orlando, Florida in 2001 and decided to begin a new career in real estate. To prepare, Mr. Songur learned about the booming real estate market in Central Florida, and earned the designations of Accredited Buyer Representative (ABR), Graduate REALTOR® Institute (GRI), and Certified International Property Specialist (CIPS) . He is regarded as a knowledgeable and respected REALTOR® by many builders in Central Florida, especially in downtown Orlando. Mr. Songur has become a top producer in residential and commercial real estate and handles transactions for international investors. He is licensed as a Florida Mortgage Broker to exceed his customer's expectations.
