Proposers are cautioned to read this section carefully and respond with full complete information that will assist the Evaluation Committee in evaluating proposal submitted. Proposers are requested to respond in the format and organizational structure stated and to refrain from including promotional or advertisement materials in their proposal. The maximum allowable points (See Section 4.0) that will be awarded for each section are stated. Failure to respond or incomplete responses to any evaluation criteria below will result in zero or reduced allocation of points for the criteria and may result in disqualification of entire proposal.

3.3.1 Experience and Qualifications of the Proposer (35 maximum points allowed)

3.3.1.1 Proposer is to provide a list and detailed description of five completed projects similar in scope to SBBC demonstrating proposer's knowledge of Florida public school financing and knowledge and experience in developing student generation rate/impact fee studies.

3.3.1.2 Proposer is to provide a narrative demonstrating familiarity of the legal basis for impact fees, to include reference to county decisions, Florida State Statutes and Municipal Codes for one of the projects submitted in Section 3.3.1.1.

3.3.1.3 Proposer is to provide profile documentation for each project team member(s) who will be assigned to SBBC. Documentation should include resumes that verify that team member possesses the qualifications to prepare student generation rate/impact fee studies.

3.3.1.4 Provide a statement of any litigation or regulatory action that has been filed against your firm(s) in the last three years. If an action has been filed, state and describe the litigation or regulatory action filed, and identify the court or agency before which the action was instituted, the applicable case or file number, and the status or disposition for such reported action. If no litigation or regulatory action has been filed against your firm(s), provide a statement to that effect. For joint venture or team proposers, submit the requested information for each member of the joint venture or team.

3.3.2 Scope of Services Provided – (Maximum 30 allowable points): Describe, in detail, the methodology the proposer will use to accomplish each of the following Scope of Services provided below.

3.3.2.1 Proposer is to provide a detailed narrative on how proposer will utilize the stated methodology to create student generation rates utilizing residential development and student address data to determine public school student generation rates by number of bedrooms for the following unit types. Total rates must be disaggregated by elementary, middle and high school and unit types as follows:

- Single family
- Townhouse/Villa/Duplex
- Garden apartments (redefine to include information concerning number of floors)
- Mid-Rise (redefine to include information concerning number of floors)
- High Rise (redefine to include information concerning number of floors)
- Mobile home

3.0 INFORMATION TO BE INCLUDED IN THE SUBMITTED PROPOSAL (Continued)

- 3.3.2.2 Proposer is to describe the relationship between the data used to generate the study and the resulting student generation rates.
- 3.3.2.3 Proposer is to provide a detailed narrative of how definitions for each of the above unit types will be developed, for example, using an American Planning Association Publication as a source.
- 3.3.2.4 Proposer is to provide a detailed narrative of how mixed use projects within the framework of a structure that contains both residential and non-residential principal uses will be defined. Additionally, describe how mixed use projects in Broward County and similar jurisdictions within the United States with associated student generation rates will be identified.
- 3.3.2.5 Provide detailed narrative on the methodology on how proposer will revise and update the financial tables (3-5, 9-20, Appendix C) included in Attachment C, "A Study of Broward County School Impact Fees Update, April 1997 – Final" to reflect, as appropriate, 1998-2004 fiscal years.
- 3.3.2.6 Proposer is to prepare and submit a timeline that will include the schedule of delivery for each deliverable listed in Attachment B. When preparing the timeline, proposer should consider an anticipated start date for the project of approximately October 2004 or after Board approval. The timeframe for the completion of the project should not exceed one year.
- 3.3.2.7 Proposer is to provide the delivery dates for each deliverable included in Attachment B and the approximate date for the Student Generation Rate/School Impact Fee study to be adopted by the Broward County Commission.

3.3.3 Cost of Services (Maximum 25 Allowable Points):

Proposer is to delineate and state the cost to provide each deliverable listed in Attachment B and provide the all-inclusive cost to furnish the services stated within the RFP, which includes, but is not limited to, cost to prepare and present the Student Generation Rate/School Impact Fee Study, Phase II. Additionally, provide the firm fixed hourly rate by job title of staff members who will be providing services stated within the RFP or additional services not included within the RFP. SBBC will not pay any additional out-of-pocket expenses, including printing, associated with this RFP.

Distribution of points will be calculated by dividing the total all-inclusive cost proposal for the entire study by each proposer by the lowest total all-inclusive cost proposal submitted. That percentage will be multiplied by the maximum amount of points allotted for the criteria. For example, Proposer A submits the lowest cost of \$50,000 and Proposer B submits a cost of \$100,000. Therefore, Proposer A would receive 25 points, which is the maximum number of points allotted for the criteria. Proposer B would receive 13 points based on the following $(\$100,000/\$50,000) = 50\% \times 25 \text{ maximum points} = 12.5 \text{ points received}$. Fraction of points will be rounded to the nearest whole point value.

3.3.2 PROPOSED SCOPE OF SERVICES

This portion of the Proposal provides a proposed scope of service for establishing a current Student Generation Rate by household type and bedroom mix; refines definitions of housing units and mixed use projects; updates tables in the 1997 report to include multifamily units; provides updated financial data and tables, provides recommendations of credits; provides an updated school impact fee schedule; documents Study efforts in a written report; incorporates input from the Public and School Board; and, conducts and attend meetings with the School Board and other agencies.

The scope of work is stratified into three (3) major Tasks:

- Develop Student Generation Rate (3.3.2.1 –3.3.2.4);
- Prepare Supporting Financial Data (3.3.2.5); and,
- Meetings and Approvals.

The overall study effort will be legally defensible, provide for maximizing School Board revenue and be timely. The proposed eleven (11) month project schedule (3.3.2.6) with delivery dates (3.3.2.7) is provided on the following page. The schedule will be refined and updated during the progress of the work effort.

Task 1 – Develop Student Generation Rate (3.3.2.1 – 3.3.2.4)

The initial portion of this Task will be to refine Study methodology to ensure the process is legally defensible and consistent with the School Board's RFP desired scope and required deliverables. The anticipated approach is predicated on taking a complete (100%) sampling of new housing units completed between 1998 and 2004 utilizing CO, building permit information, property information and school enrollment data from the Broward County Department of Planning and Environmental Protection, Broward County Property Appraiser and Broward County School Board. Key project team members will present methodology and legal recommendations to the Board staff on these issues.

Definitions will be reviewed and modified, as appropriate, for housing unit categories including: single family; townhouse/villa/duplex; garden apartments (including information on number of floors); mid rise apartments (including information on number of floors); high rise apartment (including information on number of floors); and, mobile home. Mixed use projects will also be reviewed to determine a standard definition for use in this and subsequent studies. The final selected definitions will consider the suggestions of nationally recognized sources such as the Urban Land Institute, American Planners Association, the Institute of Transportation Engineers, etc.

Utilizing data files on property records, building CO's, student addresses, etc., computer matching efforts will be performed to link addresses to housing unit types, bedrooms and other variables. Quality control efforts will be employed to

verify the applicability of data and to determine when adjustments and refinements may be needed to ensure reliable data matching. Major concerns deal with multifamily units where renter addresses may not be readily available due to the Property Appraisers emphasis towards owner addresses identification. As appropriate, field checks and other sources will be employed to provide proper addresses for matching purposes.

Demographic information will also be collected to identify growth trends, population projections, etc. As appropriate, GIS will be used to review and assess major data items.

Table 1, "Growth in Public School Membership Countywide" will be updated to reflect fiscal years 1998-2004. Tables 2, 6, 7 and 8 will also be updated to reflect multifamily units and reflect fiscal years 1998-2004 associated with student generation rates. Relationships between the data used and the resulting student generation rates will be explained and described. Information on the student generation rates of mixed use projects will be collected locally and nationally.

The end report of this Task is a Student Generation Rate draft report, generally consistent with prior reports. Minor format revisions may be employed if determined to be beneficial. Twenty (20) draft copies of the report will be provided in addition to an Acrobat electronic copy.

Task 2 – Update Supporting Financial Data (3.3.2.5)

A significant portion of the Task 2 effort will be to update prior financial data presented in the 1997 report to current conditions and utilize the results from Task 1 to develop applicable School Impact Fee schedules.

Current information will be collected on millage, PECO, CO&DS, impact fees and other revenue available for school plant facilities and operations. All revenue sources will be documented. Current information will be obtained on land cost, construction costs, state and local credits. As appropriate, recommendations will be provided to revise credit calculations to maximize School Board revenue consistent with defensible legal justification.

Tables 4, 5 and 9 through 20 will be updated to reflect fiscal years 1998 – 2004 in a manner similar to the 1997 report. The end report of this Task is a Student Generation Rate/School Impact Fee Study – Phase II draft report, generally consistent with prior reports. Minor format revisions may be employed if determine to be beneficial.

Task 3 – Meetings and Approvals

This Task provides for Report revisions, on going meetings with Board staff on study progress and formal meetings with the Board and other agencies. The following meetings are proposed: formal presentation to the Board (2 workshops and 1 Board Meeting); a Public Workshop; one meeting with the Broward County
